Sibyll 2.3d
S★($\bar{p}$)
S★(mix)
S★(ρ)
S★($K^{\pm,0}$)
$\theta = 67°$, $E_\mu > 1.5$ GeV
$\langle N_\mu \rangle / \langle N_\mu \rangle_{\text{Sibyll2.3d}}$
$\log_{10}(E_p/\text{eV})$
dN_μ/dE ratio to Sibyll 2.3d
$E_p = 1$ PeV
$E_p = 100$ PeV
$E_p = 10$ EeV
$\log_{10}(E_\mu/\text{GeV})$
