

$$\begin{array}{ccccc}
 \mathcal{M}_f^k(V) & \xleftarrow{c} & V^k & \xrightarrow{f^k} & U^k \\
 & & \downarrow \rho & \downarrow & \downarrow h \\
 & \nearrow c & V^k & \xrightarrow{f^k} & U^k
 \end{array}$$

A commutative diagram illustrating a relationship between mathematical objects. The top row consists of three objects:  $\mathcal{M}_f^k(V)$ ,  $V^k$ , and  $U^k$ . The bottom row consists of two objects:  $V^k$  and  $U^k$ . The objects  $V^k$  in the top and bottom rows are vertically aligned. The arrows are labeled as follows:

- A horizontal arrow labeled  $c$  points from  $V^k$  to  $\mathcal{M}_f^k(V)$ .
- A horizontal arrow labeled  $f^k$  points from  $V^k$  to  $U^k$  in the top row.
- A diagonal arrow labeled  $c$  points from  $V^k$  (bottom) to  $\mathcal{M}_f^k(V)$ .
- A vertical arrow labeled  $\rho$  points from  $V^k$  (top) to  $V^k$  (bottom).
- A horizontal arrow labeled  $f^k$  points from  $V^k$  (bottom) to  $U^k$  (bottom).
- A vertical arrow labeled  $h$  points from  $U^k$  (top) to  $U^k$  (bottom).
- A path consisting of a vertical arrow from  $V^k$  (top) to a horizontal segment, followed by a horizontal arrow to a vertical segment, and finally a vertical arrow to  $U^k$  (top), is shown. This path is parallel to the arrow  $h$ .
