

Diagram illustrating the decomposition of a 3D tensor \mathcal{W} into a sum of rank-1 tensors.

The tensor $\mathcal{W} \in \mathbb{S}^{d^3}$ (green cube) is equal to the sum of terms:

$$\mathcal{W} = \lambda_1 \mathbf{p}_1^{\otimes 3} + \lambda_2 \mathbf{p}_2^{\otimes 3} + \dots$$

where $\mathbf{p}_1^{\otimes 3}$ and $\mathbf{p}_2^{\otimes 3}$ represent the tensor product of three vectors \mathbf{p}_1 and \mathbf{p}_2 (blue rectangular prisms).
