

⚠ Priority is given to enteries according to the order listed.

1) Search by name/s or coordinates

Enter one name or multiple names seperated by commas.

Search by

Star name

HD122563, HE1523-0901

Select range of elements and format

These options specify the elements shown in the plot and table.

Filter by atomic number:

From

0

To

100

Abundances to show

Log(e)

Solar abundances

Asplund 2009

Show table

Plot abund. vs. atomic nu.

2) Search by references

Select references from the table below.

☐ Select/deselect all

☐ Afsar et al. (2016)

☐ Allen et al. (2012)

☐ Andrievsky et al. (2009)

☐ Andrievsky et al. (2010)

☐ Aoki et al. (2001)

☐ Aoki et al. (2002a)

☐ Aoki et al. (2002b)

☐ Fulbright et al. (2004)

☐ Gallagher et al. (2010)

☐ GarciaPerez et al. (2009)

☐ Geisler et al. (2005)

☐ Gilmore et al. (2013)

☐ Hansen et al. (2011)

☐ Hansen et al. (2012)

☐ Hansen et al. (2014)

☐ Norris et al. (2001)

☐ Norris et al. (2002)

☐ Norris et al. (2007)

☐ Norris et al. (2010)

☐ Norris et al. (2012)

☐ Norris et al. (1997)

☐ Norris et al. (1997)

☐ Norris et al. (1997)

3) Search using JINAbase ID's

JINAbase ID for stars to plot

e.g. 7,11,13,17

Enter ID's seperated by a comma. To get the ID's do a search using the options above or from the Query tab.

If you did a search with the above options and have a table shown below, leave this empty to plot all the entries in the table.

Select abundances format from the panel above.

Data to include in output table

Select information to show in the table along with the abundances:

JINAbase data

☐ Select/deselect all

☒ JINAbase ID

☐ JINAbase priority

☒ Reference

☒ Star name

☐ n-capture signatures

☐ CEMP signature

☐ Location

☐ Stellar type

Literature data

☐ Select/deselect all

☐ Teff

☐logg

☐[M/H]

☐ Vmic

Simbad data

☐ Select/deselect all

☐ Simbad Name

☐ RA

☐ DEC

☐ Radial velocity

☐ RV bibcode

☐ U mag

☐ B mag

☐ V mag

☐ R mag

☐ I mag

☐ J mag

☐ H mag

☐ K mag
