Insteon Hub Pro

Control and Manage Insteon Devices and other HomeKit Devices from your iPhone, iPad, and iPod touch with the HomeKit-enabled Insteon Hub and Insteon+ App.

Remote Control

Control Insteon connected lights and appliances alongside HomeKit-compatible products from your iPhone, iPad or iPod touch.

Siri® Control

Control HomeKit-enabled accessories with your voice using Siri on your iPhone, iPad or iPod touch.

Build Scenes

Quickly and easily create scenes that let you control multiple devices simultaneously. Customize advanced features like On Level, too.

Automate with Schedules

Configure a single device to turn on and off at dusk and dawn or create customized groups of devices that turn on and off at various times throughout the day.

Insteon and HomeKit

With Insteon+, you can choose the best automation device for the task; add and control Insteon and HomeKit devices side-by-side. You can even mix and match Insteon and HomeKit devices in scenes and schedules.

Dashboard

Your home is always at your fingertips with Dashboard; see at-a-glance which lights you've left on, if the doors are secure and what the thermostat is doing. Add in your favorite devices and scenes and you might never need to leave.

Be Your Guest

If your friends and family have an iPhone, iPad or iPod touch, they're just an Apple ID away from guest access to your home. Guests can control devices and scenes but can't make changes to your meticulously crafted home configuration.

Icons Galore

Everyone thinks about their homes in a unique way which is why we've created over 500 custom icons. There's something for everyone - even some hidden gems - so you should be able to find the right icon for even the most obscure household knick-knack.

Search for Anything

As your home automation system grows in scope, we've made it easier than ever to find the device, room or zone you're looking for. Just tap search and start typing.

INSTEON®
