COLOSSUS Memo # 205

TO: Distribution  
FROM: N. W. Brodeur  
DATE: August 7, 1969  
SUBJECT: Revision 1 of Artemis

Revision 1 of Artemis was made from Revision 67 of Comanche and was BAD with 3 cusses.

Major changes incorporated into ARTEMIS revision 1.

1. Log section P51-53 was replaced with a new, more compact version which resulted from the coding reduction effort. There are no logic changes involved. This change produced a savings of 105 registers. (ACB 45)
2. Unused constants, coding and routines were deleted. Routines deleted are: XACTALM, XACTO, DMPNSUB, CDU\*NBSM, CDU\*SMNB, CD\*TR\*G, TRG\*SMNB. These deletions produced a savings of 62 registers. (ACB46)
