

Name of Program(s): *Luminary*Originator: *Densmore*Organization: *MIT*Date: *29 OCT 69*

Description of Change:

Provide a tear-out for section 2 GSOP of absolute addresses for the update program.

Adds 12 ECADRS to Bank 34 which had 87 leftover locations. For later

Reason: releases the assembler will be changed to print out an ECADR which doesn't take up a memory location.*

Assigned to:

Dave Densmore

Comments:

Attention: Norm Borden please do same for Coresses.
