

Rye

Name of Program(s): LuminanceOriginator: RyeOrganization: MIT/ILDate: 12/30/69

Description of Change: Create subroutine RLCNSVAC to release VAC area and change a FINDVAC to a NOVAC job. Perform this before putting up cyclic displays at end of guidance.

Reason:

To keep displays in timing and account from being up a VAC area if DSKY is busy because of instrument or calculated work.

Assigned to:

P. 1/2

Comments:

for luminance ID
