---	--

1.5 REASON(S) FOR CHANGE **An inadvertent termination of the descent programs via GOTOPOOH as a result of a V34E response to a flashing display, although very unlikely, would make continuation of the landing impossible.**

1.6 DESCRIPTION OF CHANGE **Ignore the V34E response to V06N64 and V06N60, flashed during P64 and P66 respectively. (Do the same for flashing V06N63 during P63, if the PCR to add that display is approved.)**
