GEORGE SILVER

To: Robert Lones
From: Vince Megna
Subject: Failures Sustained by G&N System 200
Date: 5 October 1970

G&N System 200 has amassed a total operating time of 12,973 hours of operations. During this period of time there have been 6 IRIG failures, 2 PIPA failures, 11 electronic module failures, and 3 mechanical part failures. The operating time of these components at failure are listed in Table I. The failure of two IRIGs due to wheel failure are attributed to the type and severity of testing occurring prior to failure, i.e., excessive gimbal rates.

Approximately 90% of the electronic modules installed in the system at initial turn-on are still operating in the system without any measured degradation in operation. A complete historical record of all modules which have been installed in System 200 is available for reference.

TABLE I

Failure Date	System Hours	Failure			Cause
		Part Type	Serial No.		
5-31-66	427	IRIG	6A23		ADIA Inst.
5-6-67	1387	IRIG	6A25		Wheel out of sync
8-21-67	1136	IRIG	103		Wheel failure
11-22-67	1522	IRIG	7A22		ADIA Inst.
7-18-68	2046	IRIG	7A114		Wheel failure
10-14-69	3982	IRIG	7B146		Gyro Thermistor
9-4-68	7220	PIPA	126		Bubble
3-14-69	2038	PIPA	8P113		Bubble
9-15-66	1869	Binary Cur.	251		Erratic Output
6-9-66	1226	DC Diff Amp	251		Erratic Output
8-1-66	1749	120 VDC P/S	206		Short to Gnd.
8-9-66	521	SCT MDA	203		Short to frame
1-25-67	1256	SHAFT O/A	203		Output failed
11-27-67	2635	Gimbal Ser. Amp.	262		Open Resistor
5-6-68	4114	Trunnion O/A	201		Output failed
6-13-68	6470	Digital Mode	P003		Output failed
7-31-68	2492	Optics Relay Mod.	253		Relay failed
6-5-69	4470	MSA Mod.	260		Broken weld
7-14-70	12,518	Error Counter	251		Output failed
6-1-66	700	Thermostat	A16		Closed at wrong temp.
9-13-67	4897	IMU Blower	3		Shaft worn
1-17-69	8500	Thermostat	-		Test induced failure
