Artificial Life

Artificial Life is the first unifying forum for the dissemination of scientific research in the new field of artificial life. Relevant topics span the hierarchy of biological organization, including studies of the origin of life, self-assembly, growth and development, evolutionary and ecological dynamics, animal and robot behavior, social organization, and cultural evolution.

Artificial Life Online

is a WWW- and ftp-accessible Internet service that provides a variety of information to the artificial life research community: artificial-life-related software, papers, FAQs, discussion forums; and mailing lists.

BLACKWELL Journals **Syntax**

A Journal of Theoretical, Experimental and Interdisciplinary Research

Edited by Samuel Epstein and Suzanne Flynn

Syntax aims to unite related but often disjointedly represented areas of syntactic inquiry together in one publication. Within a single forum *Syntax* accommodates both the explosive growth and increased specialization in the field of syntax.

Syntax contains a reviewed Open Forum section which debates topical questions concerning syntactic research. Varied discussions include historical antecedents of current ideas; methodological, interdisciplinary and philosophical issues confronting contemporary research and ideas; and issues for undergraduate and graduate teaching of interdisciplinary syntax.

Recent and forthcoming highlights:

Now in its eleventh year, *Neural Computation* has established itself as the leading journal for a growing community of scientists interested in exploring the computational principles that make brains tick. Carefully reviewed by a distinguished editorial board, *Neural Computation* publishes short communications, long articles and timely reviews on the interplay between experimental data, computational models, and theoretical analysis at all levels of organization in the brain, from the molecular to the systems levels.

Editors-in-Chief:

C.M. Sperberg-McQueen, University of Illinois at Chicago
B. Tommie Usdin, Mulberry Technologies

“As XML begins to dominate high-end Web applications, developers and users will welcome *Markup Languages* as a place to discuss the theory and practice of markup in general and XML in particular.”

—Pamela Gennusa, President, International SGML Users' Group

The MIT Press is pleased to announce a new journal, *Markup Languages: Theory and Practice*. This quarterly, peer-reviewed technical journal will be the first journal devoted to research, development, and practical applications of text markup for computer processing, management, manipulation, and display. Specific areas of interest include new syntaxes for generic markup languages; refinements to existing markup languages; theory of formal languages as applied to document markup; systems for mark-up; uses of markup for printing, hypertext, electronic display, content analysis, information reuse and repurposing, search and retrieval, and interchange; shared applications of markup languages; and techniques and methodologies for developing markup languages and applications of markup languages.

Forthcoming in Volume 1:

Association for Computational Linguistics
1999 MEMBERSHIP, CHANGE OF ADDRESS AND EMAIL, AND ORDER FORM

MEMBERSHIP

Membership in the Association for Computational Linguistics is for the calendar year, regardless of when dues are paid. Membership includes a full year of the ACL journal, Computational Linguistics, reduced registration at most ACL-sponsored conferences, and discounts on ACL-sponsored publications. Payments for membership dues, fund donations, back issues, and proceedings may be made in Europe or the USA. Follow the instructions under the **PAYMENT** heading carefully.

Provide all personal information, even if you have previously done so, to be sure the ACL membership database is up-to-date. Write legibly, please!

MEMBERSHIP DUES FOR 1999

IMPORTANT NOTE: Renewals must be received no later than 1 April 1999 to avoid late payment fee assessment. Membership categories include Regular Members and the following: Couples with the same mailing address may be Joint Members; they will receive only one set of publications, but each will be eligible for all other member benefits. Students taking a full-time program of courses and not earning a regular income may become Student Members **WITH COPY OF CURRENT STUDENT ID**. Students who are not Student Members because of their income can still participate in student activities as Student-Employed. Also available are Retired and Unemployed memberships. We now offer **MULTI-YEAR MEMBERSHIPS** to Regular and Joint members. Please indicate type of membership you desire below; *if no indication is provided, one-year membership will be presumed* for Regular and Joint. Late payment fee does not apply to new memberships.

Guidelines for Submissions

Manuscripts for **Computational Linguistics** should be submitted on letter-size paper (8.5 by 11 inches, or A4), double-spaced and single-sided throughout, including footnotes and references. The paper should begin with an informative abstract of approximately 150–250 words. Manuscripts must be written in English. Contact the editor regarding the possibility of electronic submission.

Submissions may be made in any of the following categories:

Papers: This category includes contributions that report significant new research results in computational linguistics or that provide critical reviews of the literature on a particular topic. The length of a paper depends on its content, but it is suggested that manuscripts be limited to forty double-spaced pages. That is the equivalent of thirty journal pages. Each paper is fully refereed by three or four experts in the field. Manuscripts may also be submitted electronically; consult <http://www.aclweb.org/cl/submit.txt> for instructions and pointers to the \LaTeX style files. The submission of an article to CL for refereeing means that the author certifies the manuscript is not copyrighted; nor has it been published or submitted for publication to another refereed journal. If any version of the paper has appeared, or will appear, in a non-refereed publication, the details of such publication must be made known to the Editor at the time of submission. The final version of a paper tentatively accepted for publication must be accompanied by a Copyright Transfer Agreement signed by all of the authors or, in the case of a "work for hire," by the employer. This written transfer is necessary under the 1978 U.S. Copyright law.

Letters to the Editor: This category includes statements of opinion on issues relevant to the readership. The Editor and the editorial board will evaluate the appropriateness of these contributions for inclusion.

Five copies of papers or three copies of letters should be sent to:

Julia Hirschberg, CL Editor
AT&T Labs-Research, Room B223
180 Park Avenue
Florham Park, NJ 07932-0971
(+1 973) 360-8330; acl@research.att.com

Squibs and Discussions: This category includes short articles reporting technical results, discussions of results, algorithms, or new computational linguistic data or tools of interest to the journal readership. Submission format is the same as for regular papers, but the length should in no case exceed eight journal pages. Electronic submissions (\LaTeX source, postscript or plain text) are welcome and should be submitted to:

Xerox Research Centre Europe
6, chemin de Maupertuis
38240 Meylan, France
+33 4 76 61 51 98; Pierre.Isabelle@xrce.xerox.com

Book Section: Anyone interested in reviewing a book, or in suggesting a book for review, should contact the Book Review Editor; publishers may also submit copies of books for review directly to:

Graeme Hirst, CL Book Review Editor
University of Toronto
Department of Computer Science
Toronto, CANADA M5S 3G4

Founded in 1962, the Association for Computational Linguistics (ACL) is the primary scientific and professional society for natural language processing research and applications. A European chapter was established in 1982. Besides publishing *Computational Linguistics*, the ACL holds international meetings (annually in North America, biennially in Europe) where the state-of-the-art in natural language processing research and development is presented. Recently, special interest groups on the Mathematics of Language, the Lexicon, Parsing, Generation, Computational Phonology, Multimedia Language Processing, and Very Large Corpora have been formed; others are likely to be added.
