

# AMMOS Mission Control Solution

A Software Suite for Monitoring and Controlling Spacecraft

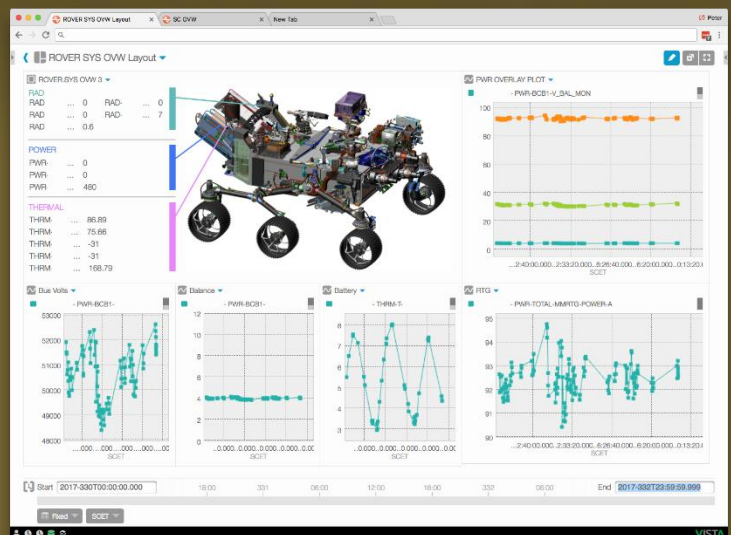

**AMMOS offers an Suite of tools for Real-time Monitoring and Control of a Spacecraft**

**Ideal for missions with Simple to complex Spacecraft Any size budget Any venue (test through operations) Operating in deep space or in earth orbit**

This suite enables you to:

- Process CCSDS frames into engineering data
- Display, store and retrieve all engineering data
- Access all engineering data via a ReST API
- Visualize telemetry data via a Web based app
- Command your spacecraft
- Connect to your spacecraft's Ground Support Equipment (GSE)

AMMOS – Advanced Multimission Operations System, a NASA-sponsored set of products and services for mission operations systems
