

$$\Sigma_{\phi}^{\text{ladder}} = \text{[empty diamond]} + \text{[diamond with 1 wavy line]} + \text{[diamond with 2 wavy lines]} + \text{[diamond with 3 wavy lines]} + \dots$$

Approximation:

$$\begin{array}{ccc}
 & \omega + \epsilon_1 & \omega + \epsilon_1 \\
 \omega & \text{[diamond with 2 wavy lines labeled } \epsilon_1, \epsilon_2 \text{]} & \omega + \epsilon_1 + \epsilon_2 \\
 & \omega + \epsilon_1 & \omega + \epsilon_1 \\
 & \omega & \omega + \epsilon_2
 \end{array}
 \approx \text{[diamond with 2 wavy lines labeled } \epsilon_1, \epsilon_2 \text{]}$$
