

$$\Sigma_x^{GW^0} = \frac{\text{Diagram 1}}{G_y}$$

Diagram 1: A diagram representing a self-energy correction. It consists of a horizontal double line (representing a fermion propagator) with a wavy line (representing a boson) attached to it. The wavy line is labeled  $G_\Phi^0$ .

$$\Sigma_y^{GW^0} = \frac{\text{Diagram 2}}{G_x}$$

Diagram 2: A diagram representing a self-energy correction. It consists of a horizontal double line (representing a fermion propagator) with a wavy line (representing a boson) attached to it. The wavy line is labeled  $G_\Phi^0$ .
