

The image displays two circular photomasks side-by-side, separated by a white vertical line. Both masks have a central circular aperture. The mask on the left, labeled 'R-type', features a series of radial lines extending from the center to the outer edge. The mask on the right, labeled ' ϕ -type', features a series of concentric circular lines. Both masks have a dark, textured appearance with some lighter, irregular patches.

R-type

ϕ -type
