

Figure 1. Map of the study area in the North Sea, showing the location of the 100-m depth contour, the 200-m depth contour, and the 500-m depth contour.

the 100-m depth contour, the 200-m depth contour, and the 500-m depth contour. The map also shows the location of the 100-m depth contour, the 200-m depth contour, and the 500-m depth contour. The map includes a latitude and longitude grid, with latitude ranging from 55°N to 60°N and longitude from 0° to 10°E. A scale bar indicates distances from 0 to 100 km. The map shows the coastline of the British Isles and the North Sea. The 100-m depth contour is marked with a solid line, the 200-m depth contour with a dashed line, and the 500-m depth contour with a dotted line.

The map also shows the location of the 100-m depth contour, the 200-m depth contour, and the 500-m depth contour.
