

$Z_2$  lattice gauge theory

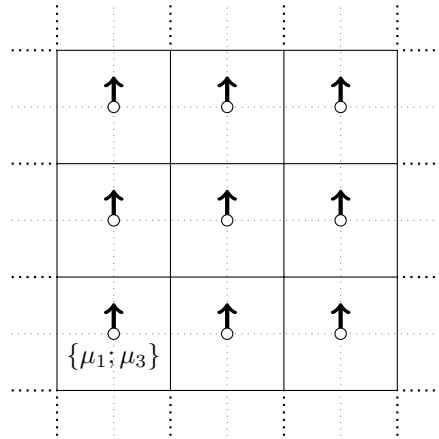

Local Gauss law :  $\mathcal{G}(\vec{n}) = \prod_{i=1}^2 \sigma_1(\vec{n}, \hat{i}) \sigma_1(\vec{n} - \hat{i}, \hat{i}) = 1$

$Z_2$   
Duality/Canonical  
transformations

$Z_2$  spin model.

No Gauss law constraints
