0.25 eV

The figure consists of three dodecahedral unit cells, each containing a central red sphere. The first cell on the left has four smaller red spheres at the corners of an inscribed cube, representing a coordination number of 4. The middle cell has six smaller red spheres at the centers of the six faces, representing a coordination number of 6. The third cell on the right has eight smaller red spheres at the corners of an inscribed cube, representing a coordination number of 8. The size of the red spheres increases from left to right, corresponding to the increasing coordination number.
