This figure is a circular astronomical image, likely a radio continuum map. The image is predominantly blue, indicating low intensity, with a noisy background. A prominent, bright yellow-green source is visible in the lower-left quadrant, at approximately North offset -12" and East offset -10". Several other faint, cyan-colored sources are scattered throughout the field. In the top-right corner, there is a white rectangular box containing the number -5, which likely represents a spectral index or a specific frequency channel.
