

Outflow (convective boundary)

The diagram shows a fluid flow system. At the top, a horizontal line with 11 upward-pointing arrows is labeled "Outflow (convective boundary)". In the center, a light red circle with a dark red outline represents a sphere. A black dot at the center has a line segment labeled r extending to the right edge. To the left of the sphere, an arrow points to its surface with the text "No-slip; $T = T_w$ ". To the right of the sphere, a downward-pointing arrow is labeled g . At the bottom, another horizontal line with 11 upward-pointing arrows is labeled "Inflow (constant velocity)".

Saturated liquid
($T = T_{sat}$)

g

No-slip; $T = T_w$

r

Inflow (constant velocity)
