Spectral Type:

SN II

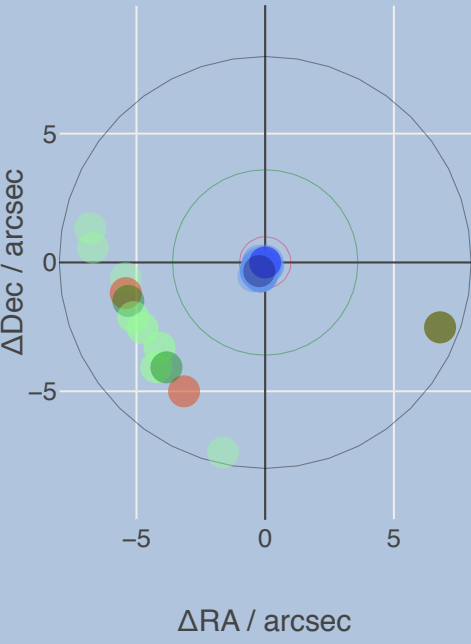

Context:

SN

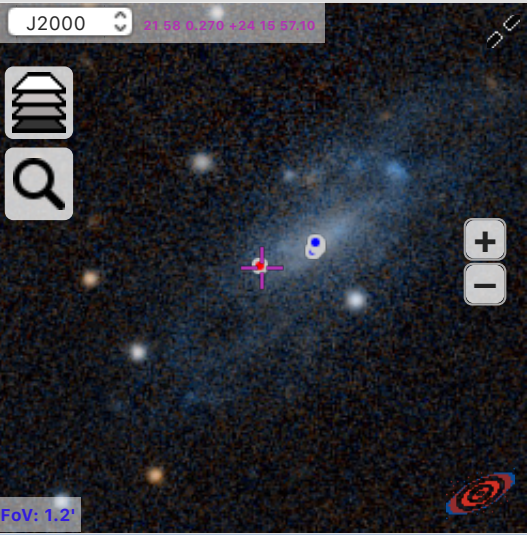

The transient is possibly associated with *UGC11860/1237680308005765563*; an r=16.13 mag galaxy found in the GLADE/NED/NED_D/SDSS catalogues. It's located 2.29" S, 7.26" E (1.5 Kpc) from the galaxy centre. A host distance of 40.4 Mpc(z=0.010) implies a $m - M = 33.03$.
