

**a** Onsite energy on layer 1~4:  $V = \Delta_V(-3/2, -1/2, 1/2, 3/2)\text{meV}$   
 $\theta = 2.3^\circ$ , without crystal field

**b**  $\theta = 2.3^\circ$ , with crystal field:  $V_{\text{CF}} = \Delta_{\text{CF}}(1, 0, 0, 1)\text{meV}$ ;  $\Delta_{\text{CF}} = 10\text{meV}$
