

a)

**Tender-Firm Bipartite**

Unweighted and Directed

◆ Tender    ● Firm

Discard firms  
with less than  
one bid each year

Create Ensemble  
of 1000 Randomized  
Tender-Firm Networks

Obtain a null distribution  
of Jaccard Similarity  
for each pair of firms

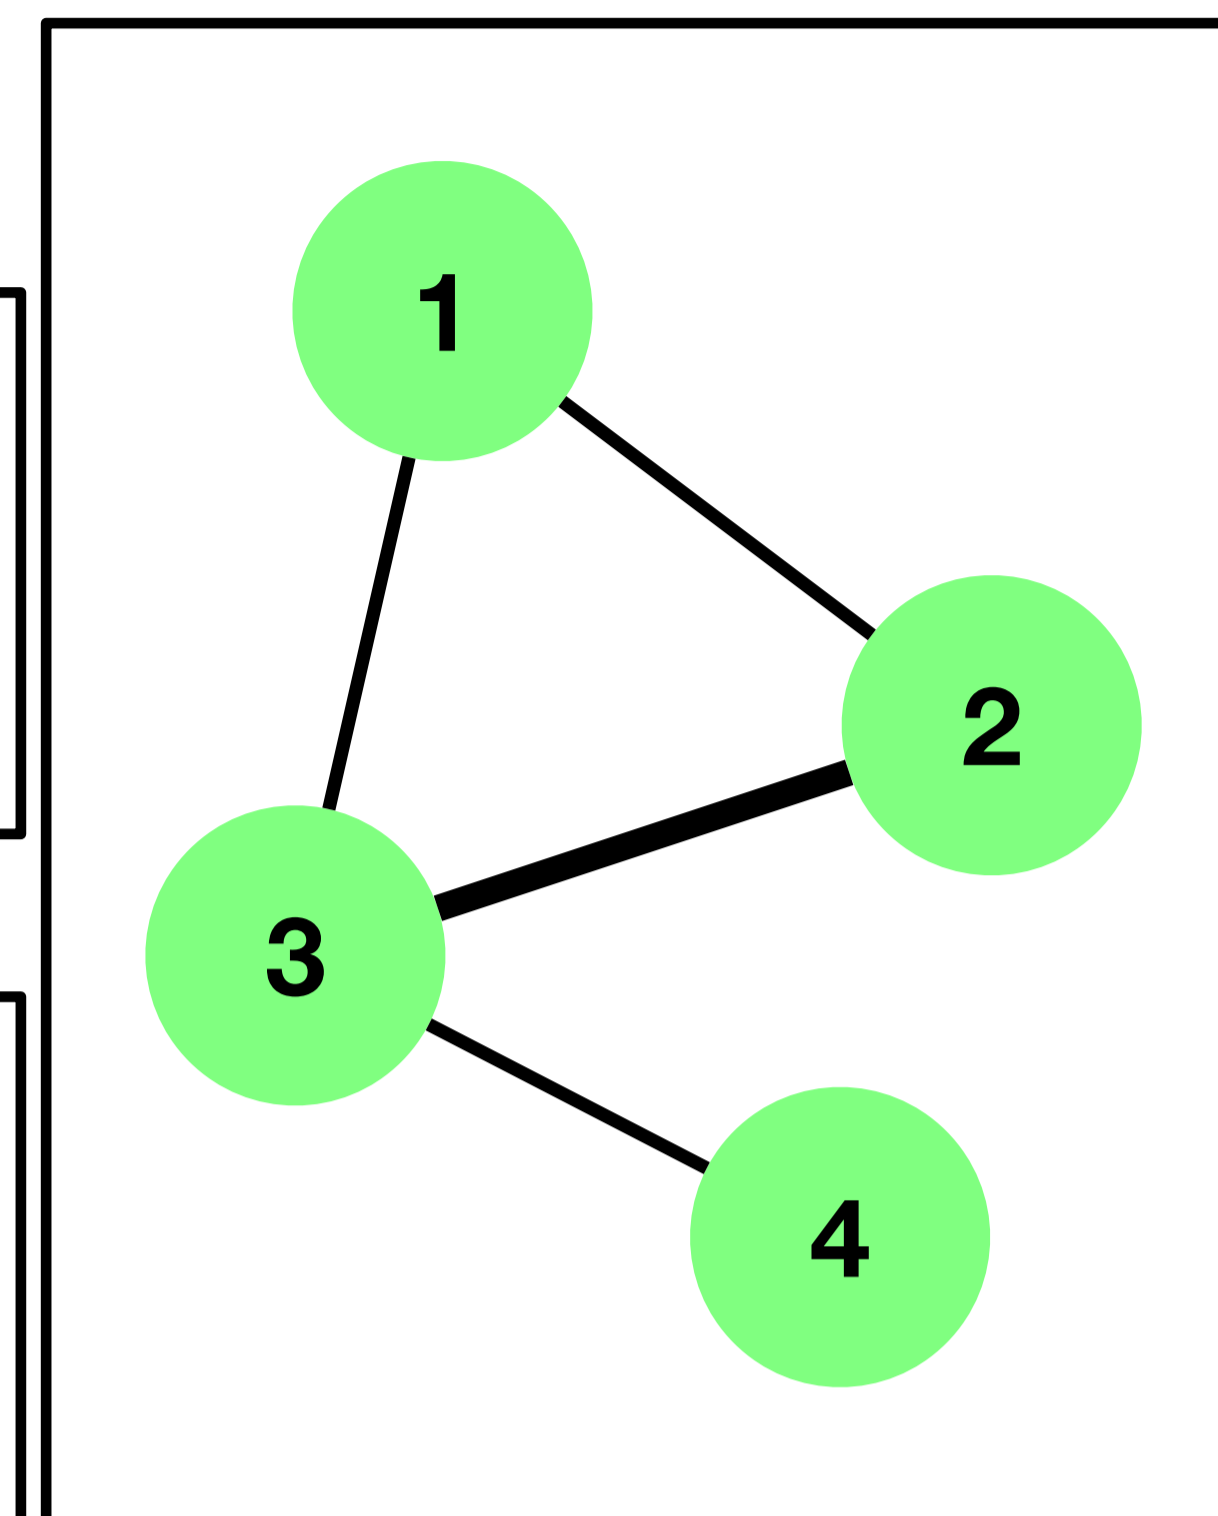

Estimate the empirical  
Jaccard similarity  
coefficient for each  
pair of firms

**p**

estimate p-value

**Firm-Firm Projection**

Weighted and Undirected

● Firm

Discard edges with  
negative Jaccard  
and with  $p$ -value  $> 0.05$
