

Step 0.  
Parameters  
Calculation

The compression ratio  
of a QKD system

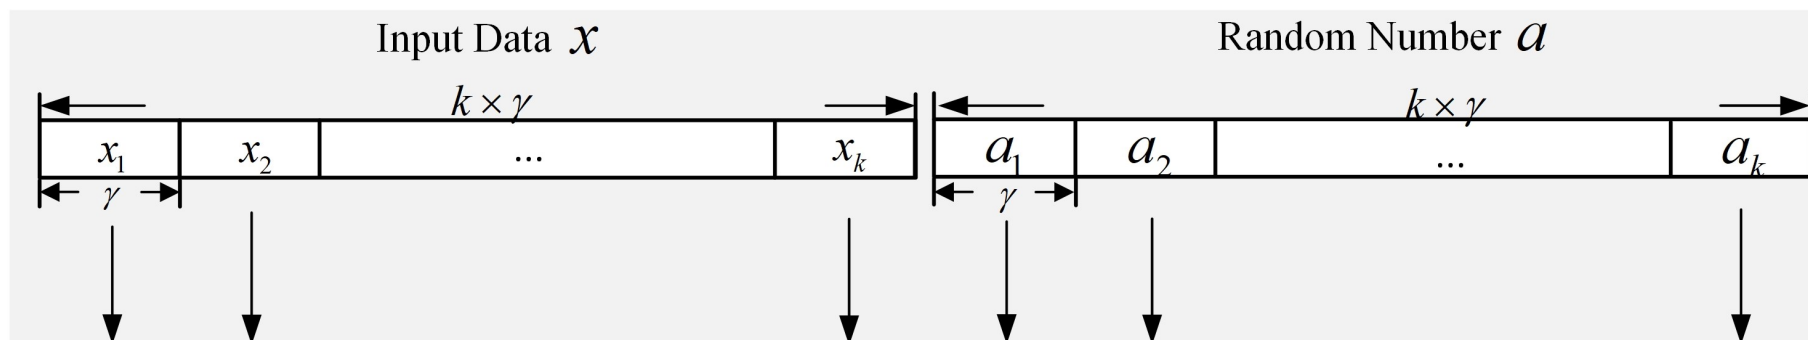

$$r_{\text{DV}} = \beta I_{AB} - I_{AE}(e_1 + \Delta_n)$$

$$r_{\text{CV}} = \beta I_{AB} - \chi_{BE} - \Delta_n$$

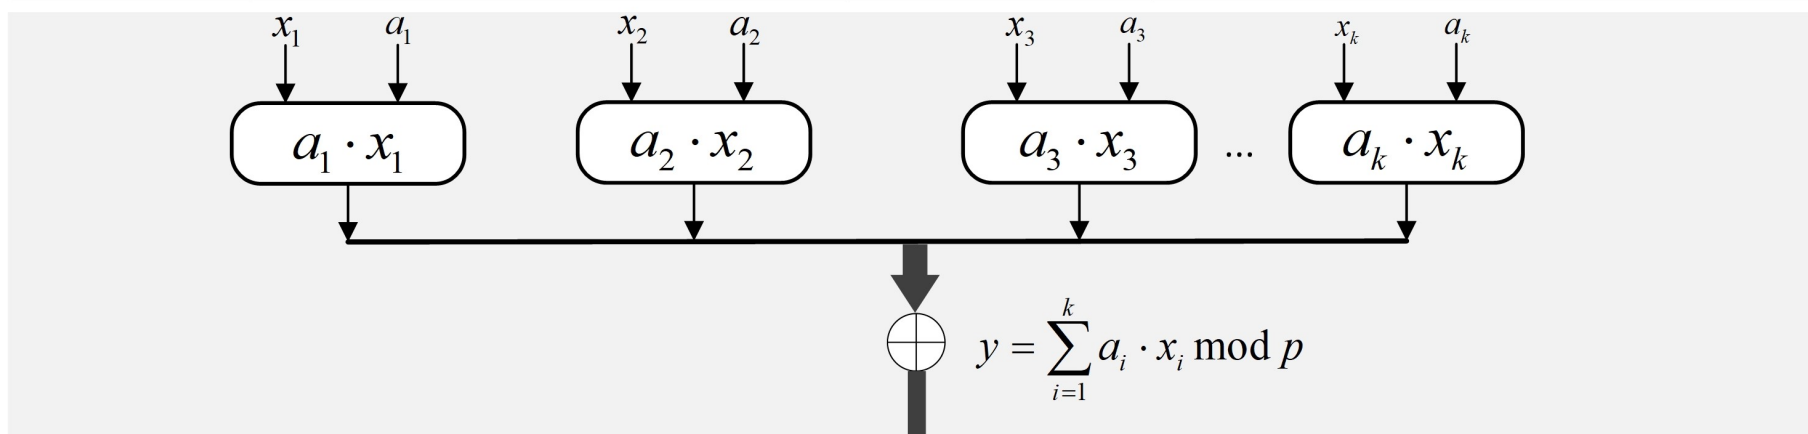

Parameter

$$p = 2^\gamma - 1$$

Step 1.  
Split and Map

Step 2.  
Multilinear Modular  
Hashing

Step 3.  
Modular Arithmetic  
Hashing
