

- $p_t(x)$: Data from task t
- $p_t(m|x)$: Gating policy of task t
- $p_{1:t-1}(m|x)$: Gating prior policy of tasks $1 : t - 1$
- $p_t(\theta|m)$: Expert policy of task t
- $p_{1:t-1}(\theta|m)$: Expert prior policy of tasks $1 : t - 1$
- $g(\theta, x)$: Input processing, e.g., convolution
- $\sigma(\cdot)$: Activation function
- $U(x, y)$: Utility function
