

Dear Editor:

We would like to submit our manuscript entitled "A Parallel PageRank Algorithm for Undirected Graph" for consideration for publication in "Applied Mathematics and Computation". This paper proposes a new parallel PageRank algorithm for undirected graphs using Chebyshev Polynomial approximation. Formally, it extends the Chebyshev Polynomial approximation from the field of real function to the field of matrix function. This approach allows for the creation of similar algorithms utilizing other orthogonal polynomials.

We believe that our research is relevant to the scope of your journal and will be of interest to its readership. If required, the entire code can be made available as supplementary information. Do let me know if you wish to have a look at them.

This manuscript has not been published or presented elsewhere in part or in entirety, and is not under consideration by another journal. There are no conflicts of interest to declare.

Thanks for your consideration of this manuscript. We look forward to hearing from you.

Sincerely,

Qi Zhang
