

h Synchronisation condition:

$$\Omega_2 = \frac{\Delta}{\sqrt{16n^2 - \alpha_{25}^2}}$$

$$= \frac{9.45 MHz}{\sqrt{16n^2 - 0.985^2}}$$

$$= 2.45 MHz \quad (\text{for } n=1)$$

$$\alpha_{25} = \frac{\Omega_2(P)}{\Omega_5(P)}$$
