

Average FWHM for Different Emission Line Widths

- Extension of FWHM after slope increase  
 $y = 0.8959x + 0.4971 \text{ nm}$
- - - Extension of FWHM before slope increase  
 $y = 1.3268x + 0.1995 \text{ nm}$
- Averaged FWHM as a function  
of emission line width
