

Bin Mapping

$f_i$  maps 1 variable to 1 token

$$1 \leq i \leq l$$

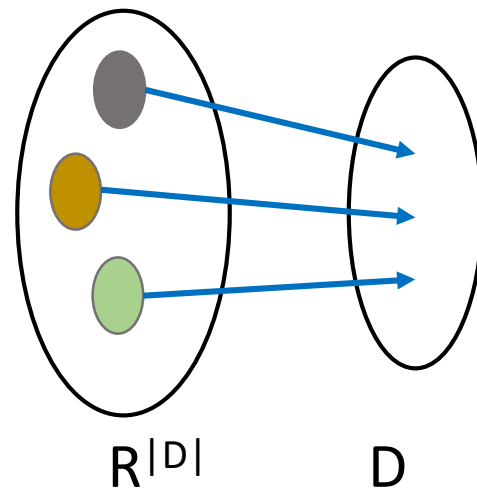

Single Group Mapping

$f_i$  maps 1 variable to a 0/1 token

$$1 \leq i \leq |D|$$

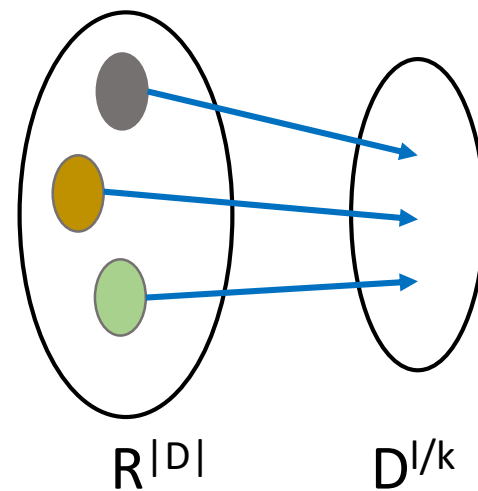

Multi-group Mapping

$f_i$  maps  $|D|$  variable to 1 token

$$1 \leq i \leq l * |D|$$

Dynamic Multi-group Mapping

$f_i$  maps  $|D|$  variable to  $l/k$  token

$$1 \leq i \leq k$$
