## Most Frequent Subgraphs

## Frequent Subgraph Mining (Unsupervised)

$\mathbf{X}_i$  : Feature Vector for graph  $\mathcal{G}_i$

If  $g_1$  exists in graph  $\mathcal{G}_1$ , then  $x_1^1 = 1$

$\mathbf{X}_1 = (1, 1, 1, 1, 0, \dots)$

$\mathbf{X}_2 = (1, 1, 1, 1, 0, \dots)$

$\mathbf{X}_3 = (1, 1, 0, 0, 1, \dots)$

Classifier (e.g., SVM)
