

```

public class Server {
    public static void main(String[] args) throws IOException{
        SocketService socketService = new SocketService();
        socketService.oneServer();
    }
    public void oneServer(){
        try{
            ServerSocket server=null;
            server=new ServerSocket(5209);
.....
public class Client {
    public static void main(String[] args) throws IOException {
        try {
            Socket socket=new Socket("127.0.0.1",5209);
            BufferedReader br = new BufferedReader(new InputStreamReader(System.in));
            PrintWriter write = new PrintWriter(socket.getOutputStream());
            BufferedReader in = new BufferedReader(new InputStreamReader(socket.getInputStream()));
.....

```
