

# Web-scaled Descriptive Narratives

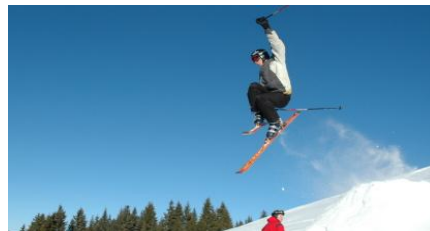

High semantic distinction

(Settings, common objects, certain steps, etc.)

*Ski jumping competitions. Jumper in mid air with extreme speed. The background of the forest and slope.*

# Static Images

Spatial Inductive

**Textual Discrepancy**

CLIP Pre-training Data

**Visual Discrepancy**

## Concise Category Names

Low semantic distinction

(Short phrases with constant hard-prompt)

*A video of a person  
Ski jumping.*

## Video Sequences

Spatio-Temporal

Video Recognition Data

**Text Encoder**

**Matching**

**Dominant Pipeline**

**Visual Encoder**

**Temporal Learner**

☺: Dominant pipelines tackle the visual discrepancy via additional temporal learners

☹: The textual discrepancy is overlooked, which may introduce ambiguity in matching
