

(a) Inputs

Transducer
properties

Segmentations

Attenuation α

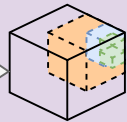

Impedance Z

...

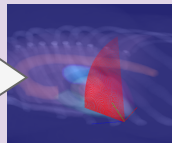

Tissues' acoustic
properties

(b) Pre-processing (offline)

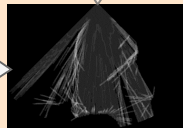

1. Conversion to
NanoVDB Volume

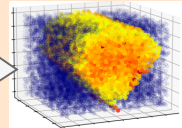

2. Virtual Scene

(c) Simulation Module

1. Monte Carlo
Path Tracing

2. Scatterers
generation

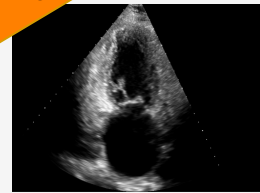

3. RF Lines
computation
(COLE Algorithm)

(d) Simulated Ultrasound

Postprocessing

(e) Real Ultrasound (Not paired)
