

Diagram illustrating the combination of three matrices, F_σ , F_ϕ , and F_α , to form a final matrix, labeled *Eq. 26*.

The matrices are represented as 8x8 grids, partitioned into four quadrants by dashed lines. The top-left quadrant is labeled S_0 , the top-right S_1 , the bottom-left V_0 , and the bottom-right V_1 .

- F_σ (Left): Contains blue blocks in the S_0 and S_1 quadrants.
- F_ϕ (Middle): Contains red blocks in the V_0 and V_1 quadrants.
- F_α (Right): Contains blue blocks in the V_0 and V_1 quadrants.

The final matrix (Eq. 26) is the result of the combination, showing a complex pattern of blue, red, and dark blue blocks across all quadrants.
