Network_Latency

Item a:Network_Latency<=100ms
Item b:100ms<Network_Latency<200ms
Item c:Network_Latency>=200ms

Unmatched_template_num

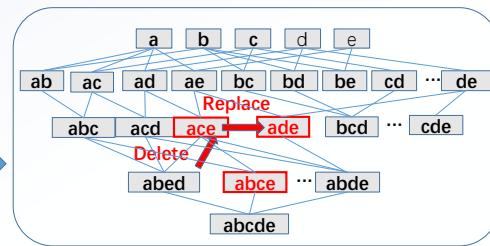

Item d:Unmatched_template_num!=0
Item e:Unmatched_template_num==0

RuleSet Learning

Generate surrogate function $v_{\alpha,r^{(t-1)}}^k(j|r_k)$

Greedy Initialization

New Rule

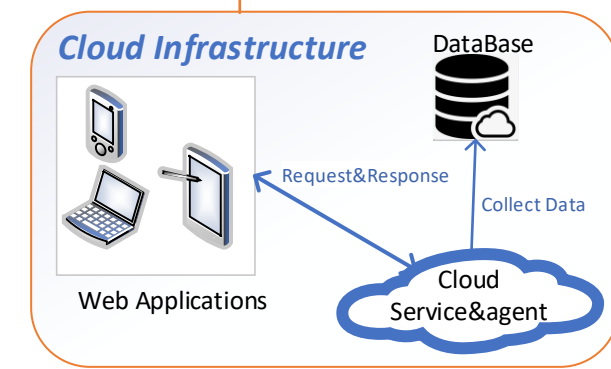

A diagram showing a feature space with nodes labeled a, b, c, d, e and their combinations (ab, ac, ad, ae, bc, bd, be, cd, de, abc, acd, ace, ade, bcd, cde, abcd, abce, abde, abcde). Red arrows indicate 'Replace' (ace to ade) and 'Delete' (ace) operations. To the right, a scatter plot shows three rules: Rule A (green checkmark), Rule B (red X), and Rule C (blue box).
