

FROG

 = [MASK]/misleading/X%

Q

Question: Here has been successive increases of 20% and then  in the price of gas from the previous month. By what percentage should a driver reduce gas consumption so that the expenditure does not change?

+

FROG Template

Answer: 24%

+

C

few (7.4%), tiny amount (2.4%), small amount (18.3%), none (0.4%), some (22.5%), ...

Hard choices: Top K

Easy choices: Randomly sampled

A. none B. small amount  C. few D. tiny amount

A. some  B. few C. tiny amount D. most

 Answer

Step 1: Find Math Question with Percentage Mentions

Step 2:  the Percentage Mention

Step 3: Search for Nearest Quantifiers

Step 4: Construct the FROG Task
