

## Approach 1: Consider whole clinical interview

## Approach 2: Consider question-answer pair

## HiQuE: Considers hierarchical structure

**Interviewer** | Main Question  
Q32. How easy is it for you to get a good night's sleep?

**Participant** | Answer  
Very hard.

**Interviewer** | Follow-up Question  
Q33. Are they triggered by something?

**Participant** | Answer  
Well.. I wake up about every two hours to go to the bathroom and um.. or I uh.. something wakes.. some noise wakes me up, so I don't sleep well, and I'm tired all the time.
