

Neuro-Symbolic AI Algorithms *(Section 2)*

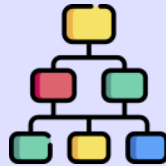

Neural Network

Scalable
Flexible

Handle inconsistency

+

Symbolic

Interpretable
Explainable
Data-efficient

+

Probabilistic

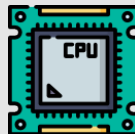

Robust to
uncertainty

Hardware Compute Platforms *(Section 3)*

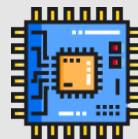

GPU

CPU

Domain-Specific
Accelerator

Challenges

Ad-hoc model design

Limited extensibility

Large #algos and #HW

Heterog. compute kernels

Research Opportunities *(Section 4)*

① Unifying neuro-symbolic-prob models

② Developing software frameworks for NSAI

③ Benchmarking diverse NSAI workloads

④ Designing architectures for NSAI systems
