

Operations	Examples																																				
Fuzzy logic (LTN)	$F = \forall x(isCarnivor(x)) \rightarrow (isMammal(x))$ $isCarnivor(x): [0, 1] \quad isMammal(x): [1, 0] \xrightarrow{\text{Lukasiewicz}} F = [1,0]$																																				
Inner product and add (NVSA)	$X_i \in \{+1, -1\}^d$ $X_i \cdot X_j / X_i + X_j$																																				
Logic rules (ABL)	<p><b>Domain:</b> <i>animal(dog).carnivore(dog).mammal(dog).</i></p> <p><b>logical formula:</b> <i>mammal(x)^carnivore(x).</i></p> <p><b>ABL:</b> <i>hypothesis(x): -animal(x),mammal(x),carnivore(x)</i></p>																																				
Pre-defined objects (NSVQA)	<table><tr><th>Module</th><th>Input type</th><th>Output type</th><th>Description</th></tr><tr><td>equal_color</td><td>(entry, entry)</td><td>Boolean</td><td>Return whether input colors are the same</td></tr><tr><td>equal_material</td><td>(entry, entry)</td><td>Boolean</td><td>Return whether input materials are the same</td></tr><tr><td>equal_shape</td><td>(entry, entry)</td><td>Boolean</td><td>Return whether input shapes are the same</td></tr><tr><td>equal_size</td><td>(entry, entry)</td><td>Boolean</td><td>Return whether input sizes are the same</td></tr><tr><td>equal_integer</td><td>(number, number)</td><td>Boolean</td><td>Return whether input numbers equal</td></tr><tr><td>greater_than</td><td>(number, number)</td><td>Boolean</td><td>Return whether the first number is greater than the second</td></tr><tr><td>less_than</td><td>(number, number)</td><td>Boolean</td><td>Return whether the first number is less than the second</td></tr><tr><td>exist</td><td>scene</td><td>Boolean</td><td>Return whether the input scene includes any object</td></tr></table>	Module	Input type	Output type	Description	equal_color	(entry, entry)	Boolean	Return whether input colors are the same	equal_material	(entry, entry)	Boolean	Return whether input materials are the same	equal_shape	(entry, entry)	Boolean	Return whether input shapes are the same	equal_size	(entry, entry)	Boolean	Return whether input sizes are the same	equal_integer	(number, number)	Boolean	Return whether input numbers equal	greater_than	(number, number)	Boolean	Return whether the first number is greater than the second	less_than	(number, number)	Boolean	Return whether the first number is less than the second	exist	scene	Boolean	Return whether the input scene includes any object
Module	Input type	Output type	Description																																		
equal_color	(entry, entry)	Boolean	Return whether input colors are the same																																		
equal_material	(entry, entry)	Boolean	Return whether input materials are the same																																		
equal_shape	(entry, entry)	Boolean	Return whether input shapes are the same																																		
equal_size	(entry, entry)	Boolean	Return whether input sizes are the same																																		
equal_integer	(number, number)	Boolean	Return whether input numbers equal																																		
greater_than	(number, number)	Boolean	Return whether the first number is greater than the second																																		
less_than	(number, number)	Boolean	Return whether the first number is less than the second																																		
exist	scene	Boolean	Return whether the input scene includes any object
