

Neuro-Symbolic AI Algorithms (*Sec. II*)Neuro-Symbolic AI Workload Characterization (*Sec. III, IV, V*) ④ ⑤Neuro-Symbolic AI Workload Optimization (*Sec. V*)

Challenges

Limited evaluation tasks

Ad-hoc model design

Limited extensibility

Large #algos and #HW

Heterog. compute kernels

Research Opportunities (*Sec. VI*)

① Building more cognitive datasets/testbeds

② Unifying neuro-symbolic-probabilistic models

③ Developing efficient software frameworks

④ Benchmarking diverse neuro-symbolic workloads

⑤ Designing cognitive architectures
