**Total Sequenced Credits 52-58**

**Additional GER and elective credits to meet minimum 120 credits for graduation**

**Program Benchmarks (p. 402)**

**Additional Requirements for Graduation:**

- Minimum cumulative GPA of 2.75 on all UWM and transfer courses
- Minimum cumulative GPA of 2.75 on professional education courses
- Satisfactory completion of a minimum of 120 credits
- Completion of the last year of coursework (30 credits) in residence at UWM

**Inclusive EC with Licensure:**

- Successfully complete an approved reading assessment (e.g., WiFort assessment or WiFort alternative portfolio)
- Demonstration of successful completion of the Pedagogical Knowledge Assessment (PKA).

**Benchmarks**

Students must meet benchmarks at several points during the program and prior to student teaching. Benchmarks are monitored through

tracking systems and advising. A student will be restricted from moving forward in the program if the benchmarks are not completed.

**Admission**

- C or better in ENGLISH 102
- C or better in MATH 175
- C or better in TCH LRN 109
- C or better in TCH LRN 312
- Must be enrolled in OR have completed with a C or better TCH LRN 209
- Must be enrolled in OR have completed with a C or better TCH LRN 501
- Must be enrolled in OR have completed with a C or better TCH LRN 302
- Cleared Criminal Background Check on file
- Minimum 2.5 cumulative grade point average
- Mandatory meeting with advisor

**Content Knowledge**

Prior to student teaching, choose one of the options below.

**Option A: Coursework**

Students earn a cumulative GPA of 3.0 or higher in the following courses:

Code	Title	Credits
ENGLISH 102	College Writing and Research	3
MATH 175	Mathematical Explorations for Elementary Teachers I	3
TCH LRN 323	Teaching of Social Studies: Inclusive Early Childhood Education	3
TCH LRN 338	Teaching of Science in Inclusive Early Childhood Education	3
TCH LRN 502	Emergent Literacy and Bilinguality in the Inclusive Early Childhood Classroom	3
TCH LRN 520	Developing Mathematical Thinking in Young Children	3

**Option B: Test (Score)**

Students demonstrate a score of 157 or above on the Praxis 5018. This demonstration is required 2 semesters prior to student teaching.

**Student Teaching**

Prior to student teaching, review the following with your advisor:

- Minimum cumulative GPA of 2.75 on all UWM and transfer courses
- C or higher in the IECTE professional courses
- At least one attempt of the Wisconsin Foundations of Reading Test (WiFoRT)
- Successful Completion of the Content Knowledge Requirement
  - 3.0 in the specified content courses
  - Passing score on the ECE Praxis Subject Assessment 5018
- ESL certification only: PRAXIS Subject Assessment Exam #5362 – Teaching of English to Speakers of Other Languages, with a passing score of 149 or higher or minimum 3.0 GPA in CURRINS 541, 542, 543, 546, 655
- Bilingual certification only: ACTFL OPI exam – A minimum score of Advanced-Low (see advisor for details)

## Undergraduate Advising

Our purpose is to provide collaborative, mentoring relationships which promote educational, career, and professional development. We value a student-centered, holistic, and ethical approach to advising based on strong partnerships with students, faculty and staff, and the larger campus community. We are committed to creating a respectful and supportive environment. We encourage students to be self-reliant through informed decisions and choices based upon dissemination of accurate information. We value our own continuous professional development to enhance the quality of the advising experience.

### How to Prepare for an Advising Meeting

- Review your Advisement Report in PAWS (<http://uwm.edu/registrar/academic-unit-services/paws-academic-advisement/>).
- Come prepared with questions or topics for discussion.
- Make a list of courses you think you should take.
- Investigate opportunities to prepare for the job you want.
- Keep a record of your academic progress.
- Understand you are ultimately responsible for creating your educational, life, and career plans.
- Maintain honest and open communication with your advisor.
- Take responsibility for choices you make as a student and member of the UW-Milwaukee community.

### Scheduling an Appointment

Office of Student Services  
Enderis Hall, Room 209  
(414) 229-4721  
[soeinfo@uwm.edu](mailto:soeinfo@uwm.edu)

### Graduate Advising

If you are a School of Education graduate student, you may schedule an appointment with your faculty advisor by contacting your faculty advisor directly. Faculty contact information can be found in the Directory (<https://uwm.edu/education/directory/>). Your faculty advisor will be listed in your PAWS account.

## Honors in the Department of Teaching and Learning

Departmental Honors are granted to students who have achieved a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester.

## College of Community Engagement and Professions Dean's Honor List

GPA of 3.750 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Education, BS: Mathematics Education, Grades 4-12

The Mathematics Education Program is available for students who plan to teach mathematics in 6th through 12th grade. Mathematics Program students gain real world experience in the classroom through student teaching or on-the-job experiences at area schools. Students who satisfactorily complete the program requirements also meet the Wisconsin teacher certification requirements for teaching mathematics subject areas in those grades. Students at this level of certification may add the following licenses while pursuing or after obtaining their Mathematics licensure as their initial certification:

- Bilingual
- English as a Second Language

## Requirements

### General Education Requirements (GERs)

UW-Milwaukee has General Education Requirements (p. 29) that must be met in order to earn a bachelor's degree. Some of the requirements of your program may fulfill the campus GERs. Please review the requirements and consult with your academic advisor.

### Program Admission Requirements (p. 415)

#### Program Core

Code	Title	Credits
COMMUN 103	Public Speaking (GER-HU, fulfilled prior to program admission)	3
CURRINS 328 or CURRINS 300	Introduction to Teaching Science and Mathematics in Middle and High School Introduction to Teaching: Colloquium and Fieldwork	3
ED PSY 330	Introduction to Learning and Development	3
Choose one: <sup>1</sup>		3
ANTHRO 213	American Indian Peoples of Wisconsin (GER-CD, SS)	
ENGLISH 276	Introduction to American Indian Literature: (GER-CD, HU)	
AIS 203	Western Great Lakes American Indian Community Life of the Past (GER-CD, SS)	

HIST 263	North American Indian History Since 1887 (GER-CD, SS)	
<b>Total Credits</b>		<b>12</b>

<sup>1</sup> Non-Western History or Contemporary Culture and Minority Group Relations (Act 31) statutory requirements can both be met by taking one class. Program may allow fulfillment of Act 31 with a 1-day workshop.

### Content Area

Code	Title	Credits
MATH 231	Calculus and Analytic Geometry I (QL-B, GER-NS)	4
or MATH 221	Honors Calculus I	
MATH 232	Calculus and Analytic Geometry II	4
or MATH 222	Honors Calculus II	
MATH 240	Matrices and Applications	3
or MATH 234	Linear Algebra and Differential Equations	
MATH 341	Seminar: Introduction to the Language and Practice of Mathematics	3
MATH 431	Modern Algebra with Applications	3
MATH 451	Axiomatic Geometry	3
MATH 575	High School Mathematics from an Advanced Viewpoint	3
MTHSTAT 215	Elementary Statistical Analysis	3
Any 300-level or about MATH course or MATH 233-suggested courses:		3
MATH 305	Introduction to Mathematical and Computational Modeling	
or MATH 405	Mathematical Models and Applications	
MATH 313	Linear Programming and Optimization	
or MATH 315	Mathematical Programming and Optimization	
MATH 320	Introduction to Differential Equations	
MATH 325	Vector Analysis	
MATH 405	Mathematical Models and Applications	
MATH 413	Introduction to Numerical Analysis	
MATH 417	Computational Linear Algebra	
MATH 451	Axiomatic Geometry	
MATH 523	Advanced Calculus I	
MATH 535	Linear Algebra	
<b>Total Credits</b>		<b>29</b>

### Professional Education Requirements

**MACSTEP Sequence** - Milwaukee Area Collaborative Secondary Science (and Math) Teacher Education Program. Formal admission to the School of Education required. A grade of C or better must be met for all professional requirements, including student teaching.

Code	Title	Credits
<b>Summer</b>		
CURRINS 332	Teaching of Mathematics 3	3
EXCEDUC 531	Inclusion for Secondary Educators: Humanities, the Arts, Foreign Language	3
<b>Fall</b>		
CURRINS 516	Field Work in Middle School	3

CURRINS 532	Teaching of Mathematics: Secondary	3
CURRINS 541	Principles and Methods of Teaching ESL	3
EXCEDUC 601	Behavioral Supports	3

### Spring

<b>Student Teaching (Spring) <sup>2</sup></b>		
Take 12 credits:		12
CURRINS 431	Student Teaching in Mathematics	
CURRINS 432	Student Teaching Mathematics Seminar	3
<b>Total Credits</b>		<b>33</b>

<sup>2</sup> Students must complete paperwork in order to be assigned a student teaching placement. To be approved for placement, additional criteria must be met. See Benchmarks (p. 415) for details.

### Additional Requirements for Graduation

- A minimum cumulative GPA of 2.5.
- A minimum GPA of 3.0 in all mathematics content area courses and a minimum 2.75 GPA in all professional education courses.
- Satisfactory completion of a minimum 120 credits.
- Completion of the last year of coursework (30 credits) in residence at UW-Milwaukee.

## Advance to Major

### Program Admission Requirements

Application to the Mathematics Education program requires satisfactory completion of the requirements listed below. For more information about the application process, visit our website (<http://uwm.edu/education/academics/mathematics/>).

- **Satisfaction of QL-A, QL-B, OWC-A, and OWC-B.**
- **Completion of** CURRINS 328, Introduction to Teaching Science and Mathematics in Middle and High School, with a grade of C or better.
- **Completion of** COMMUN 103 with a grade of C or better.
- **A 2.5 minimum cumulative GPA** in all UWM and transfer courses at the time of admission application.
- **A minimum of 58 credits** (UWM and transfer credits) at the time of admission application. It is not required to have all the Core Curriculum courses completed at the time of application.
- **Meeting with faculty advisor** to review admission application. Faculty signature required on application.
- **Pass a Criminal Background Check (CBC)** as required by the Wisconsin Department of Public Instruction for all applicants to a professional education preparation program.

## Benchmarks

### Student Teaching

Students must complete paperwork in order to be assigned a student teaching placement. To determine your deadline (February or April), visit the Office of Clinical Experiences website (<https://uwm.edu/education/academics/clinical-experiences/>).

To be approved for placement, you must meet the following criteria:

- Be admitted to the School of Education;
- Completion of all required coursework;
- Cumulative GPA of a minimum 2.75; 2.5;
- A minimum of 2.75 in all your professional education courses;
- Content Knowledge Requirement: A minimum of 3.0 in all your mathematics content used for certification or passing score on the Praxis II General Mathematics Content Test;
- C or better in all mathematics content being used for certification;
- C or better in all professional sequence courses;
- TB test results submitted to the Office of Clinical Experiences; and
- Passing Criminal Background Check submitted to the Office of Clinical Experiences.

## Undergraduate Advising

Our purpose is to provide collaborative, mentoring relationships which promote educational, career, and professional development. We value a student-centered, holistic, and ethical approach to advising based on strong partnerships with students, faculty and staff, and the larger campus community. ## Education, BS: Social Studies Education

The Social Studies Education Program is available for candidates who plan to teach social studies to learners in middle through high school.

Social Studies Education Program candidates are exposed to relevant field experiences at area schools through an initial semester long middle level placement and a year-round high school student teaching placement. Candidates who satisfactorily complete the Social Studies Education Program requirements meet the Wisconsin teacher certification requirements for EAA Licensure (ages 10 to 21).

Undergraduate and/or Post-Baccalaureate candidates who satisfactorily complete the Social Studies Education Program will be granted a Wisconsin EAA license in one or more of the following social studies subject areas: Broad Field Social Studies, Economics, Geography, History, Political Science, Psychology, and Sociology.

## Requirements

### General Education Requirements (GERs)

UW-Milwaukee has General Education Requirements (p. 29) that must be met in order to earn a bachelor's degree. Some of the requirements of your program may fulfill the campus GERs. Please review the requirements and consult with your academic advisor.

### Program Core

Program core is comprised of foundational courses and should be completed prior to beginning the professional education semesters.

Code	Title	Credits
CES 210	Introduction to Conservation and Environmental Science	3

or GEOG 350	Conservation of Natural Resources	
COMMUN 103	Public Speaking (pass with a C or better (GER-HU))	3
CURRINS 300	Introduction to Teaching: Colloquium and Fieldwork (pass with a C or better)	3
ED POL 375	Cultural Foundations of Education	3
<b>Total Credits</b>		<b>12</b>

## Content Area Requirements

The following content coursework must be completed prior to acceptance to the program (in addition to the requirements listed under Program Admission Requirements/Advance to Major tab).

Code	Title	Credits
<i>History</i>		
HIST 151	American History: 1607 to 1877	3
HIST 152	American History: 1877 to the Present	3
HIST 101	Western Civilization: Ancient World to 1500	3
or HIST 131	World History to 1500	
HIST 102	Western Civilization: 1500 to the Present	3
or HIST 132	World History Since 1500	
HIST 595	The Quantitative Analysis of Historical Data (QLB)	3
Select 6 credits of HIST level 300 or higher.		6
<i>Political Science</i>		
POL SCI 104	Introduction to American Government and Politics	3
POL SCI 105	State Politics	3
<i>Geography</i>		
GEOG 110	The World: Peoples and Regions	3
GEOG 120	Our Physical Environment	3
or GEOG 350	Conservation of Natural Resources

## Program Admission Requirements (p. 420)

### Professional Education Requirements

A grade of C or better is required in professional education semester coursework in order to advance in the program. The professional requirements should be completed **after full admission** to the Social Studies Education program.

Code	Title	Credits
<b>Spring 1</b>		
CURRINS 321	Introduction to the Teaching of Social Studies	1
CURRINS 323	Teaching of Social Studies:	2

CURRINS 516	Field Work in Middle School <sup>1</sup>	3
CURRINS 545	Reading in the Content Areas: Middle, Junior, and Senior High School	3
ED PSY 330	Introduction to Learning and Development	3
ED POL 534	Students Placed At Risk: Deconstructing Risk, Defining Promise	3
<b>Fall 1</b>		
CURRINS 415	Preliminary Student Teaching: <sup>1</sup>	3
CURRINS 523	Current Issues and Practices in the Teaching of Social Studies	3
CURRINS 541	Principles and Methods of Teaching ESL	3
ED POL 535	Educating Students Placed At Risk: Pedagogies of Engagement	3
EXCEDUC 531	Inclusion for Secondary Educators: Humanities, the Arts, Foreign Language	3
<b>Spring 2</b>		
CURRINS 423	Student Teaching in Social Studies <sup>1</sup>	12
<b>Total Credits</b>		<b>42</b>

<sup>1</sup> Students must complete paperwork in order to be assigned a student teaching placement. To be approved for placement, additional criteria must be met. See Benchmarks (p. 420) for details.

### Additional Requirements for Graduation

- Completion of University GER requirements;
- Minimum of a C or better and GPA of 2.75 in all professional education courses;
- Minimum cumulative GPA of 2.75;
- Satisfactory completion of a minimum 120 credits; and
- Completion of the last year of coursework (30 credits) in residence at UW-Milwaukee.

### Addition Requirements for Certification

- Completion of an approved course or workshop on the history, culture, and sovereignty rights of Wisconsin Indians to fulfill the ACT 31 legislation requirement of the Wisconsin Department of Public Instruction;
- Successful completion of a pedagogical knowledge assessment required for certification; and
- Minimum cumulative GPA of 2.75 in all UWM and transfer courses.

## Advance to Major

### Program Admissions Requirements

Application to the Social Studies program requires satisfactory completion of the requirements listed below. For more information about the application process, visit our website (<https://uwm.edu/education/academics/social-studies/>).

- Pass a Criminal Background Check (CBC) as required by the Wisconsin Department of Public Instruction for all applicants to a professional education preparation program.
- **Completion of OWC-A.**
- **Completion of QL-A.**
- **Pass COMMUN 103** with a C or better.

- **Pass CURRINS 300** with a C or better.
- **A 2.5 minimum cumulative GPA** in all UWM and transfer courses at the time of admission application.
- **A 2.75 cumulative GPA** in all Content Area courses (economics, geography, history, psychology, political science, and sociology) listed in the program requirements.
- **Meeting with faculty advisor** to review admission application. Faculty signature required on application.

## Benchmarks

### Student Teaching

Students must complete paperwork in order to be assigned a student teaching placement. Student teaching deadlines (February or April) are posted on the Office of Clinical Experiences website (<https://uwm.edu/education/academics/clinical-experiences/>).

To be approved for placement, you must meet the following criteria:

- Be admitted to the School of Education;
- Completion of all required coursework;
- Cumulative GPA of a minimum 2.5;
- Minimum of 2.75 GPA in all Professional Education courses taken thus far;
- Have a GPA of 3.0 or better in the Content Area courses, OR Pass the Praxis Subject Assessment exam: Social Studies: Content Knowledge #5081;
- Removal of all F or I grades in courses required for the program;
- TB test **results** submitted to the Office of Clinical Experiences; and
- Updated Criminal Background Check submitted to the Office of Clinical Experiences.

## Undergraduate Advising

Our purpose is to provide collaborative, mentoring relationships which promote educational, career, and professional development. We value a student-centered, holistic, and ethical approach to advising based on strong partnerships with students, faculty and staff, and the larger campus community. We are committed to creating a respectful and supportive environment. We encourage students to be self-reliant through informed decisions and choices based upon dissemination of accurate information. We value our own continuous professional development to enhance the quality of the advising experience.

### How to Prepare for an Advising Meeting

- Review your Advisement Report in PAWS (<http://uwm.edu/registrar/academic-unit-services/paws-academic-advisement/>).
- Come prepared with questions or topics for discussion.
- Make a list of courses you think you should take.
- Investigate opportunities to prepare for the job you want.
- Keep a record of your academic progress.
- Understand you are ultimately responsible for creating your educational, life, and career plans.
- Maintain honest and open communication with your advisor.
- Take responsibility for choices you make as a student and member of the UW-Milwaukee community.

### Scheduling an Appointment

Office of Student Services  
Enderis Hall, Room 209

(414) 229-4721  
soeinfo@uwm.edu

### Graduate Advising

If you are a School of Education graduate student, you may schedule an appointment with your faculty advisor by contacting your faculty advisor directly. Faculty contact information can be found in the Directory (<https://uwm.edu/education/directory/>). Your faculty advisor will be listed in your PAWS account.

### Honors in the Department of Teaching and Learning

Departmental Honors are granted to students who have achieved a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester.

### College of Community Engagement and Professions Dean's Honor List

GPA of 3.750 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

### Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

### Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

### Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

### Education, BS: World Language Education

The World Languages Program is available for students as a major or a minor. A World Language major is for students who plan to teach a world language to children from birth to age 21, in PK through 12th grade. The World Language minor will result in the additional certification at the same level as your initial license.

Students who satisfactorily complete the undergraduate program (as a major or minor) will be granted a license in one of the following languages: American Sign Language, Chinese, French, German, Italian, Latin, Spanish, Japanese, or Arabic.

Students seeking a World Language certification (major or minor) may also add the following licenses:

- Bilingual (only available for Spanish, World Language Licenses; a bilingual license will allow you to teach Spanish for Heritage Speakers only)
- English as a Second Language

## Requirements

### General Education Requirements (GERs)

UW-Milwaukee has General Education Requirements (p. 29) that must be met in order to earn a bachelor's degree. Some of the requirements of your program may fulfill the campus GERs. Please review the requirements and consult with your academic advisor.

### Program Admission Requirements (p. 426)

#### Program Core

Code	Title	Credits
COMMUN 103	Public Speaking (GER-HU, fulfilled prior to program admission)	3
CURRINS 300	Introduction to Teaching: Colloquium and Fieldwork (fulfilled prior to program admission)	3

#### Minority Group Relations (Act 31) 3

A component of the Human Relations Requirement for Teacher Certification is met by completing one of the following courses or a one-day seminar.

ANTHRO 213	American Indian Peoples of Wisconsin (GER-CD)	
ENGLISH 276	Introduction to American Indian Literature: (GER-CD)	
AIS 203	Western Great Lakes American Indian Community Life of the Past (GER-CD)	
HIST 263	North American Indian History Since 1887 (GER-CD)	

**Total Credits 9**

### Language Content Area

Complete total credits in chosen language, plus any prerequisites. Initial language courses (levels 1-4) may be satisfied through language proficiency examinations. See academic advisor for details.

<b>Total Credits</b>		<b>9</b>

## Advance to Major Program Admission Requirements

Application to the World Languages program requires satisfactory completion of the requirements listed below. For more information about the application process, visit our website (<https://uwm.edu/education/academics/second-language/>).

- **GER: OWC-A** Completion of Oral-Written Communication part A competency.
- **GER: QL-A:** Completion of Quantitative Literacy part A competency.
- **Completion of CURRINS 300** with a grade of C or better.
- **Completion of COMMUN 103** with a grade of C or better.
- **A 2.75 minimum GPA** in all World Language content courses completed prior to program admission.
- **A 2.5 minimum GPA** in all UWM and transfer courses at time of admission application.
- **A minimum of 48 credits** (UWM and transfer credits) at the time of admission application. It is not required to have all content area courses completed at the time of application.
- The Wisconsin Department of Public Instruction requires that all applicants to a professional education preparation program pass a **Criminal Background Check (CBC)** prior to admission.

## Benchmarks Student Teaching

Prior to requesting/being assigned a student teaching placement, students must:

- Take the Department of Public Instruction Mandated Content Exam (language proficiency) - ASL students require SLPI Intermediate Plus. Other languages require a minimum score of Intermediate-High on both the ACTFL OPI and the WPT.
- Complete an Immersion Experience - Required for all prospective language teachers, this requirement must be met by spending a significant amount of time in a community/country where the chosen major language is spoken. Submit documentation of experience to your academic advisor prior to student teaching placement.
- Complete and submit an application. Deadlines for submission are posted by the Office of Clinical Experiences. (<http://uwm.edu/education/academics/clinical-experiences/>)

To be approved, students must **ALSO** meet the following criteria:

- Be admitted to the School of Education
- Complete all required coursework. An exception to allow a student to take a course concurrently with student teaching requires approval by the student's faculty advisor.
- Have a minimum cumulative GPA of 2.75 on all undergraduate coursework, including transfer courses.
- Content Knowledge: Minimum score of Intermediate-High on the ACTFL OPI and WPT tests or a minimum score of SLPI Intermediate Plus for ASL students; or a minimum GPA of 3.0 in languages content courses.

- Removal of all F and/or I (incomplete) grades in courses that count toward graduation or certification.
- TB test *results* submitted to the Office of Clinical Experiences (may take up to 6 weeks).
- Criminal Background Check submitted to the Office of Clinical Experience.

## Undergraduate Advising

Our purpose is to provide collaborative, mentoring relationships which promote educational, career, and professional development. We value a student-centered, holistic, and ethical approach to advising based on strong partnerships with students, faculty and staff, and the larger campus community. We are committed to creating a respectful and supportive environment. We encourage students to be self-reliant through informed decisions and choices based upon dissemination of accurate information. We value our own continuous professional development to enhance the quality of the advising experience.

### How to Prepare for an Advising Meeting

- Review your Advisement Report in PAWS (<http://uwm.edu/registrar/academic-unit-services/paws-academic-advisement/>).
- Come prepared with questions or topics for discussion.
- Make a list of courses you think you should take.
- Investigate opportunities to prepare for the job you want.
- Keep a record of your academic progress.
- Understand you are ultimately responsible for creating your educational, life, and career plans.
- Maintain honest and open communication with your advisor.
- Take responsibility for choices you make as a student and member of the UW-Milwaukee community.

### Scheduling an Appointment

Office of Student Services  
Enderis Hall, Room 209  
(414) 229-4721  
[soeinfo@uwm.edu](mailto:soeinfo@uwm.edu)

### Graduate Advising

If you are a School of Education graduate student, you may schedule an appointment with your faculty advisor by contacting your faculty advisor directly. Faculty contact information can be found in the Directory (<https://uwm.edu/education/directory/>). Your faculty advisor will be listed in your PAWS account.

## Honors in the Department of Teaching and Learning

Departmental Honors are granted to students who have achieved a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester.

## College of Community Engagement and Professions Dean's Honor List

GPA of 3.750 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## English as a Second Language Education, Minor

A teaching certification in English as a Second Language (ESL) is for those who wish to teach English to non-native speakers. Students wishing to pursue a minor in ESL must be in the process of obtaining, or already have, a certification to teach at the Early Childhood, Early Childhood Through Adolescence, Middle Childhood Through Early Adolescence, or Early Adolescence Through Adolescence level.

## Requirements

Code	Title	Credits
<b>Content Area</b>		
CURRINS 541	Principles and Methods of Teaching ESL	3
CURRINS 542	History and Politics of Second Language Education	3
CURRINS 543	Developing Biliteracy	3
CURRINS 546	Language, Content, and Comprehensible Input	3
CURRINS 655	Applied Educational Linguistics	3
<b>Pre-Student Teaching and Student Teaching</b>		
CURRINS 350	Field Seminar in Language Education	1
CURRINS 443	Pre-Student Teaching in English as a Second Language Education	2
CURRINS 444	Student Teaching in English as a Second Language Education	3
CURRINS 445	Seminar in Language Education	3
<b>Total Credits</b>		<b>24</b>

<sup>1</sup> Students must complete paperwork in order to be assigned a student teaching placement. To be approved for placement, additional criteria must be met. See Benchmarks (p. 427) for details.

## Additional Requirements for Certification

- Minimum cumulative grade point average of 2.75 in all professional education coursework. This includes any transfer coursework that is counted towards certification at UWM, as well as grades earned in student teaching or field experiences;
- Undergraduate students must meet the graduation requirements for their primary certification;
- Program Portfolio completion - based on the 10 WI Teacher Standards; and
- Completion of the Pedagogical Knowledge Assessment (PKA) (required for certification).

## Benchmarks

### Student Teaching

Students must complete an application to request/be assigned a student teaching placement. Deadlines for submission are posted by the Office of Clinical Experiences. (<http://uwm.edu/education/academics/clinical-experiences/>)

To be approved, students must **ALSO** meet the following criteria:

- Be admitted to the School of Education
- Complete all required coursework. An exception to allow a student to take a course concurrently with student teaching requires approval by the student's faculty advisor.
- Have a minimum cumulative GPA of 2.5 on all undergraduate coursework, including transfer courses.
- Have a minimum 2.75 GPA in all content area and professional education courses.
- Content Knowledge; Passing scores reflected on your transcript for the Praxis II exam: English to Speakers of Other Languages: Content Knowledge #5361; or minimum 3.0 GPA on content area courses.
- Removal of all F and/or I (incomplete) grades.
- TB test results submitted to the Office of Clinical Experiences (may take up to 6 weeks).
- Criminal Background Check submitted to the Office of Clinical Experiences.

## Undergraduate Advising

Our purpose is to provide collaborative, mentoring relationships which promote educational, career, and professional development. We value a student-centered, holistic, and ethical approach to advising based on strong partnerships with students, faculty and staff, and the larger campus community. We are committed to creating a respectful and supportive environment. We encourage students to be self-reliant through informed decisions and choices based upon dissemination of accurate information. We value our own continuous professional development to enhance the quality of the advising experience.

### How to Prepare for an Advising Meeting

- Review your Advisement Report in PAWS (<http://uwm.edu/registrar/academic-unit-services/paws-academic-advisement/>).
- Come prepared with questions or topics for discussion.
- Make a list of courses you think you should take.
- Investigate opportunities to prepare for the job you want.
- Keep a record of your academic progress.
- Understand you are ultimately responsible for creating your educational, life, and career plans.

- Maintain honest and open communication with your advisor.
- Take responsibility for choices you make as a student and member of the UW-Milwaukee community.

### Scheduling an Appointment

Office of Student Services  
 Enderis Hall, Room 209  
 (414) 229-4721  
 soeinfo@uwm.edu

### Graduate Advising

If you are a School of Education graduate student, you may schedule an appointment with your faculty advisor by contacting your faculty advisor directly. Faculty contact information can be found in the Directory (<https://uwm.edu/education/directory/>). Your faculty advisor will be listed in your PAWS account.

## Exceptional Education, BS: Early Adolescence - Adolescence

The Early Adolescence-Adolescence (EAA) Special Education program leads to a Bachelor of Science in Exceptional Education. Upon completion of the program and other license requirements, students will be eligible to apply for a Cross-Categorical Special Education Teaching License from the Wisconsin Department of Public Instruction for ages 10-21 (grades 6 through 12). If you already hold a Bachelor’s Degree, you can earn EAA Special Education Teacher Certification as a Post-Baccalaureate student.

Our faculty are recognized leaders in the field of Special Education with expertise in urban teaching, inclusive education, language and literacy and transition. Our program will prepare you to become a powerful, effective educator in a high-demand area.

### Requirements

#### General Education Requirements (GERs)

UW-Milwaukee has General Education Requirements (p. 29) that must be met in order to earn a bachelor’s degree. Some of the requirements of your program may fulfill the campus GERs. Please review the requirements and consult with your academic advisor.

#### Admission to Program (p. 430)

#### Program Core

Code	Title	Credits
Highly recommended-choose one: 3		
ENGLISH 201	Strategies for Academic Writing (GER-OWCB)	
ENGLISH 206	Technical Writing (GER-OWCB)

CURRINS 543	Developing Biliteracy	3
EXCEDUC 588	Teaching Experience III	9
Field Requirement	Twenty weeks full-time (M-F)	
<b>Total Credits</b>		<b>55</b>

<sup>2</sup> It is strongly recommended that students take the reading test required for initial certification at the end of the first year of the professional sequence.

### Exceptional Education Degree, EAA Submajor Completion Requirements

- Completion of all admission requirements, granted admission to the EAA program, and completion of EAA professional course sequence;
- Completion of EAA program requirements that also fulfill university GER requirements, including coursework to meet the Act 31 requirement;
- Completion of a minimum of 18 credits of approved content coursework;
- Completion of university GER requirements;
- At least 30 program credits must be earned in residence at the University of Wisconsin-Milwaukee, following admission to the program;
- Completion of a minimum of 120 degree credits; and
- Maintain a cumulative GPA of 2.75.

### Department of Public Instruction (DPI) Licensure Requirements

- Minimum cumulative GPA of 2.75;
- Minimum cumulative GPA of 2.75 in professional coursework;
- Completion of DPI Content Knowledge Requirement by earning a 3.0 cumulative GPA in required content coursework, by demonstrating proficiency in a content portfolio, or by passing the PRAXIS II (Middle School: Content Knowledge Test–0146/5146); and
- Passing scores on state-mandated tests (Wisconsin Foundations of Reading Test, edTPA).

### Post-Baccalaureate Program

(Under revision; please see an advisor for information.)

## Advance to Major

### Program Admission Requirements

- Achieve a placement level 4 or higher on the English placement test, or complete ENGLISH 102 or an equivalent with a C or better (OWC-A);
- Score of 30 or higher on the Math placement test or MATH 102, MATH 103, MATH 105, MATH 108, MATH 175, or equivalent with a C or better (QL-A);
- Completion of CURRINS 300 (or equivalent), with a C or better;
- Completion of EXCEDUC 300, EXCEDUC 600, or EXCEDUC 605 (or equivalent), with a C or better;
- Completion of ED POL 375 or ED POL 530 (or equivalent), with a C or better;
- Completion of an approved advanced course (at least three credits) with significant written or oral communication component (OWC-B), with a C or better (recommendations: EXCEDUC 560, ENGLISH 215, ENGLISH 240, ENGLISH 245 or equivalent);
- Completion of an approved advanced course (at least three credits) making use of quantitative tools (QL-B), with a C or better (recommendations: MATH 176 or equivalent);
- Completion of a minimum of 45 credits at the time of application;
- Maintain a cumulative GPA of 2.5;
- Completion of a program application; and
- Interview.

## Benchmarks

### Content Knowledge Coursework

A 3.0 cumulative GPA in 6 of the content-focused courses below meets the DPI content knowledge proficiency requirement.

Code	Title	Credits
<b>English - choose two of the following:</b>		
ENGLISH 102	College Writing and Research	3
ENGLISH 201	Strategies for Academic Writing	3
ENGLISH 205	Business Writing	3
ENGLISH 215	Introduction to English Studies	3
EXCEDUC 680	Literacy I	3
<b>Math - choose two of the following:</b>		
MATH 102	Mathematical Literacy for College Students II	3
MATH 103	Contemporary Applications of Mathematics	3
MATH 108	Algebraic Literacy II	3

MATH 175	Mathematical Explorations for Elementary Teachers I	3
MATH 176	Mathematical Explorations for Elementary Teachers II	3
MTHSTAT 215	Elementary Statistical Analysis	3
CURRINS 332	Teaching of Mathematics 3	2-3

### Social Studies - choose one of the following:

ECON 103	Principles of Microeconomics	3
ECON 104	Principles of Macroeconomics	3
GEOG 110	The World: Peoples and Regions	3
HIST 151	American History: 1607 to 1877	3
HIST 152	American History: 1877 to the Present	3
POL SCI 104	Introduction to American Government and Politics	3
POL SCI 105	State Politics	3
SOCIOL 101	Introduction to Sociology	3
PSYCH 101	Introduction to Psychology	3

### Science - choose one of the following:

ATM SCI 100	Survey of Meteorology	3
ATM SCI 109	Thunderstorms, Tornadoes and Hurricanes	3
BIO SCI 100	Survey of Zoology	3
BIO SCI 102	Elements of Biology	3
BIO SCI 103	Topics in Modern Biology:	3
BIO SCI 104	Plants in Today's World	3
BIO SCI 206	Biology of Women	3
CES 210	Introduction to Conservation and Environmental Science	3
CHEM 106	Chemistry in the World Around Us-- Chemistry for the Non-Science Major	3
CHEM 185	Basic Chemistry for Teachers	3
GEO SCI 100	Introduction to the Earth	3
GEO SCI 102	Principles of Historical Geology	3
GEO SCI 105	Earth, Air, Fire and Water	3
GEO SCI 106	The Earth Environment	3
GEO SCI 185		3
PHYSICS 107	Physics in Everyday Life	3
PHYSICS 185	Basic Physics for Teachers	3

## Student Teaching

Students must complete paperwork in order to be assigned a student teaching placement. To determine your deadline (February or April), visit the Office of Clinical Experiences website (<https://uwm.edu/education/academics/clinical-experiences/>).

## Undergraduate Advising

Our purpose is to provide collaborative, mentoring relationships which promote educational, career, and professional development. We value a student-centered, holistic, and ethical approach to advising based on strong partnerships with students, faculty and staff, and the larger campus community. We are committed to creating a respectful and supportive environment. We encourage students to be self-reliant through informed decisions and choices based upon dissemination of accurate information. We value our own continuous professional development to enhance the quality of the advising experience.

## How to Prepare for an Advising Meeting

- Review your Advisement Report in PAWS (<http://uwm.edu/registrar/academic-unit-services/paws-academic-advisement/>).
- Come prepared with questions or topics for discussion.
- Make a list of courses you think you should take.
- Investigate opportunities to prepare for the job you want.
- Keep a record of your academic progress.
- Understand you are ultimately responsible for creating your educational, life, and career plans.
- Maintain honest and open communication with your advisor.
- Take responsibility for choices you make as a student and member of the UW-Milwaukee community.

## Exceptional Education, BS: K4-12 Special Education

Special education certification in the state of Wisconsin has undergone changes in the grade levels associated with specific licenses. The UWM Special Education program is adapting curriculum to prepare students to teach in K4-12 settings, including extensive fieldwork. This program prepares students to work in urban settings and takes place in close partnership with local school districts.

The UWM School of Education's urban mission is upheld in the special education program's commitment to preparing pre-service teachers to meet the needs of diverse populations. Students are admitted into the program upon admission to the University and completion of pre-professional coursework. It is possible to complete the program in four years. This is a field-based program involving gradual and extensive work in urban schools. Upon successful completion of all student teaching requirements, including state required assessments, students will be licensed to teach in special education.

## Requirements

### General Education Requirements (GERs)

UW-Milwaukee has General Education Requirements (p. 29) that must be met in order to earn a bachelor's degree. Some of the requirements of your program may fulfill the campus GERs. Please review the requirements and consult with your academic advisor.

### Admission to Program (p. 435)

#### Program Core

Code	Title	Credits
MATH 175	Mathematical Explorations for Elementary Teachers I (OWC-QLA)	3
MATH 176	Mathematical Explorations for Elementary Teachers II (OWC-QLB)	3
COMMUN 103	Public Speaking (GER-HU)	3
ED POL 375	Cultural Foundations of Education	3
SOCIOL 224	Race and Ethnicity in the United States (GER-SS, CD)	3
CURRINS 300	Introduction to Teaching: Colloquium and Fieldwork	3
ED PSY 330	Introduction to Learning and Development	3
CURRINS 545	Reading in the Content Areas: Middle, Junior, and Senior High School	3
Choose one:		3
EXCEDUC 300	The Exceptional Individual	
EXCEDUC 600	Survey of Exceptional Education	
EXCEDUC 605	Child, Learner, Disabilities	
<i>Highly recommended (fulfills GER)</i>		
CURRINS 233	Introduction to Children's and Young Adult Literature	
CURRINS 234	Teachers as Writers (Preferred course; GER-UWCB, HU)	
ART ED 130	Multicultural Art and Visual Learning in Elementary Education (Preferred course; GER-A, CD)	
COMSDIS 210	Survey of Communication Disorders (Preferred course; GER-SS)	
Choose one: <sup>1</sup>		
ANTHRO 213	American Indian Peoples of Wisconsin (GER-CD, SS)	
AIS 203	Western Great Lakes American Indian Community Life of the Past (GER-CD, SS)	
ENGLISH 276	Introduction to American Indian Literature: (GER-CD, HU)	
HIST 263	North American Indian History Since 1887 (GER-CD, HU)	
<b>Total Credits</b>		<b>27</b>

<sup>1</sup> Non-Western History or Contemporary Culture and Minority Group Relations (Act 31) statutory requirements can both be met by taking one class.

<b>Total Credits</b>		<b>48</b>

### Certification Requirements

- Demonstration of content knowledge proficiency through one of the following:
  - Achieve a cumulative grade point average of 3.0 or higher in prescribed content knowledge coursework (p. 435);
  - A passing score on the PRAXIS Subject Assessment #5146; or
  - A Content Knowledge Portfolio.
- Evidence of pedagogical knowledge proficiency;
- Evidence of pedagogy and pedagogical content knowledge related to teaching reading;
- Completion of ACT 31 requirement;
- Minimum cumulative GPA of 2.75 in all UWM and transfer courses; and
- Minimum cumulative GPA of 2.75 and a C or better in all professional courses.

## Advance to Major

### Program Admission Requirements

- At least 45 credits completed;
- Minimum cumulative grade point average of 2.5;
- Grade of C or better in CURRINS 300 and a positive field evaluation or equivalent;
- Grade of C or better in MATH 175 and ENGLISH 102 (or placement of 4 or higher on English placement test);
- Approved CBC;
- Successful application and interview; and
- For Second Degree candidates, bachelor's degree.

## Benchmarks

### Student Teaching

Students must complete paperwork in order to be assigned a student teaching placement. To determine your deadline (February or April), visit the Office of Clinical Experiences website (<https://uwm.edu/education/academics/clinical-experiences/>).

### Content Knowledge Coursework

A 3.0 cumulative GPA in 6 of the content-focused courses below meets the DPI content knowledge proficiency requirement.

Code	Title	Credits
<b>English - choose two of the following:</b>		<b>6</b>
ENGLISH 102	College Writing and Research	
CURRINS 234	Teachers as Writers	
EXCEDUC 681	Literacy II	
Or course with equivalent content		
<b>Math - choose two of the following:</b>		<b>6</b>
MATH 175	Mathematical Explorations for Elementary Teachers I	
MATH 176	Mathematical Explorations for Elementary Teachers II	
CURRINS 561	Mathematics Learners in Special Education I	
CURRINS 562	Mathematics Learners in Special Education II	
Or course with equivalent content		
<b>Social Studies - choose one of the following:</b>		<b>3</b>
SOCIOL 224	Race and Ethnicity in the United States	
GER-SS		
Or course with equivalent content		
<b>Science - choose one of the following:</b>		<b>3</b>
CES 210	Introduction to Conservation and Environmental Science	
GER-NS or NS+		
Or course with equivalent content		

## Portfolio/Performance Reviews

Conducted at the end of each semester and formal portfolio review at the end of Year 1. A favorable performance review is required to continue in the certification program.

## Evidence of pedagogy and pedagogical content knowledge related to teaching reading

- Depending on pathway: CURRINS 536 and EXCEDUC 681 or EXCEDUC 680 and EXCEDUC 681 with a grade of B- or better;
- Feedback and coaching from an expert of reading instruction;
- Portfolio of evidence demonstrating competence in phonemic awareness, phonics, vocabulary, reading, comprehension, and fluency.

## Undergraduate Advising

Our purpose is to provide collaborative, mentoring relationships which promote educational, career, and professional development. We value a student-centered, holistic, and ethical approach to advising based on strong partnerships with students, faculty and staff, and the larger campus community. We are committed to creating a respectful and supportive environment. We encourage students to be self-reliant through informed decisions and choices based upon dissemination of accurate information. We value our own continuous professional development to enhance the quality of the advising experience.

### How to Prepare for an Advising Meeting

- Review your Advisement Report in PAWS (<http://uwm.edu/registrar/academic-unit-services/paws-academic-advisement/>).
- Come prepared with questions or topics for discussion.
- Make a list of courses you think you should take.
- Investigate opportunities to prepare for the job you want.

- Keep a record of your academic progress.
- Understand you are ultimately responsible for creating your educational, life, and career plans.
- Maintain honest and open communication with your advisor.
- Take responsibility for choices you make as a student and member of the UW-Milwaukee community.

## Scheduling an Appointment

Office of Student Services  
Enderis Hall, Room 209  
(414) 229-4721  
[soeinfo@uwm.edu](mailto:soeinfo@uwm.edu)

## Graduate Advising

If you are a School of Education graduate student, you may schedule an appointment with your faculty advisor by contacting your faculty advisor directly. Faculty contact information can be found in the Directory (<https://uwm.edu/education/directory/>). Your faculty advisor will be listed in your PAWS account.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## Honors in the Department of Teaching and Learning

Departmental Honors are granted to students who have achieved a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester.

## College of Community Engagement and Professions Dean's Honor List

GPA of 3.750 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

# Exceptional Education, MS

The Department of Teaching and Learning offers two options for a program of study at the master's level: a general option or a certification option. Students choosing the General Option enroll in 12 credits of core requirements and 18 credits that reflect a focus area of study. Students following the Certification Option enroll in 12 credits of core requirements and apply 18 credits of their certification credits, taken at the graduate level, to the degree. This program is created in consultation with a faculty advisor. Students choosing the Certification Option must be accepted into one of the Department of Teaching and Learning's Post-Baccalaureate Teacher Certification Programs as well as the Graduate Program. Certification programs include:

- Early Childhood Education (0-8 yrs)
- Primary/Middle and Middle/Secondary Education (grades K-9 or 6-12 in the areas of learning disabilities, cognitive disabilities, and emotional disturbance)

Up to 15 credits of coursework in the certification program may be applied to the Master's degree in addition to 15 credits of core requirements.

Under the auspices of the PhD program in Urban Education, the Department offers doctoral level training with a designated specialization in Exceptional Education.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements plus these departmental requirements to be considered for admission to the program:

- Personal interview to determine an applicant's basis for seeking admission, potential for completion of the program, and relevant background and experience in exceptional education.
- Completion of the reason statement on the application.

## Credits and Courses

The minimum degree requirement is 30 graduate credits, of which 18 credits must be in Exceptional Education. The remaining credits may be taken either in or outside of the School of Education. Courses in either the Certification Option or General Option are determined in consultation with an advisor from suggested course options identified by the Department.

Code	Title	Credits
<b>Program Core Requirements</b>		
EXCEDUC 715	Issues and Trends in Exceptional Education	3
EXCEDUC 770	Seminar: Research on Individuals With Special Needs	3
	Advanced Issues or Methods in Urban Special Education (determined in collaboration with a faculty advisor).	3

EXCEDUC 890	Master's Research Project	3
<b>Total Credits</b>		<b>12</b>

### Certification Option (Up to 15 credits)

A student pursuing the Certification Option must be admitted to the Department of Teaching and Learning's Post-Baccalaureate Teacher Certification Program (consult the catalog program page for more information on admission dates and requirements). In consultation with an advisor, a student selects up to 18 credits of coursework required in the certification program for graduate credit. Additionally, the student enrolls in 12 credits of program core requirements. Listed below are the courses in each of the certification programs that can be taken for graduate credit.

**Administration and Supervision**

In cooperation with Administrative Leadership.

Code	Title	Credits
AD LDSP 780	Internship in Student Service Administration	3
AD LDSP 805	Legislative and Legal Aspects of Special Education	3
EXCEDUC 579	Current Topics in Exceptional Education:	1-3
EXCEDUC 960	Seminar: Administration/Supervision of Programs for Exceptional Individuals	3
<b>Total Credits</b>		<b>10-12</b>

**General Option (15 credits)**

The general option for a Master's program in Exceptional Education is developed by identifying a theme of study that is based upon the student's educational background, areas of professional interest, and professional development goals. A theme, for example, may focus on assessment, instruction, policy, or other relevant issues in the area of special education. Courses are selected in consultation with a faculty advisor.

**Additional Requirements****Major Professor as Advisor**

The student must have a major professor to advise and supervise the student's studies as specified in Graduate School regulations.

**Thesis**

A thesis or master's project is required for all students in the certification and general options. All students are required to present the results of their thesis or project at a seminar session in the semester in which they complete their degree.

**Time Limit**

The student must complete all degree requirements within five years of initial enrollment.

**Doctor of Philosophy in Urban Education Specialization in Exceptional Education**

Under the auspices of the doctoral program in Urban Education, the Department of Teaching and Learning provides doctoral training with a specialization in Exceptional Education. The program emphasizes the study of the socio-cultural context, educational policy, research-based practices, and systems change and reform to support learning and development of individuals with disabilities. Prospective doctoral students wishing to specialize in Exceptional Education must first be admitted to the Urban Education Doctoral Program. Admission and general program requirements can be obtained from the Director of Doctoral Studies in Urban Education. This program is described in detail on the Urban Education (p. 461) program page.

**Accelerated Program Option**

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

**Global Educator, Graduate Certificate**

The Global Educator Certificate prepares future educator professionals in K-12 schools or other educational settings to integrate global content and approaches into their professional practice. The certificate is designed for learners studying in graduate programs in the School of Education.

This 15-credit certificate will be available at two possible levels under the following terms:

- Graduate Students: Students formally admitted to and enrolled in a graduate program may count Global Educator Certificate credits toward their graduate degree program as allowed by the home department of their degree and Graduate Faculty Committee certificate policy.
- Post-Graduate: Teachers and others, who have completed a master's, doctoral degree, advanced certificate, or equivalent. Other post-graduates may seek the certificate as part of their preparation for National Board Certification. It is conceivable that a student holding a graduate degree and seeking additional advanced training short of another full graduate degree may be interested in this certificate.

**Learning Objectives and Competencies**

Students who have completed this certificate will be able to:

- Demonstrate their own awareness of the interconnectedness between communities, societies, economies, and events and trends that cross national borders.
- Embed global perspectives and practices in their teaching.
- Prepare students to become model global citizens who are culturally sensitive and informed about world affairs.
- Develop students' understanding of different cultures and languages, enhancing their ability to communicate across cultures.
- Create scholarship that engages in critical inquiry, creativity and intellectual development and includes world trends, issues and events; past, present and into the future.

## Admission Requirements

### Eligibility

To pursue this certificate, students must be enrolled in a graduate degree program at UWM.

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

This 15-credit certificate will be available at two possible levels under the following terms:

- Graduate Students: Students formally admitted to and enrolled in a graduate program may count Global Educator Certificate credits toward their graduate degree program as allowed by the home department of their degree and Graduate Faculty Committee certificate policy.
- Post-Graduate: Teachers and others, who have completed a master's, doctoral degree, advanced certificate, or equivalent. Other post-graduates may seek the certificate as part of their preparation for National Board Certification. It is conceivable that a student holding a graduate degree and seeking additional advanced training short of another full graduate degree may be interested in this certificate.

CURRINS 729	Qualitative Research and Field Studies in Educational Settings

**Total Credits** **15**

## Additional Requirements

### Transfer Credit

A maximum of 3 credits may be transferred to count toward the Global Educator certificate program's 15-credit requirement. Transfer credits will be evaluated by the departmental faculty advisor for consideration, if the applicant can provide acceptable evidence that the course taken is substantially the same as one of the certificate courses within the last five years with a grade of B or better. Other credits earned prior to their intent to pursue the Global Educator certificate will not be awarded retroactively.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Global Educator, Undergraduate Certificate

The Global Educator Certificate prepares future educator professionals in K-12 schools or other educational settings to integrate global content and approaches into their professional practice.

### Requirements

Undergraduate applicants must have a minimum 2.75 cumulative undergraduate grade point average and must declare their intent to pursue the certificate before completion of six credits in the Global Educator Certificate sequence.

A minimum GPA of 3.0 is required in certificate courses.

## Interdisciplinary Language and Literacy Intervention (ILLI), Graduate Certificate

This graduate certificate program offers a unique opportunity for students interested in language and literacy intervention to gain and apply knowledge about research, theory and practice across a variety of relevant disciplines. Prospective language and literacy specialists venturing into today's school environments would benefit from an understanding of leadership, teaching and learning theory, research, and effective practice across the broad range of disciplines involved in interventions. Successful interventionists require many tools to teach, as well as the skills to know when and how to apply those tools. These skills come from a critical, reflective understanding of the research and theory, as well as a complex problem-solving approach to assessment and instruction. The 16-credit certificate program is multi-disciplinary, drawing upon current coursework in Educational Psychology, and

Teaching and Learning in the School of Education, as well as courses in Communication Sciences and Disorders in the College of Health Sciences.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Applicants must have completed a bachelor’s degree prior to admission and a minimum 2.75 cumulative undergraduate grade point average. Applicants with a graduate degree must have a minimum 3.0 graduate grade point average.

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

Sixteen credits are required as indicated below:

Code	Title	Credits
<b>Required Core</b>		
ED PSY 748	Oral Language, Cognition, and Literacy	3
<b>Language and Literacy Intervention Electives</b>		
Select 12 credits from the following:		12
COMSDIS 661	The Role of the Speech-language Pathologist in Literacy	
COMSDIS 799	Independent Studies (Application of Theory to Learning Activities (1 credit))	
CURRINS 543	Developing Biliteracy	
CURRINS 646	University of Wisconsin System Reading Research Symposium	
CURRINS 647	Early Reading Empowerment: Part 1	
CURRINS 648	Early Reading Empowerment: Part 2	
CURRINS 747	Reading Assessment and Instruction with Practicum: K-12 Part I	
CURRINS 748	Reading Assessment and Instruction with Practicum, K-12: Part II	
CURRINS 846	Seminar in Developmental Reading: (with the topic of “Current Trends in Literacy”)	

CURRINS 849	Guiding and Directing School Reading Programs K-12
CURRINS 740	UWM Writing Project: Teachers as Writers
CURRINS 741	UWM Writing Project: Teacher Leadership in Writing
ED PSY 760	Academic Intervention and Alternative Assessment
ED PSY 779	Current Topics in Educational Psychology: (with the topic of “Self-Regulation Assessment and Interventions”)
ED PSY 852	Social, Psychological, and Biological Basis of Learning Disorders
EXCEDUC 685	Advanced Methods in Learning Disabilities
LINGUIS 570	Issues in Bilingualism
Other LINGUIS courses upon approval of the Certificate Director	

### Required Core Capstone

ILLI Capstone – Independent Study with advisor	1
--	---

**Total Credits** **16**

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Mathematics Teacher Leadership, Graduate Certificate

This certificate program provides teachers with current professional knowledge of mathematics teaching, learning trajectories, and assessment. It also imparts mathematical knowledge specialized for teaching and content-focused coaching strategies to improve instruction and student learning in mathematics.

Certificate completers will be positioned to contribute mathematics leadership as members of collaborative professional learning communities in schools, school districts, and other educational settings.

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Admission

Applicants must have completed a bachelor's degree with a 2.75 undergraduate GPA or a graduate degree with a minimum 3.0 GPA and must have teaching experience in mathematics. Applicants must also complete the reason statement in the application.

#### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Credits and Courses

Students complete 15-credits of coursework, including courses in instructional improvement, mathematics education, and mathematics instruction leadership.

Code	Title	Credits
<b>Instructional Improvement</b>		
Select 3-6 credits from the following:		3-6

CURRINS 560	Improving Mathematics Teaching and Learning: (Subtitled)
CURRINS 714	Analysis of Instruction to Improve Teaching and Learning
CURRINS 715	Guiding Instructional Improvement
CURRINS 725	Improving Teaching and Learning with Classroom-Based Assessments

#### Mathematics Education

Select 6-10 credits from the following:		6-10
CURRINS 580	Mathematics Education: (Subtitled)	
CURRINS 720	Curriculum and Standards for School Mathematics	
CURRINS 624	Instructional Trajectories for Fraction Concepts and Operations	
CURRINS 625	Principles and Practices of Teaching Geometry and Geometric Thinking	
CURRINS 626	Principles and Practices of Teaching Algebraic Reasoning	
CURRINS 730	Mathematics in Elementary Education	
CURRINS 731	Mathematics in the Secondary School	
CURRINS 779	Current Topics in Curriculum and Instruction: (Mathematics education subtitle)	

#### Capstone

CURRINS 761	Mathematics Instructional Leadership	3
-------------	--------------------------------------	---

**Total Credits** 12-19

### Additional Requirements

#### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. Transfer credits will be considered only if the applicant can provide evidence that the course is substantially the same as an approved course in the certificate program. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

#### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

#### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.

4. Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Transition for Students with Disabilities, Graduate Certificate

The Transition for Students with Disabilities Graduate Certificate provides students with increased knowledge and awareness of state-of-the-art transition planning, as well as experience with specific strategies related to transition assessment, instruction, and community/business collaboration. Those who complete the Transition for Students with Disabilities Certificate program will be able to critically examine and implement effective transition planning while ensuring students are accessing the general education curriculum; effectively collaborate with the business and general community to access work and post-secondary experiences for students with disabilities; implement customized job development strategies to meet the needs of students and the business; identify and collaborate with various community based organizations; learn strategies to develop self-determination and self-advocacy skills for students with disabilities; and understand cultural and ethnic diversity issues related to transition planning.

The courses are aligned with the APSE ([www.apse.org](http://www.apse.org) (<http://www.apse.org>)) professional standards and will provide the knowledge and skills to pass the national Certification of Employment Support Professionals (CESP).

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Applicants must have completed a bachelor’s degree prior to admission, with a minimum 2.75 cumulative undergraduate grade point average. Applicants with a graduate degree must have a minimum 3.0 graduate grade point average. Applicants must also complete the reason statement in the application.

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School

through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).

- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

The certificate requires a minimum of 15 credits. Students take five required courses and then, in consultation with the Program Coordinator, they may choose to take an optional 3 credit course in Business Management for more in-depth knowledge of working with the business community.

## Professional Education Requirements <sup>1</sup>

Code	Title	Credits
CURRINS 350	Field Seminar in Language Education	1
CURRINS 437 & CURRINS 637	Pre-Student Teaching in World Language Education and World Language Methods and Materials <sup>2</sup>	6
CURRINS 445	Seminar in Language Education <sup>3</sup>	3
CURRINS 438	Student Teaching in World Language Education	3
CURRINS 542	History and Politics of Second Language Education	3
CURRINS 543	Developing Biliteracy	3
CURRINS 546	Language, Content, and Comprehensible Input	3
<b>Total Credits</b>		<b>22</b>

<sup>1</sup> A grade of C or better is required for all professional education requirements, including student teaching. Prerequisites may be required.

<sup>2</sup> Concurrent enrollment in these courses is required. Students must complete paperwork in order to be assigned a student teaching placement. To be approved for placement, additional criteria must be met. See Benchmarks (p. 447) for details.

<sup>3</sup> Not required for students who are currently completing a portfolio in their major certification.

## Additional Requirements for Certification

- Minimum cumulative grade point average of 2.75 in all professional education courses. This includes any transfer coursework that is counted towards certification at UWM, as well as grades earned in student teaching or field experiences.
- Undergraduate students must meet the graduation requirements for their primary certification.
- Program Portfolio - based on the 10 WI Teacher Standards.

## Benchmarks

### Student Teaching

Prior to requesting/being assigned a student teaching placement, students must:

- Demonstrate Foreign Language Proficiency - A minimum score of Intermediate-High on the ACTFL OPI or equivalent is required prior to student teaching placement. Submit scores from your language proficiency test to your academic advisor.
- Complete an Immersion Experience - Required for all prospective language teachers, this requirement must be met by spending a semester or a year in a country where the chosen major language is spoken. Submit documentation of immersion experience to your academic advisor prior to student teaching placement.
- Complete and submit an application. Deadlines for submission are posted by the Office of Clinical Experiences. (<http://uwm.edu/education/academics/clinical-experiences/>)

To be approved, students must **ALSO** meet the following criteria:

- Be admitted to the School of Education
- Complete all required coursework. An exception to allow a student to take a course concurrently with student teaching requires approval by the student's faculty advisor.
- Have a minimum cumulative GPA of 2.5 on all undergraduate coursework, including transfer courses.
- Have a minimum 2.75 GPA in all content area and professional education courses.
- Passing scores reflected on your transcript for the Praxis II exam: English to Speakers of Other Languages: Content Knowledge #5361.
- Removal of all F and/or I (incomplete) grades.
- TB test results submitted to the Office of Clinical Experiences (may take up to 6 weeks).
- Criminal Background Check submitted to the Office of Clinical Experience

## Undergraduate Advising

Our purpose is to provide collaborative, mentoring relationships which promote educational, career, and professional development. We value a student-centered, holistic, and ethical approach to advising based on strong partnerships with students, faculty and staff, and the larger campus community. We are committed to creating a respectful and supportive environment. We encourage students to be self-reliant through informed decisions and choices based upon dissemination of accurate information. We value our own continuous professional development to enhance the quality of the advising experience.

### How to Prepare for an Advising Meeting

- Review your Advisement Report in PAWS (<http://uwm.edu/registrar/academic-unit-services/paws-academic-advisement/>).
- Come prepared with questions or topics for discussion.
- Make a list of courses you think you should take.
- Investigate opportunities to prepare for the job you want.
- Keep a record of your academic progress.
- Understand you are ultimately responsible for creating your educational, life, and career plans.
- Maintain honest and open communication with your advisor.
- Take responsibility for choices you make as a student and member of the UW-Milwaukee community.

### Scheduling an Appointment

Office of Student Services  
 Enderis Hall, Room 209  
 (414) 229-4721  
[soeinfo@uwm.edu](mailto:soeinfo@uwm.edu)

### Graduate Advising

If you are a School of Education graduate student, you may schedule an appointment with your faculty advisor by contacting your faculty advisor directly. Faculty contact information can be found in the Directory (<https://uwm.edu/education/directory/>). Your faculty advisor will be listed in your PAWS account.

## Urban Education

The School of Education offers an interdepartmental program of study leading to the PhD. Students must choose a specialization in either Adult, Continuing, and Higher Education Leadership, Art Education, Curriculum

and Instruction, Educational Administration, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education.

The program is designed to permit students to integrate their particular curricular areas of interest and specialization with a broader field of education, including urban education. Each specialization, with the exception of Multicultural Studies, is departmentally focused, and students must satisfy the admissions and curriculum requirements indicated for their particular specialization. Recognition of the specialization is acknowledged by official designation on the student's transcript.

Each of the specializations offers the doctoral student an opportunity to pursue study in a specific program area. For example, Adult, Continuing, and Higher Education Leadership emphasizes governance and leadership issues within urban adult education organizations. Educational Administration explores governance and Leadership issues of urban schools. Curriculum and Instruction provides program emphasis in a content area (e.g., reading), education level (e.g., early childhood), a general area (e.g., curriculum theory) or special area (e.g., guiding instructional improvement). Exceptional Education provides program emphasis in departmental interest areas (e.g., handicapping condition), or a cross-disciplinary interest.

A separate PhD with specialization in Counseling Psychology, Cognitive and Developmental Sciences, Research Methodology, and School Psychology is offered through the Department of Educational Psychology (<http://uwm.edu/graduateschool/educational-psychology/>). Multicultural Studies is a cross-department program allowing students to develop their own area of focus in collaboration with faculty in multicultural urban education. The Social Foundations of Education specialization provides students with the conceptual tools with which to examine the complex interrelationships between school and society, education and culture.

All graduates should have a broad understanding of the issues, problems and trends related to education, including urban education, and the application of these to their major.

The program requires each participant to develop research skills ranging from logic in inquiry to development of specific methodological skills in qualitative and quantitative methods. The PhD is a research degree and not only a professional preparation degree. Therefore research is an integral part of the program. Mastery of these skills is demonstrated through coursework, research projects and the dissertation. Graduates apply their skills in institutions of higher education, public or private school settings, federal, state or local governmental agencies, community organizations, and the private sector.

## Urban Education, PhD: Adult, Continuing, and Higher Education Leadership (ACHEL)

### Specialization Overview

The primary mission of the specialization in Adult, Continuing, and Higher Education Leadership (ACHEL) is to prepare individuals for leadership positions in urban adult, continuing, and higher educational organizations. The specialization will assist students to examine changing perspectives on urban postsecondary, adult and continuing educational organizations; changing notions of urban adult, continuing, and higher education teaching and learning; and the changing roles of the students, teachers, researchers, and administrators who work and study within urban adult, continuing, and higher education organizations.

For course descriptions in this area, visit the Administrative Leadership page (p. 1405).

### Degree Overview

The School of Education offers an interdepartmental program of study leading to the PhD. Students must choose a specialization in either Adult, Continuing, and Higher Education Leadership, Art Education, Curriculum and Instruction, Educational Administration, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education.

The program is designed to permit students to integrate their particular curricular areas of interest and specialization with a broader field of education, including urban education. Each specialization, with the exception of Multicultural Studies, is departmentally focused, and students must satisfy the admissions and curriculum requirements indicated for their particular specialization. Recognition of the specialization is acknowledged by official designation on the student's transcript.

Each of the specializations offers the doctoral student an opportunity to pursue study in a specific program area. For example, Adult, Continuing, and Higher Education Leadership emphasizes governance and leadership

issues within urban adult education organizations. Educational Administration explores governance and Leadership issues of urban schools. Curriculum and Instruction provides program emphasis in a content area (e.g., reading), education level (e.g., early childhood), a general area (e.g., curriculum theory) or special area (e.g., guiding instructional improvement). Exceptional Education provides program emphasis in departmental interest areas (e.g., handicapping condition), or a cross-disciplinary interest.

A separate PhD with specialization in Counseling Psychology, Learning and Development, Research Methodology, and School Psychology is offered through the Department of Educational Psychology (p. 355). Multicultural Studies is a cross-department program allowing students to develop their own area of focus in collaboration with faculty in multicultural urban education. The Social Foundations of Education specialization provides students with the conceptual tools with which to examine the complex interrelationships between school and society, education and culture.

All graduates should have a broad understanding of the issues, problems and trends related to education, including urban education, and the application of these to their major.

The program requires each participant to develop research skills ranging from logic in inquiry to development of specific methodological skills in qualitative and quantitative methods. The PhD is a research degree and not only a professional preparation degree. Therefore research is an integral part of the program. Mastery of these skills is demonstrated through coursework, research projects and the dissertation. Graduates apply their skills, in institutions of higher education, public or private school settings, federal, state, or local governmental agencies, community organizations, and the private sector.

### Cooperating Departments

- Administrative Leadership
- Educational Policy and Community Studies
- Educational Psychology
- Teaching and Learning
- Information Studies (School of)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements plus the following program requirements to be considered for admission. Applicants must also complete the reason statement in the application.

### Graduate Record Examination

GRE scores are not required for admission to program.

### Grade Point Average

Applicants must have an undergraduate GPA of 2.75.

Check with specializations that might have additional requirements.

### Writing Sample

Applicants must submit a writing sample completed within the last five years. The writing sample must be single authored, at least 1500 words, and must be selected from **one** of the following options:

1. Master's Thesis
2. Undergraduate Senior Thesis
3. Technical Report
4. Term Paper
5. Publication
6. Written Description of a Project
7. Action Research Project
8. Writing sample or written response showing evidence of analytical and argumentative writing and reasoning. The response should address the following: How would you conceptualize and analyze issues in urban education? The response to this question must show evidence of appropriate references to a knowledge base.

The writing sample must be submitted with the application.

### Reasons Statement

A Reasons Statement is used to determine the appropriateness of your educational and professional goals and serves as an example of your ability to express yourself in writing. In the statement:

- Explain your reasons for pursuing graduate study.
- Describe specific interests and your background in the field.
- List any relevant skills or training you have acquired.
- List relevant academic awards or honors you have received.

### Curriculum Vitae/Resume

All UEDP applicants are required to submit a current Curriculum Vitae/Resume.

### Recommendations

The program requires 3 letters of recommendation. These letters must be submitted through the application's electronic recommendation feature by the recommenders themselves. Letters uploaded or sent by the applicant will not be accepted. If possible, please provide your recommenders with a summary of your application materials. Feel free

to encourage your recommenders to provide illustrations linking your experiences and abilities with the aims of the doctoral specialization.

### Application

Applicants are required to articulate their urban and research interests and goals in application materials. An intended concentration within the PhD must be specified at time of application.

1. Applicants who fail to satisfy these admission requirements will not be recommended for admission. However, satisfying these minima does not guarantee admission.
2. Applicants who are not recommended for admission will be provided an opportunity to request a reconsideration.

Individual specializations may expect prior coursework in that area. Applicants may contact the Director for specific information. Openings in the program are limited.

Students should apply by December 1st of the year prior to entry, or earlier, if they plan to apply for University-wide fellowships. Applications completed after the priority deadline will be reviewed on a rolling basis up until April 1st for Fall admission of that calendar year.

***Application materials MUST be submitted by April 1st in order to be admitted for the fall semester.***

## Credits and Courses

Minimum degree requirement is 54 credits beyond the bachelor's degree (although students ordinarily take more than 54), at least 27 of which must be earned in residence at UWM (i.e., on the UWM campus).

A minimum grade of B or better is required for all courses counting toward the Urban Education doctoral degree. Students earning a B- or lower must consult with their advisor to fulfill the requirement within one semester.

In consultation with the major professor, the student designs a program of studies that enables the student to gain the knowledge and skills appropriate to the student's goals.

The program of studies includes the following:

### The Doctoral Seminars

All doctoral students must take three 3-credit seminar courses devoted to content involving education in an urban environment.

Code	Title	Credits
EDUC 701	Critical Issues in Urban Education	3
EDUC 801	Seminar in Urban Education	3
EDUC 901	Advanced Seminar in Urban Education	3

### Research Requirement

Department specialization requirements may exceed those specified here.

Code	Title	Credits
Choose one:		
ED PSY 724	Educational Statistical Methods II (prerequisite is ED PSY 624)	3-4
ED PSY 728	Techniques of Educational Research (prerequisite is ED PSY 624)	

CURRINS/AD LDSP 729	Qualitative Research and Field Studies in Educational Settings	3
	Additional advanced-level (600 or above) coursework from either a qualitative track or quantitative track	6
	Approved research design course	3
<b>Total Credits</b>		<b>15-16</b>

All students must demonstrate knowledge in this area by completing the specialization equivalent to the preliminary exam and successfully defending a dissertation.

### Designated Specialization

Students indicate a specific area of specialization by applying for one of the transcript-designated specializations in either Adult, Continuing, and Higher Education Leadership, Curriculum and Instruction, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education. Students may be required to meet the specific admissions and program requirements for their intended specialization in addition to meeting the PhD admissions and program requirements. (Please see the accompanying explanation and requirements for each specialization.)

### Residency

Residence requirements cannot be met at the master's level, and must be fulfilled before you can achieve dissertator status. There are two types of doctoral residency that must be met:

#### Academic Year Requirement

You must complete 8 to 12 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, including summer sessions. This requirement is intended to provide immersion in the chosen discipline and foster participation in the community of scholars.

#### 50% Requirement

At least 50% of the graduate credits required for your PhD program must be completed at UWM in doctoral status.

### Adult, Continuing, and Higher Education Leadership Specialization

Subsequent to UEDP admission, the student must submit a program of studies for the concentration in Adult, Continuing, and Higher Education Leadership, developed in conjunction with the student's faculty advisor and committee, to the Director of the Urban Education Doctoral Program.

The student must meet all of the program requirements of the Urban Education Doctoral Program. The specialization in Adult, Continuing, and Higher Education Leadership consists of a minimum of (34) graduate credits excluding dissertation credits.

The coursework will be structured as follows:

Code	Title	Credits
<b>Required</b>		
AD LDSP 827	Seminar in Adult and Organizational Learning	3
AD LDSP 897	Seminar-Philosophy and History of Adult, Continuing & Higher Education	3
AD LDSP 967	Seminar in Urban Adult, Continuing, and Higher Education	3
AD LDSP 999	Independent Reading	3

Students with no background in Adult, Continuing and Higher Education would enroll in the following during their first semester of coursework:		0-3
AD LDSP 709	Introduction to Higher Education Administration	
or AD LDSP 757	Principles and Foundations of Adult Education	
<b>Total Credits</b>		<b>12-15</b>

### Electives

Code	Title	Credits
AD LDSP 607	Coordination of Staff Development and Training Program	3
AD LDSP 631	Emerging Research in Human Resource Development	3
AD LDSP 632	International Cross-Cultural Experiences in Developing Human Resources	3
AD LDSP 647	Evaluation of Adult, Continuing, and Higher Education Programs	3
AD LDSP 667	Program Planning in Adult Education	3
AD LDSP 687	Instructional Design and Teaching Strategies	3
AD LDSP 691	Leadership Ethics in Multicultural Organizations	1
AD LDSP 692	Quality Management in Education	1
AD LDSP 693	Decision Making in Multicultural Organizations	1
AD LDSP 702	Leadership in Educational Organizations	3
AD LDSP 707	Using Technology With Adult Learners	3
AD LDSP 709	Introduction to Higher Education Administration	3
AD LDSP 710	Organizational Change and Team Leadership	3
AD LDSP 711	Organization and Governance in Higher Education Administration	3
AD LDSP 737	Distance Education for Adults	3
AD LDSP 740	Seminar in Innovative Technologies for Learning in Education	3
AD LDSP 747	Strategic Planning and Budgeting in Adult, Continuing, and Higher Education	3
AD LDSP 757	Principles and Foundations of Adult Education	3
AD LDSP 777	Leadership in Multicultural Organizations	3
AD LDSP 778	Introduction to College Student Personnel Administration	3
AD LDSP 787	Administration of Adult Education Programs	3
AD LDSP 795	Women and Leadership in Education	3
AD LDSP 797	The Student in the Collegiate Context	3
AD LDSP 798	Seminar in Human Resource Development	3
AD LDSP 867	Seminar in Continuing Education in the Professions	3

AD LDSP 877	Seminar in Two-Year Post Secondary Institutions	3
AD LDSP 900	Role of the Professoriate	3
AD LDSP 978	Seminar in Student Personnel Administration	3
ED POL 705	Sociology of Education and Community Engagement	3

## Additional Requirements

### Major Professor

Upon admission to the doctoral program, the student is assigned an initial advisor from their intended specialization. This person is available to discuss initial course selection and provide general advice about the program and specialization. After beginning the program and before filing a Program of Studies, the student will seek a permanent major professor from their specialization who is eligible to serve in such a capacity. This permanent advisor may be the initial advisor if the student desires. The major professor is also chair of the student's dissertation committee.

Selection of the major professor is by mutual consent between the student and the faculty member. The student must notify the UEDP in writing when the major professor has been selected.

### Foreign Language Requirement

There is no foreign language requirement. However, individual students may be required to demonstrate proficiency in a foreign language if such proficiency is determined to be necessary by a student's committee.

### Doctoral Committee Membership

The dissertation advisor is an Urban Education doctoral advisor and member of the Department of Administrative Leadership. At least two other committee members must be from the Department of Administrative Leadership.

### Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for the degree. The examination covers the area of specialization, urban education, the minor, and research methods.

### Dissertation

The candidate must present a dissertation reporting the results of an original research study appropriate to the student's program. Prior to beginning the research, the candidate must present an acceptable dissertation proposal and defend it at an oral hearing.

### Dissertation Defense

The candidate must, as the final step toward the degree, pass an oral examination in defense of the dissertation.

### Time Limit

Students who do not complete all degree requirements within seven years from the date of admission to the doctoral program will be recommended for dismissal to the Graduate School.

### Other Requirements

This is only a summary of the doctoral program requirements. A complete list of requirements is available from the Office of Doctoral Studies.

Doctoral Committees may specify course requirements which exceed the minima described here.

For additional information on the PhD, see the Graduate School Doctoral Requirements (<https://uwm.edu/graduateschool/students/academic-policies-and-procedures/doctoral-resources/doctoral-requirements/>).

### Exit Requirements

Contingent upon successful completion of program requirements, the doctoral preliminary examination, and the dissertation defense, the Chair of the Department of Administrative Leadership must give final approval for the inclusion of "Urban Education: Adult, Continuing, and Higher Education Leadership" on the student's transcript.

## Urban Education, PhD: Art Education

*Effective Fall 2021, the Art Education specialization has suspended admission.*

### Specialization Overview

The program is designed to permit students to integrate their particular media and curricular interests in art and art education with theoretical knowledge and educational practices tied to the contexts of urban education and community studies. An art education specialization provides each graduate student with opportunities for growth as an artist, teacher, and researcher through the development of their own arts practices and the study of the social and cultural implications of the arts in society and among learners. The program emphasizes the exploration of media, the development of socially responsive art curricula in urban environments, and research using disciplines of inquiry in the arts and art education.

The program requires each participant to develop research skills using qualitative and quantitative methods. The PhD is a research degree, not just a professional preparation degree. Mastery of these skills is demonstrated through coursework, research projects, and the dissertation. Many graduates apply their skills in institutions of higher education; public or private school settings; federal, state, or local governmental agencies; community organizations; and the private sector.

### Degree Overview

The School of Education offers an interdepartmental program of study leading to the PhD. Students must choose a specialization in either Adult, Continuing, and Higher Education Leadership, Art Education, Curriculum and Instruction, Educational Administration, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education.

The program is designed to permit students to integrate their particular curricular areas of interest and specialization with a broader field of education, including urban education. Each specialization, with the exception of Multicultural Studies, is departmentally focused, and students must satisfy the admissions and curriculum requirements indicated for their particular specialization. Recognition of the specialization is acknowledged by official designation on the student's transcript.

Each of the specializations offers the doctoral student an opportunity to pursue study in a specific program area. For example, Adult, Continuing, and Higher Education Leadership emphasizes governance and leadership issues within urban adult education organizations. Educational Administration explores governance and Leadership issues of urban

schools. Curriculum and Instruction provides program emphasis in a content area (e.g., reading), education level (e.g., early childhood), a general area (e.g., curriculum theory) or special area (e.g., guiding instructional improvement). Exceptional Education provides program emphasis in departmental interest areas (e.g., handicapping condition), or a cross-disciplinary interest.

A separate PhD with specialization in Counseling Psychology, Learning and Development, Research Methodology, and School Psychology is offered through the Department of Educational Psychology (p. 355). Multicultural Studies is a cross-department program allowing students to develop their own area of focus in collaboration with faculty in multicultural urban education. The Social Foundations of Education specialization provides students with the conceptual tools with which to examine the complex interrelationships between school and society, education and culture.

All graduates should have a broad understanding of the issues, problems and trends related to education, including urban education, and the application of these to their major.

The program requires each participant to develop research skills ranging from logic in inquiry to development of specific methodological skills in qualitative and quantitative methods. The PhD is a research degree and not only a professional preparation degree. Therefore research is an integral part of the program. Code	Title	Credits
Choose one:		3-4
ED PSY 724	Educational Statistical Methods II (prerequisite is ED PSY 624)	
ED PSY 728	Techniques of Educational Research (prerequisite is ED PSY 624)	
CURRINS/AD LDSP 729	Qualitative Research and Field Studies in Educational Settings	3
Additional advanced-level (600 or above) coursework from either a qualitative track or quantitative track		6
Approved research design course		3
<b>Total Credits</b>		<b>15-16</b>

All students must demonstrate knowledge in this area by completing the specialization equivalent to the preliminary exam and successfully defending a dissertation.

### Designated Specialization

Students indicate a specific area of specialization by applying for one of the transcript-designated specializations in either Adult, Continuing, and Higher Education Leadership, Curriculum and Instruction, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education. Students may be required to meet the specific admissions and program requirements for their intended specialization in addition to meeting the PhD admissions and program requirements.

(Please see the accompanying explanation and requirements for each specialization.)

### Residency

Residence requirements cannot be met at the master's level, and must be fulfilled before you can achieve dissertator status. There are two types of doctoral residency that must be met:

#### Academic Year Requirement

You must complete 8 to 12 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, including summer sessions. This requirement is intended to provide immersion in the chosen discipline and foster participation in the community of scholars.

#### 50% Requirement

At least 50% of the graduate credits required for your PhD program must be completed at UWM in doctoral status.

#### Art Education Specialization

Students wishing to specialize in Art Education must first be admitted to the Urban Education Doctoral Program (UEDP). Applications will be reviewed by the UEDP Admissions Committee as well as the Art Education graduate faculty in the Department of Art and Design within the Peck School of the Arts.

#### Specialization Requirements

1. The student must meet all Urban Education Doctoral Program requirements.
2. The student must submit a program for concentration in Art Education, developed in conjunction with the student's advisor. The program of study must be reviewed and approved by the Art Education graduate faculty and the UEDP director.
3. Students not having the equivalent of a master of arts, master of science, or master of fine arts degree in art education, or related field recognized by the Department of Art and Design may be required to take appropriate coursework as a prerequisite to the doctoral specialization in Art Education.
4. Students will be required to pass a preliminary examination by demonstrating competence in urban education, research methods, the specialization in Art Education, and their additional area of study.
5. A dissertation will be required in the specialization area of Art Education. The dissertation advisor must be an approved doctoral advisor or major professor who is a member of the specialization faculty.

For a specialization in Art Education, coursework must be completed in four areas:

1. Urban education
2. Research
3. Art education
4. An additional area of study

At least 27 credits must be completed in doctoral status at UWM, not including dissertation credits.

Code	Title	Credits
<b>Urban Course Seminar Requirements</b>		
EDUC 701	Critical Issues in Urban Education	9

ART ED 801	Seminar in Urban Education and the Visual Arts	
EDUC 901	Advanced Seminar in Urban Education	
<b>Research Methods Course Requirements</b>		<b>16</b>
ED PSY 624	Educational Statistical Methods I	
ED PSY 724	Educational Statistical Methods II	
AD LDSP/CURRINS 729	Qualitative Research and Field Studies in Education Settings	
Select at least 6 credits (700-level or above) from either a quantitative track or a qualitative track <sup>1</sup>		
<b>Major Concentration Course Requirements</b>		<b>9</b>
ART ED 810	Curricular Designs for Art Instruction	
ART ED 830	Teaching Art With Works of Art	
Select 6 credits in Art Education courses (700-level or above)		6
Select 9 credits in a specific area <sup>2</sup>		9
Select at least 6 credits in one department outside the Department of Art and Design and the School of Education that enables the research endeavor		6
<b>Total Credits</b>		<b>55</b>

<sup>1</sup> Students should work with the major professor to determine the appropriate advanced level courses.

<sup>2</sup> Select 9 credits in a specific area such as:

- Content Area (studio practices, art history, aesthetics, art criticism, cultural foundations, research methods).
- Education level (early childhood, elementary, secondary, higher education, adult).
- Social Contexts (museums, community studies, preK-12, gifted and talented, global studies, interdisciplinary practices).
- Curricular Issues (assessment and evaluation, digital and electronic media and instruction, curriculum studies).

## Additional Requirements

### Major Professor

Upon admission to the doctoral program, the student is assigned an initial advisor from his or her intended specialization. This person is available to discuss initial course selection and provide general advice about the program and specialization. After beginning the program and before filing a Program of Studies, the student will seek a permanent major professor from his/her specialization who is eligible to serve in such a capacity. This permanent advisor may be the initial advisor if the student desires. The major professor is also chair of the student's dissertation committee.

Selection of the major professor is by mutual consent between the student and the faculty member. The student must notify the UEDP in writing when the major professor has been selected.

### Foreign Language Requirement

There is no foreign language requirement. However, individual students may be required to demonstrate proficiency in a foreign language if such proficiency is determined to be necessary by a student's committee.

### Residence

The residency requirement is satisfied through the successful completion of 9 or more credits in each of two consecutive semesters, excluding

summer, or by completing at least 6 graduate credits in each of three consecutive semesters, excluding summer.

It is the student's responsibility to notify the Office of Doctoral Studies when residency requirements have been met. Such notification must be in writing and must include the semesters, year(s) and number of credits taken during each of the applicable semesters.

### Doctoral Committee Membership

Three graduate faculty from the Department of Art and Design, at least two of which must be from the Art Education area (including the major professor).

### Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for the degree. The examination covers the area of specialization, urban education, the minor, and research methods.

### Dissertation

The candidate must present a dissertation reporting the results of an original research study appropriate to the student's program. Prior to beginning the research, the candidate must present an acceptable dissertation proposal and defend it at an oral hearing.

### Dissertation Defense

The candidate must, as the final step toward the degree, pass an oral examination in defense of the dissertation.

### Time Limit

Students who do not complete all degree requirements within seven years from the date of admission to the doctoral program will be recommended for dismissal to the Graduate School.

### Other Requirements

This is only a summary of the doctoral program requirements. A complete list of requirements is available from the Office of Doctoral Studies. Doctoral Committees may specify course requirements which exceed the minima described here.

For additional information on the PhD, see the Graduate School Doctoral Requirements (<http://www.dev.uwm.edu/graduateschool/doctoral-requirements/>)

### Exit Requirements

Contingent upon the satisfactory completion of program requirements, the preliminary qualifying examination, and the successful oral defense of the dissertation, the Urban Education Doctoral Committee chair will give final approval for the specialization inclusion on transcripts.

## Urban Education, PhD: Curriculum and Instruction

### Specialization Overview

The specialization in Curriculum and Instruction (C&I) gives students an opportunity to improve professional experiences with the students they teach, the educational contexts in which they work, and their disciplinary and content knowledge. The Curriculum and Instruction specialization combines theoretical and disciplinary content knowledge, practical experiences and scholarly activities.

The program prepares education professionals to work in such varied settings as schools, colleges and universities, school district central

offices, government agencies, community organizations and private consulting. Graduates of the program are prepared for leadership roles as curriculum directors, instructional coordinators, school partnership coordinators, applied researchers, professional development coordinators and professors.

For course descriptions in this area, visit the Curriculum and Instruction courses (p. 1674).

## Degree Overview

The School of Education offers an interdepartmental program of study leading to the PhD. Students must choose a specialization in either Adult, Continuing, and Higher Education Leadership, Art Education, Curriculum and Instruction, Educational Administration, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education.

The program is designed to permit students to integrate their particular curricular areas of interest and specialization with a broader field of education, including urban education. Each specialization, with the exception of Multicultural Studies, is departmentally focused, and students must satisfy the admissions and curriculum requirements indicated for their particular specialization. Recognition of the specialization is acknowledged by official designation on the student's transcript.

Each of the specializations offers the doctoral student an opportunity to pursue study in a specific program area. For example, Adult, Continuing, and Higher Education Leadership emphasizes governance and leadership issues within urban adult education organizations. Educational Administration explores governance and Leadership issues of urban schools. Curriculum and Instruction provides program emphasis in a content area (e.g., reading), education level (e.g., early childhood), a general area (e.g., curriculum theory) or special area (e.g., guiding instructional improvement). Exceptional Education provides program emphasis in departmental interest areas (e.g., handicapping condition), or a cross-disciplinary interest.

A separate PhD with specialization in Counseling Psychology, Learning and Development, Research Methodology, and School Psychology is offered through the Department of Educational Psychology (p. 355). Multicultural Studies is a cross-department program allowing students to develop their own area of focus in collaboration with faculty in multicultural urban education. The Social Foundations of Education specialization provides students with the conceptual tools with which to examine the complex interrelationships between school and society, education and culture.

All graduates should have a broad understanding of the issues, problems and trends related to education, including urban education, and the application of these to their major.

The program requires each participant to develop research skills ranging from logic in inquiry to development of specific methodological skills in qualitative and quantitative methods. The PhD is a research degree and not only a professional preparation degree. Therefore research is an integral part of the program. Mastery of these skills is demonstrated through coursework, research projects and the dissertation. Graduates apply their skills, in institutions of higher education, public or private school settings, federal, state, or local governmental agencies, community organizations, and the private sector.

## Cooperating Departments

- Administrative Leadership
- Educational Policy and Community Studies
- Educational Psychology
- Teaching and Learning
- Information Studies (School of)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements plus the following program requirements to be considered for admission. Applicants must also complete the reason statement in the application.

### Graduate Record Examination

GRE scores are not required for admission to program.

### Grade Point Average

Applicants must have an undergraduate GPA of 2.75.

Check with specializations that might have additional requirements.

### Writing Sample

Applicants must submit a writing sample completed within the last five years. The writing sample must be single authored, at least 1500 words, and must be selected from **one** of the following options:

1. Master's Thesis
2. Undergraduate Senior Thesis
3. Technical Report
4. Term Paper
5. Publication
6. Written Description of a Project
7. Action Research Project
8. Writing sample or written response showing evidence of analytical and argumentative writing and reasoning. The response should address the following: How would you conceptualize and analyze issues in urban education? The response to this question must show evidence of appropriate references to a knowledge base.

The writing sample must be submitted with the application.

### Reasons Statement

A Reasons Statement is used to determine the appropriateness of your educational and professional goals and serves as an example of your ability to express yourself in writing. In the statement:

- Explain your reasons for pursuing graduate study.
- Describe specific interests and your background in the field.
- List any relevant skills or training you have acquired.
- List relevant academic awards or honors you have received.

### Curriculum Vitae/Resume

All UEDP applicants are required to submit a current Curriculum Vitae/Resume.

### Recommendations

The program requires 3 letters of recommendation. These letters must be submitted through the application’s electronic recommendation feature by the recommenders themselves. Letters uploaded or sent by the applicant will not be accepted. If possible, please provide your recommenders with a summary of your application materials. Feel free to encourage your recommenders to provide illustrations linking your experiences and abilities with the aims of the doctoral specialization.

### Application

Applicants are required to articulate their urban and research interests and goals in application materials. An intended concentration within the PhD must be specified at time of application.

1. Applicants who fail to satisfy these admission requirements will not be recommended for admission. However, satisfying these minima does not guarantee admission.
2. Applicants who are not recommended for admission will be provided an opportunity to request a reconsideration.

Individual specializations may expect prior coursework in that area. Applicants may contact the Director for specific information. Openings in the program are limited.

Students should apply by December 1st of the year prior to entry, or earlier, if they plan to apply for University-wide fellowships. Applications completed after the priority deadline will be reviewed on a rolling basis up until April 1st for Fall admission of that calendar year.

**Application materials MUST be submitted by April 1st in order to be admitted for the fall semester.**

## Credits and Courses

Minimum degree requirement is 54 credits beyond the bachelor’s degree (although students ordinarily take more than 54), at least 27 of which must be earned in residence at UWM (i.e., on the UWM campus).

A minimum grade of B or better is required for all courses counting toward the Urban Education doctoral degree. Students earning a B- or lower must consult with their advisor to fulfill the requirement within one semester.

In consultation with the major professor, the student designs a program of studies that enables the student to gain the knowledge and skills appropriate to the student’s goals.

The program of studies includes the following:

### The Doctoral Seminars

All doctoral students must take three 3-credit seminar courses devoted to content involving education in an urban environment.

Code	Title	Credits
EDUC 701	Critical Issues in Urban Education	3
EDUC 801	Seminar in Urban Education	3
EDUC 901	Advanced Seminar in Urban Education	3

## Research Requirement

Department specialization requirements may exceed those specified here.

Code	Title	Credits
Choose one:		
ED PSY 724	Educational Statistical Methods II (prerequisite is ED PSY 624)	3-4
ED PSY 728	Techniques of Educational Research (prerequisite is ED PSY 624)	
CURRINS/AD LDSP 729	Qualitative Research and Field Studies in Educational Settings	3
Additional advanced-level (600 or above) coursework from either a qualitative track or quantitative track		6
Approved research design course		3
<b>Total Credits</b>		<b>15-16</b>

All students must demonstrate knowledge in this area by completing the specialization equivalent to the preliminary exam and successfully defending a dissertation.

## Designated Specialization

Students indicate a specific area of specialization by applying for one of the transcript-designated specializations in either Adult, Continuing, and Higher Education Leadership, Curriculum and Instruction, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education. Students may be required to meet the specific admissions and program requirements for their intended specialization in addition to meeting the PhD admissions and program requirements. (Please see the accompanying explanation and requirements for each specialization.)

## Residency

Residence requirements cannot be met at the master’s level, and must be fulfilled before you can achieve dissertator status. There are two types of doctoral residency that must be met:

### Academic Year Requirement

You must complete 8 to 12 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, including summer sessions. This requirement is intended to provide immersion in the chosen discipline and foster participation in the community of scholars.

### 50% Requirement

At least 50% of the graduate credits required for your PhD program must be completed at UWM in doctoral status.

## Curriculum and Instruction Specialization

1. Students wishing to specialize in Curriculum and Instruction must first be admitted to the Urban Education Doctoral Program (UEDP).
2. Subsequent to UEDP admission, the student must submit to the Curriculum and Instruction Graduate Committee a program for concentration in Curriculum and Instruction developed in conjunction with the student’s advisor.

The student must meet all of the program requirements of the Urban Education Doctoral Program.

Specialization in Curriculum and Instruction consists of a minimum of 24 credits, 18 of which must be taken in Curriculum and Instruction. No

more than 6 credits taken prior to admission to the PhD program may be counted toward the specialty. The credits are to be distributed as follows:

Code	Title	Credits
<b>General Curriculum and Instruction</b>		
CURRINS 813	Instructional Research and Theory	3
CURRINS 816	Curriculum Designs for Urban Schools	3
CURRINS 819	Theory and Design of Curriculum	3
<b>Curriculum and Instruction Area of Interest</b>		
Select a minimum of 15 credits in the following:		15
Content area: (e.g., reading)		
Education level area (e.g., early childhood)		
General area: (e.g., curriculum theory)		
Special area: (e.g., guiding instructional improvement)		
<b>Total Credits</b>		<b>24</b>

The UEDP doctoral preliminary examination includes a section covering the student's Curriculum and Instruction specialization.

A dissertation with a Curriculum and Instruction emphasis is required. The dissertation advisor must be an UEDP doctoral advisor and a member of the Department of Teaching and Learning. At least two other committee members must be from Curriculum and Instruction.

## Additional Requirements

### Major Professor

Upon admission to the doctoral program, the student is assigned an initial advisor from their intended specialization. This person is available to discuss initial course selection and provide general advice about the program and specialization. After beginning the program and before filing a Program of Studies, the student will seek a permanent major professor from their specialization who is eligible to serve in such a capacity. This permanent advisor may be the initial advisor if the student desires. The major professor is also chair of the student's dissertation committee.

Selection of the major professor is by mutual consent between the student and the faculty member. The student must notify the UEDP in writing when the major professor has been selected.

### Foreign Language Requirement

There is no foreign language requirement. However, individual students may be required to demonstrate proficiency in a foreign language if such proficiency is determined to be necessary by a student's committee.

### Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for the degree. The examination covers the area of specialization, urban education, the minor, and research methods.

### Dissertation

The candidate must present a dissertation reporting the results of an original research study appropriate to the student's program. Prior to beginning the research, the candidate must present an acceptable dissertation proposal and defend it at an oral hearing.

### Dissertation Defense

The candidate must, as the final step toward the degree, pass an oral examination in defense of the dissertation.

## Time Limit

Students who do not complete all degree requirements within seven years from the date of admission to the doctoral program will be recommended for dismissal to the Graduate School.

## Other Requirements

This is only a summary of the doctoral program requirements. A complete list of requirements is available from the Office of Doctoral Studies. Doctoral Committees may specify course requirements which exceed the minima described here.

For additional information on the PhD, see the Graduate School Doctoral Requirements (<http://www.dev.uwm.edu/graduateschool/doctoral-requirements/>).

## Exit Requirements

Contingent upon completion of program requirements, the doctoral preliminary examination, and the successful defense of the dissertation, the Chair of the Department of Teaching and Learning will give final approval for the inclusion of "Urban Education: Curriculum and Instruction" on the student's transcript.

# Urban Education, PhD: Educational Administration

## Specialization Overview

The specialization in Educational Administration focuses on the development of educational leaders, particularly for service in urban metropolitan areas. Individuals trained in this program can provide excellence in leadership by nurturing leadership among others in the school community, creating a positive work environment for students, staff, and parents, and lastly contribute to the quality of teaching and learning in the district and within its schools. The curriculum draws from a variety of sources including current research and literature, national and state professional association standards, federal and state governmental guidelines, and the field of practice.

For course descriptions in this area, visit the Administrative Leadership courses (p. 1405).

## Degree Overview

The School of Education offers an interdepartmental program of study leading to the PhD. Students must choose a specialization in either Adult, Continuing, and Higher Education Leadership, Art Education, Curriculum and Instruction, Educational Administration, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education.

The program is designed to permit students to integrate their particular curricular areas of interest and specialization with a broader field of education, including urban education. Each specialization, with the exception of Multicultural Studies, is departmentally focused, and students must satisfy the admissions and curriculum requirements indicated for their particular specialization. Recognition of the specialization is acknowledged by official designation on the student's transcript.

Each of the specializations offers the doctoral student an opportunity to pursue study in a specific program area. For example, Adult, Continuing, and Higher Education Leadership emphasizes governance and leadership

issues within urban adult education organizations. Educational Administration explores governance and Leadership issues of urban schools. Curriculum and Instruction provides program emphasis in a content area (e.g., reading), education level (e.g., early childhood), a general area (e.g., curriculum theory) or special area (e.g., guiding instructional improvement). Exceptional Education provides program emphasis in departmental interest areas (e.g., handicapping condition), or a cross-disciplinary interest.

A separate PhD with specialization in Counseling Psychology, Learning and Development, Research Methodology, and School Psychology is offered through the Department of Educational Psychology (p. 355). Multicultural Studies is a cross-department program allowing students to develop their own area of focus in collaboration with faculty in multicultural urban education. The Social Foundations of Education specialization provides students with the conceptual tools with which to examine the complex interrelationships between school and society, education and culture.

All graduates should have a broad understanding of the issues, problems and trends related to education, including urban education, and the application of these to their major.

The program requires each participant to develop research skills ranging from logic in inquiry to development of specific methodological skills in qualitative and quantitative methods. The PhD is a research degree and not only a professional preparation degree. Therefore research is an integral part of the program. Mastery of these skills is demonstrated through coursework, research projects and the dissertation. Graduates apply their skills, in institutions of higher education, public or private school settings, federal, state, or local governmental agencies, community organizations, and the private sector.

ED PSY 728	Techniques of Educational Research (prerequisite is ED PSY 624)	
CURRINS/AD LDSP 729	Qualitative Research and Field Studies in Educational Settings	3
Additional advanced-level (600 or above) coursework from either a qualitative track or quantitative track		6
Approved research design course		3
<b>Total Credits</b>		<b>15-16</b>

All students must demonstrate knowledge in this area by completing the specialization equivalent to the preliminary exam and successfully defending a dissertation.

### Designated Specialization

Students indicate a specific area of specialization by applying for one of the transcript-designated specializations in either Adult, Continuing, and Higher Education Leadership, Curriculum and Instruction, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education. Students may be required to meet the specific admissions and program requirements for their intended specialization in addition to meeting the PhD admissions and program requirements. (Please see the accompanying explanation and requirements for each specialization.)

## Residency

Residence requirements cannot be met at the master’s level, and must be fulfilled before you can achieve dissertator status. There are two types of doctoral residency that must be met:

### Academic Year Requirement

You must complete 8 to 12 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, including summer sessions. This requirement is intended to provide immersion in the chosen discipline and foster participation in the community of scholars.

### 50% Requirement

At least 50% of the graduate credits required for your PhD program must be completed at UWM in doctoral status.

## Educational Administration Specialization

Subsequent to UEDP admission, the student must submit a program for concentration in Educational Administration, developed in conjunction with the student’s advisor and committee, to the chair of the department of Administrative Leadership.

The student must meet all of the program requirements of the Urban Education Doctoral Program. The specialization in Educational Administration consists of a minimum of 30 graduate credits excluding dissertation credits.

The credits are to be distributed as follows:

### PhD Non-Certification Orientation

Code	Title	Credits
<b>Required Courses</b>		
AD LDSP 801	Urban Education: Doctoral Seminar	3
AD LDSP 832	Educational Politics and Policymaking	3
AD LDSP 842	Program Planning and Evaluation in Education	3
AD LDSP 862	School Finance	3
<b>Electives in Administrative Leadership (700+)</b>		<b>18</b>
<b>Total Credits</b>		<b>30</b>

### PhD District Administrator/Superintendent Certification Orientation

Code	Title	Credits
<b>Required</b>		
AD LDSP 801	Urban Education: Doctoral Seminar	3
AD LDSP 802	District Leadership for Learning	3
AD LDSP 812	Educational Personnel Administration and Supervision	3
AD LDSP 832	Educational Politics and Policymaking	3
AD LDSP 842	Program Planning and Evaluation in Education	3
AD LDSP 862	School Finance	3
AD LDSP 882	Practicum in the School Superintendency	3
<b>Electives in Administrative Leadership (700+)</b>		<b>9</b>
<b>Total Credits</b>		<b>30</b>

Although a Master’s Degree and certification as a principal are prerequisites to certification as a School Superintendent in Wisconsin, doctoral students may satisfy the requirements for both licenses within

their PhD Program of Study. Advisors will design such programs based on individual student need.

Any post-master's courses taken prior to admission while enrolled as a non-degree student in the Specialist Program for School Superintendent Certification do not have to be repeated, subject to advisor and UEDC Director approval. All such credits may be applied toward the 30 credits required in the area of concentration except that in no case may a PhD area of concentration contain fewer than 9 upper level graduate credits (excluding dissertation credits) taken after admission to doctoral study. Individuals who have not completed at least 6 credits of accepted graduate coursework within the 5 years immediately prior to admission must take a minimum of 15 credits.

## Additional Requirements

### Major Professor

Upon admission to the doctoral program, the student is assigned an initial advisor from their intended specialization. This person is available to discuss initial course selection and provide general advice about the program and specialization. After beginning the program and before filing a Program of Studies, the student will seek a permanent major professor from their specialization who is eligible to serve in such a capacity. This permanent advisor may be the initial advisor if the student desires. The major professor is also chair of the student's dissertation committee.

Selection of the major professor is by mutual consent between the student and the faculty member. The student must notify the UEDP in writing when the major professor has been selected.

### Foreign Language Requirement

There is no foreign language requirement. However, individual students may be required to demonstrate proficiency in a foreign language if such proficiency is determined to be necessary by a student's committee.

### Doctoral Committee Membership

The dissertation advisor is an Urban Education doctoral advisor and member of the Department of Administrative Leadership. At least two other committee members must be from the Department of Administrative Leadership.

### Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for the degree. The examination covers the area of specialization, urban education, the minor, and research methods.

### Dissertation

The candidate must present a dissertation reporting the results of an original research study appropriate to the student's program. Prior to beginning the research, the candidate must present an acceptable dissertation proposal and defend it at an oral hearing.

### Dissertation Defense

The candidate must, as the final step toward the degree, pass an oral examination in defense of the dissertation.

### Time Limit

Students who do not complete all degree requirements within seven years from the date of admission to the doctoral program will be recommended for dismissal to the Graduate School.

## Other Requirements

This is only a summary of the doctoral program requirements. A complete list of requirements is available from the Office of Doctoral Studies. Doctoral Committees may specify course requirements which exceed the minima described here.

For additional information on the PhD, see the Graduate School Doctoral Requirements (<http://www.dev.uwm.edu/graduateschool/doctoral-requirements/>).

## Exit Requirements

Contingent upon successful completion of program requirements, the doctoral preliminary examination, and the dissertation defense, the Chair of the Department of Administrative Leadership must give final approval for the inclusion of "Urban Education: Educational Administration" on the student's transcript.

## Urban Education, PhD: Exceptional Education

### Specialization Overview

The doctoral specialization in Exceptional Education provides a program of advanced study of special education. The program emphasizes the study the socio-cultural context, educational policy, research-based practices and systems change and reform. Students in Exceptional Education take advanced coursework in special education and choose to focus on related areas such as administration, research, teacher education, curriculum design and development, and community-based supports and partnerships. In addition, students declare a minor area of interest.

Students work with their major professor to develop an individualized program which incorporates breadth as well as depth of study.

For course descriptions in this area, visit the Exceptional Education section (p. 1783) of this catalog.

## Degree Overview

The School of Education offers an interdepartmental program of study leading to the PhD. Students must choose a specialization in either Adult, Continuing, and Higher Education Leadership, Art Education, Curriculum and Instruction, Educational Administration, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education.

The program is designed to permit students to integrate their particular curricular areas of interest and specialization with a broader field of education, including urban education. Each specialization, with the exception of Multicultural Studies, is departmentally focused, and students must satisfy the admissions and curriculum requirements indicated for their particular specialization. Recognition of the specialization is acknowledged by official designation on the student's transcript.

Each of the specializations offers the doctoral student an opportunity to pursue study in a specific program area. For example, Adult, Continuing, and Higher Education Leadership emphasizes governance and leadership issues within urban adult education organizations. Educational Administration explores governance and Leadership issues of urban schools. Curriculum and Instruction provides program emphasis in a content area (e.g., reading), education level (e.g., early childhood),

a general area (e.g., curriculum theory) or special area (e.g., guiding instructional improvement). Exceptional Education provides program emphasis in departmental interest areas (e.g., handicapping condition), or a cross-disciplinary interest.

A separate PhD with specialization in Counseling Psychology, Learning and Development, Research Methodology, and School Psychology is offered through the Department of Educational Psychology (p. 355). Multicultural Studies is a cross-department program allowing students to develop their own area of focus in collaboration with faculty in multicultural urban education. The Social Foundations of Education specialization provides students with the conceptual tools with which to examine the complex interrelationships between school and society, education and culture.

All graduates should have a broad understanding of the issues, problems and trends related to education, including urban education, and the application of these to their major.

The program requires each participant to develop research skills ranging from logic in inquiry to development of specific methodological skills in qualitative and quantitative methods. The PhD is a research degree and not only a professional preparation degree. Therefore research is an integral part of the program. Mastery of these skills is demonstrated through coursework, research projects and the dissertation. Graduates apply their skills, in institutions of higher education, public or private school settings, federal, state, or local governmental agencies, community organizations, and the private sector.

- Information Studies (School of)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements plus the following program requirements to be considered for admission. Applicants must also complete the reason statement in the application.

### Graduate Record Examination

GRE scores are not required for admission to program.

### Grade Point Average

Applicants must have an undergraduate GPA of 2.75.

Check with specializations that might have additional requirements.

### Writing Sample

Applicants must submit a writing sample completed within the last five years. The writing sample must be single authored, at least 1500 words, and must be selected from **one** of the following options:

1. Master's Thesis
2. Undergraduate Senior Thesis
3. Technical Report
4. Term Paper
5. Publication
6. Written Description of a Project
7. Action Research Project
8. Writing sample or written response showing evidence of analytical and argumentative writing and reasoning. The response should address the following: How would you conceptualize and analyze issues in urban education? The response to this question must show evidence of appropriate references to a knowledge base.

The writing sample must be submitted with the application.

### Reasons Statement

A Reasons Statement is used to determine the appropriateness of your educational and professional goals and serves as an example of your ability to express yourself in writing. In the statement:

- Explain your reasons for pursuing graduate study.
- Describe specific interests and your background in the field.
- List any relevant skills or training you have acquired.
- List relevant academic awards or honors you have received.

### Curriculum Vitae/Resume

All UEDP applicants are required to submit a current Curriculum Vitae/Resume.

### Recommendations

The program requires 3 letters of recommendation. These letters must be submitted through the application's electronic recommendation feature by the recommenders themselves. Letters uploaded or sent by the applicant will not be accepted. If possible, please provide your recommenders with a summary of your application materials. Feel free to encourage your recommenders to provide illustrations linking your experiences and abilities with the aims of the doctoral specialization.

### Application

Applicants are required to articulate their urban and research interests and goals in application materials. An intended concentration within the PhD must be specified at time of application.

1. Applicants who fail to satisfy these admission requirements will not be recommended for admission. However, satisfying these minima does not guarantee admission.
2. Applicants who are not recommended for admission will be provided an opportunity to request a reconsideration.

Individual specializations may expect prior coursework in that area. Applicants may contact the Director for specific information. Openings in the program are limited.

Students should apply by December 1st of the year prior to entry, or earlier, if they plan to apply for University-wide fellowships. Applications completed after the priority deadline will be reviewed on a rolling basis up until April 1st for Fall admission of that calendar year.

***Application materials MUST be submitted by April 1st in order to be admitted for the fall semester.***

## Credits and Courses

Minimum degree requirement is 54 credits beyond the bachelor’s degree (although students ordinarily take more than 54), at least 27 of which must be earned in residence at UWM (i.e., on the UWM campus).

A minimum grade of B or better is required for all courses counting toward the Urban Education doctoral degree. Students earning a B- or lower must consult with their advisor to fulfill the requirement within one semester.

In consultation with the major professor, the student designs a program of studies that enables the student to gain the knowledge and skills appropriate to the student’s goals.

The program of studies includes the following:

### The Doctoral Seminars

All doctoral students must take three 3-credit seminar courses devoted to content involving education in an urban environment.

Code	Title	Credits
EDUC 701	Critical Issues in Urban Education	3
EDUC 801	Seminar in Urban Education	3
EDUC 901	Advanced Seminar in Urban Education	3

### Research Requirement

Department specialization requirements may exceed those specified here.

Code	Title	Credits
Choose one:		3-4
ED PSY 724	Educational Statistical Methods II (prerequisite is ED PSY 624)	
ED PSY 728	Techniques of Educational Research (prerequisite is ED PSY 624)	
CURRINS/AD LDSP 729	Qualitative Research and Field Studies in Educational Settings	3
Additional advanced-level (600 or above) coursework from either a qualitative track or quantitative track		6
Approved research design course		3
<b>Total Credits</b>		<b>15-16</b>

All students must demonstrate knowledge in this area by completing the specialization equivalent to the preliminary exam and successfully defending a dissertation.

### Designated Specialization

Students indicate a specific area of specialization by applying for one of the transcript-designated specializations in either Adult, Continuing, and Higher Education Leadership, Curriculum and Instruction, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education. Students may be required to meet the specific admissions and program requirements for their intended specialization in addition to meeting the PhD admissions and program requirements. (Please see the accompanying explanation and requirements for each specialization.)

### Residency

Residence requirements cannot be met at the master’s level, and must be fulfilled before you can achieve dissertator status. There are two types of doctoral residency that must be met:

#### Academic Year Requirement

You must complete 8 to 12 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, including summer sessions. This requirement is intended to provide immersion in the chosen discipline and foster participation in the community of scholars.

#### 50% Requirement

At least 50% of the graduate credits required for your PhD program must be completed at UWM in doctoral status.

### Exceptional Education Specialization

Subsequent to UEDP admission, the student must submit credentials and a program for concentration in Exceptional Education developed in conjunction with the student’s advisor in the Department of Exceptional Education. Students also must prepare a statement expressing their interests within Exceptional Education for the departmental admissions procedure.

The doctoral specialization in Exceptional Education provides a program of advanced study of special education. The program emphasizes the socio-cultural context, educational policy, research-based practices and systems change and reform. Students in Exceptional Education take advanced coursework in special education and choose to focus on related areas such as administration, research, teacher education, curriculum design and development, and community-based supports and partnerships. In addition, students declare a minor area of interest.

Students work with their major professor to develop an individualized program which incorporates breadth as well as depth of study. Building on faculty expertise and research interests, focus areas for study may include:

- Teacher education
- Cultural diversity in education
- Early childhood intervention
- Assistive technology
- Curriculum accommodation & collaboration
- Literacy
- Transition to young adulthood
- Deaf education
- School reform and special education administration

In addition to advanced coursework, students participate in research and development projects, curriculum development, co-teaching, and other activities designed to prepare leaders for roles such as a college or university professor, curriculum leader, special education administrator, consultant, or project director.

The specialization requires a recent master’s degree in exceptional education or a related field (9 of these credits may be counted toward the specialization). If an applicant does not have this background, appropriate graduate coursework and field experiences will be outlined as a prerequisite to the doctoral specialization.

- A minimum of 12 credits in Exceptional Education (800-level or above) focusing on research and practice related to teacher

education, field-based practice and supervision, community programs and support for individuals with disabilities and special education research. Core courses are selected in consultation with doctoral advisor.

- A minimum of 12 credits additional electives in an Exceptional Education focus area. Up to 9 credits of recent and relevant master's degree coursework may be applied.
- The student must meet all of the program requirements of the Urban Education Doctoral Program, including:
  - Urban education Doctoral Seminars (9 credits)
  - Research Design and Methodology (13-16 credits)
  - Minor area of study (9 credits)

Additionally, students must complete preliminary examinations and a dissertation, original research with an emphasis in Exceptional Education.

## Additional Requirements

### Major Professor

Upon admission to the doctoral program, the student is assigned an initial advisor from their intended specialization. This person is available to discuss initial course selection and provide general advice about the program and specialization. After beginning the program and before filing a Program of Studies, the student will seek a permanent major professor from their specialization who is eligible to serve in such a capacity. This permanent advisor may be the initial advisor if the student desires. The major professor is also chair of the student's dissertation committee.

Selection of the major professor is by mutual consent between the student and the faculty member. The student must notify the UEDP in writing when the major professor has been selected.

### Foreign Language Requirement

There is no foreign language requirement. However, individual students may be required to demonstrate proficiency in a foreign language if such proficiency is determined to be necessary by a student's committee.

### Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for the degree. The examination covers the area of specialization, urban education, the minor, and research methods.

### Dissertation

The candidate must present a dissertation reporting the results of an original research study appropriate to the student's program. Prior to beginning the research, the candidate must present an acceptable dissertation proposal and defend it at an oral hearing.

### Dissertation Defense

The candidate must, as the final step toward the degree, pass an oral examination in defense of the dissertation.

### Time Limit

Students who do not complete all degree requirements within seven years from the date of admission to the doctoral program will be recommended for dismissal to the Graduate School.

### Other Requirements

This is only a summary of the doctoral program requirements. A complete list of requirements is available from the Office of Doctoral Studies.

Doctoral Committees may specify course requirements which exceed the minima described here.

For additional information on the PhD, see the Graduate School [Doctoral Requirements](http://wwwdev.uwm.edu/graduateschool/doctoral-requirements/) (<http://wwwdev.uwm.edu/graduateschool/doctoral-requirements/>).

## Urban Education, PhD: Mathematics Education

### Specialization Overview

The specialization in Mathematics Education integrates mathematical knowledge for teaching within the broader field of urban education and prepares individuals to address critical issues across varied educational settings and contexts through research and scholarship in mathematics education.

For course descriptions in this area, visit the Curriculum and Instruction page (p. 1674) of this catalog.

### Degree Overview

The School of Education offers an interdepartmental program of study leading to the PhD. Students must choose a specialization in either Adult, Continuing, and Higher Education Leadership, Art Education, Curriculum and Instruction, Educational Administration, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education.

The program is designed to permit students to integrate their particular curricular areas of interest and specialization with a broader field of education, including urban education. Each specialization, with the exception of Multicultural Studies, is departmentally focused, and students must satisfy the admissions and curriculum requirements indicated for their particular specialization. Recognition of the specialization is acknowledged by official designation on the student's transcript.

Each of the specializations offers the doctoral student an opportunity to pursue study in a specific program area. For example, Adult, Continuing, and Higher Education Leadership emphasizes governance and leadership issues within urban adult education organizations. Educational Administration explores governance and Leadership issues of urban schools. Curriculum and Instruction provides program emphasis in a content area (e.g., reading), education level (e.g., early childhood), a general area (e.g., curriculum theory) or special area (e.g., guiding instructional improvement). Exceptional Education provides program emphasis in departmental interest areas (e.g., handicapping condition), or a cross-disciplinary interest.

A separate PhD with specialization in Counseling Psychology, Learning and Development, Research Methodology, and School Psychology is offered through the Department of Educational Psychology (p. 355). Multicultural Studies is a cross-department program allowing students to develop their own area of focus in collaboration with faculty in multicultural urban education. The Social Foundations of Education specialization provides students with the conceptual tools with which to examine the complex interrelationships between school and society, education and culture.

All graduates should have a broad understanding of the issues, problems and trends related to education, including urban education, and the application of these to their major.

The program requires each participant to develop research skills ranging from logic in inquiry to development of specific methodological skills in qualitative and quantitative methods. The PhD is a research degree and not only a professional preparation degree. Therefore research is an integral part of the program. Mastery of these skills is demonstrated through coursework, research projects and the dissertation. Graduates apply their skills, in institutions of higher education, public or private school settings, federal, state, or local governmental agencies, community organizations, and the private sector.

## Cooperating Departments

- Administrative Leadership
- Educational Policy and Community Studies
- Educational Psychology
- Teaching and Learning
- Information Studies (School of)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements plus the following program requirements to be considered for admission. Applicants must also complete the reason statement in the application.

### Graduate Record Examination

GRE scores are not required for admission to program.

### Grade Point Average

Applicants must have an undergraduate GPA of 2.75.

Check with specializations that might have additional requirements.

### Writing Sample

Applicants must submit a writing sample completed within the last five years. The writing sample must be single authored, at least 1500 words, and must be selected from **one** of the following options:

1. Master's Thesis
2. Undergraduate Senior Thesis
3. Technical Report
4. Term Paper
5. Publication
6. Written Description of a Project
7. Action Research Project
8. Writing sample or written response showing evidence of analytical and argumentative writing and reasoning. The response should address the following: How would you conceptualize and analyze issues in urban education? The response to this question must show evidence of appropriate references to a knowledge base.

The writing sample must be submitted with the application.

### Reasons Statement

A Reasons Statement is used to determine the appropriateness of your educational and professional goals and serves as an example of your ability to express yourself in writing. In the statement:

- Explain your reasons for pursuing graduate study.
- Describe specific interests and your background in the field.
- List any relevant skills or training you have acquired.
- List relevant academic awards or honors you have received.

### Curriculum Vitae/Resume

All UEDP applicants are required to submit a current Curriculum Vitae/Resume.

### Recommendations

The program requires 3 letters of recommendation. These letters must be submitted through the application's electronic recommendation feature by the recommenders themselves. Letters uploaded or sent by the applicant will not be accepted. If possible, please provide your recommenders with a summary of your application materials. Feel free to encourage your recommenders to provide illustrations linking your experiences and abilities with the aims of the doctoral specialization.

### Application

Applicants are required to articulate their urban and research interests and goals in application materials. An intended concentration within the PhD must be specified at time of application.

1. Applicants who fail to satisfy these admission requirements will not be recommended for admission. However, satisfying these minima does not guarantee admission.
2. Applicants who are not recommended for admission will be provided an opportunity to request a reconsideration.

Individual specializations may expect prior coursework in that area. Applicants may contact the Director for specific information. Openings in the program are limited.

Students should apply by December 1st of the year prior to entry, or earlier, if they plan to apply for University-wide fellowships. Applications completed after the priority deadline will be reviewed on a rolling basis up until April 1st for Fall admission of that calendar year.

***Application materials MUST be submitted by April 1st in order to be admitted for the fall semester.***

## Credits and Courses

Minimum degree requirement is 54 credits beyond the bachelor's degree (although students ordinarily take more than 54), at least 27 of which must be earned in residence at UWM (i.e., on the UWM campus).

A minimum grade of B or better is required for all courses counting toward the Urban Education doctoral degree. Students earning a B- or lower must consult with their advisor to fulfill the requirement within one semester.

In consultation with the major professor, the student designs a program of studies that enables the student to gain the knowledge and skills appropriate to the student's goals.

The program of studies includes the following:

## The Doctoral Seminars

All doctoral students must take three 3-credit seminar courses devoted to content involving education in an urban environment.

Code	Title	Credits
EDUC 701	Critical Issues in Urban Education	3
EDUC 801	Seminar in Urban Education	3
EDUC 901	Advanced Seminar in Urban Education	3

## Research Requirement

Department specialization requirements may exceed those specified here.

Code	Title	Credits
Choose one:		3-4
ED PSY 724	Educational Statistical Methods II (prerequisite is ED PSY 624)	
ED PSY 728	Techniques of Educational Research (prerequisite is ED PSY 624)	
CURRINS/AD LDSP 729	Qualitative Research and Field Studies in Educational Settings	3
Additional advanced-level (600 or above) coursework from either a qualitative track or quantitative track		6
Approved research design course		3
<b>Total Credits</b>		<b>15-16</b>

All students must demonstrate knowledge in this area by completing the specialization equivalent to the preliminary exam and successfully defending a dissertation.

## Designated Specialization

Students indicate a specific area of specialization by applying for one of the transcript-designated specializations in either Adult, Continuing, and Higher Education Leadership, Curriculum and Instruction, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education. Students may be required to meet the specific admissions and program requirements for their intended specialization in addition to meeting the PhD admissions and program requirements. (Please see the accompanying explanation and requirements for each specialization.)

## Residency

Residence requirements cannot be met at the master's level, and must be fulfilled before you can achieve dissertator status. There are two types of doctoral residency that must be met:

### Academic Year Requirement

You must complete 8 to 12 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, including summer sessions. This requirement is intended to provide immersion in the chosen discipline and foster participation in the community of scholars.

### 50% Requirement

At least 50% of the graduate credits required for your PhD program must be completed at UWM in doctoral status.

## Mathematics Specialization

After admission to the Urban Education Doctoral Program (UEDP), the student must submit a Plan of Studies in Mathematics Education

developed in conjunction with the student's Major Professor for approval by the Director of the UEDP.

The student must meet all of the program requirements of the Urban Education Doctoral Program, including 9 credits of doctoral seminars and 12-13 credits of research methods.

The specialization in Mathematics Education consists of 9 required credits in advanced mathematics education and a minimum of 23 elective credits in mathematics education, related coursework, dissertator credits, or a minor. Relevant master's degree and other prior graduate coursework may be used to fulfill program requirements. At least 12 credits in mathematics education must be taken after admission to the program.

Code	Title	Credits
<b>Required</b>		
CURRINS 720	Curriculum and Standards for School Mathematics	3
CURRINS 861	Seminar in Mathematics Urban Education	3
CURRINS 864	Integrating Mathematics Education Research into Curriculum and Instruction	3

### Recommended Electives

CURRINS 624	Instructional Trajectories for Fraction Concepts and Operations	3
CURRINS 625	Principles and Practices of Teaching Geometry and Geometric Thinking	3
CURRINS 626	Principles and Practices of Teaching Algebraic Reasoning	3
CURRINS 730	Mathematics in Elementary Education	3
CURRINS 731	Mathematics in the Secondary School	3
CURRINS 761	Mathematics Instructional Leadership	3
CURRINS 830	Seminar in Elementary School Mathematics Education	3
CURRINS 865	Mathematics Program Design and Development	3

**Total Credits** **33**

## Additional Requirements

### Major Professor

Upon admission to the doctoral program, the student is assigned an initial advisor from their intended specialization. This person is available to discuss initial course selection and provide general advice about the program and specialization. After beginning the program and before filing a Plan of Studies, the student will seek a permanent major professor from their specialization who is eligible to serve in such a capacity. This permanent advisor may be the initial advisor if the student desires. The major professor is also chair of the student's dissertation committee.

Selection of the major professor is by mutual consent between the student and the faculty member. The student must notify the UEDP in writing when the major professor has been selected.

## Foreign Language Requirement

There is no foreign language requirement. However, individual students may be required to demonstrate proficiency in a foreign language if such proficiency is determined to be necessary by a student's committee.

## Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for the degree. The examination covers the area of specialization, urban education, the minor (if applicable), and research methods.

## Dissertation

The candidate must present a dissertation reporting the results of an original research study appropriate to the student's program. Prior to beginning the research, the candidate must present an acceptable dissertation proposal and defend it at an oral hearing.

## Dissertation Defense

The candidate must, as the final step toward the degree, pass an oral examination in defense of the dissertation.

## Time Limit

Students who do not complete all degree requirements within seven years from the date of admission to the doctoral program will be recommended for dismissal to the Graduate School.

## Other Requirements

This is only a summary of the doctoral program requirements. A complete list of requirements is available from the Office of Doctoral Studies. Doctoral Committees may specify course requirements which exceed the minima described here.

For additional information on the PhD, see the Graduate School Doctoral Requirements (<http://wwwdev.uwm.edu/graduateschool/doctoral-requirements/>).

## Exit Requirements

Contingent upon satisfactory completion of program requirements, the preliminary qualifying examination, dissertation proposal hearing, and the successful oral defense of the dissertation, the Urban Education Doctoral Program Director will give final approval for the designated transcript inclusion of "Urban Education: Mathematics Education."

# Urban Education, PhD: Multicultural Studies

*Effective Fall 2023, the Multicultural Studies specialization has suspended admission.*

## Specialization Overview

Note that while Multicultural Studies is cross-disciplinary, for the purposes of initial advising and ongoing support the departmental home for a student in this specialization is Educational Policy and Community Studies. Students in this program will be supervised jointly by the Department of Educational Policy and Community Studies and by the Urban Education Doctoral Committee, who will assign an advisor for the particular focus area the student has chosen.

For course descriptions in this area, visit the Cultural Foundations of Education section (p. 351) of this catalog.

## Degree Overview

The School of Education offers an interdepartmental program of study leading to the PhD. Students must choose a specialization in either Adult, Continuing, and Higher Education Leadership, Art Education, Curriculum and Instruction, Educational Administration, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education.

The program is designed to permit students to integrate their particular curricular areas of interest and specialization with a broader field of education, including urban education. Each specialization, with the exception of Multicultural Studies, is departmentally focused, and students must satisfy the admissions and curriculum requirements indicated for their particular specialization. Recognition of the specialization is acknowledged by official designation on the student's transcript.

Each of the specializations offers the doctoral student an opportunity to pursue study in a specific program area. For example, Adult, Continuing, and Higher Education Leadership emphasizes governance and leadership issues within urban adult education organizations. Educational Administration explores governance and Leadership issues of urban schools. Curriculum and Instruction provides program emphasis in a content area (e.g., reading), education level (e.g., early childhood), a general area (e.g., curriculum theory) or special area (e.g., guiding instructional improvement). Exceptional Education provides program emphasis in departmental interest areas (e.g., handicapping condition), or a cross-disciplinary interest.

A separate PhD with specialization in Counseling Psychology, Learning and Development, Research Methodology, and School Psychology is offered through the Department of Educational Psychology (p. 355). Multicultural Studies is a cross-department program allowing students to develop their own area of focus in collaboration with faculty in multicultural urban education. The Social Foundations of Education specialization provides students with the conceptual tools with which to examine the complex interrelationships between school and society, education and culture.

All graduates should have a broad understanding of the issues, problems and trends related to education, including urban education, and the application of these to their major.

The program requires each participant to develop research skills ranging from logic in inquiry to development of specific methodological skills in qualitative and quantitative methods. The PhD is a research degree and not only a professional preparation degree. Therefore research is an integral part of the program. #### 50% Requirement

At least 50% of the graduate credits required for your PhD program must be completed at UWM in doctoral status.

#### Multicultural Specialization

1. Students seeking admission to the doctoral program must indicate their intended area of specialization. The application will be reviewed by the Admissions Committee of the Urban Education Doctoral Program as well as the interdisciplinary graduate faculty of the Multicultural Studies Area.
2. Students must write a brief statement explaining why they feel an interdisciplinary program is more relevant to their studies than one of the other discipline-specific specializations.
3. Subsequent to admission, the student must submit a program of concentration in Multicultural Studies developed in conjunction with the student's advisor.
4. When the student's course of studies in Multicultural Studies is approved by the Multicultural Studies interdisciplinary faculty, the student must submit a program of study to the Office of the Doctoral Studies for review and approval by the Director.

5. Prior to admission, or within the first 30 graduate credits after admittance to the Multicultural Studies specialization, the student must complete a research project, e.g., thesis or publishable paper.

<b>Total Credits</b>		<b>46</b>

<sup>1</sup> Chosen under the guidance of advisor or committee chair. Six credits must be 800 level or above. Up to 6 relevant credits may be counted from student's master's program transcript, as determined by of a student's advisor. The SOE specialization includes a tailored professional area with multicultural studies.

<sup>2</sup> Students who meet this requirement upon admission will be asked to take another research methods class in consultation with student's academic advisor.

### Additional Requirements

Students must be admitted first to the PhD Program in Urban Education, then specialize in Multicultural Studies. The course requirements for Multicultural Studies are outlined below.

1. Students must meet all the requirements of the Urban Education Doctoral Program.
2. Students not having a graduate degree in a field recognized by the specialization faculty may be required to take master's level coursework as a prerequisite to admission

#### Recommended Conference Submissions/Participation

The specialization strongly recommends all students submit and present their original work at two academic conferences during the course of their studies. Conferences may be local, regional, national, or international in scope. Additionally, students are highly encouraged to contribute to papers submitted to peer-reviewed academic journals prior to graduation.

#### Other Requirements

All students must adhere to all other general requirements of the Urban Educational Doctoral Program pertaining to such issues as residency, preliminary examinations, dissertation proposals and defense, and time limits.

## Doctoral Preliminary Examination

The preliminary qualifying exam will include a section covering the student's focus area as developed with an advisor or committee chair.

## Dissertation

A dissertation with the appropriate area of emphasis is required. The dissertation committee must be composed of a minimum of four members of the graduate faculty. The dissertation advisor will be an approved doctoral advisor and a member of the School of Education. One other member must be from the School of Education, and one or two members must be from the student developed focus area.

## Exit Requirements

Contingent upon the satisfactory completion of program requirements, including the passing of the prelim/proposal defense, and the successful oral defense of the dissertation, the Urban Education Doctoral Committee Chair will give final approval for the inclusion of "Urban Education: Multicultural Foundations" on your transcript.

# Urban Education, PhD: Social Foundations of Education

*Effective Fall 2023, the Social Foundations of Education specialization has suspended admission.*

## Specialization Overview

The PhD specialization in Social Foundations of Education provides students with a comprehensive understanding of the social forces that affect urban schools and communities. This program is designed for individuals who want to look deeply at the challenges facing urban areas in the 21st Century and are willing to explore creative solutions. Students in Social Foundations examine the sociological, historical, philosophical, anthropological, and political dimensions of schools and community change. Social foundations doctoral students may investigate issues and contexts grounded in the core disciplines of the social sciences.

## Degree Overview

The School of Education offers an interdepartmental program of study leading to the PhD. Students must choose a specialization in either Adult, Continuing, and Higher Education Leadership, Art Education, Curriculum and Instruction, Educational Administration, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education.

The program is designed to permit students to integrate their particular curricular areas of interest and specialization with a broader field of education, including urban education. Each specialization, with the exception of Multicultural Studies, is departmentally focused, and students must satisfy the admissions and curriculum requirements indicated for their particular specialization. Recognition of the specialization is acknowledged by official designation on the student's transcript.

Each of the specializations offers the doctoral student an opportunity to pursue study in a specific program area. For example, Adult, Continuing, and Higher Education Leadership emphasizes governance and leadership issues within urban adult education organizations. Educational Administration explores governance and Leadership issues of urban schools. Curriculum and Instruction provides program emphasis in a content area (e.g., reading), education level (e.g., early childhood), a general area (e.g., curriculum theory) or special area (e.g., guiding

instructional improvement). Exceptional Education provides program emphasis in departmental interest areas (e.g., handicapping condition), or a cross-disciplinary interest.

A separate PhD with specialization in Counseling Psychology, Learning and Development, Research Methodology, and School Psychology is offered through the Department of Educational Psychology (p. 355). Multicultural Studies is a cross-department program allowing students to develop their own area of focus in collaboration with faculty in multicultural urban education. The Social Foundations of Education specialization provides students with the conceptual tools with which to examine the complex interrelationships between school and society, education and culture.

All graduates should have a broad understanding of the issues, problems and trends related to education, including urban education, and the application of these to their major.

The program requires each participant to develop research skills ranging from logic in inquiry to development of specific methodological skills in qualitative and quantitative methods. The PhD is a research degree and not only a professional preparation degree. Therefore research is an integral part of the program. Mastery of these skills is demonstrated through coursework, research projects and the dissertation. Graduates apply their skills, in institutions of higher education, public or private school settings, federal, state, or local governmental agencies, community organizations, and the private sector.

### Curriculum Vitae/Resume

All UEDP applicants are required to submit a current Curriculum Vitae/Resume.

### Recommendations

The program requires 3 letters of recommendation. These letters must be submitted through the application’s electronic recommendation feature by the recommenders themselves. Letters uploaded or sent by the applicant will not be accepted. If possible, please provide your recommenders with a summary of your application materials. Feel free to encourage your recommenders to provide illustrations linking your experiences and abilities with the aims of the doctoral specialization.

### Application

Applicants are required to articulate their urban and research interests and goals in application materials. An intended concentration within the PhD must be specified at time of application.

1. Applicants who fail to satisfy these admission requirements will not be recommended for admission. However, satisfying these minima does not guarantee admission.
2. Applicants who are not recommended for admission will be provided an opportunity to request a reconsideration.

Individual specializations may expect prior coursework in that area. Applicants may contact the Director for specific information. Openings in the program are limited.

Students should apply by December 1st of the year prior to entry, or earlier, if they plan to apply for University-wide fellowships. Applications completed after the priority deadline will be reviewed on a rolling basis up until April 1st for Fall admission of that calendar year.

**Application materials MUST be submitted by April 1st in order to be admitted for the fall semester.**

## Credits and Courses

Minimum degree requirement is 54 credits beyond the bachelor’s degree (although students ordinarily take more than 54), at least 27 of which must be earned in residence at UWM (i.e., on the UWM campus).

A minimum grade of B or better is required for all courses counting toward the Urban Education doctoral degree. Students earning a B- or lower must consult with their advisor to fulfill the requirement within one semester.

In consultation with the major professor, the student designs a program of studies that enables the student to gain the knowledge and skills appropriate to the student’s goals.

The program of studies includes the following:

### The Doctoral Seminars

All doctoral students must take three 3-credit seminar courses devoted to content involving education in an urban environment.

Code	Title	Credits
EDUC 701	Critical Issues in Urban Education	3
EDUC 801	Seminar in Urban Education	3
EDUC 901	Advanced Seminar in Urban Education	3

### Research Requirement

Department specialization requirements may exceed those specified here.

Code	Title	Credits
Choose one:		3-4
ED PSY 724	Educational Statistical Methods II (prerequisite is ED PSY 624)	
ED PSY 728	Techniques of Educational Research (prerequisite is ED PSY 624)	
CURRINS/AD LDSP 729	Qualitative Research and Field Studies in Educational Settings	3
Additional advanced-level (600 or above) coursework from either a qualitative track or quantitative track		6
Approved research design course		3
<b>Total Credits</b>		<b>15-16</b>

All students must demonstrate knowledge in this area by completing the specialization equivalent to the preliminary exam and successfully defending a dissertation.

### Designated Specialization

Students indicate a specific area of specialization by applying for one of the transcript-designated specializations in either Adult, Continuing, and Higher Education Leadership, Curriculum and Instruction, Exceptional Education, Mathematics Education, Multicultural Studies, or Social Foundations of Education. Students may be required to meet the specific admissions and program requirements for their intended specialization in addition to meeting the PhD admissions and program requirements. (Please see the accompanying explanation and requirements for each specialization.)

## Residency

Residence requirements cannot be met at the master's level, and must be fulfilled before you can achieve dissertator status. There are two types of doctoral residency that must be met:

### Academic Year Requirement

You must complete 8 to 12 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, including summer sessions. This requirement is intended to provide immersion in the chosen discipline and foster participation in the community of scholars.

### 50% Requirement

At least 50% of the graduate credits required for your PhD program must be completed at UWM in doctoral status.

## Social Foundations of Education Specialization

1. Students wishing to be admitted to the Urban Education Doctoral Program must indicate their intended area of specialization. Their applications will be reviewed by the Admissions committee of the Urban Education Doctoral Program as well as by the Department of Educational Policy and Community Studies. The general requirements maintained by the Graduate School at UWM will apply to these candidates;
2. Subsequent to admission, the student must submit a program for study for a specialization in Social Foundations of Education, developed in conjunction with the student's advisor and committee;
3. If the student's specialization in Social Foundations of Education is approved, the student must submit their program of study to the Office of Doctoral Studies for review and approval by the director;
4. Students who have already had their programs approved prior to their decision to seek specialization in Social Foundations of Education must submit a program for concentration in Social Foundations of Education to the Departmental Graduate Committee for approval, and if changes are made, must seek approval of the new program of studies by the Office of Doctoral Studies.

Code	Title	Credits
<b>Urban Educational Doctoral Program General Requirements</b>		
EDUC 701	Critical Issues in Urban Education	3
EDUC 801	Seminar in Urban Education	3
EDUC 901	Advanced Seminar in Urban Education	3
<b>Research Methods</b>		
ED PSY 624	Educational Statistical Methods I (or equivalent methods course) <sup>1</sup>	3
ED PSY 724	Educational Statistical Methods II	4
CURRINS 729	Qualitative Research and Field Studies in Educational Settings	3
ED POL 837	Emergent Methods in Qualitative Research for Social Foundations	3
<b>Advanced Research Course (Choose from Advanced Research list below)</b>		<b>3</b>
<b>Specialization Requirements</b>		
ED POL 805	Sociology of Education: Seminar <sup>2</sup>	3
ED POL 822	Global Educational Studies	3
ED POL 840	Seminar in Educational Theory	3
ED POL 850	Seminar in History of American Education <sup>2</sup>	3

<b>Electives in Specialization (Choose from Electives list below)</b>	<b>9</b>
<b>Total Credits</b>	<b>46</b>

<sup>1</sup> Students who meet this requirement will be asked to take another research methods class in consultation with student's academic advisor.

<sup>2</sup> If a student has taken these courses in a master's program, comparable 800-level coursework will be selected in conjunction with the student's academic advisor.

Students with a Cultural Foundations of Education Master of Science degree may transfer 9 credits numbered 609 or above in which they earned an A- or better. Students with other master's degrees will be evaluated individually by the department to determine up to 9 credits that may be suitable to transfer as major elective courses. All courses selected must include research papers and be approved by the student's academic advisor.

## Advanced Research

Code	Title	Credits
<b>Historical/Cultural Research</b>		
<i>Anthropology</i>		
ANTHRO 705	Advanced Topics in Ethnography:	3
ANTHRO 768	Topics in Advanced Research Design in Anthropology	3
<i>History</i>		
HIST 712	Historiography and Theory of History	3
HIST 713	Historical Research Methods	3
<i>Philosophy</i>		
PHILOS 903	Seminar in Epistemology:	3
PHILOS 911	Seminar in Logic:	3
PHILOS 960	Seminar in Metaphysics:	3
<i>Political Science</i>		
POL SCI 700	Scope and Methods of Political Science	3
POL SCI 701	Techniques of Political Science Research	3
POL SCI 702	Advanced Techniques of Political Science Research	3
<i>Social Work</i>		
SOC WRK 793	Evaluation of Practice	2
SOC WRK 794	Evaluation of Programs	2

URB STD 921	Seminar: Research Methods in Urban Studies	3
URB STD 979	Qualitative Research Methods	3
URB STD 982	Advanced Quantitative Analysis	3
<b>Qualitative Research</b>		
CURRINS 829	Advanced Qualitative Research Techniques for Education Settings	3
CURRINS 839	Practicum in Writing from Qualitative Research for Educational Settings	3
<b>Quantitative Research</b>		
ED PSY 821	Psychometric Theory and Practice	3
ED PSY 822	Item Response Theory	3
ED PSY 823	Structural Equation Modeling	3

ED PSY 824	Advanced Experimental Design and Analysis	3
ED PSY 825	Multivariate Methods	3
ED PSY 826	Analysis of Cross-Classified Categorical Data	3
ED PSY 827	Survey Research Methods	3
ED PSY 829	Instrument Development	3
ED PSY 922	Seminar in Measurement and Evaluation:	3
ED PSY 929	Seminar in Statistics and Research Design	3

## Electives

*Options include, but are not limited to:*

Code	Title	Credits
ED POL 609	Community Partnerships	3
ED POL 610	Reproduction of Minoritized Communities	3
ED POL 611	Community Policies and Urban Minority Youths	3
ED POL 613	Context and Foundations of Educational Policy	3
ED POL 620	History of the Education of African Americans	3
ED POL 624	Gender and Education	3
ED POL 625	Race Relations in Education	3
ED POL 630	Race, Ethnicity, and Public Policy in Urban America	3
ED POL 633	Community Development: History, Structure, Process-Empowering Communities	3
ED POL 636	Issues in African American Education	3
ED POL 639	Milwaukee Black Community	3
ED POL 640	The Rise and Fall of America's Southern Civil Rights Movement	3
ED POL 650	The Civil Rights Movement in Northern Cities	3
ED POL 705	Sociology of Education and Community Engagement	3
ED POL 721	Data Analysis for Educational Policy & Community Engagement	3
ED POL 725		3
ED POL 823	Multicultural Education	3
ED POL 850	Seminar in History of American Education	3

## Additional Requirements

### Major Professor

Upon admission to the doctoral program, the student is assigned an initial advisor from their intended specialization. This person is available to discuss initial course selection and provide general advice about the program and specialization. After beginning the program and before filing a Program of Studies, the student will seek a permanent major professor from their specialization who is eligible to serve in such a capacity. This

permanent advisor may be the initial advisor if the student desires. The major professor is also chair of the student's dissertation committee.

Selection of the major professor is by mutual consent between the student and the faculty member. The student must notify the UEDP in writing when the major professor has been selected.

### Foreign Language Requirement

There is no foreign language requirement. However, individual students may be required to demonstrate proficiency in a foreign language if such proficiency is determined to be necessary by a student's committee.

### Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for the degree. The examination covers the area of specialization, urban education, the minor, and research methods.

### Dissertation

The candidate must present a dissertation reporting the results of an original research study appropriate to the student's program. Prior to beginning the research, the candidate must present an acceptable dissertation proposal and defend it at an oral hearing.

### Dissertation Defense

The candidate must, as the final step toward the degree, pass an oral examination in defense of the dissertation.

### Time Limit

Students who do not complete all degree requirements within seven years from the date of admission to the doctoral program will be recommended for dismissal to the Graduate School.

### Contribution to Scholarship

The department strongly recommends all students submit and present their original work at two academic conferences during the course of their studies. Conferences may be local, regional, national, or international in scope. Additionally, students are highly encouraged to contribute to papers submitted to peer-reviewed academic journals prior to graduation.

### Optional Minor (9-12 credits)

Students may also choose to complete a minor outside the School of Education in an academic department, as negotiated with the student's academic advisor. While not required, the optional minor, comprised of 9-12 credits in addition to the major requirements of the program, may provide students with another academic area of expertise (e.g., sociology, philosophy, history, etc.)

### Other Requirements

All students must adhere to all other general requirements of the Urban Educational Doctoral Program pertaining to such issues as residency, preliminary examinations, dissertation proposals and defense, and time limits.

The preliminary qualifying exam will include a section covering the student's Social Foundations of Education specialization.

A dissertation with the appropriate area of emphasis is required. The dissertation committee must be composed of a minimum of five members of the graduate faculty. The dissertation advisor will be an approved doctoral advisor and a member of the Department of

Educational Policy and Community Studies. Two other members must be from the Department of Educational Policy and Community Studies, and one member must be from the minor area.

## Exit Requirements

Contingent upon completion of program requirements, the preliminary qualifying examination, and the successful defense of the dissertation, the chair of the Department of Educational Policy and Community Studies must give final approval for the inclusion of Social Foundations of Education upon the student's transcript.

## Information Studies (School of)

The School of Information Studies (SOIS) degree programs prepare students for careers in the Information Technology and Library professions. Our academic programs are designed to meet the challenges of the digital world and an ever-expanding information landscape. SOIS graduates are prepared for careers across the spectrum of information, data, and technology.

## Bachelor of Science in Information Science & Technology (BSIST)

The Bachelor of Science in Information Science and Technology (BSIST) combines core IT skills like front-end web design, programming and project management, with electives that you choose. The only degree of its kind in the UW System, the BSIST degree will set you apart from the competition.

## Bachelor of Science in Data Analytics

The Bachelor of Science in Data Analytics is a special degree program that includes courses from the College of Letters and Science, the School of Information Studies, and other UWM colleges to provide a solid general education as well as an interdisciplinary approach to data analytics. The BS in Data Analytics at UWM is unique because its goal is to train students to practice data analytics in a field they are most passionate about. Students take foundational classes to build core data analytics skills, then specialize in data analytics for business, health, information science, natural sciences, social sciences, or geographic information sciences.

## Master of Library and Information Science (MLIS)

The Master of Library & Information Science (MLIS) program, accredited by the American Library Association since 1976, prepares librarians and information professionals to manage change in an urbanized, technologically oriented and knowledge-based society. Its systematic course of study enables individuals with a strong service orientation to apply principles of library and information science, to use current methods and tools, and to recognize the value of research.

## Master of Science in Information Science & Technology (MSIST)

The Master of Science in Information Science and Technology (MSIST) is a professional graduate degree program for those who seek advanced training to meet the ever-increasing need for information technology (IT) professionals. The MSIST will provide essential skills and knowledge in the following areas:

- **Data science:** Provides students with advanced knowledge and skills to manage data sets generated by applications.
- **Information security:** Focuses on techniques ensuring the security of all data captured, stored and analyzed through applications.

## Doctor of Philosophy in Information Studies (PhD)

The Doctor of Philosophy in Information Studies prepares graduates for academic and professional careers where an in-depth knowledge of research processes and evaluation is needed. The program emphasizes the study of the representation, storage, retrieval, use, and impact of information resources on society. Graduates will contribute to the knowledge base of the discipline and will take on leadership roles as scholars and administrators in the discipline and the profession.

---

For information on SOIS's degree programs please see the SOIS website (<https://uwm.edu/informationstudies/>).

- Library and Information Science, MLIS: Public Library (p. 516)
- Library and Information Science, MLIS: School Librarianship (p. 518)

## Doctoral

- Information Studies, PhD (p. 491)

## Graduate Certificates

- Advanced Study in Archives and Records Administration, Graduate Certificate (p. 476)
- Cyber Crime Forensics, Graduate Certificate (School of Information Studies) (p. 477)
- Data Curation, Graduate Certificate (p. 482)
- Digital Libraries, Graduate Certificate (p. 483)
- Information Security, Graduate Certificate (p. 490)

## Requirements for Employment, Licensing, or Professional Organizations

Students should be aware that some professions, occupations, and employers are subject to licensing and/or bonding requirements. When a course of study includes clinical or field training, practice teaching, internships, or the like, students may be subjected to a check of criminal conviction records, prior to acceptance of a student by the placement site. Students are responsible for obtaining the information necessary for them to become knowledgeable about these requirements and plan their studies accordingly. Please contact the appropriate department or program office for further information.

## Administration

### Dean's Office

**Tina Freiburger**  
Interim Dean

**Dietmar Wolfram**

Senior Associate Dean & Professor

**Chad Zahrt**  
Assistant Dean (Student Affairs)

### Student Services

**Tobiah Deutsch**  
Senior Academic Advisor

**Maggie Flath**  
Senior Academic Advisor

**Angela Sadowsky**  
Senior Academic Advisor

**Julie Walker**  
Student/Alumni Engagement and Outreach Specialist

**Brian Williams**  
Senior Academic Advisor

### Administrative Services

**Rebecca Hall**  
Web Development & Marketing

**Allison Hecker**  
Communication Specialist

**Laura Meyer**  
Executive Assistant to the Deans

**Jessica Russell**  
Finance Manager

**Erica Yewlett**  
Senior HR Partner

# Advanced Study in Archives and Records Administration, Graduate Certificate

The Certificate of Advanced Study (CAS) in Archives and Records Administration is designed to help working professionals to update their knowledge in core areas of their responsibilities or to develop another specialty in a library-information area. It will enable students to either alter the direction of a career path or to enrich, update, and strengthen their skills and their knowledge of their field.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School

through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).

- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Admission

A Master of Library and Information Science degree or a master's degree in a closely related or allied field such as computer science, educational technology, or history with a minimum of a 3.0 grade point average is required for admission.

In addition to the Graduate School application materials, applicants must submit a one to two page reason statement outlining their background and their educational and professional goals.

## Credits and Courses

Students pursuing the Certificate of Advanced Study (CAS) must take 15 credits of INFOST designated coursework in consultation with the student's advisor. The courses that qualify for the CAS are as follows:

Code	Title	Credits
<b>Introduction Course</b>		
INFOST 650	An Introduction to Modern Archives Administration	3
<b>Foundation Courses</b>		
Minimum of 6 credits required		6

INFOST 750	Arrangement and Description in Archives	
INFOST 752	Archival Outreach: Programs and Services	
INFOST 753	Preserving Information Media	
INFOST 855	Advanced Appraisal	
<b>Elective Courses</b>		
Maximum of 6 credits to count toward the CAS		6
INFOST 640G	Information Literacy Instruction	
INFOST 655	Information and Records Management:	
INFOST 656	Electronic Documents and Records Management	
INFOST 682	Digital Libraries	
INFOST 691	Special Topics in Information Science:	
INFOST 714	Metadata	
INFOST 758	Technology Issues in Archives	
INFOST 759	Fieldwork in Archives and Manuscripts	
INFOST 850	Seminar in Modern Archives Administration	
INFOST 891	Advanced Topics in Library and Information Science:	
INFOST 999	Independent Research	
<i>Recommended (does not count towards CAS)</i>		
INFOST 603	History of Books and Printing	
<b>Total Credits</b>		<b>15</b>

## Additional Requirements

### Transfer Credit

No credits may be taken at an institution other than UWM.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Cyber Crime Forensics, Graduate Certificate (School of Information Studies)

The Department of Criminal Justice & Criminology offers a Certificate in Cyber Crime Forensics. The satisfactory completion of a sequence of courses will lead to a certificate in this growing area. Preparation includes a foundation in cyber crime theory, legal and policy issues of cyber crime, and digital forensic investigation.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

The certificate will be available to all students who have already received a bachelor's degree from any accredited university. Graduate students enrolled in any program who successfully complete the requirements of their program will be awarded the certificate at the time of graduation. Students who already have a bachelor's degree will receive the certificate upon completion of the program requirements.

The Certificate in Cyber Crime will consist of 21 credits with the following courses (or equivalents) required:

Code	Title	Credits
CRM JST 421G	Cybercrime	3
CRM JST 422G	Cyber Crime, Law & Public Policy	3
INFOST 695G	Ethical Hacking I	3
INFOST 691G	Special Topics in Information Science: (Ethical Hacking II)	1-3
INFOST 691G	Special Topics in Information Science: (Computer Forensics)	1-3
Choose 2 from the following:		6
CRM JST 423G	Investigating the Dark Web	
CRM JST 424G	Sex Crimes, Human Trafficking, and the Internet	
CRM JST 480G	Criminal Evidence and Investigation	
INFOST 784	Information Security Management	
<b>Total Credits</b>		<b>21</b>

A minimum of 15 credits must be taken at UWM. For those with a degree in Criminal Justice, past course credits will be evaluated for equivalency and will be approved by the department chairperson.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Cybersecurity, Undergraduate Certificate

The security of information resources and associated technologies has become critical in today's interconnected world. Cybersecurity professionals ensure information is protected from data breaches, unauthorized access, and data security threats.

Information Security Certificate students will leverage their technical knowledge with problem-solving skills to address the growing threats arising from cyberattacks and information privacy intrusions. Students will be equipped with the skills needed to assess risks to the security of personal and proprietary information in an organization and articulate the technical, organizational, and human factors associated with these risks.

## About

Information Security jobs are among the fastest-growing careers nationally. The Department of Labor's Bureau of Labor Statistics predicts that "Employment of information security analysts is projected to grow 33 percent from 2020 to 2030, much faster than the average for all occupations." (<https://www.bls.gov/ooh/computer-and-information-technology/information-security-analysts.htm>).

Students will learn to evaluate information technology tools designed to protect against threats facing organizations and assess the impact of security policies on existing complex systems and organizational objectives while considering regulatory requirements and compliance. Students will be well equipped to oversee the information security life cycle of an organization, including planning, acquisition, development, and evolution of secure infrastructures.

The undergraduate certificate in Cybersecurity will provide a documented credential that an informal track of courses does not reflect. As a certificate, it could also be completed independently of the Bachelor of Science in Information Science & Technology (BSIST) program.

Graduates can work in careers such as information security analysts, penetration testers, and forensic computer analysts.

## Requirements

To fulfill the requirements for the cybersecurity certificate, students must complete the following coursework with a minimum 2.5 GPA:

Code	Title	Credits
<b>Required</b>		
INFOST 325	Information Security I	3
INFOST 385	Information Security II	3
<b>Electives</b>		<b>12</b>

Select a minimum of 12 credits from the following eligible courses

INFOST 465	Legal Aspects of Information Products and Services
INFOST 491	Advanced Topics in Information Science & Technology: (Relevant courses such as Web Application Penetration Testing)

INFOST 660	Information Policy
INFOST 661	Information Ethics
INFOST 691	Special Topics in Information Science: (Relevant courses such as Computer Forensics)
INFOST 695	Ethical Hacking I
INFOST 696	Ethical Hacking II
INFOST 697	Cisco Routing & Switching I
COMPSCI 469	Introduction to Computer Security
BUS ADM 530	Privacy and Information Security for Business

**Total Credits** **18**

## Data Analytics, BS (School of Information Studies)

There is data all around us. Businesses are looking to hire people who can manage that data, analyze it, and use it for more effective decision making. The Bachelor of Science in Data Analytics (BSDA) is designed for you to learn those skills.

The Bachelor of Science in Data Analytics is a special degree program that includes courses from the College of Letters & Science, the College of Community Engagement & Professions, the Lubar College of Business, and the College of Engineering & Applied Science to provide a solid general education as well as an interdisciplinary approach to data analytics.

The BS in Data Analytics at UWM is unique because its goal is to train students to practice data analytics in a field they are most passionate about. If you enroll in this program, you will take foundational classes to build core data analytics skills, then specialize in data analytics for business, health, information science, natural sciences, social sciences, or geographic information sciences.

The career prospects for individuals with data analytics degrees are very positive. Data analytics skills are being used not only in industries that are obviously oriented toward using data, like information technology, sciences and business, but also in fields that more recently have begun to take full advantage of their data resources, like agriculture, atmospheric sciences, environmental sciences, geography, and healthcare.

## Requirements

The B.S. in Data Analytics requires 33 credits in General Education courses, 16 credits in Foundation courses, 33 credits in Core courses, 24 credits in a Specialization, and electives to reach a total of 120 credits.

### General Education Competency and Breadth Courses (p. 30)

Code	Title	Credits
<b>Oral and Written Communication Part A</b>		
Grade of C or better in ENGLISH 102 or equivalent		3
<b>Oral and Written Communication Part B</b>		
ENGLISH 205	Business Writing	3
<b>Quantitative Literacy Part A</b>		
Grade of C or better in one of the following:		3
MATH 105	Introduction to College Algebra	
MATH 108	Algebraic Literacy II	

Equivalent course

<b>Quantitative Literacy Part B</b>	
Choose one of the following:	
MATH 208	Quantitative Models for Business
MATH 211	Survey in Calculus and Analytic Geometry I
MATH 213	Calculus with Life Sciences Applications
MATH 221	Honors Calculus I
MATH 231	Calculus and Analytic Geometry I

<b>Breadth Courses</b>	
Arts GER course	3
Cultural Diversity GER course	3
Humanities GER courses	6
Natural Science GER courses (including one lab or field experience)	6
Social Science GER courses	6
Language other than English (two semesters or equivalent)	0-10
<b>Total Credits</b>	<b>36</b>

## Foundation Courses

Code	Title	Credits
<b>Mathematics</b>		<b>10</b>
MATH 240	Matrices and Applications	
MATH 212	Survey in Calculus and Analytic Geometry II (4 credits)	
<i>Choose one of the following (3 credits)</i>		
BUS ADM 210	Statistical Modeling in Business Analytics	
BUS ADM 211	Business Scholars: Statistical Modeling in Business Analytics	
ECON 210	Economic Statistics	
MTHSTAT 215	Elementary Statistical Analysis	
<b>Computer Literacy 1 <sup>1</sup></b>		<b>3</b>
<i>Choose one of the following (3 credits)</i>		
BUS ADM 230	Introduction to Information Technology Management	
HS 224	Computational Tools for Healthcare Professionals	
COMPSCI 150	Survey of Computer Science	
<b>Computer Literacy 2 <sup>1</sup></b>		<b>3</b>
<i>Choose one of the following (3 credits)</i>		
COMPSCI 202	Introductory Programming Using Python	
COMPSCI 240	Introduction to Engineering Programming	
COMPSCI 250	Introductory Computer Programming	
INFOST 350	Introduction to Application Development	
<b>Total Credits</b>		<b>16</b>

<sup>1</sup> Computer Literacy 1 and 2 can be satisfied by COMPSCI 250 and COMPSCI 251.

**Core Courses**

<b>Code</b>	<b>Title</b>	<b>Credits</b>
<b>Programming Languages 6</b>		
<i>Choose two of the following (6 credits)</i>		
BUS ADM 335	Introduction to Business Application Development	
BUS ADM 432	Object-Oriented Systems Development	
INFOST 350	Introduction to Application Development (Cannot be used in this category if it was used to satisfy the 'Computer Literacy 2' requirement)	
INFOST 440	Web Application Development	
BIO SCI 502	Introduction to Programming and Modeling in Ecology and Evolution	
COMPSCI 351	Data Structures and Algorithms	
MTHSTAT 216	Introduction to Statistical Computing and Data Science	
<b>Databases 3</b>		
<i>Choose one of the following (3 credits)</i>		
BUS ADM 434	Data Base Management Systems	
INFOST 410	Database Information Retrieval Systems	
HI 537	Health Information Technology and Management	
COMPSCI 557	Introduction to Database Systems	
<b>Analytics and Big Data/Data Mining 6</b>		
<i>Choose two of the following (6 credits)</i>		
BUS ADM 336	Enterprise Systems and Data Analytics	
BUS ADM 536	Business Intelligence	
INFOST 582	Introduction to Data Science	
INFOST 687	Data Analysis for Data Science	
INFOST 691	Special Topics in Information Science: ('Computer Forensics' is eligible. Other topics offered in a specific offering of this course must be approved for the degree by the Director of the Program.)	
ATM SCI 600	Data Analytics	
COMPSCI 411	Machine Learning and Applications	
COMPSCI 422	Introduction to Artificial Intelligence	
COMPSCI 425	Introduction to Data Mining	
ECON 411	Economic Forecasting Methods	
GEOG 215	Introduction to Geographic Information Science	
GEOG 525	Geographic Information Science (4 credits)	
<b>Visualization 3</b>		
<i>Choose one of the following (3 credits)</i>		
BUS ADM 438	Information Technology Management Topics:	
INFOST 370	Data Analysis and Visualization for the Information Professional	
GEOG 405	Cartography (4 credits)	
<b>Statistics 6</b>		
<i>Choose two of the following (6 credits)</i>		

MTHSTAT 361	Introduction to Mathematical Statistics I	
MTHSTAT 362	Introduction to Mathematical Statistics II	
ATM SCI 500	Statistical Methods in Atmospheric Sciences	
ECON 413	Statistics for Economists	
ECON 513	Introduction to Econometrics	
<b>Communication 3</b>		
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	
<b>Ethics 3</b>		
<i>Choose one of the following (3 credits)</i>		
BUS ADM 530	Privacy and Information Security for Business	
INFOST 661	Information Ethics	
HS 311	Law and Ethics for Healthcare Professionals	
COMPSCI 395	Social, Professional, and Ethical Issues	
PHILOS 237	Technology, Values, and Society	
SOCIOL 327	Data, Technology, and Society	
<b>Capstone/Fieldwork/Thesis 3</b>		
<i>Choose one of the following (3 credits)</i>		
BUS ADM 389	Real Estate Internship	
BUS ADM 394	Human Resources Management Internship	
BUS ADM 396	Finance Internship	
BUS ADM 397	Marketing Internship	
BUS ADM 398	Supply Chain & Operations Management Internship	
BUS ADM 400	Accounting Professional Internship	
BUS ADM 439	Information Technology Management Professional Internship	
BUS ADM 459	Finance Professional Internship	
BUS ADM 469	Marketing Professional Internship	
BUS ADM 479	Supply Chain & Operations Management Professional Internship	
BUS ADM 494	International Business Internship	
BUS ADM 534	Information Technology Practicum	
BUS ADM 600	Management Analysis	
INFOST 408	Nonprofit Information Technology	
INFOST 490	Senior Capstone	
INFOST 495	Information Internship	
COMPSCI 595	Capstone Project	
ECON 489	Internship in Economics, Upper Division	
MTHSTAT 489	Internship in Mathematical Statistics, Upper Division	
MATH 599	Capstone Experience (1 credit)	
GEOG 600	Perspectives on Geography	
GEOG 698	GIS/Cartography Internship	

---

**Total Credits 33**

## Electives in Different Specializations (24 credits in each specialization)

Code	Title	Credits
<b>Business 24</b>		
Select any 24 credits; Sub-specializations are listed so students may focus their coursework.		
BUS ADM 532	Web Development for Open Business Systems	
BUS ADM 533	Introduction to Connected Systems for Business	
BUS ADM 536	Business Intelligence	
BUS ADM 537	Enterprise Systems Concepts and Issues	
BUS ADM 539	Web Application Server Development	
BUS ADM 540	ERP Certification	
<i>Supply Chain</i>		
BUS ADM 370	Introduction to Supply Chain Management	
BUS ADM 436	Systems Analysis and Design	
BUS ADM 478	Supply Chain Analytics	
BUS ADM 571	Quality and Six Sigma Tools	
<i>Marketing</i>		
BUS ADM 360	Principles of Marketing	
BUS ADM 462	Marketing Research	
<i>Finance</i>		
BUS ADM 350	Principles of Finance	
BUS ADM 450	Intermediate Finance	
BUS ADM 451	Investment Finance	
BUS ADM 457	Financial Modeling	
BUS ADM 458	Venture Finance	
<i>Recommended<sup>2</sup></i>		
BUS ADM 300	Career and Professional Development (1 credit)	
<b>Information Science and Technology 24</b>		
INFOST 240	Web Design I	
INFOST 315	Knowledge Organization for Information Science and Technology	
INFOST 320	Web Design II	
INFOST 325	Information Security I	
INFOST 340	Introduction to Systems Analysis	
INFOST 350	Introduction to Application Development (If not used already as part of the Foundations requirement)	
INFOST 375	Multimedia Web Design	
INFOST 383	Native Mobile Applications	
INFOST 430	Multimedia Application Development	
INFOST 465	Legal Aspects of Information Products and Services	
INFOST 491	Advanced Topics in Information Science & Technology. <sup>3</sup>	
INFOST 583	Survey of Information Security	
INFOST 584	Survey of Web and Mobile Content Development	
INFOST 695	Ethical Hacking I	

INFOST 691	Special Topics in Information Science. <sup>3</sup>	
<b>Health 24</b>		
<i>This specialization will require 3-6 credits from a different specialization as approved by the Program Director.</i>		
HCA 307	Epidemiology for the Health Sciences	
HCA 444	Introduction to Text Retrieval and Its Applications in Biomedicine	
HCA 541	Healthcare Information Systems Analysis and Design	
HCA 542	Healthcare Database Design and Management	
PH 355	Public Health Research Methods I	
PH 410	True Lies: Consuming and Communicating Quantitative Information	
PH 455	Public Health Research Methods II	
<i>Recommend one of the following:<sup>2</sup></i>		
HS 222	Language of Medicine	
BMS 205	Introduction to Diagnostic Medicine	
NURS 352	Health and Illness Concepts 1: Introduction	
<b>Natural Sciences 24</b>		
BIO SCI 469	Genomic Data Analysis (2 credits)	
FRSHWTR 504	Quantitative Freshwater Analysis	
FRSHWTR 514	Analytical Techniques in Freshwater Sciences	
FRSHWTR 640	Sequence Analysis	
MTHSTAT 563	Regression Analysis	
MTHSTAT 564	Time Series Analysis	
MTHSTAT 568	Multivariate Statistical Analysis	
MATH 583	Introduction to Probability Models	
ACTSCI 391	Investment Mathematics I (4 credits)	
ACTSCI 591	Investment Mathematics II	
ACTSCI 593	Actuarial Models I	
ACTSCI 594	Actuarial Models II	
ACTSCI 596	Actuarial Statistics I	
ACTSCI 597	Actuarial Statistics II	
<b>Social Sciences 24</b>		
<i>Choose at most one of the following methods courses:</i>		
CRM JST 662	Methods of Social Welfare Research	
POL SCI 203	Introduction to Political Science Research	
PSYCH 325	Research Methods in Psychology (4 credits)	
AFRIC 301	Research Methods in African & African Diaspora Studies	
SOCIOL 361	Research Methods in Sociology	
<i>Choose at most one of the following multiple regression courses</i>		
ECON 310	Research Methods for Economics	
PSYCH 610	Experimental Design	
SOCIOL 461	Social Data Analysis Using Regression	
<i>And, take courses from the list below to complete 24 credits.</i>		
CRM JST 510	Introduction to Crime Analysis	

CRM JST 520	Analysis Oriented Technology: Spatial Data Analysis; Crime Mapping; ArcGIS
GEOG 215	Introduction to Geographic Information Science
GEOG 525	Geographic Information Science (4 credits)
GEOG 547	Spatial Analysis (4 credits)
POL SCI 390	Political Data Analysis
POL SCI 392	Survey Research
PSYCH 510	Advanced Psychological Statistics
SOCIOL 352	Social Networks
<b>Geographic Information Science</b>	<b>24</b>
GEOG 403	Remote Sensing: Environmental and Land Use Analysis (4 credits)
GEOG 437	Qualitative Methods in Geography
GEOG 547	Spatial Analysis (4 credits)
GEOG 515	Watershed Analysis and Modeling
GEOG 625	Intermediate Geographic Information Science (4 credits)
URBPLAN 591	Introduction to Urban Geographic Information Systems (GIS) in Planning
CRM JST 520	Analysis Oriented Technology: Spatial Data Analysis; Crime Mapping; ArcGIS

<sup>2</sup> Recommended courses do not count toward the specialization unless approved by the Director. They are merely recommended additional courses.

<sup>3</sup> Specific topics courses need to be approved for the degree by the Program Director. A topic course cannot be used again if applied to a prior degree requirement category.

## General Electives

With the help of their academic advisor, students will select electives to complete the 120 total credits required for the degree. Electives are tailored to each student's interests and career goals.

## Second Degree

A student wishing to complete a second degree in BSDA will need to complete all 33 credits of the Core Courses. They must complete the Foundations courses to be eligible for this degree. They are not required to complete the Electives with specialization, as their first major may fulfill that role in the degree.

## College of Community Engagement and Professions Dean's Honor List

GPA of 3.750 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Data Curation, Graduate Certificate Graduate Certificate in Data Curation

The Graduate Certificate in Data Curation will provide an Information Science-centered focus on data issues, particularly in the representation, organization, storage, and retrieval of large amounts of data where expertise in these areas is needed. Data professionals are needed to fulfill a variety of functions, including data management, curation, and stewardship in academic and industry settings.

Data curators work alongside data engineers and data scientists to design, implement, and apply data management techniques to relevant data sets. Graduates of the program will gain the skills to identify reliable data sources, analyze data in various formats, and design and maintain big data and data analytics systems using the principles of data mining, data modeling, and data architecture.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Admission

The minimum G.P.A. for admission is 2.75 (4 point scale) in a prior bachelor's or postbaccalaureate degree (or cumulative credits after admission to a dual bachelor-master's degree program.) Preference will be given to those students who have a baccalaureate degree in information sciences, computer information systems, computer

science, engineering, statistics, or a related field. Students with sufficient background gained through work experience or professional training in information technologies, such as networks, web services, and database development, will also be considered for admission to the program.

In addition to the Graduate School application materials, applicants must submit a one to two page reason statement outlining their background and their educational and professional goals.

Those who have neither of the aforementioned qualifications will be encouraged to take the following prerequisites, or their equivalents, before taking related courses:

Code	Title	Credits
INFOST 240	Web Design I	3
INFOST 410	Database Information Retrieval Systems	3
INFOST 440	Web Application Development	3

If taken, these courses must have been completed within the last five years with a grade of B or better (B- not acceptable).

## Credits and Courses

To complete the requirements for the data curation certificate, students must complete:

Code	Title	Credits
<b>Required</b>		
INFOST 582G	Introduction to Data Science	3
INFOST 771	Data Curation	3
<b>Electives</b>		
Select a minimum of 9 credits from the following:		9
INFOST 465G	Legal Aspects of Information Products and Services	
INFOST 655G	Information and Records Management:	
INFOST 656G	Electronic Documents and Records Management	
INFOST 660G	Information Policy	
INFOST 661G	Information Ethics	
INFOST 687G	Data Analysis for Data Science	
INFOST 691G	Special Topics in Information Science: (with relevant topic)	
INFOST 714	Metadata	
INFOST 717	Information Architecture	
INFOST 719	Advanced Topics in Information Organization (with relevant topic)	
INFOST 785	Database Management Systems for Information Professionals	
<b>Total Credits</b>		<b>15</b>

Relevant courses from other units on campus will also be considered, including:

Code	Title	Credits
BUS ADM 749	Data and Information Management	3
COMPSCI 411G	Machine Learning and Applications	3
COMPSCI 425G	Introduction to Data Mining	3
COMPSCI 557G	Introduction to Database Systems	3

COMPSCI 723	Natural Language Processing	3
COMPSCI 744	Text Retrieval and Its Applications in Biomedicine	3
HI 745	Health Big Data Processing Platforms	3
HI 760	Biomedical and Healthcare Terminology and Ontology	3

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Digital Libraries, Graduate Certificate

The Certificate in Digital Libraries is designed to help working professionals update their knowledge and develop specialty relating to the acquisition, organization and maintenance of digital content, virtual collections and services. It will enable students to either alter the direction of a career path or to enrich, update, and strengthen their skills and their knowledge of their field.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Admission

Admission to the Master of Library and Information Science program or a master's program in a closely related field such as computer science or educational technology is required to apply for the certificate. Students already possessing an MLIS or master's degree in a closely related field may also apply for the program as a standalone certificate.

In addition to the Graduate School application materials, applicants must submit a one to two page reason statement outlining their background and their educational and professional goals.

## Credits and Courses

The candidate will complete 15 credits of coursework, planned in conjunction with their advisor, and approved by the Associate Dean of the School of Information Studies as an individually designed program suited for the needs and professional objectives of the student.

A minimum of 12 credits must be taken in the School of Information Studies.

No thesis is required, but students may obtain up to 3 credits in independent research which is included as a part of the total approved program.

- See the list of School of Information Studies (p. 1892) courses.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

## Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Information Science and Technology, BS

Information science, on which the Information Science and Technology program is based, is the study of the organization, storage, retrieval, dissemination, and use of information. Information technology (IT) is the collection of tools that make it possible to access and use information. Some graduates will go directly into jobs in business and industry sectors that rely heavily on information as a raw material or as a product. Other graduates may go on to graduate study in library and information science, information management, computer science, or telecommunications.

## Career Opportunities

The Bachelor of Science in Information Science and Technology will give students a head start on any number of careers in the information industry:

- Information Architect
- Business Information Coordinator
- Network Manager
- IT Consultant
- Web Designer
- Technology Trainer
- Multimedia Specialist
- Human-Computer Interface Designer

- Software/Systems Developer
- Technical Writer
- Database Developer
- Digital Library Specialist
- E-Commerce Web Administrator

## Experiential Learning

Becoming a leader in IT means immersing yourself in the tools and technologies of the profession. SOIS provides students with valuable experiential learning opportunities through the Nonprof-IT program. The mission of the Nonprof-IT program is to empower local nonprofit organizations with comprehensive information technology support by creating internship opportunities for UW-Milwaukee students. UWM students gain real world experience working on project teams, providing technology solutions, and receive credits toward graduation while developing a passion for service. Visit the Nonprof-IT website (<https://uwm.edu/informationstudies/community-engagement/nonprof-it/>) to learn more.

## BSIST Mission

The mission of the Bachelor of Science in Information Science and Technology (BSIST) program is to prepare students – equipped with technical, interpersonal, and ethical proficiencies – for careers in the information professions who will design, build, and support user-focused information technology solutions to meet a diverse set of needs.

## BSIST Learning Outcomes

Graduates of the Bachelor of Science in Information Science and Technology (BSIST) program will have the ability to:

1. Analyze complex information and technology needs, and to apply principles of information science and other relevant disciplines to identify and implement solutions.
2. Design, implement, evaluate, and administer information systems to meet a given set of requirements – including user and organizational needs – in diverse environments.
3. Communicate effectively in a variety of professional contexts.
4. Function effectively as a member or leader of a team engaged in the design, implementation, and evaluation information technology solutions.
5. Recognize organizational and social responsibilities as information professionals and make informed judgments based on legal and ethical principles.

[Syllabi for all BSIST courses – both core and electives – should specify which of the learning outcomes will be achieved by the end of the course.]

Approved by BSIST Curriculum Committee: March 2, 2018

## Requirements

Code	Title	Credits
Area I: UWM Distribution Requirements		21
Area II: Major Requirements		30
Area III: Information Studies Electives		15
Area IV: BSIST Cross-functional Electives		12
Area V: General Electives		42
<b>Total Credits</b>		<b>120</b>

## Related Area of Study

Each student will work with his/her advisor to select general electives, including related areas of study that are appropriate to his/her career goals and to complete the 120 total credit requirements for the BSIST degree. Because of its interdisciplinary and cross-functional nature, the BSIST program allows students to apply the study of the concepts and tools of information science, information architecture, and information technology to one or more related areas of study. The related area of study is a set of courses outside of the BSIST major, normally a minor or certificate in another field of study, typically including 18-22 credits. In some cases, students may choose to study two related areas as part of their BSIST program.

**Related Areas of Study Selected List:** Computer Science; Health Care Administration; Art & Design; General Business; Library & Information Science; Philosophy; Global Studies; Intelligent Systems; Communication; Digital Arts & Culture; Mass Communication & Journalism

With the help of their advisor, students create and customize their own related area of study. This may be credit-bearing courses that students will take to prepare for certification examinations such as Microsoft certifications, CISCO, etc., or a customized selection of courses chosen by students that will sharpen their skills in one or more selected areas of study.

## Completing the Degree

The BSIST degree includes a total of 120 credits as follows:

Code	Title	Credits
<b>Area I: UWM Distribution Requirements</b>		
General Education Requirements (GER) <sup>1</sup>		21
<b>Area II: Major Requirements</b>		
INFOST 110	Introduction to Information Science and Technology	3
INFOST 240	Web Design I	3
INFOST 290	Project Teams, Leadership, and Communication	3
INFOST 310	Human Factors in Information Seeking and Use	3
INFOST 315	Knowledge Organization for Information Science and Technology	3
INFOST 340	Introduction to Systems Analysis	3
INFOST 350	Introduction to Application Development	3
INFOST 410	Database Information Retrieval Systems	3
INFOST 440	Web Application Development	3
INFOST 490	Senior Capstone	3
<b>Area III: Information Studies Electives</b>		
Select five additional Information Studies courses at the 300, 400, 500, or 600 level or equivalent coursework		15
<b>Area IV: BSIST Cross-functional Electives</b>		
Select 12 credits		12
<b>Area V: General Electives</b>		
Select 42 General Electives, including Associate Area(s) of Study		42
<b>Total Credits</b>		<b>120</b>

<sup>1</sup> Learn more about the General Education Requirements (p. 29).

To continue and graduate in the BSIST program, each student must maintain a grade point average of at least 2.5 in the major and a cumulative grade point average of at least 2.0 on all credits counted toward the degree.

Students who have previously completed a bachelor's degree may be eligible to earn a second bachelor's degree in Information Science and Technology by completing 36 Information Studies (INFOST) credits in consultation with a BSIST advisor.

## Four-Year Graduation Guarantee

If a student satisfies all the obligations described in the Four-Year Graduation Guarantee, the student will be able to complete an undergraduate degree within four years. If the undergraduate degree completion in four years is delayed by the unavailability of courses, then UWM will relieve the student of the financial tuition burden for courses still required for graduation.

## IST Core Competencies

The successful BSIST student will demonstrate understanding of the following:

- theoretical nature of information science and information technologies;
- organization and architecture of information based on understanding of the context, the content, and the user needs;
- user-centered information system and service development;
- information storage and retrieval systems;
- management of information, including the processes to enable the flow of information; and
- use of information and communication technology for managing and organizing information and content.

## Admission to the BSIST Program

Standard UWM admission policies for freshmen and transfer students apply. Students may begin the program as freshmen or after completing several semesters as undeclared or other majors. Students may begin as transfer students from another accredited college or university or as students returning to get a second degree.

In addition to being available during standard class times, the BSIST degree is available fully online to serve students both on and off campus.

### Entrance Guidelines

Students who meet the standard University admission requirements are admissible to the School of Information Studies. The same criteria for acceptance are applied to in-state and out-of-state students. For undergraduate admission requirements, see the Admission (p. 15) section of this catalog.

## Advising

Students accepted by UWM who declare an interest in the IST program will be assigned a SOIS advisor. Students are expected to work closely with their IST advisor to tailor a program of electives to best suit their interests and career goals. IST students may also wish to explore minors or certificates in related areas such as computer science or technical

writing. For information on Academic Advising for IST majors, please visit the SOIS Academic Advising (<https://uwm.edu/informationstudies/students/academic-advising/>) page.

## Career Services

Whether you are a recent graduate just starting your career or an alumni looking for a change, the School of Information Studies (SOIS) is committed to supporting students and alumni throughout their careers. Visit our career resources (<https://uwm.edu/informationstudies/students/career-resources/>) page for career-related resources and join us throughout the year for career workshops and networking opportunities.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## Honors in the Major

GPA of 3.500 or above in all Information Studies (INFOST) courses applied towards the Information Studies Core (Area II) and Upper Division (Area III) requirements. A minimum of 36 INFOST credits completed in residence are needed towards the Core and Upper Division requirements to be considered for Honors in the Major

## High Honors in the Major

GPA of 3.750 or above in all Information Studies (INFOST) courses applied towards the Information Studies Core (Area II) and Upper Division (Area III) requirements. A minimum of 36 INFOST credits completed in residence are needed towards the Core and Upper Division requirements to be considered for High Honors in the major.

## College of Community Engagement and Professions Dean's Honor List

GPA of 3.750 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Information Science and Technology, Minor

For undergraduate students in other degree programs outside the School of Information Studies, SOIS also offers an undergraduate minor in Information Science and Technology (IST).

Students who wish to become information and technology literate while pursuing studies in their major areas are candidates. For example, the minor is attractive to students majoring in the humanities, arts, and social sciences where the combination of their major field with the IST minor will help prepare students for careers in information-related work. Fields that combine well with the IST minor include English (particularly Technical Writing), Modern Languages, Communication, Mass Communication, Psychology, Sociology, and the arts. It should also be of interest to students majoring in professional fields such as Computer Science and Business Administration where the courses from IST will complement their major.

### Requirements

Fulfillment of the minor entails completion of 18 credits from the following list of courses:

Code	Title	Credits
<b>Required</b>		<b>3</b>
INFOST 110	Introduction to Information Science and Technology	
<b>6 credits from the following IST Core options:</b>		<b>6</b>
INFOST 240	Web Design I	
INFOST 290	Project Teams, Leadership, and Communication	
INFOST 310	Human Factors in Information Seeking and Use	
INFOST 315	Knowledge Organization for Information Science and Technology	
INFOST 340	Introduction to Systems Analysis	
INFOST 350	Introduction to Application Development	
INFOST 410	Database Information Retrieval Systems	
INFOST 440	Web Application Development	
INFOST 490	Senior Capstone	
<b>9 credits:</b>		<b>9</b>
9 additional credits to be taken from INFOST 300-level or above coursework		
<b>Total Credits</b>		<b>18</b>

## Information Science and Technology, MS

The Master of Science in Information Science and Technology (MSIST) is a professional graduate degree program for those who seek advanced training to meet the ever increasing need for information technology (IT) professionals. The degree will be composed of 30 credit hours and will supplement our Bachelor of Science in Information Science and Technology.

The MSIST will provide essential skills and knowledge in the following areas:

- **Data science:** Provides students with advanced knowledge and skills to manage data sets generated by applications.
- **Information security:** Focuses on techniques ensuring the security of all data captured, stored and analyzed through applications.

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these departmental requirements to be considered for admission to the program:

- A resume.
- A one to two page reason statement outlining your background and your educational and professional goals.

#### Prerequisites

Preference will be given to those students who have a baccalaureate degree in information sciences, computer information systems, computer science, engineering, statistics, or a related field. Students with sufficient background gained through work experience or professional training in information technologies, such as networks, web services, and database development, will also be considered for admission to the program. Those who have neither of the aforementioned qualifications will be encouraged to take the following prerequisites, or their equivalents, before taking related courses:

Code	Title	Credits
INFOST 240	Web Design I	3
INFOST 410	Database Information Retrieval Systems	3
INFOST 440	Web Application Development	3

If taken, these courses must have been completed within the last five years with a grade of B or better (B- not acceptable).

### Credits and Courses

The program requires 30 graduate-level credits, including 15 credits of required coursework, competency requirement and either 12 or 15 credits of elective credit depending on whether competency is demonstrated through coursework or examination.

Code	Title	Credits
<b>Core Courses</b>		
INFOST 582	Introduction to Data Science	3
INFOST 583	Survey of Information Security	3
COMPST 701	Computing Fundamentals for IT Professionals	3
COMPST 703	Software Development Life Cycle	3

*Programming proficiency as demonstrated by one of the following with a "C" or better:* 0-3

INFOST 350	Introduction to Application Development	
BUSMGMT 744	R Programming for Business Analytics	
COMPST 702	Introductory Programming Using Python	
COMPST 750	Problem Solving with Object-Oriented Programming	
HI 741	Essential Programming for Health Informatics	
PH 718	Data Management and Visualization in R	

Programming Competency Examination

#### *Culminating Course*

INFOST 790	Project Design, Implementation, and Evaluation	3
------------	--	---

#### **Electives**

12-15 credits from any INFOST or COMPST course offerings or from any of the Tracks. Number of credits is dependent on whether programming competency is demonstrated through coursework or examination. 12-15

**Total Credits** 30

### **Electives**

Select 12 or 15 credits of elective credits depending on whether programming competency is demonstrated through coursework or examination. Electives can be used toward Tracks.

#### **Electives for the Information Security Track**

12 credits of coursework from any of the courses listed below.

Code	Title	Credits
INFOST 465	Legal Aspects of Information Products and Services (G)	3
INFOST 547	User-Centered Interaction Design	3
INFOST 584	Survey of Web and Mobile Content Development	3
INFOST 660	Information Policy	3
INFOST 661	Information Ethics	3
INFOST 671	Applied Web 3.0: Artificial Intelligence and Blockchain	3
INFOST 691	Special Topics in Information Science:	1-3
INFOST 695	Ethical Hacking I	3
INFOST 696	Ethical Hacking II	3
INFOST 697	Cisco Routing & Switching I	3
INFOST 784	Information Security Management	3
INFOST 785	Database Management Systems for Information Professionals	3
BUS ADM 743	Information Privacy, Security & Continuity	3
BUS ADM 817	Connected Systems for Business	3
COMPSCI 469	Introduction to Computer Security	3
COMPSCI 520	Computer Networks	3

COMPST 750	Problem Solving with Object-Oriented Programming	3
COMPST 751	Data Structures and Algorithms	3

#### **Electives for the Data Science Track**

12 credits of coursework from any of the courses listed below.

Code	Title	Credits
INFOST 465	Legal Aspects of Information Products and Services	3
INFOST 660	Information Policy	3
INFOST 661	Information Ethics	3
INFOST 671	Applied Web 3.0: Artificial Intelligence and Blockchain	3
INFOST 687	Data Analysis for Data Science	3
INFOST 691	Special Topics in Information Science:	1-3
INFOST 714	Metadata	3
INFOST 719	Advanced Topics in Information Organization	3
INFOST 771	Data Curation	3
INFOST 784	Information Security Management	3
INFOST 785	Database Management Systems for Information Professionals	3
BUS ADM 713	Business Forecasting Methods	3
BUS ADM 741	Web Mining and Analytics	3
BUS ADM 744	Information Technology Strategy and Management	3
BUS ADM 746	Topics in Information Technology Management:	3
BUS ADM 749	Data and Information Management	3
BUS ADM 754	Statistical Analysis	3
BUS ADM 763	Marketing Analytics	3
BUS ADM 769	Database Marketing	3
BUS ADM 810	Development of Web-Based Solutions	3
BUS ADM 816	Business Intelligence Technologies & Solutions	3
BUS ADM 914	Advanced Multivariate Techniques in Management Research	3
BUSMGMT 709	Predictive Analytics for Managers	3
BUSMGMT 744	R Programming for Business Analytics	3
COMPSCI 423	Introduction to Natural Language Processing	3
COMPSCI 425	Introduction to Data Mining	3
COMPSCI 557	Introduction to Database Systems	3
COMPSCI 710	Artificial Intelligence	3
COMPSCI 744	Text Retrieval and Its Applications in Biomedicine	3
COMPST 702	Introductory Programming Using Python	3
COMPST 750	Problem Solving with Object-Oriented Programming	3
COMPST 751	Data Structures and Algorithms	3
COMPST 790	Advanced Topics in Computer Studies:	3-9
ELECENG 711	Introduction to Machine Learning	3
ELECENG 890	Special Topics:	3

GEOG 726	Geographic Information Science	4
HI 741	Essential Programming for Health Informatics	3
HI/COMPSCI 744	Text Retrieval and Its Applications in Biomedicine	3
HI 760	Biomedical and Healthcare Terminology and Ontology	3

### Electives for the Generalist Track

Code	Title	Credits
Any Graduate level INFOST or COMPST course.		1-3
Any course from the Data Science Track.		1-3
ART 302	Art and Design Workshop:	3
ART 412	Advanced Creative Technologies	3
ART 423	Experimental Typography	3
ART 496	Sequence and Structure	3
ART 524	Professional Practice in Design:	3-6
ART 929	Advanced Research-Design & Digital Media	1-4
ARCH 583	Emerging Digital Technology:	3
ARCH 771	Representation I	3
BUS ADM 748	Managing Information Technology Projects	3
COMPSCI 459	Fundamentals of Computer Graphics	3
COMPSCI 481	Server-side Internet Programming	3
COMPSCI 482	Rich Internet Applications	3
COMPSCI 522	Computer Game Design	3
COMPSCI 718	Advanced Computer Graphics: Modeling and Animation	3
COMPSCI 737	Software Project Management	3
COMPSCI 743	Intelligent User Interfaces	3
COMPSCI 747	Principles & Practices of User Interface Design	3
GEOG 704	Remote Sensing: Environmental and Land Use Analysis	4
GEOG 705	Cartography	4
GEOG 726	Geographic Information Science	4
GEOG 804	Advanced Remote Sensing	3

### Minimum Grade Requirement in the Required Courses

The minimum grade requirement for the required courses is a B. Students who earn a grade of B- or lower have not met the minimum requirement and will be allowed to repeat the required course once. Students are responsible for tuition in the repeated course; no credit is earned from the first attempt at the required course, or any required course for which a B- or lower is earned. Materials and assignments used previously may not be reused or resubmitted when retaking a required course unless approved by the instructor. Those who do not meet the minimum grade requirements upon repeating the course will be recommended for academic dismissal. Students may not register for a course for which any of the required courses is a prerequisite until the minimum grade requirement is met.

## Additional Requirements

### Time Limit

All degree requirements must be completed within five years from the date of initial enrollment in the Master's program.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## Information Science and Technology, MS/Library and Information Science, MLIS

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

## Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if they were not taken simultaneously. *All degree requirements of each component must be satisfied.*
- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

### MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

### MSIST/MS Information Science and Technology

A Master of Science in Information Science and Technology/Master of Library and Information Science program prepares students for positions in information technology in all types of libraries, 54 credits.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Credits and Courses

### Degree Requirements

Thirty hours will be required for the MLIS and twenty-four for the MSIST. SOIS reduces the MLIS by 6 credit hours of electives in consideration of another master's degree. The requirements for the MSIST are its 5 or 6 core courses plus 6 or 9 credits of elective coursework totaling 24 credits.

In sum, for 54 credit hours a student can complete both the MLIS and MSIST degrees. Degrees will be awarded simultaneously.

- See the MSIST (p. 487) page and the MLIS (p. 493) page for more information.

### Information Science and Technology (MS)

<b>Total Credits</b>		<b>30</b>

### Important

You must refer to the catalog pages of both individual master's programs to ensure that you meet all requirements for both degrees.

## Additional Requirements

### Time Limit

All degree requirements must be completed within seven years from the date of initial enrollment in the Master's program.

## Information Security, Graduate Certificate in Information Security

The Graduate Certificate in Information Security will prepare students to address the growing threats arising from cyberattacks and information privacy intrusions. Students learn how to assess risks to the security of proprietary information in an organization and how to articulate the technical, organizational, and human factors associated with these risks. Students will learn how to evaluate information technology tools designed to protect against information security threats and assess the impact of security policies on existing complex systems and organizational objectives.

Graduates are well prepared to oversee the information security life cycle of an organization, including planning, acquisition, development, and evolution of secure infrastructures.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Admission

In addition to the Graduate School application materials, applicants must submit a one to two page reason statement outlining their background and their educational and professional goals.

## Credits and Courses

Students in the Information Security certificate program must complete a minimum of 15 graduate credits.

Code	Title	Credits
<b>Required</b>		
INFOST 583G	Survey of Information Security	3
INFOST 784	Information Security Management	3
<b>Electives</b>		
Select a minimum of 9 credits from the following: <sup>1</sup>		9
INFOST 465G	Legal Aspects of Information Products and Services	
INFOST 660G	Information Policy	
INFOST 661G	Information Ethics	
INFOST 691G	Special Topics in Information Science: (with relevant topic)	
INFOST 695G	Ethical Hacking I	
INFOST 696G	Ethical Hacking II	
INFOST 697G	Cisco Routing & Switching I	
INFOST 785	Database Management Systems for Information Professionals	
INFOST 897	Information Science and Technology Independent Study	
<b>Total Credits</b>		<b>15</b>

<sup>1</sup> Relevant courses from other units that may be appropriate include: BUS ADM 743 and COMPSCI 469G.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Information Studies, PhD

### PhD Overview

The Doctor of Philosophy in Information Studies prepares graduates for academic and professional careers where an in-depth knowledge of research processes and evaluation is needed. The program emphasizes the study of the representation, storage, retrieval, use, and impact of information resources on society. Graduates will contribute to the knowledge base of the discipline and will take on leadership roles as scholars and administrators in the discipline and the profession.

### SOIS Overview

#### About the School of Information Studies

The School of Information Studies prepares students for careers in libraries and the information professions. The School's array of graduate programs provides students with the opportunity to develop attitudes associated with progressive information services, and to develop an understanding of the value, role, and application of modern technology as it relates to library operations and the transfer of information.

In harmony with the mission of the University of Wisconsin-Milwaukee, a major urban research institute, the School of Information Studies strives to make significant contributions towards extending and enhancing the quality of information services and the promotion of information and technological literacy to a diverse society. The School of Information Studies is committed to excellence in instruction, research, and service.

#### Goals of the school are:

- To prepare professionals who are able to provide leadership and adapt to change in a technological and knowledge-based environment for careers in libraries, school media centers, information systems, and related areas, according to accepted professional standards.
- To enrich the library and information science profession through recruitment of students with strong academic skills from diverse cultural, geographic, and subject backgrounds.
- To enable undergraduate students to achieve qualifications to pursue careers in the information professions through the provision of degree and certificate programs.
- To enable students to develop specializations in the information professions at the graduate level through the provision of single and dual degree programs.
- To promote a research orientation through participation in the Doctor of Philosophy degree program.
- To contribute to the international knowledge base of library and information science through research and publication.

7. To facilitate the development, provision, and evaluation of library and information services through consultation services to individual organizations and leadership in professional associations locally, statewide, nationally, and internationally.
8. To offer opportunities for professionals and the wider community to update their skills and knowledge through advanced and continuing education courses, workshops, and programs offered nationally and internationally.

## Related Advanced Certificates

- Certificate of Advanced Study in Archives and Records Administration (p. 476)
- Certificate in Digital Libraries (p. 483)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students begin the Information Studies doctoral program in the fall. Applications are accepted only for the fall semester.

An applicant must meet Graduate School requirements plus these departmental requirements to be considered for admission to the program in regular status:

- Have a cumulative GPA in coursework for the Master's degree of at least 3.5 and an undergraduate GPA of 3.0. Applicants possessing a Master of Library and Information Science, or a master's degree in an allied discipline, are encouraged to apply.
- Submit three letters of recommendation from qualified persons who can attest to the applicant's aptitude for doctoral study. At least one letter must be from an academic.
- Submit a one to two page reason statement outlining your background and your educational, research, and career goals.
- Submit a writing sample that demonstrates the applicant's analytical and critical thinking skills. This may take the form of a published research paper, term paper from a previous graduate program, or earlier completed thesis.
- Submit a curriculum vitae.
- Verbal and quantitative scores for the Graduate Record Examination (GRE) (<http://uwm.edu/graduateschool/admission/#gre>) taken within the past five years are optional and are not required for admission consideration.
- Applicants are encouraged to bring at least two years of relevant professional experience prior to entering the PhD program.

Applicants lacking the requisite GPA or academic area may be considered for admission on probation, and may be required to complete preparatory coursework.

## Credits and Courses

Students will need to complete a minimum of 30 credits of approved coursework at the 700-level or higher.

Standard Graduate School minimum and maximum credit loads (<http://uwm.edu/graduateschool/academic-policies-procedures/>) apply. Full-time students are discouraged from taking more than 9 credits per semester.

Students, along with their major professor, should develop a plan for coursework that will prepare the student to carry out research in their areas of interest. Although an identified dissertation topic is not required upon entry to the program, students should begin to formulate ideas for potential topics as soon as possible thereafter.

Code	Title	Credits
<b>Foundation Courses</b>		
INFOST 901	Current Issues in Information Studies	3
INFOST 910	Doctoral Seminar in the Organization of Information	3
INFOST 960	Doctoral Seminar in Information Policy	3
INFOST 970	Doctoral Seminar in Information Retrieval	3
<b>Research Methods and Design</b>		
INFOST 903	Qualitative Research Methods <sup>1</sup>	3
INFOST 904	Quantitative Research Methods <sup>1</sup>	3
Select a minimum of 3 additional credits in approved research methods coursework <sup>2</sup>		3
<b>Specialized Area</b>		
Select a minimum of 9 credits related to the specialized area(s) of the dissertation topics from the following: <sup>3</sup>		9
Approved existing graduate courses within SOIS		
Advanced special topics classes offered within SOIS at the 700-level or higher		
INFOST 999	Independent Research	
Courses offered outside of SOIS		
<b>Total Credits</b>		<b>30</b>

<sup>1</sup> In exceptional cases, and with the approval of the major professor, a student may satisfy these research methods requirements through courses offered in other campus units.

<sup>2</sup> The particular focus of these 3 credits will be guided by the student's planned research areas and may include coursework in research design, qualitative, quantitative, or other research methods. Additional coursework may be required at the discretion of the major professor.

<sup>3</sup> Specific courses must be approved by the major professor.

### Minimum Grade Requirement in the Required Courses

The minimum grade requirement for each of the SOIS foundation and methods courses is "B". If a doctoral student fails to meet this requirement, they are required to retake the course. Students may retake a failed course one time. A student who fails to receive a "B" or higher after retaking a required course will be recommended to the Graduate School for academic dismissal.

## Additional Requirements

### Major Professor as Advisor

Unless a student specifically requests a particular faculty member, all doctoral students initially are assigned an “interim” advisor. After the completion of 12 credits, a student is required to designate a faculty member from an approved list of major professors with specialized interests compatible with those of the student to act as the major professor. The major professor is expected to assist the student in planning the remainder of the program of studies, chair the student’s preliminary examination committee, supervise the completion of the PhD dissertation, and conduct the dissertation defense meeting. All students should consult the program handbook for additional details on school policies and procedures.

### Residence

The student must meet minimum Graduate School residence requirements of one continuous academic year of full-time graduate studies at UWM; physical residency in Milwaukee is not necessary. This can be satisfied by completing at least 8 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions. Residence credit cannot be earned at the master’s level.

### Distance Students

Distance students (not located near Milwaukee, Wisconsin) are encouraged to apply. Such students will be required to attend an orientation on campus at the beginning of the program. SOIS doctoral seminars will be streamed live online for distance students to participate synchronously with local students and faculty, and students will be responsible for meeting all other program requirements via online courses or other approved means. Students begin the Information Studies doctoral program in the fall. An applicant whose file is incomplete will be asked to contact the Graduate School. Application requirements and deadlines are the same for traditional and distance students. Distance students must also meet the UWM Graduate School residency requirements; physical residency in Milwaukee is not necessary.

### Preliminary Examinations / Preparatory Essays

Students will be required to complete the doctoral preparatory essays toward the end of their coursework. The purpose of the essays will be to demonstrate the student’s mastery of coursework and relevant subject matter and the student’s qualifications to proceed with dissertation research. The essays will consist of two areas: one in the major area, and one to be determined by the major professor and the student, e.g., methodology. The essays will represent non-credit research papers based on topics assigned by the student’s doctoral committee, which will consist of at least three members. The timeline for completion of the essays will be at the committee’s discretion. Based on the committee’s assessment of the essays, students will be recommended for advancement toward the PhD or academic dismissal from the program. If the essay results are found to be unsatisfactory, the student will have one opportunity to repeat the essay in a future semester after conferral with the major professor on how to prepare for the next attempt.

The preparatory essays must be successfully completed within four years of initial enrollment.

### Dissertation Proposal

A doctoral committee of at least four faculty members will be in place by the time the student undertakes their dissertation proposal. Students

may have a maximum of six committee members. The committee will consist of at least three members from the School of Information Studies and a faculty member with appropriate expertise from outside the School. All doctoral committees shall be chaired by a major professor from the SOIS graduate faculty. Approval of the dissertation proposal, which ordinarily should occur within two semesters after successfully passing the preparatory essays, allows a student to proceed toward completion of the dissertation.

### Dissertation

The candidate must write a dissertation which demonstrates their ability to formulate a research topic and pursue independent and original investigation that contributes to the knowledge base of the field.

### Dissertation Defense

After submission of a reading copy of the dissertation to the student’s doctoral committee, the candidate and the major professor will schedule a committee meeting for the purpose of undertaking an oral defense of the dissertation work by the candidate. At the conclusion of the candidate’s oral remarks, the dissertation committee will vote on passing the candidate’s dissertation work. A majority of the committee must vote to approve the dissertation and recommend granting of the Doctor of Philosophy degree.

Approval of the dissertation by the student’s doctoral committee satisfies a final requirement for the PhD degree in Information Studies from the UWM-SOIS.

### Time Limit

All components of the PhD program must be completed within seven years of matriculation.

### Additional Information for Doctoral Students

For additional information on policies and procedures for doctoral students, please see the Graduate School Doctoral Requirements (<http://uwm.edu/graduateschool/doctoral-requirements/>) page.

## Library and Information Science, MLIS

### About the School of Information Studies

The School of Information Studies prepares students for careers in libraries and the information professions. The School’s array of graduate programs provides students with the opportunity to develop attitudes associated with progressive information services, and to develop an understanding of the value, role, and application of modern technology as it relates to library operations and the transfer of information.

In harmony with the mission of the University of Wisconsin-Milwaukee, a major urban research institute, the School of Information Studies strives to make significant contributions towards extending and enhancing the quality of information services and the promotion of information and technological literacy to a diverse society. The School of Information Studies is committed to excellence in instruction, research, and service.

### Goals of the school are:

1. To prepare professionals who are able to provide leadership and adapt to change in a technological and knowledge-based environment for careers in libraries, school media centers,

information systems, and related areas, according to accepted professional standards.

2. To enrich the library and information science profession through recruitment of students with strong academic skills from diverse cultural, geographic, and subject backgrounds.
3. To enable undergraduate students to achieve qualifications to pursue careers in the information professions through the provision of degree and certificate programs.
4. To enable students to develop specializations in the information professions at the graduate level through the provision of single and dual degree programs.
5. To promote a research orientation through participation in the Doctor of Philosophy degree program.
6. To contribute to the international knowledge base of library and information science through research and publication.
7. To facilitate the development, provision, and evaluation of library and information services through consultation services to individual organizations and leadership in professional associations locally, statewide, nationally, and internationally.
8. To offer opportunities for professionals and the wider community to update their skills and knowledge through advanced and continuing education courses, workshops, and programs offered nationally and internationally.

6. To build upon current knowledge of information and communication theories and technologies in planning, design, development, and delivery of information services.

The master's degree program is designed to support each of these objectives with appropriate coursework and educational experiences.

The School of Information Studies offers students the opportunity to obtain certification from the Wisconsin Department of Public Instruction as library media specialists or school librarians. Students admitted to the Master of Library and Information Science degree program can incorporate in their degree program the courses for these licenses to the extent that these courses satisfy the degree requirements, either as required core courses or as electives. For additional information about these licenses and their relationship to the master's degree, consult the School Library Media Coordinator.

The advanced courses offered by the School of Information Studies may be selected on a non-degree basis by post-master's students who wish to continue their professional education or special competence in some phase of urban library and information services. The School's graduate courses are also open to graduate students in other fields of study, provided that they have completed the appropriate basic courses (or their equivalent).

### Coordinated Degree Programs

In cooperation with the Peck School of the Arts; the College of Health Sciences; and the College of Letters and Science, the School of Information Studies offers the following coordinated degree programs:

#### M.S./MLIS

A **Master of Science in Anthropology**/Master of Library and Information Science to prepare students for positions as curators of museum libraries and as information specialists and researchers for local history collections and state historical societies, 51 credits.

#### M.A./MLIS

A **Master of Arts in English**/Master of Library and Information Science program to prepare students for positions as humanities librarians and curators of special subject collections in the humanities, 51 credits.

#### M.A./MLIS

A **Master of Arts in Geography**/Master of Library and Information Science program to prepare students for positions as map librarians, 48 credits.

#### M.S./MLIS

A **Master of Science in Health Care Informatics**/Master of Library and Information Science program to prepare students for positions as clinical informationists, 56 credits.

#### M.A./MLIS

A **Master of Arts in History**/Master of Library and Information Science program to prepare students for positions as archivists, 48 credits.

#### MSIST/MLIS

A **Master of Science in Information Science and Technology**/Master of Library and Information Science program to prepare students for positions in information technology in all types of libraries, 54 credits.

#### MALLT/MLIS

A **Master of Arts in Language, Literature, and Translation**/Master of Library and Information Science program to prepare students for positions as librarians in a variety of libraries and curators of special subject collections, 51 credits.

---

## Related Advanced Certificates

- Certificate of Advanced Study in Archives and Records Administration (p. 476)
- Certificate in Digital Libraries (p. 483)

## MLIS Program

The purpose of the MLIS program is to prepare librarians and information professionals who are able to manage change in an urbanized, technologically oriented, and knowledge-based society. The MLIS program provides a systematic course of study which enables individuals with a strong service orientation to apply principles of library and information science, use current methods and tools, and recognize the value of research.

Students may elect to specialize according to the type of library or information service which best meets their needs: i.e., school, public, academic, or special; or to follow a more generalized approach. Concentrations in archival studies, information organization, information technology, and public libraries are available.

Graduates of the Master of Library and Information Science degree program are expected to demonstrate the following competencies:

1. To apply scientific principles in developing and managing information resources designed to meet user needs and interests.
2. To analyze, describe, and organize resources for effective and efficient retrieval and dissemination of information.
3. To utilize knowledge of information sources, services, and systems to meet the informational needs of users.
4. To apply management principles in planning, developing, marketing, and evaluating library and information services.
5. To work in specialized areas of library and information service, utilizing knowledge obtained from concentrations within the School and in other disciplines.

**M.M./MLIS**

A **Master of Music**/Master of Library and Information Science program to prepare students for positions as music librarians. Students in the M.M. degree program will pursue a concentration in Music History and Literature, 54 credits.

**M.S./MLIS**

A **Master of Science in Urban Studies**/Master of Library and Information Science program to prepare students for positions as urban information specialists, 54 credits.

**M.A./MLIS**

A **Master of Arts in Women's and Gender Studies**/Master of Library and Information Science program to prepare students for positions as information specialists in institutions of higher learning, libraries, and research centers, 54 credits.

Prerequisite to the award of either degree in these coordinated programs is the simultaneous award of its counterpart degree. For additional information on these programs, see the Anthropology (<http://uwm.edu/graduateschool/anthropology/>), English (<http://uwm.edu/graduateschool/english/>), Language, Literature, and Translation (<http://uwm.edu/graduateschool/language-literature-translation/>), Geography (<http://uwm.edu/graduateschool/geography/>), Health Care Informatics (<http://uwm.edu/graduateschool/health-care-informatics/>), History (<http://uwm.edu/graduateschool/history/>), Music (<http://uwm.edu/graduateschool/music/>), Urban Studies (<http://uwm.edu/graduateschool/urban-studies/>), and Women's and Gender Studies (<http://uwm.edu/graduateschool/womens-studies/>) sections of this website.

**Admission Requirements**

**Application Deadlines**

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

**Application**

An applicant must apply to both the Graduate School and the School of Information Studies.

**Admission**

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus the following additional requirements of the School of Information Studies to be considered for admission to the program:

- Applicants from foreign institutions are required to submit the Test of English as a Foreign Language (TOEFL) score. The minimum acceptable score is 550 PBT or 79 iBT. A score of 6.5 or higher on the International English Language Testing System (IELTS) may be submitted in lieu of the TOEFL.
- A one to two page reason statement outlining your background and your educational and professional goals.

No prior coursework in library/information science is required. A student whose undergraduate grade point average is below 2.75 (4.0 basis) may be considered for admission on probation. See the Admission on Probation (<http://uwm.edu/graduateschool/admission/>) Website.

**Credits and Courses**

The minimum degree requirement is 36 graduate credits, 30 of which must be in library and information science and up to 6 of which may be in related areas. Students who have already completed a master's or doctoral degree in a field other than library science may have the library and information science master's program reduced to 30 credits. Under special circumstances, up to 6 of these credits may be from another field in a closely allied area with advisor consent. Students who have completed library science courses at the undergraduate level may, upon request, have their coursework reviewed to determine whether the content was the equivalent of that in required courses in the School of Information Studies Program. However, the establishment of such equivalencies will not reduce the total number of credits required for the master's degree in library and information science, but merely enable the student to avoid unnecessary repetition.

The number of credits needed for each of the coordinated degree programs is 12 credits less than the sum of credits of the two programs if taken separately. All degree requirements of each component program, however, must be satisfied. This includes makeup courses for deficiencies, required courses, and graduation proficiency requirements. The MLIS component of each coordinated program includes 30 credits of SOIS courses including the 12 credits of required courses.

The following are basic required courses:

Code	Title	Credits
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies	3
<b>Total Credits</b>		<b>12</b>

**Minimum Grade Requirement in the Required Courses**

The minimum grade requirement for the required courses is a B. Students who earn a grade of B- or lower have not met the minimum requirement and will be allowed to repeat the required course once. Students are responsible for tuition in the repeated course; no credit is earned from the first attempt at the required course, or any required course for which a B- or lower is earned. Materials and assignments used previously may not be reused or resubmitted when retaking a required course unless approved by the instructor. Those who do not meet the minimum grade requirements upon repeating the course will be recommended for academic dismissal. Students may not register for a course for which any of the required courses is a prerequisite until the minimum grade requirement is met.

**Culminating Experience Requirement in Library and Information Science**

Effective Fall 2016, INFOST 799 meets the requirement for the culminating event for the MLIS program. If 591 was taken prior to the fall of 2016, it can still be used to meet the culminating event requirement. Said course must be taken in SOIS and cannot be transferred into the program.

**Thesis Option**

Students may choose the thesis option in order to satisfy the program requirements and must take at least three credits of thesis coursework

in addition to the 36 credits required for the comprehensive examination option, making the minimum credits required for the thesis option 39 credits. However, only 3 credits of thesis coursework may count toward the total degree credit requirement of 39.

Those who already have a graduate degree must complete a minimum of 33 credits for this option. Students who choose the thesis option in the coordinated master's degree programs also need to take an additional 3 credits of thesis coursework. Thus, while total degree credits vary among the coordinated master's programs, the Master of Library and Information Science component of each requires 33 credits of SOIS coursework, three of which would be taken as thesis credit.

Students pursuing thesis options in both programs will be required to fulfill each program's thesis requirement and complete two separate theses. Students in the thesis option must take a minimum of 3 credits of research methods. A course other than INFOST 799 may be chosen in consultation with the major professor. Additional courses that do not count toward degree requirements may be required by individual circumstances.

Students must complete the required MLIS and research methods course before they will be allowed to defend the thesis proposal. Students must register for INFOST 898: Master's Thesis (1-3 credits), during every semester of thesis work. Students may select the thesis option at any point in their course of study, but are encouraged to make this decision and form their thesis committee as early as possible to avoid the necessity of taking additional coursework.

The faculty advisor assigned to each student upon admission may serve as the student's thesis advisor, but is not required to do so. It is the student's responsibility to enter into a mutually agreed upon advising relationship with a thesis advisor in SOIS, who then serves as chair of the thesis committee.

Students must pass an oral examination in defense of the thesis. The thesis defense may be repeated once. A student may withdraw from the thesis option; however, the student would need to meet all course requirements for the MLIS degree.

### Library Media Certification Programs Requirements: 1902 License

The following SOIS courses are required for the MLIS with Library Media Certification in Wisconsin.

Code	Title	Credits
<b>Information Studies</b>		
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 520	Managing Library Collections	3
INFOST 571	Information Access and Retrieval	3
INFOST 640	Information Literacy Instruction	3
INFOST 642	School Library Media Programs and Resources	3
INFOST 644	Clinical Experience in School Libraries	2-3
INFOST 645	Library Materials for Children	3
INFOST 646	Library Materials for Young Adults	3
INFOST 647	Library Services for Children and Young Adults	3
INFOST 670	Instructional Technologies	3

INFOST 691	Special Topics in Information Science: (Cataloging for Small/School Libraries or equivalent)	1
INFOST 799	Research Methods in Information Studies	3

**Total Credits** **36-37**

This program will provide school library certification to those who hold a Wisconsin teaching license. Candidates who do not hold a teaching license must also complete post-baccalaureate education coursework and activities to earn the MLIS and school library certification. Students in states other than Wisconsin must consult with their own licensing agencies to determine whether working with our program will meet that state's licensure requirements.

## Additional Requirements

### Time Limit

Students in the 36-credit program must complete all degree requirements within seven years of initial enrollment. Students in the 30-credit program must complete all degree requirements within five years of initial enrollment.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## Library and Information Science, MLIS/Anthropology, MS

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

## Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if they were not taken simultaneously. *All degree requirements of each component must be satisfied.*
- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

### MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

### MLIS/MS Anthropology

The MLIS/MS Anthropology Coordinated Degree Program (51 credits) prepares students for positions as curators of museum libraries; and as information specialists and researchers for local history collections and state historical societies.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet the UWM Graduate School requirements plus all admission requirements of both the School of Information Studies and the coordinated degree department. Please review the admission details of each program and contact an advisor with any questions.

### Degree Requirements

Students enrolled in this program concurrently pursue the MS degree in Anthropology (p. 874) (21 credits in Anthropology—9 fewer elective credits) and the MLIS degree (p. 493) (30 credits in SOIS). Candidates for the coordinated degree program will be expected to fulfill the degree requirements of both programs. Degrees will be awarded simultaneously.

## Credits and Courses

Students in the Master's degree program in Anthropology are required to take a minimum of 30 credits, some of which are obtained by taking required courses. Required courses differ by concentration (requirements for students seeking to acquire a Certificate in Museum Studies are listed on that page).

### Archaeology Concentration

Code	Title	Credits
<b>Core</b>		
ANTHRO 801	A Survey of Physical Anthropology	3
ANTHRO 802	Perspectives on Prehistory	3
ANTHRO 803	Survey of Cultural Anthropology	3
<b>Methods</b>		
ANTHRO 568	Introduction to Anthropological Statistics	3
Select one of the following:		3
ANTHRO 380	Anthropological Applications of GIS	
ANTHRO 501	Archaeology of Death	
ANTHRO 525	Zooarchaeology: Analysis of Faunal Remains	
ANTHRO 535	Analysis of Archaeological Ceramics	
ANTHRO 562	Techniques and Problems in Archaeology	
ANTHRO 566	Archaeological Analysis and Report Preparation:	
ANTHRO 567	Archaeological Field School	
ANTHRO 768	Topics in Advanced Research Design in Anthropology	
Or an alternative approved by the advisor and the Director of Graduate Studies		
<b>Advanced Seminar</b>		
ANTHRO 763	Professionalism in Anthropology	3
<b>Electives</b>		

Select 12 credits	12
<b>Total Credits</b>	<b>30</b>

### Biological Anthropology Concentration

Code	Title	Credits
<b>Core</b>		
ANTHRO 801	A Survey of Physical Anthropology	3
ANTHRO 802	Perspectives on Prehistory	3
ANTHRO 803	Survey of Cultural Anthropology	3
<b>Methods</b>		
ANTHRO 568	Introduction to Anthropological Statistics	3
Course approved by the advisor and the Director of Graduate Studies		3
<b>Advanced Seminar</b>		
Course approved by the advisor and the Director of Graduate Studies		3
<b>Electives</b>		
Select 12 credits		12
<b>Total Credits</b>		<b>30</b>

### Cultural Anthropology Concentration

Code	Title	Credits
<b>Core</b>		
ANTHRO 801	A Survey of Physical Anthropology	3
ANTHRO 802	Perspectives on Prehistory	3
ANTHRO 803	Survey of Cultural Anthropology	3
<b>Methods</b>		
Select two of the following:		6
ANTHRO 560	Introduction to Research Methods in Anthropology	
ANTHRO 561	Techniques and Problems in Ethnography	
ANTHRO 568	Introduction to Anthropological Statistics	
<b>Advanced Seminar</b>		
ANTHRO 940	Seminar in Problems in Cultural Anthropology:	3
<b>Electives</b>		
Select 12 credits		12
<b>Total Credits</b>		<b>30</b>

Students may request a waiver for any of the above required courses except the advanced seminar. To request a waiver, a student must submit a letter to the Graduate Studies Committee. Requests must be accompanied by documentation demonstrating that the student is competent in the subject area of the course for which the waiver is sought. A waived course must be replaced by an anthropology course numbered 700 or above.

Students must maintain a B (3.0) average or better overall. The three core courses must be completed with an average of 3.0 or better. Students with a grade below a B in a core course subsequently accepted into the Ph.D. program must retake the course until they achieve a grade of B or better.

A thesis is required of all students; students may apply up to 6 credits of Research/Thesis courses toward meeting the minimum credits for the degree. The thesis must be formatted in accord with Graduate School requirements. Students will submit an electronic copy of the thesis to the Graduate School and a signed, unbound “hard” copy to the Department of Anthropology.

### Basic Required MLIS Courses

Code	Title	Credits
<b>Core Courses</b>		
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies	3
<b>Other MLIS courses</b>		<b>18</b>
<b>Total Credits</b>		<b>30</b>

### Important

You must refer to the catalog pages of both individual master’s programs to ensure that you meet all requirements for both degrees.

## Library and Information Science, MLIS/Art History, MA

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master’s degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

### Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if they were not taken simultaneously. *All degree requirements of each component must be satisfied.*
- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

### MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School’s offerings in accordance with the student’s goals in the coordinated degree program.

### MLIS/MA Art History

The MLIS/MA Art History Coordinated Degree Program prepares students for positions as art librarians, as curators of rare books and special collections, and as archivists, registrars, and collections managers in art museums.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students are admitted to both graduate programs separately, and admission requirements are consistent with those specified by the UWM Graduate School, the Art History MA of the College of Letters and Science, and the Library and Information Science MLIS of the School of Information Studies.

## Credits and Courses

The MA in Art History normally has a minimum requirement of 30 credits from Art History courses. For the coordinated MA Art History/MLIS degree program, however, students can substitute 6 credits in Information Studies courses for 6 credits of Art History courses. This program, therefore, requires a total of 54 credits. Students must complete the 30 credits required for the MLIS component and the 24 credits in Art History courses as specified below.

### Basic Required MLIS Courses

Code	Title	Credits
<b>Core Courses</b>		
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies	3
<b>Other MLIS courses</b>		<b>18</b>
<b>Total Credits</b>		<b>30</b>

### Art History Courses

Minimum degree requirement is 24 credits in Art History, of which a minimum of 18 credits must be 700- to 900-level courses. To fulfill the Distribution Requirement, students must complete at least 3 credits in each of the following four areas 1) Ancient/Medieval, 2) Renaissance/Baroque, 3) Modern/Contemporary, and 4) Non-Western. At least 6 of these credits must be fulfilled at the 700-level or above.

Code	Title	Credits
<b>Core Courses</b>		
ARTHIST 700	Proseminar in Art History (Must be taken in the student’s first fall semester)	3
ARTHIST 891	Art Museum Internship	3
ARTHIST 990	Thesis Research	6
<b>Distribution Requirement</b>		<b>12</b>
<b>Total Credits</b>		<b>24</b>

### Important

You must refer to the catalog pages of both individual master’s programs to ensure that you meet all requirements for both degrees.

## Additional Requirements

### Thesis

A thesis, on a subject selected in consultation with the advisor. This study must demonstrate the student's ability to organize material and her/his familiarity with relevant research methods and art-historical literature. The student must pass an oral defense of the thesis.

### Language Translation Exam

The student must pass a language translation exam.

## Library and Information Science, MLIS/English, MA

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

## Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if they were not taken simultaneously. *All degree requirements of each component must be satisfied.*
- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

### MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

### MLIS/MA English

The MLIS/MA English Coordinated Degree Program prepares students for positions as humanities librarians.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet the UWM Graduate School requirements plus all admission requirements of both the School of Information Studies and the coordinated degree department. Please review the admission details of each program and contact an advisor with any questions.

## Credits and Courses

Students interested in the English MA/MLIS program are expected to follow all the requirements and standards as described in this section of the Catalog with the following exceptions: the 21 credits required for the MA in English in the coordinated degree program are to be taken

within the Department. Courses in related areas must be approved by the Director of Graduate Studies in English. For more information on this program, see the Library and Information Science page.

### Basic Required MLIS Courses

Code	Title	Credits
<b>Core Courses</b>		
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies	3
<b>Other MLIS courses</b>		<b>18</b>
<b>Total Credits</b>		<b>30</b>

### Important

You must refer to the catalog pages of both individual master's programs to ensure that you meet all requirements for both degrees.

### English Courses

Students in the MA/MLIS program may subtract 9 elective credits from their chosen concentration below.

Students admitted to the master's program earn the degree by completing a minimum of 30 credits of graduate coursework in English, writing a final project, and passing an oral examination at the conclusion of their coursework.

Although students must enroll initially in one of the four plans of study described below, students who demonstrate a capacity for doctoral work, and wish to earn a Ph.D. at UWM, are advised to proceed as rapidly as possible to the PhD program. Ordinarily students are not allowed to proceed beyond 30 credits without having been admitted to the doctoral program. No more than 27 credits earned at the master's level may be included in the 54 credits required for the Ph.D.

### Plan A (Literature and Cultural Theory)

A minimum of 30 credits, including:

Code	Title	Credits
ENGLISH 703	Introduction to Graduate Studies in Literature (must be taken in first semester)	1
ENGLISH 720	Modern Literary Theory	3
Select 9 credits in literature courses (at least 3 credits pre-1800)		9
Select 3 credits in 800-level seminar in literature or cultural theory		3
Select 6 credits in cultural theory		6
Select 8 credits of electives <sup>1</sup>		8
<b>Total Credits</b>		<b>30</b>

<sup>1</sup> Which may include up to 5 credits of ENGLISH 790.

### Additional Requirements

- A final project, which shall be a paper of at least 30 pages which grows out of and significantly expands some aspect of the student's literary studies.
- An oral examination, usually lasting an hour and a half, which covers the final project and a separate 30-book reading list.

- All credits must be 600-level or above, with no more than 6 credits at the 600 level. (ENGLISH 701 must be counted as an elective.)

### Plan B (Rhetoric and Composition)

A minimum of 30 credits, including:

Code	Title	Credits
<b>Required courses</b> <sup>1</sup>		
ENGLISH 712	Theories in Public Rhetorics and Community Engagement:	3
ENGLISH 713	Research Methods in Rhetorics, Literacies, and Community Engagement:	3
ENGLISH 750	History of Rhetoric and Writing Studies:	3
<b>Select 21 credits of electives</b> <sup>2</sup>		<b>21</b>
ENGLISH 427	Writing for Nonprofits	
ENGLISH 431G	Topics in Advanced Communications:	
ENGLISH 432	The Rhetoric of Argument	
ENGLISH 439	Information Design	
ENGLISH 443	Grant Writing	
ENGLISH 444	Technical Editing	
ENGLISH 633G	Seminar in Rhetoric and Professional Writing:	
ENGLISH 701	Writing Pedagogies	
ENGLISH 711	Topics in Public and Professional Writing:	
ENGLISH 749	Advanced Internship in Writing and Community Engagement	
ENGLISH 755	Issues in Writing Research:	
ENGLISH 790	Master's Project <sup>3</sup>	
ENGLISH 854	Seminar in College Writing Pedagogy:	
ENGLISH 855	Seminar in Public Rhetorics and Community Engagement:	
<b>Total Credits</b>		<b>30</b>

<sup>1</sup> ENGLISH 712, ENGLISH 713, and ENGLISH 750 may be taken twice with different topics with the second iteration counting toward Electives.

<sup>2</sup> No more than 6 credits may be from courses below the 700 level. Students may take up to 6 credits of ENGLISH 749 and may take ENGLISH 711, ENGLISH 755, ENGLISH 854, and ENGLISH 855 up to three times with different topics.

<sup>3</sup> Electives may include up to 6 credits of ENGLISH 790. Please consult your advisor for guidance on enrolling in ENGLISH 790 and preparing for the MA project and exam.

#### Additional Requirements

- A final project, which shall be a research paper appropriate to the student's professional goals.
- An oral examination, usually lasting an hour and a half, which covers the final project and a reading list of at least 30 texts not listed in the project bibliography or works cited list.

### Plan C (Creative Writing)

A minimum of 30 credits, including:

Code	Title	Credits
Select 6 credits in 600- or 700-level literature courses (at least 3 credits at the 700 level)		6
Select one of the following:		6
ENGLISH 715 & ENGLISH 815	Narrative Craft and Theory: and Seminar in Fiction Writing:	
ENGLISH 716 & ENGLISH 816	Poetic Craft and Theory: and Seminar in Poetry Writing:	
Select 6 credits in writing courses at the 600 or 700 level		6
Select 12 credits of electives <sup>1</sup>		12
<b>Total Credits</b>		<b>30</b>

<sup>1</sup> Which may include up to 6 credits of ENGLISH 790.

#### Additional Requirements

- No more than 12 credits may be earned in 600-level courses.
- A final project, which shall be a collection of fiction and/or poetry, a novel, or other substantial work of imaginative writing.
- An oral examination, usually lasting an hour and a half, which covers the final project and a reading list of at least 30 texts representative of the student's literary background and interests.

### Plan H (Media, Cinema, and Digital Studies)

Code	Title	Credits
<b>Core Courses</b>		
Take 15 credits across these courses:		15
ENGLISH 742	Media Studies	
ENGLISH 743	Film Theory and Criticism (Subtitle)	
ENGLISH 876	Seminar in Media Studies:	
ENGLISH 877	Seminar in Film Studies:	
ENGLISH 887	Seminar in Digital Studies:	
<i>Proseminar (take 2 credits)</i>		2
ENGLISH 747	Proseminar in Media, Cinema, and Digital Studies	
<i>Electives: 7-12 credits electives at graduate level (can include 700 &amp; 701)</i>		7-12
<i>Master's project: 1-6 credits of English 790</i>		1-6
<b>Total credits</b>		<b>30</b>

\* If students take more elective credits, then they may take fewer credits in the master's project, or vice versa, so long as their total credits add up to 30. Students should consult the Coordinator to decide how many credits of the master's project are recommended.

## Additional Requirements

### Major Professor as Advisor

The student must have a Major Professor to advise and supervise the student's work as specified in Graduate School regulations. The coordinator of the student's concentration serves as an initial advisor.

### Final Project

A research paper or other project appropriate to the student's professional goals.

## Oral Examination

Usually lasting an hour and a half, the oral exam covers the final project and a reading list of at least 30 texts not listed in the project bibliography or works cited list.

## Regulations Concerning Final Projects and Oral Examinations

1. Students should consult with their advisors before completing 24 credits to determine a final project. Ordinarily, it is a revised and expanded course or seminar paper of at least 30 pages. The project should demonstrate the student's skills in research, critical analysis, argumentation, and prose style. For students in Plan C (Creative Writing), the project is a substantial portfolio, the exact character of which is determined in consultation with the student's MA Committee. The project serves both as a concluding effort at the master's level and also as an indication of a student's potential for doctoral study.
2. In consultation with the student, the Director of Graduate Studies appoints an MA Examining Committee. At least two of the three members must be English Graduate Faculty. The MA Examining Committee administers the final Oral Examination, covering the project and a separate reading list of at least 30 texts, to be selected by the student and approved by the Committee.
3. The project must be submitted and the oral examination completed within one year after the completion of 24 credits. Students should remember that a maximum of 27 credits at the master's level is applicable to the PhD 54 credit requirement.
4. The Examining Committee offers a recommendation regarding the student's qualifications for further graduate study at the doctoral level. The Committee Chair puts this recommendation in writing and places it in the student's academic file.
5. Students who fail the oral examination may be required to revise their final project, retake the examination, or both. The oral examination may be retaken only once. No additional credits may be earned for the revision of the project after a failed examination. For further information regarding the MA project and examination, see the English Graduate Program Handbook.

## Time Limit

The student must complete all degree requirements within five years of initial enrollment.

## Library and Information Science, MLIS/Geography, MA

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

## Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if they were not taken simultaneously. *All degree requirements of each component must be satisfied.*
- The MLIS portion of the coordinated degrees can be completed online.

- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

## MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

## MLIS/MA Geography

The MLIS/MA Geography Coordinated Degree Program prepares students for positions as map librarians. Graduates of the program are qualified to assume positions as curators and staff in map collections of universities, governmental agencies, and industry.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Credits and Courses

The MA in Geography normally has a minimum requirement of 30 credits from regular geography courses (which includes 4 capstone/thesis credits). For the coordinated MA Geography/MLIS degree program, however, students can substitute 6 credits in information studies courses for 6 credits of geography. This program, therefore, requires a total of 54 credits. Students must complete the 30 credits required for the MLIS component and the 24 credits in Geography courses specified below.

Code	Title	Credits
GEOG 726	Geographic Information Science	4
GEOG 747	Spatial Analysis	4
GEOG 810	Introduction to Techniques of Research and Presentation	3
GEOG 870	Contemporary Geographic Approaches: (subtitle)	3
Select a GEOG 900-level course		3
Select any GEOG graduate course		3
GEOG 889 or GEOG 999	Internship in Geography or Independent Work	4
<b>Total Credits</b>		<b>24</b>

The Geography Department offers opportunities for fieldwork that may count toward these requirements. In addition to off-campus fieldwork, the American Geographical Society Collection at the UWM Golda Meir Library provides many unique opportunities for map librarianship fieldwork and is an appropriate site for an internship.

Graduates of the program are qualified to assume positions as curators and staff members in map collections of universities, governmental agencies, and industry. In cases where map collections are not of sufficient size to warrant separation as distinct collections, knowledge of how to store, classify, and retrieve maps will be a valuable set of skills that enhance the qualifications of the information professional.

<b>Total Credits</b>		<b>30</b>

**Important**

You must refer to the catalog pages of both individual master's programs to ensure that you meet all requirements for both degrees.

## Library and Information Science, MLIS/Health Care Informatics, MS

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

### Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if they were not taken simultaneously. *All degree requirements of each component must be satisfied.*
- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

### MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

### MLIS/MS Health Care Informatics

The MLIS/MS Health Care Informatics Coordinated Degree Program is designed to provide students with theoretical and practical exposure to the evolving field of healthcare informatics as practiced in hospitals, clinics, professional offices, corporations, the government, the insurance industry, and higher education.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Admission

Students are admitted to both graduate programs separately and admission requirements (<http://uwm.edu/graduateschool/admission/>) are consistent with those specified by the UWM Graduate School, the Health Care Informatics program, and the MLIS program of the School of Information Studies.

## Credit and Courses

Students accepted into this MS/MLIS program complete the following courses:

### Health Care Informatics

Code	Title	Credits
<b>Required HCI courses include:</b>		
HI 700	Introduction to Health Care Informatics	3
HI 722	Legal, Ethical and Social Issues in Health Care Informatics	3
HI 723	Health Care Systems Applications - Administrative and Clinical	3
HI 740	Introduction to Biomedical Database Applications	3
HI 741	Essential Programming for Health Informatics	3
HI 742	Computational Intelligence in Health Informatics	3
HI 745	Health Big Data Processing Platforms	3
PH 801	Seminar in Public Health Research	3
Select one of the following:		3
HI 890	Health Care Informatics Research and Thesis	
HI 891	Health Care Informatics Professional Project	
<b>Total Credits</b>		<b>27</b>

### Library and Information Science

Code	Title	Credits
<b>Required</b>		
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies (Culminating experience for the degree)	3
<b>MLIS Electives</b>		<b>18</b>
<b>Total Credits</b>		<b>30</b>

- **Minimum Credits for MHI: 27**
- **Minimum MLIS Credits: 30**
- **Minimum Total Credits for the Program: 57**

The credits for the coordinated program would typically be completed in both programs at the same time, rather than one program after the other. A student not completing the requirements for the coordinated degree program would need to complete all requirements for an individual program in order to receive a degree.

## Important

You must refer to the catalog pages of both individual master's programs to ensure that you meet all requirements for both degrees.

## Additional Requirements

### Time Limit

Students in the coordinated MS/MLIS degree program must complete all degree requirements within seven years of the first enrollment semester as a degree student.

## Library and Information Science, MLIS/History, MA

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

## Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if they were not taken simultaneously. *All degree requirements of each component must be satisfied.*
- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

### MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

### MLIS/MA History

The Master of Arts in History/Master of Library and Information Science program consists of 54 credits.

Graduates of the program are qualified to assume positions as archivists and staff members in libraries, museums, universities, governmental agencies, and industry. For those who pursue employment opportunities beyond archives in such institutions, knowledge of how to store, classify, and retrieve archival material will be a valuable set of skills that enhance the qualifications of the information professional.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Credits and Courses

For the MLIS/MA in History, students complete a minimum of 54 credits total for both degrees. Within the coordinated degree program, the minimum requirement for the MA in History is 30 graduate credits, of

which 24 must be within History. By completing 30 credits of coursework in SOIS and 24 credits of coursework in History, a student can combine the MLIS with the MA in History. Thus the MLIS/MA in History may be achieved with the completion of 54 credit hours, and the MA and MLIS degrees will be awarded simultaneously.

For the History, MA: Public History, students complete a minimum of 60 credits total for both degrees. The minimum degree requirement for completing the History MA with the Public History concentration is 36 graduate credits, 12 of which must be taken in General History courses, 12 in Public History courses, and the remaining 12 in the chosen area of specialization. Within the coordinated degree program the student may complete the degree requirements for the History MA with the concentration in Public History as follows: 12 credits in General History, 12 credits in Public History, and 6 credits in approved elective courses; the remaining 6 credits of specialization are to be fulfilled within the student's 30 credits of MLIS coursework. Thus, the MLIS/MA in History may be achieved with the completion of 60 credit hours, and the MA and MLIS degrees will be awarded simultaneously.

### Library and Information Science (MLIS) coursework

<sup>1</sup> Students pursuing the Public History option must select 6 of these credits of SOIS electives from the list of courses satisfying both the MA in History with a concentration in Public History and the MLIS. See table below under Public History.

### General History: Thesis Option

Code	Title	Credits
HIST 712 or HIST 713	Historiography and Theory of History Historical Research Methods	3

Select 6 credits in two colloquia (800-level courses) <sup>2</sup>	6
Select 6 credits in two seminars (900-level courses)	6
HIST 985 Master's Capstone	6
Select 3 credits in History electives in consultation with the student's advisor	3
<b>Total Credits</b>	<b>24</b>

### General History: Master's Essay Option

Code	Title	Credits
HIST 712	Historiography and Theory of History	3
or HIST 713	Historical Research Methods	
Select 6 credits in two colloquia (800-level courses) <sup>2</sup>		6
Select 6 credits in two seminars (900-level courses)		6
Select 9 credits in History electives in consultation with the student's advisor		9
<b>Total Credits</b>		<b>24</b>

<sup>2</sup> Students may take 3 credits of either HIST 716 or HIST 717 as a substitute for 3 credits in one colloquium.

### Public History

Code	Title	Credits
<b>General History</b>		
Select 6 credits in colloquia (800-level courses) <sup>3</sup>		6
Select 6 credits in seminars (900-level courses) <sup>3</sup>		6
<b>Public History</b>		
Students are advised to complete these two courses in the first year.		
HIST 700	Public History Seminar	3
HIST 715	Research Methods in Local History	3
Students also complete the following, generally taken at any point after the second semester.		
HIST 701	Graduate Internship in Public History <sup>4</sup>	6
Select 6 credits in History electives at the graduate level		6
Select 6 credits from among the following courses approved for both the MLIS and the MA in History: Public History (if not already taken to satisfy MLIS)		6
INFOST 650G	An Introduction to Modern Archives Administration	
INFOST 714	Metadata	
INFOST 750	Arrangement and Description in Archives	
INFOST 752	Archival Outreach: Programs and Services	
INFOST 753	Preserving Information Media	
INFOST 855	Advanced Appraisal	
<b>Total Credits</b>		<b>30</b>

<sup>3</sup> As a substitute for one colloquium or seminar, students may take 3 credits of either HIST 716 or HIST 717 or another appropriate course, which must be approved in advance by the Public History Director.

<sup>4</sup> Students must take a total of 6 credits of HIST 701, and this requirement is generally completed as two 3-credit internships. However, an individual internship may be taken for 1 to 6 credits.

Unless granted an exception by the program faculty, students complete their 701 internship(s) after having taken both HIST 700 and HIST 715.

### Approved Cross-Listed Courses

WGS 501G, with the topic "Women, Gender, & Global Revolutions," counts as a History course.

### Additional Requirements

#### General History: Thesis Option

##### Academic Review and Thesis Prospectus Hearing

Thesis Option students are subject to an academic review along with their thesis prospectus hearing. The Review and Prospectus hearing is a one- to two-hour meeting involving the student, the student's Major Professor and two other members of the History Graduate Faculty who will serve as examiners for the student's thesis defense. With the assistance of their Major Professor, the student must prepare a prospectus for the thesis in advance of the Review. The Review involves an evaluation of the student's academic progress in master's coursework, two unrevised course papers, and the thesis prospectus.

##### Thesis

The student must write a thesis that conforms to the guidelines above and as established at the thesis prospectus hearing.

##### Thesis Defense

The student must pass an oral examination in defense of the thesis.

#### General History: Master's Essay Option

##### Academic Review

Within the first semester after completing 9 credits (including two of the following courses: HIST 712, HIST 713, HIST 712, HIST 713, a colloquium and/or seminar), Master's Essay students are subject to an academic review. The Review is a one- to two-hour meeting involving the student, the student's Major Professor and two other members of the History Graduate Faculty. The Review involves an evaluation of the student's academic progress in master's coursework, two unrevised course papers, and the Master's Essay.

#### Public History

Students doing the Public History option are not required to take a comprehensive exam nor write a thesis; instead, they complete the required 6 credits of HIST 701.

#### Time Limit

The student must complete all requirements for the coordinated degree within seven years of initial enrollment.

#### Important

You must refer to the catalog pages of the individual master's programs to ensure that you meet all requirements for both degrees.

## Library and Information Science, MLIS/Language, Literature, and Translation, MA

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees

concurrently—one in Library and Information Science (MLIS) and one in a subject area.

## Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if they were not taken simultaneously. *All degree requirements of each component must be satisfied.*
- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

### MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet the UWM Graduate School requirements plus all admission requirements of both the School of Information Studies and the coordinated degree department. Please review the admission details of each program and contact an advisor with any questions.

## Credits and Courses

### Basic Required MLIS Courses

Code	Title	Credits
<b>Core Courses</b>		
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies	3
<b>Other MLIS courses</b>		<b>18</b>
<b>Total Credits</b>		<b>30</b>

### Important

You must refer to the catalog pages of both individual master's programs to ensure that you meet all requirements for both degrees.

**Note:** The full requirements for MALLT concentrations appear below. Some electives are waived for the MLIS/MALLT program.

### Linguistics Requirements

The following are the minimum course requirements for a concentration within the Standard Track:

Code	Title	Credits
<b>Core Seminars</b>		
Selected two of the following:		6
LINGUIS 708	Proseminar in Linguistics	
MALLT 706	Seminar in Foreign Language Methodology and Pedagogy	
CURRINS 800	Master's Seminar in Curriculum and Instruction	
PHILOS 681	Seminar in Advanced Topics: (subtitle)	
<b>Additional Requirements</b>		
LINGUIS 461	Introduction to Phonology	3
LINGUIS 464	Introduction to Syntax	3
Select three additional courses in Linguis		9
Select three additional linguistics courses in or outside the Department of Linguistics		
<b>Electives</b>		
Select 9 credits in consultation with the student's advisor <sup>1</sup>		9
<b>Total Credits</b>		<b>30</b>

<sup>1</sup> May include up to 6 credits in MALLT 790.

### Spanish and Hispanophone Language, Literature, and Culture Requirements

The following are the minimum course requirements for a concentration within the Standard Track:

Code	Title	Credits
Select two core seminars as a foundation in basic aspects of languages, literatures, and linguistics		6
Select at least 15 graduate credits in Spanish		15
Select three courses in related areas to give the program breadth		9
<b>Total Credits</b>		<b>30</b>

## Additional Requirements

Students interested in the MALLT/MLIS program will be expected to follow all of the requirements and standards as described in this section of the Catalog. Nine of the 30 credits normally required for a MALLT degree will be satisfied by courses taken in SOIS. In the coordinated degree program, MALLT thesis option credits will be in addition to the 21 required MALLT credits. Courses in related areas must be approved by the Coordinator of MALLT.

- See the [MALLT](#) and MLIS (p. 493) pages for more information.

## Library and Information Science, MLIS/Music, MM

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

## Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if

they were not taken simultaneously. *All degree requirements of each component must be satisfied.*

- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

## MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

## MLIS/MM Music (Music History and Literature concentration only)

The coordinated degree program (54 credits) prepare students in the Music History and Literature concentration for positions as music librarians.

While prospective students are not required to submit Graduate Record Examination (<http://uwm.edu/graduateschool/admission/#gre>) scores, they are strongly advised to take these tests before or early in their graduate work if they wish to be considered for a UWM Distinguished Graduate Student Fellowship or if they plan to continue their graduate work after completing a master's degree at UWM.

Diagnostic examinations in both music history and music theory are required of all entering and transferring graduate students before their first semester of study at UWM. Exceptions will be granted in extenuating circumstances. In no case will students be allowed to proceed beyond the first year of graduate study without having taken the diagnostic exams. These examinations assist the faculty in determining whether the student may proceed with required graduate courses, or whether they first need to remove deficiencies.

Applicants exhibiting deficiencies in music history will be required to enroll in Graduate Music History (MUSIC 704), and those exhibiting deficiencies in music theory will be required to enroll in Graduate Theory Foundations (MUSIC 703); these courses must be passed with a minimum grade of "B" or better. Additionally, other areas of deficiency may require further review. Graduate Music History may count toward the degree as an elective. Credits earned in making up deficiencies in music theory do not count toward the degree. The following courses are recommended to fulfill the graduate theory elective requirement: MUSIC 680, MUSIC 731, MUSIC 744.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

Diagnostic examinations in both music history and music theory are required of all entering and transferring graduate students before their first semester of study at UWM. Exceptions will be granted in extenuating circumstances. In no case will students be allowed to proceed beyond the first year of graduate study without having taken the diagnostic exams. These examinations assist the faculty in determining whether the student

may proceed with required graduate courses, or whether they first need to remove deficiencies.

In addition to the application materials required by the Graduate School, those seeking admission to the Master of Music degree program must submit the following to the Director of Graduate Studies, Department of Music:

1. A Graduate Music Application (available upon request from the Department of Music, Dr. Timothy Noonan [tpnoonan@uwm.edu](mailto:tpnoonan@uwm.edu), 414-229-2286).
2. A one-page resume of the applicant's performance experience and extracurricular activities.
3. A one-page statement addressing the applicant's reasons for wishing to pursue a degree program at UWM, the applicant's career goals, and what he or she intends to do with a UWM degree.
4. Three letters of recommendation.

While prospective students are not required to submit Graduate Record Examination (<http://uwm.edu/graduateschool/admission/#gre>) scores, they are strongly advised to take these tests before or early in their graduate work if they wish to be considered for a UWM Distinguished Graduate Student Fellowship or if they plan to continue their graduate work after completing a master's degree at UWM.

## Credits and Courses

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these departmental requirements to be considered for admission to the program:

1. Undergraduate music course background must include adequate preparation in music theory demonstrated through satisfactory completion of the following or equivalent courses:

Code	Title	Credits
MUSIC 127	Materials of Theory I	2
MUSIC 128	Materials of Theory II	3
MUSIC 225	Materials of Theory III	3
MUSIC 123	Aural Theory I	1
MUSIC 124	Aural Theory II	1
MUSIC 226	Aural Theory III	1
MUSIC 230		3
MUSIC 421	Materials of Theory IV	3

2. Preparation in music history and literature must be demonstrated through satisfactory completion of a two-semester survey course in development of music from earliest times to the present plus one semester of more specialized music history.

### Additional Requirements

Applicants exhibiting deficiencies in music history will be required to enroll in MUSIC 704, and those exhibiting deficiencies in music theory will be required to enroll in MUSIC 703; these courses must be passed with a minimum grade of "B" or better. Additionally, other areas of deficiency may require further review. Graduate Music History may count toward the degree as an elective. Credits earned in making up deficiencies in music theory do not count toward the degree. The following courses are recommended to fulfill the graduate theory elective requirement: MUSIC 680, MUSIC 731, MUSIC 744.

Minimum degree requirement is 30 graduate credits, 27 of which must be in specified music areas, 3 of which may be in one of the other areas or in a related field.

Code	Title	Credits
<b>Specific Requirements</b>		
MUSIC 450	Introduction to Musicology	3
MUSIC 452	Early Music Ensemble (1 credit each for two semesters)	2
MUSIC 710	Graduate Studies in Music	3
MUSIC 711	Graduate Seminar in Music History:	3
MUSIC XXX	Graduate Theory Elective	3
MUSIC 911	Seminar In Musicology I	3
MUSIC 990	Research of Thesis	3
<b>Electives</b>		
Music History		6
Other Areas of Music		1
Select one of the following:		3-30
3 credits of General Electives (UG or G)		
30 credits in Library Science if M.M./MLIS major		
<b>Total Credits</b>		<b>30-57</b>

The program must also include:

- MUSIC 314, if not previously completed.
- Reading knowledge of German, French or Italian (see below for specific details).

The 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

<b>Total Credits</b>	<b>30</b>
----------------------	-----------

## Library and Information Science, MLIS/Urban Studies, MS

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

### Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if they were not taken simultaneously. *All degree requirements of each component must be satisfied.*
- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

### MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

### MLIS/MS Urban Studies

A Master of Science in Urban Studies/Master of Library and Information Science program to prepare students for positions as urban information specialists, 54 credits.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Credits and Courses

Students in the MS/MLIS program follow all of the requirements and standards as described in this section of the Bulletin with the following joint exceptions: 21 of the 24 credits, including the optional 3 credits for a master's thesis, required for the Urban Studies portion of the joint degree are taken within USP. All courses in related areas and any exceptions to the 21 credit rule must be reviewed by the Coordinator of Urban Studies. All courses selected are expected to be consistent with the objectives of the Urban Studies program.

### Urban Studies

The minimum degree requirement is 30 graduate credits. All Urban Studies students are required to take a core curriculum of 15 credits:

Code	Title	Credits
Select an approved quantitative analysis course		3
URB STD 921	Seminar: Research Methods in Urban Studies	3
Select three of the following:		9
URB STD 901	Urban Social Structure	
URB STD 913	Seminar in Urban Political Process	
URB STD 945	The Internal Structure of the City	
URB STD 971	Seminar on the History of American Urban Problems	
<b>Total Credits</b>		<b>15</b>

Students may opt to enroll in URB STD 990 and earn up to 3 credits toward the MS degree for their paper/thesis research and writing.

### Basic Required MLIS Courses

Code	Title	Credits
<b>Core Courses</b>		<b>12</b>
INFOST 501	Foundations of Library and Information Science	
INFOST 511	Organization of Information	
INFOST 571	Information Access and Retrieval	
INFOST 799	Research Methods in Information Studies	
<b>Other MLIS courses</b>		<b>18</b>
<b>Total Credits</b>		<b>30</b>

### Important

You must refer to the catalog pages of both individual master's programs to ensure that you meet all requirements for both degrees.

## Library and Information Science, MLIS/Women's and Gender Studies, MA

In collaboration with several other academic units at UW-Milwaukee, SOIS offers students the opportunity to obtain two Master's degrees concurrently—one in Library and Information Science (MLIS) and one in a subject area.

### Degree Requirements

- The number of degree credits needed for each of the coordinated programs is usually 12 fewer than the sum of the two programs if

they were not taken simultaneously. *All degree requirements of each component must be satisfied.*

- The MLIS portion of the coordinated degrees can be completed online.
- Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

### MLIS Component

The Master of Library and Information Science (MLIS) component of each of the coordinated programs includes 30 credits of SOIS courses. These include the MLIS core courses (12 credits). The remaining 18 MLIS credits are selected from the School's offerings in accordance with the student's goals in the coordinated degree program.

### MLIS/MA Women's and Gender Studies

The coordinated program is designed to provide students with theoretical and practical exposure to evolving information retrieval and organization, and the field of feminist research and scholarship.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students are admitted to both graduate programs separately, and admission requirements are consistent with those specified by the UWM Graduate School, the Women's and Gender Studies MA of the College of Letters and Science, and the Library and Information Science MLIS of the School of Information Studies.

## Credit and Courses

The MA in Women's and Gender Studies (WGS) normally has a minimum requirement of 30 credits from Women's and Gender Studies courses. For the coordinated MA WGS/MLIS degree program, however, students can substitute 6 credits in Information Studies for 6 credits of WGS courses. This program, therefore, requires a total of 54 credits. Students must complete the 30 credits required for the MLIS component and the 24 credits in WGS courses as specified below.

### Women's and Gender Studies

Code	Title	Credits
<b>Required</b>		
WGS 700	Feminist Issues and Scholarship	3
WGS 701	Feminisms in Global Context	3
WGS 710	Advanced Feminist Theory	3
WGS 711	Feminist Epistemologies and Research Practices	3
WGS 740	Advanced Queer Theory	3
Select one WGS G or U/G course <sup>1</sup>		3
<b>Electives</b>		

Select 6 elective credits in WGS or WGS cross-listed courses (not SOIS), in consultation with the WGS Director of Graduate Studies. Of these electives, 3 credits may be thesis credits (WGS 990).

**Total Credits 24**

<sup>1</sup> Excluding WGS 497, WGS 700, WGS 990, WGS 999.

Total WGS credits: 24 (maximum of 6 U/G cr; and maximum 3 cr of WGS 999)

### Library and Information Science

Code	Title	Credits
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies	3

#### Electives

Select 18 credits in consultation with a SOIS faculty advisor. 18

**Total Credits 30**

Total MLIS Credits: 30 (min of 33 with SOIS thesis option)

**Total Credits for Coordinated Program: 54 (57 with SOIS thesis)**

The credits for the coordinated program would typically be completed in both programs at the same time, rather than one program after the other. A student not completing the requirements for the coordinated degree program would need to complete all requirements for an individual program in order to receive a degree.

### Important

You must refer to the catalog pages of both individual master's programs to ensure that you meet all requirements for both degrees.

## Additional Requirements

### Time Limit

Students in the coordinated MA/MLIS degree program must complete all degree requirements within seven years of the first enrollment semester as a degree student.

## Library and Information Science, MLIS: Archival Studies

### MLIS: Archives Concentration

Archival studies offers you the opportunity to investigate the processes that shape the historical record. By studying how records are selected for preservation, arranged and described, and made accessible to the public, archives students have a unique opportunity to research a field that mixes history, ethics, technology and philosophy. Through this study, you are able to research the influences that help determine how society views itself.

The Archives Program provides a range of professional development opportunities, as well as alumni and other professional connections around the country in order to ensure that you are competitive in the job market and have a well-rounded view of the complex issues facing

archives. Completion of this program provides you with a graduate degree that will help you gain employment at a variety of archives throughout the United States.

## About the School of Information Studies

The School of Information Studies prepares students for careers in libraries and the information professions. The School's array of graduate programs provides students with the opportunity to develop attitudes associated with progressive information services, and to develop an understanding of the value, role, and application of modern technology as it relates to library operations and the transfer of information.

In harmony with the mission of the University of Wisconsin-Milwaukee, a major urban research institute, the School of Information Studies strives to make significant contributions towards extending and enhancing the quality of information services and the promotion of information and technological literacy to a diverse society. The School of Information Studies is committed to excellence in instruction, research, and service.

### Goals of the school are:

1. To prepare professionals who are able to provide leadership and adapt to change in a technological and knowledge-based environment for careers in libraries, school media centers, information systems, and related areas, according to accepted professional standards.
2. To enrich the library and information science profession through recruitment of students with strong academic skills from diverse cultural, geographic, and subject backgrounds.
3. To enable undergraduate students to achieve qualifications to pursue careers in the information professions through the provision of degree and certificate programs.
4. To enable students to develop specializations in the information professions at the graduate level through the provision of single and dual degree programs.
5. To promote a research orientation through participation in the Doctor of Philosophy degree program.
6. To contribute to the international knowledge base of library and information science through research and publication.
7. To facilitate the development, provision, and evaluation of library and information services through consultation services to individual organizations and leadership in professional associations locally, statewide, nationally, and internationally.
8. To offer opportunities for professionals and the wider community to update their skills and knowledge through advanced and continuing education courses, workshops, and programs offered nationally and internationally.

## Related Advanced Certificates

- Certificate of Advanced Study in Archives and Records Administration (p. 476)
- Certificate in Digital Libraries (p. 483)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found

by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

An applicant must apply to both the Graduate School and the School of Information Studies.

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus the following additional requirements of the School of Information Studies to be considered for admission to the program:

- Applicants from foreign institutions are required to submit the Test of English as a Foreign Language (TOEFL) score. The minimum acceptable score is 550 PBT or 79 iBT. A score of 6.5 or higher on the International English Language Testing System (IELTS) may be submitted in lieu of the TOEFL.
- A one to two page reason statement outlining your background and your educational and professional goals.

No prior coursework in library/information science is required. A student whose undergraduate grade point average is below 2.75 (4.0 basis) may be considered for admission on probation. See the Admission on Probation (<http://uwm.edu/graduateschool/admission/>) Website.

## Credits and Courses

The minimum degree requirement is 36 graduate credits, 30 of which must be in library and information science and up to 6 of which may be in related areas. Students who have already completed a master's or doctoral degree in a field other than library science may have the library and information science master's program reduced to 30 credits. Under special circumstances, up to 6 of these credits may be from another field in a closely allied area with advisor consent. Students who have completed library science courses at the undergraduate level may, upon request, have their coursework reviewed to determine whether the content was the equivalent of that in required courses in the School of Information Studies Program. However, the establishment of such equivalencies will not reduce the total number of credits required for the master's degree in library and information science, but merely enable the student to avoid unnecessary repetition.

The number of credits needed for each of the coordinated degree programs is 12 credits less than the sum of credits of the two programs if taken separately. All degree requirements of each component program, however, must be satisfied. This includes makeup courses for deficiencies, required courses, and graduation proficiency requirements. The MLIS component of each coordinated program includes 30 credits of SOIS courses including the 12 credits of required courses.

The following are basic required courses:

Code	Title	Credits
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies	3
<b>Total Credits</b>		<b>12</b>

## Minimum Grade Requirement in the Required Courses

The minimum grade requirement for the required courses is a B. Students who earn a grade of B- or lower have not met the minimum requirement and will be allowed to repeat the required course once. Students are responsible for tuition in the repeated course; no credit is earned from the first attempt at the required course, or any required course for which a B- or lower is earned. Materials and assignments used previously may not be reused or resubmitted when retaking a required course unless approved by the instructor. Those who do not meet the minimum grade requirements upon repeating the course will be recommended for academic dismissal. Students may not register for a course for which any of the required courses is a prerequisite until the minimum grade requirement is met.

## Culminating Experience Requirement in Library and Information Science

Effective Fall 2016, INFOST 799 meets the requirement for the culminating event for the MLIS program. If 591 was taken prior to the fall of 2016, it can still be used to meet the culminating event requirement. Said course must be taken in SOIS and cannot be transferred into the program.

## Thesis Option

Students may choose the thesis option in order to satisfy the program requirements and must take at least three credits of thesis coursework in addition to the 36 credits required for the comprehensive examination option, making the minimum credits required for the thesis option 39 credits. However, only 3 credits of thesis coursework may count toward the total degree credit requirement of 39.

Those who already have a graduate degree must complete a minimum of 33 credits for this option. Students who choose the thesis option in the coordinated master's degree programs also need to take an additional 3 credits of thesis coursework. Thus, while total degree credits vary among the coordinated master's programs, the Master of Library and Information Science component of each requires 33 credits of SOIS coursework, three of which would be taken as thesis credit.

Students pursuing thesis options in both programs will be required to fulfill each program's thesis requirement and complete two separate theses. Students in the thesis option must take a minimum of 3 credits of research methods. A course other than INFOST 799 may be chosen in consultation with the major professor. Additional courses that do not count toward degree requirements may be required by individual circumstances.

Students must complete the required MLIS and research methods course before they will be allowed to defend the thesis proposal. Students must register for INFOST 898: Master's Thesis (1-3 credits), during every semester of thesis work. Students may select the thesis option at any point in their course of study, but are encouraged to make this decision and form their thesis committee as early as possible to avoid the necessity of taking additional coursework.

The faculty advisor assigned to each student upon admission may serve as the student's thesis advisor, but is not required to do so. It is the student's responsibility to enter into a mutually agreed upon advising relationship with a thesis advisor in SOIS, who then serves as chair of the thesis committee.

Students must pass an oral examination in defense of the thesis. The thesis defense may be repeated once. A student may withdraw from

the thesis option; however, the student would need to meet all course requirements for the MLIS degree.

## Archives Concentration

Students pursuing the Archives Concentration must take 15 credits of coursework in archives as electives within the overall MLIS program. To pursue the Archival Studies Concentration students must be admitted into the MLIS program and must submit the Archival Studies Concentration Declaration of Intent form (see SOIS website for details). This will allow the program coordinator to track your progress and communicate with you.

The Archival Studies concentration requires 15 credits of coursework planned in consultation with the student's advisor. Credits for the concentration count as electives for the MLIS. The courses that qualify for the concentration are as follows:

Code	Title	Credits
<b>Introduction Course</b>		
INFOST 650	An Introduction to Modern Archives Administration	3
<b>Foundation Courses</b>		
Minimum of 6 credits required		6
INFOST 750	Arrangement and Description in Archives	
INFOST 752	Archival Outreach: Programs and Services	
INFOST 753	Preserving Information Media	
INFOST 855	Advanced Appraisal	
<b>Elective Courses</b>		
Maximum of 6 credits to count toward concentration		6
INFOST 640	Information Literacy Instruction	
INFOST 655	Information and Records Management:	
INFOST 656	Electronic Documents and Records Management	
INFOST 682	Digital Libraries	
INFOST 691	Special Topics in Information Science: (with appropriate subtitle)	
INFOST 714	Metadata	
INFOST 758	Technology Issues in Archives	
INFOST 759	Fieldwork in Archives and Manuscripts <sup>1</sup>	
INFOST 791	Topics in Library and Information Science: (with appropriate subtitle)	
INFOST 850	Seminar in Modern Archives Administration	
INFOST 891	Advanced Topics in Library and Information Science: (with appropriate subtitle)	
INFOST 999	Independent Research	
<b>Recommended (does not count towards concentration)</b>		
INFOST 603	History of Books and Printing	
<b>Total Credits</b>		<b>15</b>

<sup>1</sup> Optional, but highly recommended for those without experience working in an archival collection.

## Additional Requirements

### Time Limit

Students in the 36-credit program must complete all degree requirements within seven years of initial enrollment. Students in the 30-credit program must complete all degree requirements within five years of initial enrollment.

## Library and Information Science, MLIS: Information Organization

### MLIS: Information Organization Concentration

Preparing students for careers in cataloging, indexing, metadata work, or archival organization in a wide variety of settings, including libraries, archives, museums, private corporations, government agencies, and other organizations, the Information Organization (IO) Concentration provides a way for you to formally focus your studies on information organization within the context of your MLIS degree program and its requirements. The Concentration includes a mixture of theoretical and practical knowledge and skills, and will be posted on your transcript upon degree conferral.

## About the School of Information Studies

The School of Information Studies prepares students for careers in libraries and the information professions. The School's array of graduate programs provides students with the opportunity to develop attitudes associated with progressive information services, and to develop an understanding of the value, role, and application of modern technology as it relates to library operations and the transfer of information.

Students must pass an oral examination in defense of the thesis. The thesis defense may be repeated once. A student may withdraw from the thesis option; however, the student would need to meet all course requirements for the MLIS degree.

### Information Organization Concentration

Students pursuing the Information Organization Concentration must take 15 credits of coursework from the list of qualifying courses as electives within the overall MLIS program.

The Information Organization Concentration requires a minimum of 15 credits of coursework taken from the list of qualifying courses below. The student's concentration program must be approved by the SOIS Information Organization Curriculum Coordinator. A fieldwork experience of 1-3 credits with a focus on information organization is required of students without practical experience.

Courses that qualify for the concentration are as follows:

Code	Title	Credits
INFOST 582	Introduction to Data Science	3
INFOST 619	Topics in Information Organization: (with an IO related topic)	1-3
INFOST 712	Resource Description for Library Catalogs	3
INFOST 714	Metadata	3
INFOST 717	Information Architecture	3
INFOST 719	Advanced Topics in Information Organization (with an IO related topic. May be repeated with change in topic to 9 credits max.)	3
INFOST 750	Arrangement and Description in Archives (prereq: INFOST 650)	3
INFOST 771	Data Curation	3
INFOST 785	Database Management Systems for Information Professionals	3
INFOST 898	Master's Thesis (with an IO topic, directed by an IO faculty member)	1-3
INFOST 990	Fieldwork in Library and Information Science Services (with a focus on IO. Prereqs: all INFOST core courses and relevant IO elective courses.)	1-3
or INFOST 759	Fieldwork in Archives and Manuscripts	

## Additional Requirements

### Time Limit

Students in the 36-credit program must complete all degree requirements within seven years of initial enrollment. Students in the 30-credit program must complete all degree requirements within five years of initial enrollment.

## Library and Information Science, MLIS: Information Technology

### MLIS: Information Technology (IT) Concentration

Emphasizing the use, implementation, management and evaluation of information technologies for a wide range of organizations, the IT concentration will prepare you to work in a diverse information technology landscape.

## About the School of Information Studies

The School of Information Studies prepares students for careers in libraries and the information professions. The School's array of graduate programs provides students with the opportunity to develop attitudes associated with progressive information services, and to develop an understanding of the value, role, and application of modern technology as it relates to library operations and the transfer of information.

In harmony with the mission of the University of Wisconsin-Milwaukee, a major urban research institute, the School of Information Studies strives to make significant contributions towards extending and enhancing the quality of information services and the promotion of information and technological literacy to a diverse society. The School of Information Studies is committed to excellence in instruction, research, and service.

### Goals of the school are:

1. To prepare professionals who are able to provide leadership and adapt to change in a technological and knowledge-based environment for careers in libraries, school media centers, information systems, and related areas, according to accepted professional standards.
2. To enrich the library and information science profession through recruitment of students with strong academic skills from diverse cultural, geographic, and subject backgrounds.
3. To enable undergraduate students to achieve qualifications to pursue careers in the information professions through the provision of degree and certificate programs.
4. To enable students to develop specializations in the information professions at the graduate level through the provision of single and dual degree programs.
5. To promote a research orientation through participation in the Doctor of Philosophy degree program.
6. To contribute to the international knowledge base of library and information science through research and publication.
7. To facilitate the development, provision, and evaluation of library and information services through consultation services to individual organizations and leadership in professional associations locally, statewide, nationally, and internationally.
8. To offer opportunities for professionals and the wider community to update their skills and knowledge through advanced and continuing education courses, workshops, and programs offered nationally and internationally.

## Related Advanced Certificates

- Certificate of Advanced Study in Archives and Records Administration (p. 476)
- Certificate in Digital Libraries (p. 483)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

An applicant must apply to both the Graduate School and the School of Information Studies.

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus the following additional requirements of the School of Information Studies to be considered for admission to the program:

- Applicants from foreign institutions are required to submit the Test of English as a Foreign Language (TOEFL) score. The minimum acceptable score is 550 PBT or 79 iBT. A score of 6.5 or higher on the International English Language Testing System (IELTS) may be submitted in lieu of the TOEFL.
- A one to two page reason statement outlining your background and your educational and professional goals.

No prior coursework in library/information science is required. A student whose undergraduate grade point average is below 2.75 (4.0 basis) may be considered for admission on probation. See the Admission on Probation (<http://uwm.edu/graduateschool/admission/>) Website.

## Credits and Courses

The minimum degree requirement is 36 graduate credits, 30 of which must be in library and information science and up to 6 of which may be in related areas. Students who have already completed a master's or doctoral degree in a field other than library science may have the library and information science master's program reduced to 30 credits. Under special circumstances, up to 6 of these credits may be from another field in a closely allied area with advisor consent. Students who have completed library science courses at the undergraduate level may, upon request, have their coursework reviewed to determine whether the content was the equivalent of that in required courses in the School of Information Studies Program. However, the establishment of such equivalencies will not reduce the total number of credits required for the master's degree in library and information science, but merely enable the student to avoid unnecessary repetition.

The number of credits needed for each of the coordinated degree programs is 12 credits less than the sum of credits of the two programs if taken separately. All degree requirements of each component program, however, must be satisfied. This includes makeup courses for deficiencies, required courses, and graduation proficiency requirements.

The MLIS component of each coordinated program includes 30 credits of SOIS courses including the 12 credits of required courses.

The following are basic required courses:

Code	Title	Credits
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies	3
<b>Total Credits</b>		<b>12</b>

### Minimum Grade Requirement in the Required Courses

The minimum grade requirement for the required courses is a B. Students who earn a grade of B- or lower have not met the minimum requirement and will be allowed to repeat the required course once. Students are responsible for tuition in the repeated course; no credit is earned from the first attempt at the required course, or any required course for which a B- or lower is earned. Materials and assignments used previously may not be reused or resubmitted when retaking a required course unless approved by the instructor. Those who do not meet the minimum grade requirements upon repeating the course will be recommended for academic dismissal. Students may not register for a course for which any of the required courses is a prerequisite until the minimum grade requirement is met.

### Culminating Experience Requirement in Library and Information Science

Effective Fall 2016, INFOST 799 meets the requirement for the culminating event for the MLIS program. If 591 was taken prior to the fall of 2016, it can still be used to meet the culminating event requirement. Said course must be taken in SOIS and cannot be transferred into the program.

### Thesis Option

Students may choose the thesis option in order to satisfy the program requirements and must take at least three credits of thesis coursework in addition to the 36 credits required for the comprehensive examination option, making the minimum credits required for the thesis option 39 credits. However, only 3 credits of thesis coursework may count toward the total degree credit requirement of 39.

Those who already have a graduate degree must complete a minimum of 33 credits for this option. Students who choose the thesis option in the coordinated master's degree programs also need to take an additional 3 credits of thesis coursework. Thus, while total degree credits vary among the coordinated master's programs, the Master of Library and Information Science component of each requires 33 credits of SOIS coursework, three of which would be taken as thesis credit.

Students pursuing thesis options in both programs will be required to fulfill each program's thesis requirement and complete two separate theses. Students in the thesis option must take a minimum of 3 credits of research methods. A course other than INFOST 799 may be chosen in consultation with the major professor. Additional courses that do not count toward degree requirements may be required by individual circumstances.

Students must complete the required MLIS and research methods course before they will be allowed to defend the thesis proposal. Students must register for INFOST 898: Master's Thesis (1-3 credits), during every semester of thesis work. Students may select the thesis option at any point in their course of study, but are encouraged to make this decision and form their thesis committee as early as possible to avoid the necessity of taking additional coursework.

The faculty advisor assigned to each student upon admission may serve as the student's thesis advisor, but is not required to do so. It is the student's responsibility to enter into a mutually agreed upon advising relationship with a thesis advisor in SOIS, who then serves as chair of the thesis committee.

Students must pass an oral examination in defense of the thesis. The thesis defense may be repeated once. A student may withdraw from the thesis option; however, the student would need to meet all course requirements for the MLIS degree.

### Information Technology (IT) Concentration

Students pursuing the IT Concentration must take 15 credits of coursework from the list of qualifying courses as electives within the overall MLIS program. To pursue the IT Concentration students must be admitted into the MLIS program and must submit the IT Concentration Declaration of Intent form (see SOIS website for details). This will allow the program coordinator to track your progress and communicate with you.

## Additional Requirements

### Time Limit

Students in the 36-credit program must complete all degree requirements within seven years of initial enrollment. Students in the 30-credit program must complete all degree requirements within five years of initial enrollment.

# Library and Information Science, MLIS: Public Library

## MLIS: Public Library Concentration

See yourself leading an information revolution in public libraries? The Public Library Concentration prepares MLIS graduates to positively engage with the range of opportunities facing the post-modern public library: extended community involvement, incorporation of emerging technologies, and pro-active advocacy for service populations.

Public library leaders build vital, resilient communities through their understanding of user needs, community partnerships, access to information and library services, and the legal and financial frameworks of public libraries. The objective of the Public Library Concentration is to enable graduates to take strong leadership positions with sensitivity to community needs and the possibilities engendered by new media technologies.

## About the School of Information Studies

The School of Information Studies prepares students for careers in libraries and the information professions. The School's array of graduate programs provides students with the opportunity to develop attitudes associated with progressive information services, and to develop an understanding of the value, role, and application of modern technology as it relates to library operations and the transfer of information.

In harmony with the mission of the University of Wisconsin-Milwaukee, a major urban research institute, the School of Information Studies strives to make significant contributions towards extending and enhancing the quality of information services and the promotion of information and technological literacy to a diverse society. The School of Information Studies is committed to excellence in instruction, research, and service.

### Goals of the school are:

1. To prepare professionals who are able to provide leadership and adapt to change in a technological and knowledge-based environment for careers in libraries, school media centers, information systems, and related areas, according to accepted professional standards.
2. To enrich the library and information science profession through recruitment of students with strong academic skills from diverse cultural, geographic, and subject backgrounds.
3. To enable undergraduate students to achieve qualifications to pursue careers in the information professions through the provision of degree and certificate programs.
4. To enable students to develop specializations in the information professions at the graduate level through the provision of single and dual degree programs.
5. To promote a research orientation through participation in the Doctor of Philosophy degree program.
6. To contribute to the international knowledge base of library and information science through research and publication.
7. To facilitate the development, provision, and evaluation of library and information services through consultation services to individual organizations and leadership in professional associations locally, statewide, nationally, and internationally.
8. To offer opportunities for professionals and the wider community to update their skills and knowledge through advanced and continuing

education courses, workshops, and programs offered nationally and internationally.

## Related Advanced Certificates

- Certificate of Advanced Study in Archives and Records Administration (p. 476)
- Certificate in Digital Libraries (p. 483)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

An applicant must apply to both the Graduate School and the School of Information Studies.

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus the following additional requirements of the School of Information Studies to be considered for admission to the program:

- Applicants from foreign institutions are required to submit the Test of English as a Foreign Language (TOEFL) score. The minimum acceptable score is 550 PBT or 79 iBT. A score of 6.5 or higher on the International English Language Testing System (IELTS) may be submitted in lieu of the TOEFL.
- A one to two page reason statement outlining your background and your educational and professional goals.

No prior coursework in library/information science is required. A student whose undergraduate grade point average is below 2.75 (4.0 basis) may be considered for admission on probation. See the Admission on Probation (<http://uwm.edu/graduateschool/admission/>) Website.

## Credits and Courses

The minimum degree requirement is 36 graduate credits, 30 of which must be in library and information science and up to 6 of which may be in related areas. Students who have already completed a master's or doctoral degree in a field other than library science may have the library and information science master's program reduced to 30 credits. Under special circumstances, up to 6 of these credits may be from another field in a closely allied area with advisor consent. Students who have completed library science courses at the undergraduate level may, upon request, have their coursework reviewed to determine whether the content was the equivalent of that in required courses in the School of Information Studies Program. However, the establishment of such equivalencies will not reduce the total number of credits required for the master's degree in library and information science, but merely enable the student to avoid unnecessary repetition.

The number of credits needed for each of the coordinated degree programs is 12 credits less than the sum of credits of the two programs if taken separately. All degree requirements of each component program, however, must be satisfied. This includes makeup courses for

deficiencies, required courses, and graduation proficiency requirements. The MLIS component of each coordinated program includes 30 credits of SOIS courses including the 12 credits of required courses.

The following are basic required courses:

Code	Title	Credits
INFOST 501	Foundations of Library and Information Science	3
INFOST 511	Organization of Information	3
INFOST 571	Information Access and Retrieval	3
INFOST 799	Research Methods in Information Studies	3
<b>Total Credits</b>		<b>12</b>

### Minimum Grade Requirement in the Required Courses

The minimum grade requirement for the required courses is a B. Students who earn a grade of B- or lower have not met the minimum requirement and will be allowed to repeat the required course once. Students are responsible for tuition in the repeated course; no credit is earned from the first attempt at the required course, or any required course for which a B- or lower is earned. Materials and assignments used previously may not be reused or resubmitted when retaking a required course unless approved by the instructor. Those who do not meet the minimum grade requirements upon repeating the course will be recommended for academic dismissal. Students may not register for a course for which any of the required courses is a prerequisite until the minimum grade requirement is met.

### Culminating Experience Requirement in Library and Information Science

Effective Fall 2016, INFOST 799 meets the requirement for the culminating event for the MLIS program. If 591 was taken prior to the fall of 2016, it can still be used to meet the culminating event requirement. Said course must be taken in SOIS and cannot be transferred into the program.

### Thesis Option

Students may choose the thesis option in order to satisfy the program requirements and must take at least three credits of thesis coursework in addition to the 36 credits required for the comprehensive examination option, making the minimum credits required for the thesis option 39 credits. However, only 3 credits of thesis coursework may count toward the total degree credit requirement of 39.

Those who already have a graduate degree must complete a minimum of 33 credits for this option. Students who choose the thesis option in the coordinated master's degree programs also need to take an additional 3 credits of thesis coursework. Thus, while total degree credits vary among the coordinated master's programs, the Master of Library and Information Science component of each requires 33 credits of SOIS coursework, three of which would be taken as thesis credit.

Students pursuing thesis options in both programs will be required to fulfill each program's thesis requirement and complete two separate theses. Students in the thesis option must take a minimum of 3 credits of research methods. A course other than INFOST 799 may be chosen in consultation with the major professor. Additional courses that do not count toward degree requirements may be required by individual circumstances.

Students must complete the required MLIS and research methods course before they will be allowed to defend the thesis proposal. Students must register for INFOST 898: Master's Thesis (1-3 credits), during every semester of thesis work. Students may select the thesis option at any point in their course of study, but are encouraged to make this decision and form their thesis committee as early as possible to avoid the necessity of taking additional coursework.

The faculty advisor assigned to each student upon admission may serve as the student's thesis advisor, but is not required to do so. It is the student's responsibility to enter into a mutually agreed upon advising relationship with a thesis advisor in SOIS, who then serves as chair of the thesis committee.

Students must pass an oral examination in defense of the thesis. The thesis defense may be repeated once. A student may withdraw from the thesis option; however, the student would need to meet all course requirements for the MLIS degree.

### Public Library Concentration

Students pursuing the Public Library Concentration must take 15 credits of coursework from the list of qualifying courses as electives within the overall MLIS program. To pursue the Public Library Concentration students must be admitted into the MLIS program and must submit the Public Library Concentration Declaration of Intent form (see SOIS website for details). This will allow the program coordinator to track your progress and communicate with you.

The Public Library Concentration requires 15 credits of coursework planned in consultation with the student's advisor. Credits for the concentration count as electives for the MLIS. The courses that qualify for the concentration are as follows:

Code	Title	Credits
<b>Required</b>		
INFOST 736	The Public Library	3
Select one of the following:		3
INFOST 861	Seminar in Intellectual Freedom	
INFOST 862	Legal Issues for Library and Information Managers	
INFOST 864	Critical Approaches to Public Librarianship	
<b>Electives</b>		
Select a minimum of 9 credits from the following:		9
INFOST 520	Managing Library Collections	
INFOST 524	Management of Libraries and Information Services	
INFOST 622	Information Marketing	
INFOST 637	Library Services for Young Children

INFOST 661	Information Ethics	
INFOST 682	Digital Libraries	
INFOST 685	Electronic Publishing and Web Design	

INFOST 774	Online Information Retrieval
INFOST 999	Independent Research
<b>Total Credits</b>	<b>15</b>

## Additional Requirements

### Time Limit

Students in the 36-credit program must complete all degree requirements within seven years of initial enrollment. Students in the 30-credit program must complete all degree requirements within five years of initial enrollment.

## Library and Information Science, MLIS: School Librarianship School Librarianship

School librarians are K-12 school leaders who facilitate the exploration of technology tools, information literacy, and current literature. SOIS offers the MLIS degree with a concentration in school librarianship which will lead to School Library Media Specialist Licensure, WI DPI License #1902.

## About the School of Information Studies

The School of Information Studies prepares students for careers in libraries and the information professions. The School's array of graduate programs provides students with the opportunity to develop attitudes associated with progressive information services, and to develop an understanding of the value, role, and application of modern technology as it relates to library operations and the transfer of information.

In harmony with the mission of the University of Wisconsin-Milwaukee, a major urban research institute, the School of Information Studies strives to make significant contributions towards extending and enhancing the quality of information services and the promotion of information and technological literacy to a diverse society. The School of Information Studies is committed to excellence in instruction, research, and service.

### Goals of the school are:

1. To prepare professionals who are able to provide leadership and adapt to change in a technological and knowledge-based environment for careers in libraries, school media centers, information systems, and related areas, according to accepted professional standards.
2. To enrich the library and information science profession through recruitment of students with strong academic skills from diverse cultural, geographic, and subject backgrounds.
3. To enable undergraduate students to achieve qualifications to pursue careers in the information professions through the provision of degree and certificate programs.
4. To enable students to develop specializations in the information professions at the graduate level through the provision of single and dual degree programs.
5. To promote a research orientation through participation in the Doctor of Philosophy degree program.
6. To contribute to the international knowledge base of library and information science through research and publication.
7. To facilitate the development, provision, and evaluation of library and information services through consultation services to individual

organizations and leadership in professional associations locally, statewide, nationally, and internationally.

8. To offer opportunities for professionals and the wider community to update their skills and knowledge through advanced and continuing education courses, workshops, and programs offered nationally and internationally.

## Related Advanced Certificates

- Certificate of Advanced Study in Archives and Records Administration (p. 476)
- Certificate in Digital Libraries (p. 483)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

An applicant must apply to both the Graduate School and the School of Information Studies.

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus the following additional requirements of the School of Information Studies to be considered for admission to the program:

- Applicants from foreign institutions are required to submit the Test of English as a Foreign Language (TOEFL) score. The minimum acceptable score is 550 PBT or 79 iBT. A score of 6.5 or higher on the International English Language Testing System (IELTS) may be submitted in lieu of the TOEFL.
- A one to two page reason statement outlining your background and your educational and professional goals.

No prior coursework in library/information science is required. A student whose undergraduate grade point average is below 2.75 (4.0 basis) may be considered for admission on probation. See the Admission on Probation (<http://uwm.edu/graduateschool/admission/>) Website.

Students seeking School Library Certification in the state of WI must clear a criminal background check for admission to a certification pathway.

## Credits and Courses

The minimum degree requirement is 36 graduate credits, 30 of which must be in library and information science and up to 6 of which may be in related areas. Students who have already completed a master's or doctoral degree in a field other than library science may have the library and information science master's program reduced to 30 credits. Under special circumstances, up to 6 of these credits may be from another field in a closely allied area with advisor consent. Students who have completed library science courses at the undergraduate level may, upon request, have their coursework reviewed to determine whether the content was the equivalent of that in required courses in the School of Information Studies Program. However, the establishment of such

equivalencies will not reduce the total number of credits required for the master's degree in library and information science, but merely enable the student to avoid unnecessary repetition.

The number of credits needed for each of the coordinated degree programs is 12 credits less than the sum of credits of the two programs if taken separately. All degree requirements of each component program, however, must be satisfied. This includes makeup courses for deficiencies, required courses, and graduation proficiency requirements. INFOST 644G	Clinical Experience in School Libraries	
INFOST 645G	Library Materials for Children	
INFOST 646G	Library Materials for Young Adults	
INFOST 670G	Instructional Technologies	
<b>Total Credits</b>		<b>15</b>

### Additional Requirements for WI School Library Certification:

- Completion of an approved course or workshop on the history, culture, and sovereignty rights of Wisconsin Indians to fulfill the ACT 31 legislation requirement of the Wisconsin Department of Public Instruction required for certification; and

- Additional coursework to meet WI State Statutes, as designated on an individualized program plan; and
- Satisfactory completion of approved program assessment.

## Additional Requirements

### Time Limit

Students in the 36-credit program must complete all degree requirements within seven years of initial enrollment. Students in the 30-credit program must complete all degree requirements within five years of initial enrollment.

## School Librarianship, Undergraduate Certificate

UW-Milwaukee's Certificate in School Librarianship prepares candidates for the Wisconsin Department of Public Instruction Teaching License #1902, so they may serve as certified school librarians in Wisconsin K-12 school districts. School librarians serve the information needs of K-12 students, teachers, and families. In addition to being experts in library and information studies content and competencies, school librarians also have skills as teachers, guiding students in research, reading, information literacy, ethical use of information, and critical thinking.

The School Librarianship - Undergraduate Certificate is a Post-Baccalaureate program that includes pathways for both certified teachers who wish to earn the add-on licensure in school librarianship and students who are not yet certified teachers who wish to earn their initial licensure in school librarianship.

Visit the [program website](https://uwm.edu/informationstudies/academics/school-library-media-programs/) for a complete list of all pathways toward school library licensure (<https://uwm.edu/informationstudies/academics/school-library-media-programs/>).

## Requirements

Students must already hold an undergraduate degree and must have matriculated with a cumulative GPA of 2.75 or higher. Students are required to maintain a cumulative 2.75 GPA or higher throughout their certificate program as well. Specific program requirements vary depending on which pathway the student is following towards licensure, but SOIS courses and clinical work are required for every program. Per WI DPI requirements, all students must complete a successful background check through UWM to gain admission to our program. Please visit this link (<https://uwm.edu/education/students/clinical-experiences/>) to complete the check through UWM's partnership with MPS.

### We have four pathways towards school library licensure:

1. Students who are already certified teachers who want to earn their add-on licensure in school librarianship as part of their Master's in Library and Information Science (MLIS) degree. These students complete the certification requirements as part of their MLIS and will not be a part of the undergraduate certificate program.
2. Students who are already certified teachers who only want the add-on licensure in school librarianship. These students are undergraduate certificate program students for their entire course of study.
3. Students who are not yet certified teachers who will be earning their Master's in Library and Information Science (MLIS) degree, and then return as undergraduate certificate program students to complete their initial licensure in school libraries.

4. Students who are not yet certified teachers who will be earning only their initial licensure in school librarianship. These students are undergraduate certificate program students for their entire course of study.

### Pathway Course List for certified teachers who want to earn an MLIS with the 1902 school library license:

Code	Title	Credits
INFOST 501G	Foundations of Library and Information Science	3
INFOST 511G	Organization of Information	3
INFOST 571G	Information Access and Retrieval	3

## Social Welfare (Helen Bader School of)

The Helen Bader School of Social Welfare offers programs to educate students about social policies and programs, and to train them for beginning level practice in a variety of professional roles in social work and criminal justice. Its location in metropolitan Milwaukee gives students numerous opportunities to gain practical experience in social, health, educational, or criminal justice agencies.

Undergraduate majors in both social work and criminal justice & criminology lead to the Bachelor of Science degree, and are designed to prepare students for available entry-level positions in their respective fields. These programs also provide excellent preparation for graduate work.

The School also offers graduate programs at the master's degree level in both criminal justice and social work.

## Degree Programs

**Bachelor of Science** Criminal Justice & Criminology, Social Work

**Master of Science** Criminal Justice & Criminology

**Master of Social Work**

**Doctor of Philosophy** Social Welfare

## Departments and Programs

- Criminal Justice and Criminology (p. 523)
  - Crime Analysis, Undergraduate Certificate (p. 523)
  - Criminal Justice and Criminology, BS (p. 524)
  - Criminal Justice and Criminology, BS: Crime Analysis (p. 526)
  - Criminal Justice and Criminology, Minor (p. 528)
  - Criminal Justice and Criminology, MS (p. 528)
  - Criminal Justice and Criminology, MS/Public Administration, MPA (p. 529)
  - Criminal Justice and Criminology, MS/Social Welfare, PhD (p. 530)
  - Criminal Justice and Criminology, MS/Social Work, MSW (p. 532)
  - Criminal Justice and Criminology, MS: Crime Analytics (p. 533)
  - Cyber Crime Forensics, Graduate Certificate (Helen Bader School of Social Welfare, Department of Criminal Justice) (p. 535)
  - Death Investigation, Undergraduate Certificate (Helen Bader School of Social Welfare, Department of Criminal Justice) (p. 536)
  - Forensic Science, Undergraduate Certificate (Helen Bader School of Social Welfare, Department of Criminal Justice) (p. 536)

- Forensic Toxicology, Undergraduate Certificate (Helen Bader School of Social Welfare, Department of Criminal Justice) (p. 537)
- Military Science (p. 538)
- Social Work (p. 540)
  - Aging, Minor (p. 541)
  - Applied Gerontology, Graduate Certificate (p. 541)
  - Social Welfare, PhD (p. 543)
  - Social Welfare, PhD/Criminal Justice and Criminology, MS (p. 545)
  - Social Work, BS (p. 547)
  - Social Work, MSW (p. 549)
  - Social Work, MSW/Criminal Justice and Criminology, MS (p. 551)
  - Social Work, MSW/Public Health, MPH (p. 552)
  - Social Work, MSW/Social Welfare, PhD (p. 554)
  - Social Work, MSW/Women's and Gender Studies, MA (p. 556)
  - Suicide Prevention Across the Lifespan, Undergraduate Microcredential (p. 558)
- Trauma Informed Care, Graduate Certificate (Helen Bader School of Social Welfare, Department of Social Work) (p. 558)

## Graduate Admission Requirements

Each graduate program has admission requirements in addition to the general Graduate School admission requirements. Refer to Graduate Admissions and Cost (p. 20) for the graduate school's admission requirements, and to the specific program for the program's admission requirements.

## Undergraduate Admission

### Freshmen

Freshmen entering UWM who indicate an interest in criminal justice & criminology or social work are admitted directly into the Helen Bader School of Social Welfare, and are designated criminal justice & criminology or social work majors.

Admission to the University does not guarantee enrollment in the social work major; a separate application will be required to advance in the major.

### Transfer Students

Transfer students who transfer from outside UWM to criminal justice & criminology or social work become criminal justice & criminology or social work intended majors upon admission regardless of the number of credits they transfer. They can apply for admission to the major when they have at least junior standing and have completed one full-time semester or the equivalent at UWM.

### Second Bachelor's Degree Students

Second bachelor's degree students applying to the University who already hold one bachelor's degree and who wish to pursue a second degree in either criminal justice & criminology or social work are directly admitted and social work majors must submit a separate application to advance in the major. They must complete at least 30 credits at UWM beyond the credits that counted toward the first degree, and must satisfy the same degree and curriculum requirements as students working towards a first degree in the same major.

Special students in the Helen Bader School of Social Welfare and University special students are permitted to register in any undergraduate course offered by the School, provided they meet the stated prerequisites or are admitted to the course by the instructor.

## Requirements for Employment, Licensing, or Professional Organizations

Effective October 1, 1998, changes in Chapters 48 (Children's Code) and 50 (Uniform Licensure) of the Wisconsin State Statutes make it a requirement for selected organizations to perform rigorous background checks of persons who provide care for vulnerable adults and children or who have access to people who receive such care.

The results of these background checks are intended to help employers and government officials in making employment and licensing decisions. The law affects anyone who is employed as a caregiver or who has access to clients within caregiving organizations, **including students**. The organizations required to perform these background checks are those that are regulated by the State Department of Health and Family Services (DHFS).

The law means that if you are going to train (including a field or clinical placement) or work in an agency providing care to vulnerable adults or children, and that agency is regulated by DHFS, a background check will be required of you. A background check may be required even if you do not have direct caregiving responsibilities to clients. Depending on the circumstances, a student may be disqualified from field placement in certain agencies as a result of this law. Students are responsible for obtaining the information necessary for them to become knowledgeable about these requirements and plan their studies accordingly.

## Graduate Policies and Regulations

The Graduate School policies and regulations can be found at Graduate School Policies (p. 31). Please refer to the specific program for program policies and regulations.

## Undergraduate Policies and Regulations

### Academic Regulations

For information on actions on unsatisfactory grades and honors for scholarship, see Academic Policies (p. 22).

### Semester Course Load

Registration for more than 18 credits in a given semester requires the advisor's permission. For students in the School's majors, this permission will be given upon advice of the appropriate program chair.

### Change in Requirements

If curriculum requirements are changed after the student has been formally accepted in the major, the student is free to remain with the former requirements or to follow the new ones.

## Administration

**Tina Freiburger**

## Criminal Justice and Criminology

Study the criminal justice system through legal and political lenses, examining the nature, causes and impact of crime. Students learn through courses taught by experienced faculty, and in fieldwork opportunities, to improve their listening, speaking, writing, analytical and

evaluative skills. They graduate prepared to work in law enforcement, corrections and the courts.

## Programs

- Crime Analysis, Undergraduate Certificate (p. 523)

## Crime Analysis, Undergraduate Certificate

The Department of Criminal Justice & Criminology offers a specialization, a minor, and a post-baccalaureate certificate in Crime Analysis. Crime analysts gather crime and disorder data, identify and analyze patterns, trends and problems, develop recommendations based on their findings, and create and disseminate information that helps criminal justice agencies address crime and allocate resources.

A sequence of courses will lead to a specialization in this growing area. Preparation includes a foundation in criminal justice and research methods; specialized coursework in crime analysis, analysis-oriented

technology, and data-driven policing; and field placement in an agency setting with practicing professionals.

## Requirements

The Certificate in Crime Analysis is designed for students who already have a bachelor's degree in any field and consists of 21 credits, with the following courses (or equivalents) required:

Code	Title	Credits
CRM JST 110	Introduction to Criminal Justice	3
INFOST 110	Introduction to Information Science and Technology	3
or INFOST 120	Information Technology Ethics	
CRM JST 480	Criminal Evidence and Investigation	3

CRM JST 510	Introduction to Crime Analysis	3
CRM JST 520	Analysis Oriented Technology: Spatial Data Analysis; Crime Mapping; ArcGIS	3
CRM JST 530	Data Driven Policing Strategies and Police Intelligence	3
CRM JST 311	Field Experience Practicum	3

**Total Credits** 21

Students must complete all coursework within the sequence. A minimum of 15 credits must be taken in residence at UWM.

## Contact Information

### Criminal Justice Department

Enderis Hall, 1110  
2400 E Hartford Ave.

<http://uwm.edu/socialwelfare/academics/crime-analytics/>

## Criminal Justice and Criminology, BS

Study in the field of criminal justice examines the component parts of criminal justice – police, courts, and corrections – and seeks to gain an understanding of the interdependencies among them. Courses emphasize the role of criminal justice agencies in society, particularly in relation to the impact of alternative criminal justice policies on society and social problems. The program prepares students as generalists in criminal justice and is well suited for those who want to pursue graduate work in criminal justice, law, public administration, and the social sciences.

Thousands of our graduates have gone on to careers with the public sector, private sector and non-profit organizations, including jobs such as FBI agent, intelligence analyst, police officer, evidence technician, border patrol agent, computer security expert, probation officer, customs inspector, and private investigator.

Refer to Proficiency Requirements in General Education Requirements. Contact a school advisor for specific information.		
<b>Liberal Arts Foundation</b>		

### UWM Foreign Language Requirement

Completion of two years of high school-level instruction in a single foreign language, or satisfactory completion of at least two semesters of a single foreign language, or approved demonstration of foreign language ability

### UWM Cultural Diversity Requirement

One course from the Arts, Humanities, or Social Sciences must also satisfy UWM's Cultural Diversity requirement

#### Arts

Select 3 credits of General Education-approved arts course in the history, philosophy, theory, or practice of the creative and interpretive arts 3

#### Humanities

COMMUN 103 Public Speaking 3

Select 3 credits of General Education-approved humanities courses 3

#### Natural Science

Select 6 credits of General Education-approved natural science courses to include a lab or field course 6

#### Social Science

Select 6 credits of General Education-approved social science courses 6

**Total Credits** 21

## Major Requirements

Criminal justice intended majors spend their first two years building a liberal arts foundation and fulfilling proficiency requirements. Freshmen and sophomores may begin to take courses offered in the Helen Bader School of Social Welfare.

Students must complete at least 120 credits to obtain the degree. The major in criminal justice requires a minimum of 45 credits in required courses and electives. The Department requires that students attain at least a 2.0 GPA on all credits in the major attempted at UWM. In addition, students must attain a 2.0 GPA on all major credits attempted, including transfer work, to meet graduation requirements.

Code	Title	Credits
<b>Required Courses</b>		
CRM JST 110	Introduction to Criminal Justice	3

or INFOST 370	Data Analysis and Visualization for the Information Professional	

### Criminal Justice Electives

Select 18 credits <sup>1</sup> 18

### Fieldwork

Complete up to 6 credits <sup>2</sup>	0-6
<b>Total Credits</b>	<b>45</b>

<sup>1</sup> SOC WRK 100 and SOC WRK 306 count as electives in the criminal justice major.

<sup>2</sup> Upon approval of the Criminal Justice Field Coordinator, the student may earn up to 6 credits of Criminal Justice electives for authorized field placements with various criminal justice agencies including police departments, court-related agencies, and correctional institutions.

## General Electives

Code	Title	Credits
Credits towards the degree not counted in other categories will apply to General Electives. Classes counting towards General Electives may include, but are not limited to:		
ENGLISH 100	Introduction to College Writing and Reading	4
ENGLISH 101	Introduction to College Writing	3
ENGLISH 102	College Writing and Research	3
MATH 102	Mathematical Literacy for College Students II	3
MATH 103	Contemporary Applications of Mathematics	3
MATH 105	Introduction to College Algebra	3
MATH 108	Algebraic Literacy II	3
Foreign Language credits		
<b>Total Credits</b>		<b>54</b>

Credits earned in HONORS 687 or HONORS 689 will not count towards the major.

## Degree Requirements

An overall GPA (including non-UWM college work) of 2.0 and a total of 120 credits are needed for graduation. To receive the bachelor's degree with a criminal justice major, the student must complete at least 30 degree credits at UWM. At least 50% of the credits required for the Criminal Justice major must be earned at UWM.

## Undergraduate Academic Advising

The Office of Student Services in the Helen Bader School of Social Welfare, located in the Northwest Quadrant Building D 3rd Floor, offers undergraduate student academic advising from professional advisors who are familiar with the Social Work and Criminal Justice & Criminology curriculum, College requirements, and university policies. Advisors can also provide information on scholarship opportunities, tutoring, and student organizations that align with a student's interests.

These advisors provide services such as new freshman orientation, course selection, assistance with registration, and review of transfer credit. Students are assigned to a permanent professional advisor upon admittance into the Helen Bader School of Social Welfare and are encouraged to meet with their academic advisor at least once each semester. Please call (414) 229-4852 to schedule an appointment or for more information.

## Transfer Students

The Helen Bader School of Social Welfare welcomes students from other academic areas on the UWM campus and students transferring to UWM

from other institutions. Students planning to transfer into either major from another institution should meet with an academic advisor as soon as they are admitted and the transfer credit evaluation process has been completed. During this meeting, the student and advisor will review transfer course equivalencies, discuss program requirements, and create an academic plan for coming semesters. Students may meet with their advisor in person or by phone. Please call (414) 229-4852 to schedule an appointment or for more information.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## Honors in the Major

Honors in the Major is granted to students who have earned a GPA of 3.500 or above in all major courses taken in residence at UWM. A minimum of 28 Social Work credits or 24 Criminal Justice credits completed in residence are needed to be considered for Honors in the Major.

## High Honors in the Major

High Honors in the Major is granted to students who have earned a GPA of 3.750 or above in all major courses taken in residence at UWM. A minimum of 28 Social Work credits or 24 Criminal Justice credits completed in residence are needed to be considered for Honors in the Major.

## College of Community Engagement and Professions Dean's Honor List

GPA of 3.750 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Criminal Justice and Criminology, Minor

The minor in criminal justice is a strong complement for students studying journalism, politics, sociology, social work, political science, or philosophy; students who plan on attending law school; and students who seek careers in public service.

The Department of Criminal Justice & Criminology offers a specialization, a minor, and a post-baccalaureate certificate in Crime Analysis. Crime analysts gather crime and disorder data, identify and analyze patterns, trends and problems, develop recommendations based on their findings, and create and disseminate information that helps criminal justice agencies address crime and allocate resources.

A sequence of courses will lead to a specialization in this growing area. Preparation includes a foundation in criminal justice and research methods; specialized coursework in crime analysis, analysis-oriented technology, and data-driven policing; and field placement in an agency setting with practicing professionals.

## Requirements

### Standard Track

The standard minor track requires a minimum of 18 credits in criminal justice & criminology courses:

Code	Title	Credits
<b>Required</b>		
CRM JST 110	Introduction to Criminal Justice	3
CRM JST 271	Introduction to Policing	3
CRM JST 273	Introduction to Corrections	3
CRM JST 275	Introduction to Criminal Courts	3
<b>Electives</b>		
Select 6 credits in courses at the 300 level or above		6
<b>Total Credits</b>		<b>18</b>

Credits earned in CRM JST 311 and CRM JST 599 do not count toward the minimum number of credits required for the standard minor track.

### Crime Analysis Track

The crime analysis minor track consists of 18 credits, with the following courses (or equivalents approved by the department chairperson) required:

Code	Title	Credits
CRM JST 110	Introduction to Criminal Justice	3
CRM JST 480	Criminal Evidence and Investigation	3
CRM JST 510	Introduction to Crime Analysis	3
CRM JST 520	Analysis Oriented Technology: Spatial Data Analysis; Crime Mapping; ArcGIS	3
CRM JST 530	Data Driven Policing Strategies and Police Intelligence	3
CRM JST 311	Field Experience Practicum	3
<b>Total Credits</b>		<b>18</b>

A minimum of 15 credits must be taken in residence at UWM.

## Criminal Justice and Criminology, MS

The School of Social Welfare offers a master's program of study in criminal justice and criminology. The program is designed to educate students for leadership positions in the field of criminal justice. The program also provides a strong foundation for students anticipating advanced study at the doctoral level. The curriculum is also designed to prepare Criminal Justice professionals to understand all aspects of criminal justice policy. Legal, organizational, political and behavioral frameworks are used to analyze the operation of the criminal justice system. Students are introduced to advanced knowledge on the nature and causes of crime, the justification and means of social control, the administration of the justice system, and the evaluation of criminal justice programs.

## Requirements

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Admission

An applicant must meet all Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these program-specific requirements to be considered for admission:

- Undergraduate degree from an accredited university in criminal justice, a related social science, or other relevant educational background.
- Undergraduate cumulative grade point average (GPA) of 3.00.
- In addition, applicants with an undergraduate cumulative GPA between 2.75-2.99 may be considered for admission, but should address their lower cumulative GPA within their reason statement.
- Two letters of recommendation from persons who are familiar with the applicant's academic record and suitability for graduate work.
- It is recommended that applicants have completed a research methods course and a statistics course at the undergraduate level prior to beginning the program.
- Applicants must also submit a brief narrative statement indicating reasons for interest in graduate study.

## Application

Application must be made to the Graduate School. Applicants may be admitted to the program for Fall, Spring or Summer (note graduate course offerings are currently limited in the summer session). For further information regarding the application process, please contact the Criminal Justice & Criminology Department office at (414) 229-2392.

## Credits and Courses

The Master of Science in Criminal Justice consists of a minimum of 33 graduate credits:

Code	Title	Credits
Courses taken within the Criminal Justice program (27 credits)		
Must include 15 credits of:		
CRM JST 713	Measuring Crime & Analyzing Crime Data	3
CRM JST 743	Proseminar: Administration of Criminal Justice Systems	3
CRM JST 756	Proseminar: Analysis of Criminal Justice Research	3
CRM JST 773	Criminological Perspectives	3
CRM JST 920	Criminal Justice Masters Capstone Seminar	3
Select an additional 12 credits of Criminal Justice Electives (4 courses)		12
Select an additional 6 credit hours taken elsewhere in the School of Social Welfare or in other UWM departments with the prior consent of advisor.		6
<b>Total Credits</b>		<b>33</b>

The student must pursue either Option A: Essay Option, or Capstone Option B: Non-Essay Option described below.

### Option A: Essay Option

Students must complete the required proseminars and, as part of the 33 graduate credits required, must complete 3 credits of research and a graduate-level statistics course approved by the student's faculty advisor. Students planning to go into doctoral programs are strongly encouraged to pursue the essay option.

#### Essay

An acceptable essay must be written on the student's area of concentration.

#### Comprehensive Examination

The student must pass a final oral examination in defense of the essay.

### Option B: Non-Essay Option

Students must complete the 33 graduate credits required, including the three proseminars and the criminal justice capstone seminar course.

## Additional Requirements

### Major Professor as Advisor

The student must have a faculty advisor to advise and supervise the student's studies as specified in Graduate School regulations. At the time of admission, the Graduate Program Director will assign each student to a faculty advisor. Students who begin to work closely with a particular faculty member with expertise in their area of interest may request that this faculty member serve as their advisor. Students who pursue the

Essay Option must choose a faculty member to serve as their major professor.

### Time Limit

The student must complete all degree requirements within seven years of initial enrollment.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## Criminal Justice and Criminology, MS/Public Administration, MPA

Both departments collaboratively offer a program designed to provide students with theoretical and practical exposure to evolving professional practice in the field of criminal justice.

## Requirements

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Admission

Students are admitted to both graduate programs separately and admission requirements are consistent with those specified by the UWM Graduate School, the MS in Criminal Justice & Criminology and the MPA program.

## Credits and Courses

Students accepted into this MS/MPA program complete the following courses:

### MS in Criminal Justice & Criminology

Code	Title	Credits
<b>Required</b>		
CRM JST 773	Criminological Perspectives	3
CRM JST 743	Proseminar: Administration of Criminal Justice Systems	3
CRM JST 756	Proseminar: Analysis of Criminal Justice Research	3
<b>Electives</b>		
Select 12 additional credits within the criminal justice & criminology program		12
Select 12 additional credits with the consent of the student's advisor		12
<b>Total Credits</b>		<b>33</b>

### Master of Public Administration

Students entering the MPA program will be placed, at the discretion of the MPA Director in one of two tracks (A or B) within the core. The minimum degree requirement is 39 credits for Track A and 42 for Track B.

**Track A**

Students with significant public or nonprofit sector work experience may, at the discretion of the MPA Director, have PUB ADM 921 waived. Students seeking placement in this track will need to meet with the MPA Director to discuss this possibility and will be required to provide documentation of current public or nonprofit sector work experience.

**Track B**

Students with no significant public or nonprofit sector work experience are required to enroll in and successfully complete PUB ADM 921. As part of the requirements for this course, Track B students are required to obtain, with the assistance of the MPA Director, one or more internships in either the public or nonprofit sector while enrolled in the MPA program.

Code	Title	Credits
<b>Required Core</b>		
BUS ADM 738	Human Resource Management	3
PUB ADM 763	Scope and Dynamics of Public Administration	3
PUB ADM 769	Analyzing and Evaluating Public Policies and Programs	3
Select one of the following:		3
BUSMGMT 709	Predictive Analytics for Managers	
PUB ADM 792	Decision-Making for Nonprofit and Public Organizations	
CRM JST 756	Proseminar: Analysis of Criminal Justice Research	
Select one of the following:		3
BUS ADM 441	Diversity in Organizations	
BUS ADM 443	Special Topics in Human Resources Management:	
BUS ADM 737	Managerial Decisions and Negotiations	
<b>Capstone</b>		
PUB ADM 959	Capstone Seminar in Public Administration <sup>1</sup>	3
<b>General Public Administration</b>		
Select three of the following:		9
BUSMGMT 724	Accounting for Nonprofit Organizations	
PUB ADM 400	Ethics and Responsibility in Public Administration	
PUB ADM/URBPLAN 630	Budgeting and Finance in the Public Sector	
PUB ADM 750	Public Administration Risk and Analysis	
PUB ADM/POL SCI 914	Seminar in Intergovernment Relations	
PUB ADM 958	Seminar in Public Administration:	
PUB ADM 965	Municipal Management	
<b>Concentration</b>		
Select 12 credits in CRM JST		12
<b>Internship</b>		
PUB ADM 921	Public Service Administrative Internship <sup>2</sup>	3
<b>Total Credits</b>		<b>42</b>

the assistance of the instructor. This course will also be devoted to coverage of special issues and problems of the public administration profession, including administrative ethics.

<sup>2</sup> An internship is mandatory for students with no public sector work experience.

**Total Degree Credits for Master of Public Administration: 48-51 cr**

The total credits for the coordinated program would typically be completed in both programs at the same time, rather than one program after the other. A student not completing the requirements for the coordinated degree program would need to complete all requirements for an individual program in order to receive a degree.

**Additional Requirements****Time Limit**

Students in the coordinated MS/MPA degree program must complete all degree requirements within seven years of the first enrollment semester as a degree student.

**Criminal Justice and Criminology, MS/Social Welfare, PhD**

The Joint Master of Criminal Justice and Criminology and Doctor of Philosophy in Social Welfare program prepares students to make significant contributions to both education and research in the social sciences. The goals and objectives of both the MSCJC and PhD programs reflect the department's concerns with urban social problems, social and economic equity and well-being, cultural diversity, and the empowerment of individuals, families, organizations, and communities to effect change.

**Admission Requirements****Application Deadlines**

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

**Admission**

Relevant application materials must be submitted to both the Graduate School and the Helen Bader School of Social Welfare and will be accepted for admission in the Fall semester only. All applications must be completed and submitted on or before January 2. Applications received after January 2 will be considered only if space is available after other applications are reviewed.

Students who apply and are accepted to the joint MSCJ/PhD program will be able to earn both degrees in the course of their studies and will not be required to apply to the PhD program after earning the MSCJ degree, assuming their progress is consistent with departmental, school, and Graduate School standards. Applicants who are not offered admission to the joint program will still be considered for admission into the MSCJ-only program.

All applicants must meet Graduate School requirements plus the following school requirements:

<sup>1</sup> Every student will be required to take the capstone seminar, PUB ADM 959. The course requirements will include the completion and written and oral presentation of a project on a topic selected with

1. Have an undergraduate grade point average of 2.75 or better.
2. Have completed at least 21 semester credits in the social and behavioral sciences (i.e., psychology, sociology, political science, economics, anthropology, and/or their equivalents).

In the Personal Statement section of the Graduate School application form, applicants must indicate:

1. That, of the PhD program’s four areas of specialization (Criminal Justice, Addiction and Behavioral Health, Applied Gerontology, or Family and Child Welfare) they wish to pursue the Criminal Justice option.
2. Their reasons for seeking a doctoral degree.
3. Their goals as future scholars.
4. A topic or issue in the field that they consider to be particularly challenging and worthy of study.

In other materials submitted to the Graduate School, applicants must:

1. Provide a current copy of a professional résumé or curriculum vitae. This should contain information on:

- All post-secondary education, including institutions, degrees and dates of completed programs of study, plus institutions, dates, and types of study that did not lead to a degree.
- All employment by the applicant in criminal justice, social work, and related areas, including dates and employing organizations.
- Employment unrelated to criminal justice or social work within the past five years.
- Any past or current professional licenses held.

2. Submit scores from within the past five years on the Graduate Record Examination (GRE) General Test.

3. Submit three letters of recommendation from persons familiar with the applicant’s achievements and academic potential, including at least one current or former academic instructor.

4. Submit a sample of written work that demonstrates: the applicant’s knowledge of social welfare theory, practice, and research; ability to think analytically; and writing skills. The sample should be at least 1000 words in length and represent work for which the applicant was the sole author, or if it is jointly authored should indicate which sections were primarily done by the applicant.

**Advisement**

The school will assign each MSCJ/PhD student a major professor. This assignment is based on congruence between the applicant’s interests and the expertise of the major professor. In consultation with the director of the PhD program, the student may change major professors after beginning the program, but no applicant will be admitted unless a doctoral faculty member agrees to serve as major professor.

**Financial Assistance**

Through a combination of tuition remission, teaching assistantships, research assistantships, fellowships, and other options, the program will attempt to provide financial assistance to all admitted students during their first four years in the program. Applicants needing additional information on other sources of financial assistance, such as student loans, should contact the campus Department of Financial Aid.

**Residence**

Students must meet minimum Graduate School residency requirements.

**Credits and Courses**

The Criminal Justice MS (MSCJ) portion of the joint curriculum requires a minimum of 21 graduate credits. Another 12 Masters-level credits will be replaced by the same number of PhD-level credits. Courses at the Masters level are:

Code	Title	Credits
CRM JST 743	Proseminar: Administration of Criminal Justice Systems	3
CRM JST 756	Proseminar: Analysis of Criminal Justice Research	3
CRM JST 773	Criminological Perspectives	3
CRM JST 920	Criminal Justice Masters Capstone Seminar	3
or CRM JST 990	Thesis or Research Project	
CRM JST 795	Issues in Law Enforcement Practice and Policy	3
CRM JST 810	Police Administration	3
CRM JST 850	Issues in Correctional Practice and Policy	3
<b>Total Credits</b>		<b>21</b>

MSCJ courses to be replaced by PhD-level courses are:

Code	Title	Credits
CRM JST 713	Measuring Crime & Analyzing Crime Data (replaced by SOC WRK 961)	3
CRM JST 999	Independent Reading in Criminal Justice (replaced by SOC WRK 791 or SOC WRK 932)	1-3
	Elective (replaced by doctoral elective)	3
	Elective (replaced by doctoral elective)	3
<b>Total Credits</b>		<b>12</b>

A minimum of 40 credits of PhD-level course work is required. At least 31 of these must be earned in residence at UWM. Required courses include:

Code	Title	Credits
<b>Foundation</b>		
SOC WRK 901	Philosophy of Science	3
<b>Specialization Seminars</b>		
9 credits required, 3 from student’s area of specialization		9
SOC WRK 931	Theories of Poverty and Social Welfare Policy	
SOC WRK 932	Theories and Research on Behavior Change	
SOC WRK 945	Family and Long-Term Care Across the Life Course	
SOC WRK 791	Current Topics in Social Work: (Multigenerational Policies and Services)	
SOC WRK 791	Current Topics in Social Work: (Child and Family Wellbeing)	
SOC WRK 791	Current Topics in Social Work: (Criminal Justice Practice and Policy)	
<b>Research Methods</b>		
SOC WRK 951	Quantitative Research Methods	3

SOC WRK 952	Qualitative Research Methods in Social Work	3
<b>Statistics</b>		
SOC WRK 961	Introduction to Statistical Methods	4
SOC WRK 962	Applied Multiple Regression Analysis	3
<b>Research Methods or Statistics Electives</b>		
SOC WRK 963	Measurement Methods and Related Multivariate Statistics	3
SOC WRK 964	Advanced Statistical Methods	3
<b>Proseminars</b>		
SOC WRK 991	Doctoral Proseminar: (Proseminar in Research Ethics)	1
SOC WRK 991	Doctoral Proseminar: (Proseminar in Grantwriting)	1
GRAD 803	Teaching & Learning in College: Reflections on Theory and Practice	1
<b>Practicum</b>		
Accompanies first teaching and research assistantships		
SOC WRK 999	Independent Reading in Social Work (Teaching)	1-3
or CRM JST 999	Independent Reading in Criminal Justice	
SOC WRK 999	Independent Reading in Social Work (Research)	1-3
or CRM JST 999	Independent Reading in Criminal Justice	
<b>Electives</b>		
Two approved external doctoral-level courses in area of specialization (2-3 credits each)		4-6
<b>Total Credits</b>		<b>40-42</b>

## Additional Requirements

### Preliminary Examination

All students must pass a preliminary examination subsequent to successfully completing all required course work and prior to being admitted to doctoral candidacy (see <http://uwm.edu/socialwelfare/preliminary-examination/>). The examination assesses students' ability to articulate their research interests, analyze and synthesize empirical knowledge and relevant theoretical concepts, explain how theory may affect the generation of knowledge, and show familiarity with relevant scientific methodologies. In keeping with Graduate School rules, the preliminary examination should be completed within five years of enrollment.

Prior to initialing the preliminary examination, students must complete an application for the examination through the Graduate School's Milestones system. Students who fail the preliminary examination may not proceed to the dissertation. The exam may be retaken only once. Complete policies regarding forming a preliminary examination committee, writing the proposal, and taking the examination are available in the Social Welfare PhD program handbook.

### Dissertation Proposal Defense

All students must successfully complete an oral defense of their dissertation proposal to determine their preparation for independent research. The defense must be completed successfully within four years of initial enrollment.

### Dissertation

Students who have successfully completed the Preliminary Examination and a one-page preliminary dissertation proposal are formally admitted to doctoral candidacy. In accordance with Graduate School policies, students must then register for three research or thesis/dissertation credits each semester until the dissertation is submitted to the Graduate School. To meet the requirements for the dissertation, the candidate must complete an original independent research project that adds meaningfully to the existing body of knowledge in social welfare. It should be of a caliber that warrants publication in respected journals in the field.

### Dissertation Defense

As the final step toward the degree, the candidate must pass an oral examination before their doctoral committee in defense of the dissertation. The examination may also cover general topics relevant to the student's area of study. This requirement may not be completed until all other degree requirements are satisfied.

### Time Limit

It is expected that most students will complete all degree requirements within seven years of initial enrollment in the joint MSCJ/PhD program. All requirements MUST be completed within ten years from the date of initial enrollment.

## Criminal Justice and Criminology, MS/Social Work, MSW

Both departments in the Helen Bader School of Social Welfare collaboratively offer a program designed to provide students with theoretical and practical exposure to evolving professional practice in the field of criminal justice, or social work with a focus on criminal justice (e.g., corrections, juvenile justice, probation and parole, etc).

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students are admitted to both graduate programs separately and admission requirements are consistent with those specified by the UWM Graduate School, the MS in Criminal Justice & Criminology and the MSW program in the Helen Bader School of Social Welfare.

## Credits and Courses

Students accepted into this MS/MSW program complete the following courses:

Code	Title	Credits
<b>Criminal Justice &amp; Criminology</b>		
CRM JST 773	Criminological Perspectives (G)	3
CRM JST 743	Proseminar: Administration of Criminal Justice Systems (G)	3
CRM JST 756	Proseminar: Analysis of Criminal Justice Research (G)	3

Select 12 additional credit hours of courses within the criminal justice & criminology program 12

Select 12 credit hours of Social Work courses with the consent of the student's advisor

Students must complete the requirements of the Essay Option or Non-Essay Option as the degree capstone

**Social Work Foundation Curriculum (required before the Advanced Curriculum for students without a bachelor's degree in social work)**

SOC WRK 604	Social Systems and Social Work Practice (U/G)	3
SOC WRK 662	Methods of Social Welfare Research (U/G)	3
SOC WRK 665	Cultural Diversity and Social Work (U/G)	3
SOC WRK 705	Individual Behavior and Social Welfare (G)	3
SOC WRK 708	Social Work Methods I: Individuals and Families (G)	3
SOC WRK 709	Social Work Methods II: Groups, Organizations and Communities (G)	3
SOC WRK 721	Field Instruction I (G)	3
SOC WRK 750	Social Welfare Policy Development and Implementation (G)	3

**Social Work Advanced Practice Curriculum**

*Required Core Courses*

SOC WRK 711	Direct Social Work Practice I	3
SOC WRK 712	Advanced Practice and Leadership in Organizations and Communities	3
SOC WRK 795	Evaluation of Social Work Practice and Programs	3
SOC WRK 851	Social Issue and Policy Analysis:	3

*Required Field Placement Courses*

SOC WRK 722	Field Instruction II	3
SOC WRK 821	Field Instruction III	3-4
SOC WRK 822	Field Instruction IV	3-4

**Electives**

Select 6 credits of electives from CJC courses in consultation with advisor

Remaining elective credits for MSW degree selected from Social Work graduate courses in consultation with MSW advisor 7

**Total Credits 73-75**

**Total Credits for Coordinated Degree: 73 (without a BSW) or 49 (with a BSW).**

The total credits for the coordinated program would typically be completed in both programs at the same time, rather than one program after the other. Degrees will be awarded simultaneously.

A student not completing the requirements for the coordinated degree program would need to complete all requirements for an individual program in order to receive a degree.

## Additional Requirements

### Time Limit

Students in the coordinated MS/MSW degree program must complete all degree requirements within seven years of the first enrollment semester as a degree student.

## Criminal Justice and Criminology, MS: Crime Analytics

The Department of Criminal Justice and Criminology offers a Crime Analytics Concentration at the master's level. A sequence of courses will lead to a concentration in this growing area. Preparation includes a foundation in criminal justice, research methods, and criminological theory. It also includes specialized coursework in measuring crime, crime mapping, and analytic techniques for understanding crime and crime patterns. At the conclusion of the program, students will complete a crime analytics project to demonstrate their mastery of crime analytics.

Students entering the Concentration in Crime Analytics choose one of the two tracks:

- Crime Analytics Track
- Advance Crime Analytics Track

## General Degree Information

The School of Social Welfare offers a master's program of study in criminal justice and criminology. The program is designed to educate students for leadership positions in the field of criminal justice. The program also provides a strong foundation for students anticipating advanced study at the doctoral level. The curriculum is also designed to prepare Criminal Justice professionals to understand all aspects of criminal justice policy. Legal, organizational, political and behavioral frameworks are used to analyze the operation of the criminal justice system. Students are introduced to advanced knowledge on the nature and causes of crime, the justification and means of social control, the administration of the justice system, and the evaluation of criminal justice programs.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet all Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these program-specific requirements to be considered for admission:

- Undergraduate degree from an accredited university in criminal justice, a related social science, or other relevant educational background.
- Undergraduate cumulative grade point average (GPA) of 3.00.
- In addition, applicants with an undergraduate cumulative GPA between 2.75-2.99 may be considered for admission, but should address their lower cumulative GPA within their reason statement.

- Two letters of recommendation from persons who are familiar with the applicant's academic record and suitability for graduate work.
- It is recommended that applicants have completed a research methods course and a statistics course at the undergraduate level prior to beginning the program.
- Applicants must also submit a brief narrative statement indicating reasons for interest in graduate study.

## Application

Application must be made to the Graduate School. Applicants may be admitted to the program for Fall, Spring or Summer (note graduate course offerings are currently limited in the summer session). For further information regarding the application process, please contact the Criminal Justice & Criminology Department office at (414) 229-2392.

## Credits and Courses

The Master of Science in Criminal Justice consists of a minimum of 33 graduate credits:

Code	Title	Credits
Courses taken within the Criminal Justice program (27 credits)		
Must include 15 credits of:		
CRM JST 713	Measuring Crime & Analyzing Crime Data	3
CRM JST 743	Proseminar: Administration of Criminal Justice Systems	3
CRM JST 756	Proseminar: Analysis of Criminal Justice Research	3
CRM JST 773	Criminological Perspectives	3
CRM JST 920	Criminal Justice Masters Capstone Seminar	3
Select an additional 12 credits of Criminal Justice Electives (4 courses)		12
Select an additional 6 credit hours taken elsewhere in the School of Social Welfare or in other UWM departments with the prior consent of advisor.		6
<b>Total Credits</b>		<b>33</b>

The student must pursue either Option A: Essay Option, or Capstone Option B: Non-Essay Option described below.

### Option A: Essay Option

Students must complete the required proseminars and, as part of the 33 graduate credits required, must complete 3 credits of research and a graduate-level statistics course approved by the student's faculty advisor. Students planning to go into doctoral programs are strongly encouraged to pursue the essay option.

### Essay

An acceptable essay must be written on the student's area of concentration.

### Comprehensive Examination

The student must pass a final oral examination in defense of the essay.

### Option B: Non-Essay Option

Students must complete the 33 graduate credits required, including the three proseminars and the criminal justice capstone seminar course.

## Crime Analytics Track

Students who complete the Crime Analytics Track will be prepared to enter into crime analysis positions in law enforcement and in other criminal justice organizations. To complete this track, students will take the following series of courses:

Code	Title	Credits
CRM JST 520	Analysis Oriented Technology: Spatial Data Analysis; Crime Mapping; ArcGIS	3
CRM JST 713	Measuring Crime & Analyzing Crime Data	3
CRM JST 716	Advanced Analytic Techniques for Crime Analysts	3
CRM JST 795 or CRM JST 850	Issues in Law Enforcement Practice and Policy Issues in Correctional Practice and Policy	3
CRM JST 910	Methods and Practice Capstone for Crime Analysts	3
<b>Total Credits</b>		<b>15</b>

Students who complete the Crime Analytics track will also be required to complete the requirements of the master's in Criminal Justice & Criminology, for a total of 33 credits. Students who completed CRM JST 520 at the undergraduate level can have another course substituted for CRM JST 520 with the permission of the department chair. Students who take CRM JST 910 will not need to take CRM JST 920. Students must receive a B or better in all the listed required courses in order to have the concentration posted on their transcripts.

## Advanced Crime Analytics Track

The Advanced Crime Analytics track will be intensive in research methods and advanced statistical analysis. Students who complete the advanced track will be prepared for jobs as advanced analyst, to work with big data, and to conduct advanced predictive modeling. To complete this track, students will take the following series of courses:

Code	Title	Credits
CRM JST 520	Analysis Oriented Technology: Spatial Data Analysis; Crime Mapping; ArcGIS	3
CRM JST 713	Measuring Crime & Analyzing Crime Data	3
CRM JST 716	Advanced Analytic Techniques for Crime Analysts	3
CRM JST 795 or CRM JST 850	Issues in Law Enforcement Practice and Policy Issues in Correctional Practice and Policy	3
SOC WRK 962	Applied Multiple Regression Analysis	3
SOC WRK 963	Measurement Methods and Related Multivariate Statistics	3
CRM JST 783	Data Mining and Predictive Modeling for Crime Analytics	3
CRM JST 910	Methods and Practice Capstone for Crime Analysts	3
<b>Total Credits</b>		<b>24</b>

Students who complete the Advanced Crime Analysts track will also be required to complete the requirements of the Master's in Criminal Justice & Criminology, for a total of 36 completed credits. Students

who completed CRM JST 520 at the undergraduate level can have another course substituted for CRM JST 520 with the permission of the department chair. Students who take CRM JST 910 will not need to take CRM JST 920. Students must receive a B or better in all the listed required courses in order to have the concentration posted on their transcripts.

## Additional Requirements

### Major Professor as Advisor

The student must have a faculty advisor to advise and supervise the student's studies as specified in Graduate School regulations. At the time of admission, the Graduate Program Director will assign each student to a faculty advisor. Students who begin to work closely with a particular faculty member with expertise in their area of interest may request that this faculty member serve as their advisor. Students who pursue the Essay Option must choose a faculty member to serve as their major professor.

### Time Limit

The student must complete all degree requirements within seven years of initial enrollment.

# Cyber Crime Forensics, Graduate Certificate (Helen Bader School of Social Welfare, Department of Criminal Justice)

The Graduate Certificate in Cyber Crime Forensics is offered in collaboration with the School of Information Studies and the Department of Criminal Justice & Criminology. The satisfactory completion of a sequence of courses will lead to a certificate in this growing area. Preparation includes a foundation in cyber crime theory, legal and policy issues of cyber crime, and digital forensic investigation.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

The certificate will be available to all students who have already received a bachelor's degree from any accredited university. Graduate students enrolled in any program who successfully complete the requirements of their program will be awarded the certificate at the time of graduation. Students who already have a bachelor's degree will receive the certificate upon completion of the program requirements.

The Certificate in Cyber Crime will consist of 21 credits with the following courses (or equivalents) required:

Code	Title	Credits
CRM JST 421G	Cybercrime	3
CRM JST 422G	Cyber Crime, Law & Public Policy	3
INFOST 695G	Ethical Hacking I	3
INFOST 691G	Special Topics in Information Science: (Ethical Hacking II)	1-3
INFOST 691G	Special Topics in Information Science: (Computer Forensics)	1-3
Choose 2 from the following:		6
CRM JST 423G	Investigating the Dark Web	
CRM JST 424G	Sex Crimes, Human Trafficking, and the Internet	
CRM JST 480G	Criminal Evidence and Investigation	
INFOST 784	Information Security Management	
<b>Total Credits</b>		<b>21</b>

A minimum of 15 credits must be taken at UWM. For those with a degree in Criminal Justice, past course credits will be evaluated for equivalency and will be approved by the department chairperson.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.

4. Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Death Investigation, Undergraduate Certificate (Helen Bader School of Social Welfare, Department of Criminal Justice)

The Biomedical Sciences Program, Criminal Justice Program, and Departments of Anthropology and Chemistry cooperate in offering three certificates in the area of forensic sciences. Sponsored jointly by the College of Letters and Science, the College of Health Professions and Sciences, and the Helen Bader School of Social Welfare, these certificate curricula are designed to train students in basic skills that will provide the foundation for careers in the fields of law enforcement, death investigation, pathology, and toxicology. Certificates are offered in Death Investigation, Forensic Science, and Forensic Toxicology. Where applicable, the curriculum meets the criteria required for professional certification examinations (Medicolegal Death Investigation, Toxicological Chemist).

### Eligibility

Undergraduate students who pursue a forensic sciences certificate maintain their identity as majors in their home departments and continue to progress toward a baccalaureate degree while in the certificate program. Courses include lecture presentations and laboratory experiences that cover fundamental areas of forensic science and provide unique instruction on techniques that are essential in the specific certificates. Students are given instruction by faculty members at UWM and forensic professionals in the Milwaukee community. Any of the programs may be pursued as a post-baccalaureate educational certificate. Individuals who are not enrolled in a degree program at UWM, but are seeking continuing education for career development, may be admitted to courses in the certificate programs by meeting prerequisites with equivalent experience or consent of the instructor.

### Requirements

To receive a certificate in Death Investigation, Forensic Science, or Forensic Toxicology, students must complete at least one half of the required credits on the UWM campus. A minimum grade point average of 2.500 must be achieved on the required credits. All options within the certificate require at least a basic knowledge of chemistry and biology. To meet this requirement, prior to registering themselves in the Forensic Sciences Certificate Program, students must successfully complete CHEM 100 or equivalent and BIO SCI 100 or equivalent.

The following courses must be completed successfully to obtain a Certificate in Death Investigation:

Code	Title	Credits
ANTHRO/BMS/CHEM/ CRM JST 281	Dead Men Do Tell Tales: An Introduction to Forensic Science	3
ANTHRO/BMS/CHEM/ CRM JST 285	Medicolegal Death Investigation	3
ANTHRO/BMS/CHEM/ CRM JST 481	Criminalistics	3
ANTHRO 403	The Human Skeleton	3
ANTHRO 405	Forensic Anthropology	3
CRM JST 110	Introduction to Criminal Justice	3
CRM JST 480	Criminal Evidence and Investigation	3
BMS 610 or HCA 212	Pharmacology Drugs Used and Abused	3
<b>Total Credits</b>		<b>24</b>

Additional courses with forensic content are listed below. Check prerequisites or consult the instructor for eligibility. These courses are recommended, but are not required, for the Certificate in Death Investigation:

Code	Title	Credits
ANTHRO/BMS/CHEM/ CRM JST 585	Internship in Forensic Toxicology	1-3
ANTHRO/BMS/CHEM/ CRM JST 589	Internship in Death Investigation	1-3
ANTHRO/BMS/CHEM/ CRM JST 594	Internship in Forensic Science	1-3
ANTHRO 404	Human Biological Variation	3
BIO SCI 539	Laboratory Techniques in Molecular Biology	4
CHEM 194	First-Year Seminar	3
CHEM 524	Instrumental Analysis	3
CHEM 602	Biochemistry: Cellular Processes	3
BMS 555	Toxicology and Therapeutic Drug Monitoring	1
BMS 560	Molecular and Genetic Diagnostics	2
BMS 561	Molecular Diagnostics Laboratory	1

## Forensic Science, Undergraduate Certificate (Helen Bader School of Social Welfare, Department of Criminal Justice)

The Biomedical Sciences Program, Criminal Justice Program, and Departments of Anthropology and Chemistry cooperate in offering three certificates in the area of forensic sciences. Sponsored jointly by the College of Letters and Science, the College of Health Professions and Sciences, and the Helen Bader School of Social Welfare, these certificate curricula are designed to train students in basic skills that will provide the foundation for careers in the fields of law enforcement, death investigation, pathology, and toxicology. Certificates are offered in Death Investigation, Forensic Science, and Forensic Toxicology. Where applicable, the curriculum meets the criteria required for

professional certification examinations (Medicolegal Death Investigation, Toxicological Chemist).

## Eligibility

Undergraduate students who pursue a forensic sciences certificate maintain their identity as majors in their home departments and continue to progress toward a baccalaureate degree while in the certificate program. Courses include lecture presentations and laboratory experiences that cover fundamental areas of forensic science and provide unique instruction on techniques that are essential in the specific certificates. BMS 560	Molecular and Genetic Diagnostics	2
BMS 561	Molecular Diagnostics Laboratory	1

## Military Science

### Army ROTC

UW-Milwaukee students have the opportunity to participate in the Army Reserve Officers Training Corps (AROTC) at Marquette University. The AROTC program provides university students with leadership, management, technical, and tactical skills that will enable them to start their journey as commissioned officers in the United States Army, Army Reserve, or Army National Guard.

Army ROTC is not a major field of study. It is a program in which students pursue a baccalaureate degree of their choice and take AROTC courses in military-oriented subject matter. AROTC provides a general knowledge of the contemporary role of the Army in support of national objectives and a practicum in management and leadership skills. Credits earned in military science courses apply toward graduation requirements.

The Army ROTC program offers competitive two-, three-, and four-year scholarships to qualified students. Currently, the scholarships offered

for UWM students cover full tuition and fees or room and board, \$1,200 a year for books, and a \$300-\$500 monthly stipend.

### General Eligibility

To be eligible for an AROTC scholarship, students must:

- Be a United States citizen;
- Be a full-time student;
- Have no major civil convictions;
- Not be a conscientious objector;
- Be medically qualified;
- Have a minimum 2.5 GPA; and
- Have a minimum ACT score of 19 or SAT score of 950.

The Army ROTC program is divided into two parts: the basic course (freshman and sophomore years) and the advanced course (junior and senior years). The freshman year course currently is being offered at UWM; the remainder of the courses are offered at Marquette University. Credit hours earned at Marquette University are transferred to UWM student transcripts and count towards GPA and elective credit.

### Basic Course

In the basic course, cadets learn basic military skills and receive the foundation for leadership and management skills that are expanded during the advanced course. The basic course is open to all full-time UWM students without any obligation to the Army.

### Advanced Course

During the advanced course, cadets learn more extensive leadership and management skills, and they are placed into various leadership positions in the battalion. Cadets also develop skills and attributes that are essential for all commissioned officers in the U.S. Army.

In addition to completing the military science courses, advanced-course students are required to attend the Advanced Leadership Course at Fort Lewis, Washington, during the summer between the junior and senior years. During this five-week camp, cadets are expected to apply all of the skills that they have learned in the AROTC program. In addition, cadets are offered the opportunity to compete for a chance to attend Airborne School, Air Assault School, or Cadet Troop Leadership Training (CTLT). CTLT is an "internship" in which cadets have a chance to see what a Second Lieutenant does on an active duty Army post.

To qualify for the Advanced Course, students must accomplish one of the following:

- Complete the two years of the basic course;
- Attend the Basic Leaders Course, a six-week camp at Fort Knox, Kentucky; or
- Complete U.S. Army Basic Training or its equivalent.

### Field Exercises

Once a semester, all of the cadets in the program go to Fort McCoy, Wisconsin, to practice all of the skills that they have learned. Advanced course cadets also are given the opportunity to improve their leadership skills by being placed in various leadership positions leading other cadets.

### Physical Training

Three times a week, cadets are required to attend physical training (PT). During PT, cadets do physical activities such as push-ups, sit-ups,

and running. PT currently is conducted at both UWM and Marquette University.

For more information about enrolling in the Army ROTC program, contact [army-rotc@uwm.edu](mailto:army-rotc@uwm.edu) or the Department of Military Science at Marquette University, (414) 288-7195, or [www.marquette.edu/rotc/army](http://www.marquette.edu/rotc/army) (<http://www.marquette.edu/rotc/army/>).

## Air Force ROTC

UWM students have the opportunity to participate fully in the Air Force Reserve Officers Training Corps (AFROTC) Program. Students enrolled in the Air Force ROTC program attend AFROTC courses at Marquette University.

Through this program, UWM offers its students the opportunity to prepare for initial active duty assignments as Air Force Commissioned Officers. In order to receive a commission, AFROTC cadets must complete all university requirements for a degree and courses specified by the Air Force. AFROTC offers four- and three-year programs leading to a commission as an Air Force officer. Four-year program students complete the general military course and the professional officer course.

### General Eligibility

- Be a full-time student;
- Be a United States citizen (for scholarship appointment);
- Be in good physical condition;
- Be of good moral character;
- For pilot or navigator training, fulfill all commissioning requirements before age 29;
- For scholarship recipients, fulfill all commissioning requirements before age 31; and
- For non-scholarship students, fulfill all commissioning requirements before age 31.

### General Military Course

The first- and second-year educational program in Air Force Aerospace Studies consists of a series of one-hour courses designed to give students basic information on world military systems and the role of the U.S. Air Force in the defense of the free world. All required textbooks and uniforms are provided free. The general military course is open to all students at UWM without advance application and does not obligate students to the Air Force in any way.

### Field Training

AFROTC Field Training is offered during the summer months at Maxwell Air Force Base, Alabama, and provides leadership and officer training in a structured military environment. Major areas of study include physical training, drill and ceremony, marksmanship, and survival training. The Air Force pays all expenses associated with field training.

### Professional Officer Course

The third and fourth years of Air Force Aerospace Studies are designed to develop skills and attitudes vital to the professional officer. Students completing the professional officer course are commissioned as officers in the U.S. Air Force upon college graduation. All students in the professional officer course receive a non-taxable subsistence allowance per month during the academic year. Students wanting to enter the professional officer course should apply early in the spring semester in order to begin this course of study in the following fall semester.

## Leadership Lab

Leadership Lab is a cadet-centered activity. It is largely cadet-planned and -directed, in line with the premise that it provides leadership training experience that will improve a cadet's ability to perform as an Air Force officer. The freshman and sophomore leadership laboratory program introduces Air Force customs and courtesies, drill and ceremonies, wearing the uniform, career opportunities in the Air Force, education and training benefits, the life and work of an Air Force officer, and opportunities for field trips to Air Force installations throughout the U.S. Initial experiences include preparing the cadet for individual squadron and flight movements in drill and ceremonies and for the field training assignment prior to the junior year.

The junior and senior leadership laboratory program involves the cadets in advanced leadership experiences. Cadet responsibilities include planning and directing the activities of the cadet corps, preparing briefings and written communications, and providing interviews, guidance, information, and other services that will increase the performance and motivation of other cadets.

## AFROTC College Scholarship and High School Scholarship Programs

While participating in AFROTC, scholarship students receive a stipend per month along with paid tuition, fees, and a fixed textbook reimbursement. To be eligible for either of these programs, students must:

- Be a U.S. citizen;
- Be at least 17 years of age on the date of enrollment and under 31 years of age on December 31 of the estimated year of commissioning;
- Pass an Air Force physical exam;
- Be selected by a board of Air Force officers;
- Have no moral objections or personal convictions that prevent bearing arms and supporting and defending the Constitution of the United States against all enemies, foreign and domestic (applicants must not be conscientious objectors);
- Maintain a 2.5 grade point average.

High school students can apply for scholarships late in their junior year or early in their senior year. Information on Air Force ROTC and applications for Air Force scholarships are available at [www.AFROTC.com](http://www.AFROTC.com) (<http://www.afrotc.com/>). Scholarship applications will not be accepted after December 1 of the year before entering college.

For more information, contact the Department of Aerospace Studies at Marquette University, (414) 288-7682.

## Naval ROTC

The Naval Science Department at Marquette University administers the Naval Reserve Officers Training Corps (NROTC) program. Graduates who complete all requirements will receive reserve commissions and serve on active duty in the Navy or Marine Corps with a minimum three-year commitment for non-scholarship students and five-year commitment for scholarship students.

### Scholarships

NROTC offers two-, three-, and four-year scholarships to qualified applicants. Four-year scholarships are awarded on a national level to qualified high school applicants (visit [www.nrotc.navy.mil](http://www.nrotc.navy.mil) (<http://www.nrotc.navy.mil>) for more information and to apply). Two- and three-year scholarships are awarded to students who have completed at least

one, but not more than four, terms of college while a member of the NROTC Unit. Two-year scholarships for students who are entering their junior year and have not previously been enrolled in the NROTC program also are available.

Students entering UWM with a four-year scholarship, earned on a competitive basis while still in high school, will receive full tuition, fees, laboratory expenses, a stipend for books, and a subsistence allowance of \$250 to \$400 per month, depending on class year. Necessary uniforms and textbooks for required Naval Science courses are issued as well.

## General Eligibility

- Be a U.S. citizen;
- Not less than 17 years old by Sept. 1 of year starting college, and no more than 23 on June 30 of that year;
- Be of good moral character;
- Be a high school graduate;
- Be 27 or younger by June 30 of the year you will graduate;
- Be physically qualified by Navy/Marine Corps standards; and
- Achieve qualifying scores on the SAT or ACT  
**ACT:** 22 verbal, 22 math (22 composite for Marine Corps)  
**SAT:** 530 verbal, 520 math (1000 composite for Marine Corps).

Students not on scholarship can still participate in the NROTC College Program. They receive uniforms and Naval Science textbooks, and \$350 and \$400 per month during their junior and senior years, respectively. All College Program students are eligible to compete for Naval Education and Training Command scholarships. Students are selected on a competitive basis after completing at least one term as an NROTC College Program student. Selection boards meet semiannually in March and June to consider students based on their most recent term. Students may receive scholarship benefits for three or two academic years. Once selected, the students receive the same benefits and incur the same active duty requirements as students in the four-year scholarship program.

The Naval Science Department teaches Naval Science courses and supervises a midshipman-run drill program that instills leadership skills and professional development in all members of the midshipman battalion. All midshipmen are required to register for and participate in this two-hour weekly drill period, which occurs at the Marquette University Gymnasium. One Naval Science class each term is also required, with the exception of Nurse Corps and Marine Corps Options. Students enrolled in the program from UWM attend Naval Science classes at Marquette as "cross-town" students, while the rest of their major is completed on the UWM campus. Midshipmen on scholarship or in advanced-standing status also are required to attend a four- to six-week training period each summer. This summer training introduces

midshipmen to the fleet and to the life of a junior Naval Officer. The summer training period also provides an orientation to each of the different warfare specialties available upon graduation (aviation, surface, submarine, and the Marine Corps).

All Navy Option scholarship students are required to complete one year of calculus by the end of their sophomore year, and one year of calculus-based physics by the end of their junior year. Navy Option college program students must complete one year each in mathematics and physical science. One course on World Cultural Awareness, one year of English, and either an American Military History or National Security Policy course also are required for all NROTC students.

All scholarships are awarded on the basis of merit and personal qualifications. Neither a Parents' Confidential Financial Statement nor a standard FAF is required for consideration for Naval ROTC scholarships.

For more information, contact the Department of Naval Science at Marquette University, (414) 288-7076, or visit our website at [www.marquette.edu/rotc/navy](http://www.marquette.edu/rotc/navy) (<http://www.marquette.edu/rotc/navy/>).

## Social Work

Study in the field of social work examines social problems from multiple perspectives and encourages change among individuals, families, groups, organizations and communities. Social work practitioners work in child welfare, gerontology, mental and physical health, and community leadership. This program partners with hundreds of agencies to prepare graduates with hands-on field experience.

## Programs

- Aging, Minor (p. 541)
- Applied Gerontology, Graduate Certificate (p. 541)
- Social Welfare, PhD (p. 543)
- Social Welfare, PhD/Criminal Justice and Criminology, MS (p. 545)
- Social Work, BS (p. 547)
- Social Work, MSW (p. 549)
- Social Work, MSW/Criminal Justice and Criminology, MS (p. 551)
- Social Work, MSW/Public Health, MPH (p. 552)
- Social Work, MSW/Social Welfare, PhD (p. 554)
- Social Work, MSW/Women's and Gender Studies, MA (p. 556)
- Suicide Prevention Across the Lifespan, Undergraduate Microcredential (p. 558)
- Trauma Informed Care, Graduate Certificate (Helen Bader School of Social Welfare, Department of Social Work) (p. 558)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Lisa Berger	Associate Dean and Professor	PhD	University of Wisconsin-Milwaukee	✓	
Ai Bo	Assistant Professor	PhD	New York University	✓

Jeanne Wagner	Clinical Professor	MSW	Jane Addams College of Social Work	
Trina Salm Ward	Associate Professor	PhD	University of Wisconsin-Milwaukee	✓

## Aging, Minor

Older adults are living longer than any other time in history. By 2035, older adults will outnumber children. There is a genuine need for social work students to be adequately trained to meet the needs of older adults in settings including: medical, hospice, long-term care, rehabilitation, home and community-based services, behavioral health, corrections, criminal justice, research and policy analysis, program development, advocacy, education, and training.

The Social Work Minor in Aging will provide an opportunity for undergraduate social work students to obtain skills and knowledge in gerontology. Their classroom training will culminate in a field practicum in an agency that serves older adults. In this setting, students will have the opportunity to apply the knowledge they have learned in the classroom and acquire direct practice skills by interacting with clients in the field with the support of an agency field instructor. This will prepare students to work with the aging population after graduation.

## Requirements

The Social Work Minor in Aging is open to Undergraduate Social Work Students only. It includes 22 total credits, including the following required courses and electives:

Code	Title	Credits
<b>Required Courses (already required for the Social Work program)</b>		
SOC WRK 250	Human Behavior and the Social Environment	3
SOC WRK 421	Field Education & Integrated Field Seminar I	5
SOC WRK 422	Field Education & Integrated Seminar II	5
<b>Electives</b>		
Choose three courses from those listed below:		9
SOC WRK 300	Aged to Perfection: Introduction to the Study of Aging	
SOC WRK 564	Social Services for the Aging	
SOC WRK 680	Death and Dying	
SOC WRK 685	Social Gerontology	
<b>Total Credits</b>		<b>22</b>

## Applied Gerontology, Graduate Certificate

The Graduate Certificate in Applied Gerontology is an interdisciplinary program designed to provide students with the knowledge and skills they need to successfully pursue careers within aging services organizations, or to conduct academic research in the field of aging. The program

focuses on the biological, psychological, social, and policy aspects of aging, and encourages students to link practice and research in order to improve the quality of life of older adults. The GCAG is intended for graduate degree-seeking students in any field, and for degreed professionals looking to advance or refocus their careers. Please contact Jennifer Kahn-Pettigrew, Coordinator for Education and Programming, at 414-229-6888 or kahnpet2@uwm.edu for more information.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

Scholarship (<https://uwm.edu/socialwelfare/research/office-of-applied-gerontology/appgerscholarships/>) options are available.

### Admission

Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted in to a certificate program.

## Credits and Courses

Students wishing to earn a Graduate Certificate in Applied Gerontology must complete 18 graduate credit hours. No student may complete all 18 credits within a single school or college.

Code	Title	Credits
<b>Core</b>		
NURS 760	Processes of Aging	3
SOC WRK 851	Social Issue and Policy Analysis: (Aging)	3
<b>Choice Core</b>		
Select two of the following: 6		
AD LDSP 547	The Educational Dimensions of Practice with Older Adults	
NURS 670G	Nursing Care of Adults and Older Adults I (*open to Nursing students only)	
OCCTHPY 744	Advanced Occupational Therapy for Aging Adults (*open to Occupational Therapy students only)	

PSYCH 680	Psychology of Aging
SOC WRK 680	Death and Dying
SOC WRK 685	Social Gerontology
SOC WRK 855	Practice Skills and Concepts for Aging and Health
<b>Electives</b>	
Select 6 credits <sup>1</sup>	6
AD LDSP 667	Program Planning in Adult Education
AD LDSP 757	Principles and Foundations of Adult Education
ARCH 791	Master's Level Directed Research
ARCH 792	Master's Level Independent Studies and Research
ARCH 794	Pre-Thesis or Master's Project Research
ARCH 800	Design Elective:
ARCH 891	Master's Project
COMMUN 672	Communication and Social Order
COMSDIS 713	Degenerative Cognitive Communication Disorders in Older Adults
ED PSY 747	Human Development: Study of the Adult
ENGLISH 749	Advanced Internship in Writing and Community Engagement
NURS 671G	Nursing Care of Adults and Older Adults II (*open to Nursing students only)
NURS 702	Advanced Practice Nursing Adult-Gerontology Chronic Illness (*open to Nursing students only)
NURS 779	Special Topics Seminar: (Pain and Symptom Management)
OCCTHPY 625	Design and Disability
OCCTHPY 760	Assistive and Rehabilitation Technology
OCCTHPY 770	Assessment in Assistive Technology and Accessible Design
PSYCH 782	The Aging Brain
SOC WRK 564	Social Services for the Aging
SOC WRK 811	Direct Social Work Practice II: (Aging)

**Total Credits** 18

<sup>1</sup> Additional electives that are not listed in the Electives heading above may be approved by the Certificate Coordinator. Students may also complete a "Practicum" in their home department or area of choice, with the approval of the Certificate Coordinator.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

## Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

## Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Overview

The Helen Bader School of Social Welfare (HBSSW) offers a program of graduate studies in social work. As a department in an urban research university, the mission of the Department of Social Work is to promote positive change through social work research, scholarship, education, and community partnerships. The Department promotes the values of the social work profession through a commitment to social justice and diversity, a dedication to public service, and an emphasis on individual

and community well-being. The goal of the MSW program is to prepare graduates with specialized knowledge and skills for advanced practice and leadership with diverse populations and communities.

In furtherance of its mission, the goals of the Social Work Department are:

1. To educate students to become highly skilled, culturally competent, and ethical social workers and to provide leadership for the practice of social justice.
2. To create and disseminate knowledge leading to social work and inter-disciplinary innovations.
3. To engage in research and apply results that inform social work policy, practice, advocacy, education, and future research.
4. To collaborate with community partners in promoting evidence-informed practice, educational and research partnerships, and social and economic justice.

HBSSW offers students access to the University computer system, special interview training rooms, and specialized audiovisual materials.

The MSW curriculum is designed to prepare students for advanced-level professional Social Work practice, and builds upon a solid base of coursework in human behavior, practice methods, research, and policy. The MSW program is accredited by the Council on Social Work Education and can prepare students for state certification requirements.

## Requirements

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Admission

Relevant application materials must be submitted to both the Graduate School (<http://uwm.edu/graduateschool/admission/>) and HBSSW and will be accepted for admission in the Fall semester only. All applications must be completed and submitted on or before January 2. Applications received after January 2 will be considered only if space is available after other applications are reviewed. Applicants must meet Graduate School requirements plus the following departmental requirements in order to be considered:

1. Hold or be in the process of completing a master's degree in social welfare or master's degree in criminal justice, criminology, or comparable degree. Applicants with master's degrees in related disciplines will be considered on a case-by-case basis.
2. Identify the following in the Personal Statement section of the Graduate School application:
  - Which of the program's four areas of specialization (Applied Behavioral Health, Applied Gerontology, Criminal Justice, or Family and Child Welfare) they wish to pursue.
  - Their reasons for seeking a doctoral degree in social welfare.
  - Their goals as future scholars.
  - A topic or issue in the field that they consider to be particularly challenging and worthy of study.

- Submit a current copy of a professional résumé or curriculum vitae to the Social Welfare PhD Program. This should contain information on:
  - All post-secondary education, including institutions, degrees and dates of completed programs of study, plus institutions, dates, and types of study that did not lead to a degree.
  - All employment by the applicant in social work, criminal justice, and related areas, including dates and employing organizations.
  - Employment unrelated to social work or criminal justice within the past five years.
  - Information on any past or current professional licenses held.
- Submit scores from within the past five years on the Graduate Record Examination (GRE) (<http://uwm.edu/graduateschool/admission/#gre>) General Test to the Social Welfare PhD Program.
- Submit three letters of recommendation from persons familiar with the applicant's achievements and academic potential, including at least one current or former graduate program instructor to the Social Welfare PhD Program.
- Submit a sample of written work to the Social Welfare PhD Program that demonstrates: the applicant's knowledge of social work and/or criminal justice theory, practice, and research; ability to think analytically; and writing skills. The sample should be at least 1000 words in length and represent work for which the applicant was the sole author.

The program will assign each PhD student a major professor. This assignment is based on congruence between the applicant's interests and the expertise of the major professor. In consultation with the director of the PhD program, the student may change major professors after beginning the program, but no applicant will be admitted unless a doctoral faculty member in criminal justice or social work agrees to serve as major professor.

### Financial Assistance

Through a combination of tuition remission, teaching assistantships, research assistantships, fellowships, and other options, the program will attempt to provide financial assistance to all admitted students during their first three years in the program. Applicants needing additional information on other sources of financial assistance, such as student loans, should contact the campus Office of Financial Aid.

## Credits and Courses

A minimum degree of 43 graduate credits beyond the master's degree are required, at least 36 of which must be earned in residence at UWM.

In consultation with the major professor and as soon as possible after admission, each student designs a program of study to gain the knowledge and skills appropriate to his/ her educational goals. All programs of study must include the following:

Code	Title	Credits
<b>Knowledge Building</b>		
SOC WRK 901	Philosophy of Science	3
Select 11-12 credits in Specialization Seminars (see below)		11-12
<b>Methods of Inquiry and Analysis</b> <sup>1</sup>		
<i>Research Methods</i>		
SOC WRK 951	Quantitative Research Methods	3
SOC WRK 952	Qualitative Research Methods in Social Work	3
<i>Statistics</i>		

SOC WRK 961	Introduction to Statistical Methods	4
SOC WRK 962	Applied Multiple Regression Analysis	3
<i>Research Methods and Statistics Electives</i> <sup>2</sup>		
SOC WRK 963	Measurement Methods and Related Multivariate Statistics	3
SOC WRK 964	Advanced Statistical Methods	3
<i>Doctoral Proseminar</i> <sup>3</sup>		
SOC WRK 991	Doctoral Proseminar: (Research Ethics)	1
SOC WRK 991	Doctoral Proseminar: (Grantwriting)	1
SOC WRK 991	Doctoral Proseminar: (Teaching)	1
<i>Teaching</i> <sup>4</sup>		
Select one semester of work as a teaching assistant		
Select semester as a project or research assistant		
<i>Independent Study</i> <sup>5</sup>		
SOC WRK 999	Independent Reading in Social Work	1-3
<b>Electives</b> <sup>6</sup>		
Select 4-6 credits		4-6
<b>Total Credits</b>		<b>41-46</b>

<sup>1</sup> Content in this area comprises a set of required courses in methods of social/behavioral research and statistics. Students are expected to enter the program with at least a basic background in both methods and statistics and may need to satisfy prerequisites before proceeding to required courses.

<sup>2</sup> Two electives from inside or outside the HBSSW are required. Students may choose one or both of the above elective courses or one or two courses from an approved set of alternatives offered in other Schools or campuses. Approval must be secured from the major advisor prior to enrolling.

<sup>3</sup> Requirements in this area are designed to provide students with specialized knowledge and skills needed for success in scholarly endeavors and teaching at the post-secondary level. With respect to classroom work, all students must complete the following three one-credit proseminars.

<sup>4</sup> All students must complete one semester of work as a teaching assistant and one semester as a project or research assistant, usually in their second year. During the semester in which they serve as a teaching assistant, students must enroll for one credit in SOC WRK 999/CRM JST 999.

<sup>5</sup> This independent study credit will be completed under the supervision of the faculty member to whom the student is assigned as an assistant. The product should be a project that will advance the student's skills in teaching, such as preparation of a guest lecture or other such task determined by the supervising faculty member.

<sup>6</sup> These credits provide an opportunity for students to take content of interest within the HBSSW or in other schools on campus that offer graduate-level courses relevant to the student's educational goals. Elective options within the HBSSW include the completion of additional specialization seminars beyond the required total. Students may also complete this requirement by taking additional research methods or statistics courses within or outside the HBSSW, or they may take theory or basic-knowledge courses in other Schools that are at the graduate level and are approved by their advisor and the PhD program director.

### Knowledge Building

The goals and objectives of the doctoral program reflect the Department's concern with urban social problems, social and economic equity and

well-being, cultural diversity, and the empowerment of individuals, families, organizations, and communities to effect change. The program will prepare students to make significant contributions to social work education and the knowledge base of the profession.

The curriculum includes four areas of specialization:

- Applied Behavioral Health
- Applied Gerontology
- Criminal Justice
- Family and Child Welfare

Each student must select at least one of these areas in which to concentrate. In consultation with the major professor, a student may also choose to develop expertise that spans more than one area.

Content in these four specialization areas is presented in the form of specialization seminars. All students must take at least three specialization seminars within the program and at least one relevant course external to the HBSSW; the external course must be from a list of courses approved for this purpose or a student's unique request approved by the doctoral program committee. At least two courses, including one internal and one external course, must be in the student's area of specialization, and at least one course internal to the HBSSW must be in an area other than the student's primary specialization. All specialization courses outside the HBSSW must be approved by the student's major professor prior to enrollment.

### Examples of Specialization Seminars

Code	Title	Credits
SOC WRK 931	Theories of Poverty and Social Welfare Policy (Family and Child Welfare specialization)	3
SOC WRK 932	Theories and Research on Behavior Change (Addiction and Behavioral Health specialization)	3
SOC WRK 945	Family and Long-Term Care Across the Life Course (Applied Gerontology specialization)	3
SOC WRK 791	Current Topics in Social Work: (Family and Child Welfare Specialization)	1-3

## Additional Requirements

### Residence

Students must meet minimum Graduate School residency requirements.

### Preliminary Examination

All students must pass a preliminary examination subsequent to successfully completing all required coursework and prior to being admitted to doctoral candidacy. The examination assesses students' ability to articulate their research interests, analyze and synthesize empirical knowledge and relevant theoretical concepts, explain how theory may affect the generation of knowledge, and show familiarity with relevant scientific methodologies. In keeping with Graduate School rules, the preliminary examination should be completed within five years of enrollment.

An Application for the Doctoral Preliminary Examination must be completed by the student and signed and submitted to the PhD Program Committee by the major professor six weeks prior to the first examination. Students who fail the preliminary examination may not proceed to the dissertation. The exam may be retaken only

once. Complete policies regarding forming a preliminary examination committee, writing the proposal, and taking the examination are available in the Social Welfare PhD program handbook.

### Dissertation Proposal Defense

All students must successfully complete an oral defense of their dissertation proposal to determine their preparation for independent research. The defense must be completed successfully within four years of initial enrollment.

### Dissertation

Students who have passed the Preliminary Examination and have submitted a one-page preliminary dissertation proposal are formally admitted to doctoral candidacy. In accordance with Graduate School policies, students must then register for three research or thesis/dissertation credits each semester until the dissertation is submitted to the Graduate School. To meet the requirements for the dissertation, the candidate must complete an original independent research project that adds meaningfully to the existing body of knowledge in social work. It should be of a caliber that warrants publication in respected journals in the field.

### Dissertation Defense

As the final step toward the degree, the candidate must pass an oral examination before his/her doctoral committee in defense of the dissertation. The examination may also cover general topics relevant to the student's area of study. This requirement may not be completed until all other degree requirements are satisfied.

### Time Limit

It is expected that most students will complete all degree requirements within six years of initial enrollment in the doctoral program. All requirements MUST be completed within ten years from the date of initial enrollment.

## Social Welfare, PhD/Criminal Justice and Criminology, MS

The Joint Master of Criminal Justice and Criminology and Doctor of Philosophy in Social Welfare program prepares students to make significant contributions to both education and research in the social sciences. The goals and objectives of both the MSCJC and PhD programs reflect the department's concerns with urban social problems, social and economic equity and well-being, cultural diversity, and the empowerment of individuals, families, organizations, and communities to effect change.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Relevant application materials must be submitted to both the Graduate School and the Helen Bader School of Social Welfare and will be accepted for admission in the Fall semester only. All applications must be completed and submitted on or before January 2. Applications received after January 2 will be considered only if space is available after other applications are reviewed.

Students who apply and are accepted to the joint MSCJ/PhD program will be able to earn both degrees in the course of their studies and will not be required to apply to the PhD program after earning the MSCJ degree, assuming their progress is consistent with departmental, school, and Graduate School standards. Applicants who are not offered admission to the joint program will still be considered for admission into the MSCJ-only program.

All applicants must meet Graduate School requirements plus the following school requirements:

1. Have an undergraduate grade point average of 2.75 or better.
2. Have completed at least 21 semester credits in the social and behavioral sciences (i.e., psychology, sociology, political science, economics, anthropology, and/or their equivalents).

In the Personal Statement section of the Graduate School application form, applicants must indicate:

1. That, of the PhD program's four areas of specialization (Criminal Justice, Addiction and Behavioral Health, Applied Gerontology, or Family and Child Welfare) they wish to pursue the Criminal Justice option.
2. Their reasons for seeking a doctoral degree.
3. Their goals as future scholars.
4. A topic or issue in the field that they consider to be particularly challenging and worthy of study.

In other materials submitted to the Graduate School, applicants must:

1. Provide a current copy of a professional résumé or curriculum vitae. This should contain information on:

- All post-secondary education, including institutions, degrees and dates of completed programs of study, plus institutions, dates, and types of study that did not lead to a degree.
- All employment by the applicant in criminal justice, social work, and related areas, including dates and employing organizations.
- Employment unrelated to criminal justice or social work within the past five years.
- Any past or current professional licenses held.

2. Submit scores from within the past five years on the Graduate Record Examination (GRE) General Test.

3. Submit three letters of recommendation from persons familiar with the applicant's achievements and academic potential, including at least one current or former academic instructor.

4. Submit a sample of written work that demonstrates: the applicant's knowledge of social welfare theory, practice, and research; ability to think analytically; and writing skills. The sample should be at least 1000 words in length and represent work for which the applicant was the sole author, or if it is jointly authored should indicate which sections were primarily done by the applicant.

#### Advisement

The school will assign each MSCJ/PhD student a major professor. This assignment is based on congruence between the applicant's interests and the expertise of the major professor. In consultation with the director of the PhD program, the student may change major professors after beginning the program, but no applicant will be admitted unless a doctoral faculty member agrees to serve as major professor.

#### Financial Assistance

Through a combination of tuition remission, teaching assistantships, research assistantships, fellowships, and other options, the program will attempt to provide financial assistance to all admitted students during their first four years in the program. Applicants needing additional information on other sources of financial assistance, such as student loans, should contact the campus Department of Financial Aid.

#### Residence

Students must meet minimum Graduate School residency requirements.

## Credits and Courses

The Criminal Justice MS (MSCJ) portion of the joint curriculum requires a minimum of 21 graduate credits. Another 12 Masters-level credits will be replaced by the same number of PhD-level credits. Courses at the Masters level are:

Code	Title	Credits
CRM JST 743	Proseminar: Administration of Criminal Justice Systems	3
CRM JST 756	Proseminar: Analysis of Criminal Justice Research	3
CRM JST 773	Criminological Perspectives	3
CRM JST 920	Criminal Justice Masters Capstone Seminar	3
or CRM JST 990	Thesis or Research Project	
CRM JST 795	Issues in Law Enforcement Practice and Policy	3
CRM JST 810	Police Administration	3
CRM JST 850	Issues in Correctional Practice and Policy	3
<b>Total Credits</b>		<b>21</b>

MSCJ courses to be replaced by PhD-level courses are:

Code	Title	Credits
CRM JST 713	Measuring Crime & Analyzing Crime Data (replaced by SOC WRK 961)	3
CRM JST 999	Independent Reading in Criminal Justice (replaced by SOC WRK 791 or SOC WRK 932)	1-3
	Elective (replaced by doctoral elective)	3
	Elective (replaced by doctoral elective)	3
<b>Total Credits</b>		<b>12</b>

A minimum of 40 credits of PhD-level course work is required. At least 31 of these must be earned in residence at UWM. Required courses include:

Code	Title	Credits
<b>Foundation</b>		
SOC WRK 901	Philosophy of Science	3
<b>Specialization Seminars</b>		
9 credits required, 3 from student's area of specialization		9
SOC WRK 931	Theories of Poverty and Social Welfare Policy	
SOC WRK 932	Theories and Research on Behavior Change	

SOC WRK 945	Family and Long-Term Care Across the Life Course	
SOC WRK 791	Current Topics in Social Work: (Multigenerational Policies and Services)	
SOC WRK 791	Current Topics in Social Work: (Child and Family Wellbeing)	
SOC WRK 791	Current Topics in Social Work: (Criminal Justice Practice and Policy)	

**Research Methods**

SOC WRK 951	Quantitative Research Methods	3
SOC WRK 952	Qualitative Research Methods in Social Work	3

**Statistics**

SOC WRK 961	Introduction to Statistical Methods	4
SOC WRK 962	Applied Multiple Regression Analysis	3

**Research Methods or Statistics Electives**

SOC WRK 963	Measurement Methods and Related Multivariate Statistics	3
SOC WRK 964	Advanced Statistical Methods	3

**Proseminars**

SOC WRK 991	Doctoral Proseminar: (Proseminar in Research Ethics)	1
SOC WRK 991	Doctoral Proseminar: (Proseminar in Grantwriting)	1
GRAD 803	Teaching & Learning in College: Reflections on Theory and Practice	1

**Practicum**

Accompanies first teaching and research assistantships		
SOC WRK 999	Independent Reading in Social Work (Teaching)	1-3
or CRM JST 999	Independent Reading in Criminal Justice	
SOC WRK 999	Independent Reading in Social Work (Research)	1-3
or CRM JST 999	Independent Reading in Criminal Justice	

**Electives**

Two approved external doctoral-level courses in area of specialization (2-3 credits each)	4-6
---	-----

**Total Credits** **40-42**

## Additional Requirements

### Preliminary Examination

All students must pass a preliminary examination subsequent to successfully completing all required course work and prior to being admitted to doctoral candidacy (see <http://uwm.edu/socialwelfare/preliminary-examination/>). The examination assesses students' ability to articulate their research interests, analyze and synthesize empirical knowledge and relevant theoretical concepts, explain how theory may affect the generation of knowledge, and show familiarity with relevant scientific methodologies. In keeping with Graduate School rules, the preliminary examination should be completed within five years of enrollment.

Prior to initialing the preliminary examination, students must complete an application for the examination through the Graduate School's Milestones system. Students who fail the preliminary examination may not proceed to the dissertation. The exam may be retaken only once. Complete

policies regarding forming a preliminary examination committee, writing the proposal, and taking the examination are available in the Social Welfare PhD program handbook.

### Dissertation Proposal Defense

All students must successfully complete an oral defense of their dissertation proposal to determine their preparation for independent research. The defense must be completed successfully within four years of initial enrollment.

### Dissertation

Students who have successfully completed the Preliminary Examination and a one-page preliminary dissertation proposal are formally admitted to doctoral candidacy. In accordance with Graduate School policies, students must then register for three research or thesis/dissertation credits each semester until the dissertation is submitted to the Graduate School. To meet the requirements for the dissertation, the candidate must complete an original independent research project that adds meaningfully to the existing body of knowledge in social welfare. It should be of a caliber that warrants publication in respected journals in the field.

### Dissertation Defense

As the final step toward the degree, the candidate must pass an oral examination before their doctoral committee in defense of the dissertation. The examination may also cover general topics relevant to the student's area of study. This requirement may not be completed until all other degree requirements are satisfied.

### Time Limit

It is expected that most students will complete all degree requirements within seven years of initial enrollment in the joint MSCJ/PhD program. All requirements MUST be completed within ten years from the date of initial enrollment.

## Social Work, BS

The bachelor's degree in social work is accredited by the Council on Social Work Education. Its primary objective is to prepare students for beginning generalist social work practice.

The program prepares students for potential employment in both public (federal, state, and county) and private social service agencies. Students are trained to work and affect change among individuals, families, groups, organizations and communities. The program helps prepare students to engage in critical thinking and actively apply research to practice, policy, advocacy, education, and leadership. A sample of career possibilities includes caseworker, psychiatric social worker, youth counselor, and alcohol/drug counselor.

## Requirements

Code	Title	Credits
	General Curriculum Requirements (p. 547)	36
	Major Requirements (p. 548)	55
	General Electives (p. 548)	29
<b>Total Credits</b>		<b>120</b>

## General Curriculum Requirements

For courses that satisfy the distribution requirements in humanities, natural science, and social science, see the GER listing in the current Timetable (<http://www4.uwm.edu/schedule/>). The UWM General

Education Requirements (p. 30) apply to all students who were not enrolled in an accredited institution prior to 1986.

Code	Title	Credits

	Select 6 credits of General Education-approved social science courses	6
<b>Total Credits</b>		<b>21</b>

## Major Requirements

The undergraduate social work major includes a pre-professional component. Freshmen and sophomores may begin to take courses offered in the Helen Bader School of Social Welfare.

Students must complete at least 120 credits to obtain the degree. The major in Social Work requires a minimum of 55 credits in Social Work or Helen Bader School of Social Welfare courses (students can take courses in criminal justice and have them count toward the major as elective credit). The Department requires that students attain at least a 2.5 cumulative GPA, including transfer credits, in order to advance in the major. In addition, students must attain a 2.0 cumulative GPA in order to graduate from UWM.

Code	Title	Credits
<b>Required Courses</b>		
SOC WRK 100	Introduction to Social Work	3
SOC WRK 250	Human Behavior and the Social Environment	3
SOC WRK 260	Case Management in Social Work	3
SOC WRK 270	Advocacy and Empowerment	3

SOC WRK 665	Cultural Diversity and Social Work	3
<b>Social Work Electives</b>		
Select 9 credits in SOC WRK or CRM JST courses		9
<b>Total Credits</b>		<b>55</b>

<sup>1</sup> Minimum grade of B or better required.

<sup>2</sup> To be taken concurrently.

<sup>3</sup> To be taken concurrently.

No academic credit for life experience and previous work experience is granted in lieu of field placement or course work.

All credit for required courses must have been earned within 10 years of graduation.

## General Electives

Code	Title	Credits
Credits towards the degree not counted in other categories will apply to General Electives. Classes counting towards General Electives may include, but are not limited to:		
ENGLISH 100	Introduction to College Writing and Reading	4
ENGLISH 101	Introduction to College Writing	3
ENGLISH 102	College Writing and Research	3
MATH 102	Mathematical Literacy for College Students II	3
MATH 103	Contemporary Applications of Mathematics	3
MATH 105	Introduction to College Algebra	3
MATH 108	Algebraic Literacy II	3
Foreign Language credits		
<b>Total Credits</b>		<b>44</b>

Credits earned in HONORS 687 or HONORS 689 will not count towards the major.

## Fieldwork

The field education sequence required for social work majors consists of two semesters of placement, beginning as early as the junior year. A total of 216 hours in the field is required each of the two semesters. The field courses are taken concurrently with the practice courses. Students are required to maintain a grade of B or better in each social work practice and field course. When a student does not, the student's academic progress is reviewed by the chair of the Social Work Department. In certain cases, the student may be referred to the Faculty Review Panel and may not be allowed to continue in the major.

For further information about fieldwork, consult the Field Staff Office, Enderis Hall, Room 1075, (414) 229-6526.

## Degree Requirements

To receive the bachelor's degree with a social work major, the student must have an overall GPA (including non-UWM college work) of 2.0 and a total of 120 credits. At least 50% of the credits in the social work major must be earned at UWM. Social work students must complete at least one semester of field placement at UWM. Students must earn their last 30 credits at UWM.

## Advancing to the Major

Social Work majors must be formally advanced to the major to begin field placement. This is an automated process that occurs through PAWS upon completion of the requirements listed below. Students who have not yet been advanced to the Social Work major are still able to take a sequence of Social Work courses. The requirements to be advanced to the Social Work major are:

- Completion of 48+ credits
- Completion of SOC WRK 100, SOC WRK 250, and SOC WRK 306
- Cumulative GPA of 2.5 or higher, including all transfer work

All of these requirements must be satisfied to be advanced into the major. Students may appeal to be advanced into the major if they fail to meet one or more of the requirements listed above. This should be done in consultation with an academic advisor in the Helen Bader School of Social Welfare.

## Undergraduate Academic Advising

The Office of Student Services in the Helen Bader School of Social Welfare, located in the Northwest Quadrant Building D 3rd Floor, offers undergraduate student academic advising from professional advisors who are familiar with the Social Work and Criminal Justice & Criminology curriculum, College requirements, and university policies. Advisors can also provide information on scholarship opportunities, tutoring, and student organizations that align with a student's interests.

These advisors provide services such as new freshman orientation, course selection, assistance with registration, and review of transfer credit. Students are assigned to a permanent professional advisor upon admittance into the Helen Bader School of Social Welfare and are encouraged to meet with their academic advisor at least once each semester. Please call (414) 229-4852 to schedule an appointment or for more information.

## Transfer Students

The Helen Bader School of Social Welfare welcomes students from other academic areas on the UWM campus and students transferring to UWM from other institutions. Students planning to transfer into either major from another institution should meet with an academic advisor as soon as they are admitted and the transfer credit evaluation process has been completed. During this meeting, the student and advisor will review transfer course equivalencies, discuss program requirements, and create an academic plan for coming semesters. Students may meet with their advisor in person or by phone. Please call (414) 229-4852 to schedule an appointment or for more information.

## Honors in the Major

Honors in the Major is granted to students who have earned a GPA of 3.500 or above in all major courses taken in residence at UWM. A minimum of 28 Social Work credits or 24 Criminal Justice credits completed in residence are needed to be considered for Honors in the Major.

## High Honors in the Major

High Honors in the Major is granted to students who have earned a GPA of 3.750 or above in all major courses taken in residence at UWM. A minimum of 28 Social Work credits or 24 Criminal Justice credits completed in residence are needed to be considered for Honors in the Major.

## College of Community Engagement and Professions Dean's Honor List

GPA of 3.750 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Overview

The Helen Bader School of Social Welfare (HBSSW) offers a program of graduate studies in social work. As a department in an urban research university, the mission of the Department of Social Work is to promote positive change through social work research, scholarship, education, and community partnerships. The Department promotes the values of the social work profession through a commitment to social justice and diversity, a dedication to public service, and an emphasis on individual and community well-being. The goal of the MSW program is to prepare graduates with specialized knowledge and skills for advanced practice and leadership with diverse populations and communities.

In furtherance of its mission, the goals of the Social Work Department are:

1. To educate students to become highly skilled, culturally competent, and ethical social workers and to provide leadership for the practice of social justice.
2. To create and disseminate knowledge leading to social work and inter-disciplinary innovations.
3. To engage in research and apply results that inform social work policy, practice, advocacy, education, and future research.
4. To collaborate with community partners in promoting evidence-informed practice, educational and research partnerships, and social and economic justice.

HBSSW offers students access to the University computer system, special interview training rooms, and specialized audiovisual materials.

The MSW curriculum is designed to prepare students for advanced-level professional Social Work practice, and builds upon a solid base of coursework in human behavior, practice methods, research, and policy. The MSW program is accredited by the Council on Social Work Education and can prepare students for state certification requirements.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Applications will be made to both the Graduate School and the MSW program via a single application in the UWM Graduate School Panthera system. The MSW program accepts applications for the Fall semester only. MSW applications open in the Panthera system October 1. For priority consideration, applications are due by January 3. Second priority applications are due by the final deadline of March 1. Applicants must meet Graduate School and MSW program requirements for admission, including:

1. Undergraduate grade point average of 2.75 or better.
2. Completion of at least 21 semester credits in the social and behavioral sciences (i.e., psychology, sociology, political science, economics, anthropology, and/or their equivalents).

3. Submission of a program application which includes two letters of recommendation, a narrative statement, and a comprehensive professional resume.

*Please see complete requirements and instructions for applying on the MSW program web page (<http://uwm.edu/socialwelfare/academics/msw-in-social-work/>) before starting an application.*

## Credits and Courses

The MSW program requires a minimum of 34 graduate credits for students admitted to the Advanced Curriculum. Students may be required to complete up to 22 credits to fulfill the Professional Foundation prior to beginning the Advanced Curriculum. The minimum 34 Advanced Curriculum credit requirements are distributed as follows:

Code	Title	Credits
<b>Required</b>		
SOC WRK 722	Field Instruction II	3
SOC WRK 821	Field Instruction III	3
SOC WRK 822	Field Instruction IV <sup>1</sup>	3
SOC WRK 711	Direct Social Work Practice I	3
SOC WRK 712	Advanced Practice and Leadership in Organizations and Communities	3
SOC WRK 795	Evaluation of Social Work Practice and Programs	3
SOC WRK 851	Social Issue and Policy Analysis:	3
<b>Electives</b>		
Select 13 credits of graduate social work electives <sup>2</sup>		13
<b>Total Credits</b>		<b>34</b>

<sup>1</sup> The capstone requirement is satisfied by SOC WRK 822.

<sup>2</sup> Electives outside of social work can be approved by advisor.

## Professional Foundation

Students admitted into the graduate social work program without having earned a bachelor's degree from an accredited social work program within the past 5 years are required to fulfill the Professional Foundation prior to Advanced Curriculum coursework (see below for exemptions). The purpose of the Professional Foundation is to orient students to the profession and to provide a knowledge, values and skills base in preparation for the Advanced Curriculum. Coursework in the Professional Foundation is not included in the 34 Advanced Curriculum credits required for completion of the MSW degree. The Professional Foundation courses are:

Code	Title	Credits
SOC WRK 604	Social Systems and Social Work Practice	3
SOC WRK 662	Methods of Social Welfare Research	3
SOC WRK 665	Cultural Diversity and Social Work	3
SOC WRK 705	Individual Behavior and Social Welfare	3
SOC WRK 708	Social Work Methods I: Individuals and Families	3
SOC WRK 709	Social Work Methods II: Groups, Organizations and Communities	3
SOC WRK 721	Field Instruction I	3

SOC WRK 750	Social Welfare Policy Development and Implementation	3
<b>Total Credits</b>		<b>24</b>

### Exemptions

Students who have, within the 5 years preceding admission, completed coursework which substantially duplicates Professional Foundation courses may apply to the MSW Program Coordinator for an exemption from the relevant courses. Exemption examinations are also offered on a scheduled basis for these courses. Exemption of the field experience (SOC WRK 721) may be permitted under special employment experience circumstances and only by permission of the Director of Field Programs. Students interested in securing an exemption should request course exemption forms upon notification of admission to the program.

All requests for exemptions must be made at the time of initial enrollment. Exemption requests will not be accepted following the end of the first semester of coursework.

### Elective Pathways

The MSW Program at UWM is anchored in core courses that build knowledge and skills in crucial advanced social work competencies. Students will build Advanced Generalist competencies related to social work practice with individuals, families, groups, organizations and communities, as well as knowledge and skills in the areas of social welfare policy, social justice, and evaluation of practice and programs.

### Traditional Program Students (Campus-based)

Beyond the curriculum core, students may choose electives that build a pathway of emphasis for their MSW Degree in areas related to child and family well-being, behavioral and mental health, gerontology, physical health, school social work, clinical social work practice, substance abuse counseling and trauma-informed care. Alternately, students can also choose to build a pathway with varied electives of their choice to broaden and diversify their knowledge and skills across multiple areas of advanced social work practice.

With careful faculty advising, students are able to develop a course of study that builds upon their individualized interests, experiences and strengths.

### Online Program Students

Online Program students will take a standard set of elective courses built into their cohort's course plan. Elective courses are selected to represent a spectrum of advanced topics relevant to broad-based social work practice.

## Additional Requirements

### Advising

MSW students will work with the MSW Advisor for course and curriculum planning, including appropriately sequenced courses and electives for meeting a student's desired pathway. Additionally, all students will be assigned a faculty member advisor with whom they may consult regarding career pathway development and professional guidance and support.

### Time Limit

Students admitted directly into the Advanced Curriculum must complete all degree requirements within seven years of initial enrollment; students required to complete any portion of the Professional Foundation must complete all degree requirements within seven years of initial enrollment.

## Social Work, MSW/Criminal Justice and Criminology, MS

Both departments in the Helen Bader School of Social Welfare collaboratively offer a program designed to provide students with theoretical and practical exposure to evolving professional practice in the field of criminal justice, or social work with a focus on criminal justice (e.g., corrections, juvenile justice, probation and parole, etc).

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students are admitted to both graduate programs separately and admission requirements are consistent with those specified by the UWM Graduate School, the MS in Criminal Justice & Criminology and the MSW program in the Helen Bader School of Social Welfare.

## Credits and Courses

Students accepted into this MS/MSW program complete the following courses:

Code	Title	Credits
<b>Criminal Justice &amp; Criminology</b>		
CRM JST 773	Criminological Perspectives (G)	3
CRM JST 743	Proseminar: Administration of Criminal Justice Systems (G)	3
CRM JST 756	Proseminar: Analysis of Criminal Justice Research (G)	3
Select 12 additional credit hours of courses within the criminal justice & criminology program		12
Select 12 credit hours of Social Work courses with the consent of the student's advisor		
Students must complete the requirements of the Essay Option or Non-Essay Option as the degree capstone		
<b>Social Work Foundation Curriculum (required before the Advanced Curriculum for students without a bachelor's degree in social work)</b>		
SOC WRK 604	Social Systems and Social Work Practice (U/G)	3
SOC WRK 662	Methods of Social Welfare Research (U/G)	3
SOC WRK 665	Cultural Diversity and Social Work (U/G)	3
SOC WRK 705	Individual Behavior and Social Welfare (G)	3
SOC WRK 708	Social Work Methods I: Individuals and Families (G)	3
SOC WRK 709	Social Work Methods II: Groups, Organizations and Communities (G)	3
SOC WRK 721	Field Instruction I (G)	3
SOC WRK 750	Social Welfare Policy Development and Implementation (G)	3

**Social Work Advanced Practice Curriculum***Required Core Courses*

SOC WRK 711	Direct Social Work Practice I	3
SOC WRK 712	Advanced Practice and Leadership in Organizations and Communities	3
SOC WRK 795	Evaluation of Social Work Practice and Programs	3
SOC WRK 851	Social Issue and Policy Analysis:	3

*Required Field Placement Courses*

SOC WRK 722	Field Instruction II	3
SOC WRK 821	Field Instruction III	3-4
SOC WRK 822	Field Instruction IV	3-4

**Electives**

Select 6 credits of electives from CJC courses in consultation with advisor	
Remaining elective credits for MSW degree selected from Social Work graduate courses in consultation with MSW advisor	7

**Total Credits** **73-75**

**Total Credits for Coordinated Degree: 73** (without a BSW) **or 49** (with a BSW).

The total credits for the coordinated program would typically be completed in both programs at the same time, rather than one program after the other. Degrees will be awarded simultaneously.

A student not completing the requirements for the coordinated degree program would need to complete all requirements for an individual program in order to receive a degree.

## Additional Requirements

### Time Limit

Students in the coordinated MS/MSW degree program must complete all degree requirements within seven years of the first enrollment semester as a degree student.

## Social Work, MSW/Public Health, MPH

The Zilber College of Public Health and the Helen Bader School of Social Welfare collaboratively offer a program designed to provide students with theoretical, research-based policy and practice knowledge and accompanying skill sets, to address health inequities and inequalities and respond to the health and well-being needs of communities at the local, regional, national and international arenas.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students are admitted to each graduate program separately and based on admission requirements which are consistent with those specified

by the UWM Graduate School, the MPH program in the Zilber College of Public Health, and the MSW program of the Department of Social Work.

## Credits and Courses

Students accepted into this MPH/MSW program complete the following courses:

### Master of Public Health (MPH)

**Required Common Core Courses (24-25 Credits)**

Code	Title	Credits
<b>Required Common Core Courses</b>		
PH 702	Introduction to Biostatistics	3
PH 703	Environmental Health Sciences	3
PH 704	Principles and Methods of Epidemiology	3
PH 705	Principles of Public Health Policy and Administration	3
PH 706	Perspectives on Community & Behavioral Health	3
PH 708	Health Systems and Population Health	3
PH 733	Overview of Qualitative Methods for Public Health *	1
PH 791	Leadership in Public Health	1
PH 800	Capstone in Public Health	2
SOC WRK 823	Coordinated Public Health and Social Work Field Education **	3
<b>Total Credits</b>		<b>25</b>

\* Students in the PHP Track take PH 776 Qualitative Approaches in Public Health Policy instead of PH 733. Students in the CBHP Track may take PH 776 Qualitative Approaches in Public Health Policy as an elective instead of PH 733.

\*\* SOC WRK 823 satisfies the PH 790 Field Experience for MPH/MSW students.

**Students specialize in one of the two public health tracks of study:**

- Community and Behavioral Health Promotion
- Public Health Policy

**Community and Behavioral Health Promotion Track (24 credits)**

In addition to the common MPH core classes, students complete:

Code	Title	Credits
<b>Required Courses</b>		
PH 700	Structures of Inequality and Population Health	3
PH 725	Theories and Models of Health Behavior	3
PH 726	Community Health Assessment	3
PH 727	Program Planning & Implementation in Public Health	3
PH 728	Program Evaluation in Public Health	3
<b>Electives (see table below)</b>		<b>9</b>
<b>Total Credits</b>		<b>24</b>

**Community and Behavioral Health Promotion Electives**

Code	Title	Credits
<b>Methods "S" Electives 6</b>		
Select two of the following courses:		
PH 729	Survey Research Methods in Public Health	3
PH 776	Qualitative Approaches in Public Health Policy	3
PH 831	Community Engagement and Participatory Research Approaches in Public Health	3
<b>Electives 3</b>		
Select one of the following courses:		
PH 719	Social Justice in Public Health	3
PH 730	Overview of Children with Special Health Care Needs	3
PH 740	Special Topics in Public Health:	1-3
PH 752	Public Health and Mental Health	3
PH 820	Maternal and Child Health Foundations, Policy and Practice	3
PH 999	Independent Study	1-3
Other courses as approved by advisor.		

**Public Health Policy Track (24 credits)**

In addition to the common MPH core classes, students complete:

Code	Title	Credits
<b>Required Courses</b>		
PH 776	Qualitative Approaches in Public Health Policy	3
PH 777	Quantitative Research Methods for Public Health Policy	3
PH 779	Public Health Policymaking and Policy Analysis	3
PH 785	Principles of Public Health Economics	3
<b>Electives (see table below)</b>		<b>12</b>
<b>Total Credits</b>		<b>24</b>

**Public Health Policy Electives**

Code	Title	Credits
<b>Content Elective 3</b>		
Select one of the following courses:		
ED POL 630G	Race, Ethnicity, and Public Policy in Urban America	3
PH 700	Structures of Inequality and Population Health	3
PH 719	Social Justice in Public Health	3
PH 730	Overview of Children with Special Health Care Needs	3
PH 752	Public Health and Mental Health	3
PH 769	Critical Perspectives on Nutritional Epidemiology and the Food System	3
PH 784	Social and Economic Policy as Health Policy	3
PH 820	Maternal and Child Health Foundations, Policy and Practice	3

PH 859	Racial/Ethnic Health Disparities in the United States	3
<b>Methods and Practice Elective 9</b>		
Select three of the following courses:		
BUS ADM 755	Health Care Administration and Delivery Systems	3
BUS ADM 766	Marketing for Nonprofit Organizations	3

Other courses as approved by advisor.		

### Total Degree Credits Required:

- (1) With BSW: 34 cr. (includes 9 cr. satisfied by public health credits)
- (2) Without BSW: 56 cr. (includes 9 cr. satisfied by public health credits)

### Total Credits for Coordinated Degree Program:

- (1) With BSW: 73 - 74 cr.
- (2) Without BSW: 95 - 96 cr.

The credits for the coordinated program would typically be completed in both programs at the same time, rather than one program after the other. A student not completing the requirements for the coordinated degree program would need to complete all requirements for an individual program in order to receive a degree.

## Additional Requirements

### Time Limit

Students in the coordinated MPH/MSW degree program must complete all degree requirements within seven years of the first enrollment semester as a degree student.

## Social Work, MSW/Social Welfare, PhD

### Overview

The Helen Bader School of Social Welfare (HBSSW) offers a program of graduate studies in social work. As a department in an urban research university, the mission of the Department of Social Work is to promote positive change through social work research, scholarship, education, and community partnerships. The Department promotes the values of the social work profession through a commitment to social justice and diversity, a dedication to public service, and an emphasis on individual and community well-being. The goal of the MSW program is to prepare graduates with specialized knowledge and skills for advanced practice and leadership with diverse populations and communities.

In furtherance of its mission, the goals of the Social Work Department are:

1. To educate students to become highly skilled, culturally competent, and ethical social workers and to provide leadership for the practice of social justice.
2. To create and disseminate knowledge leading to social work and inter-disciplinary innovations.
3. To engage in research and apply results that inform social work policy, practice, advocacy, education, and future research.
4. To collaborate with community partners in promoting evidence-informed practice, educational and research partnerships, and social and economic justice.

HBSSW offers students access to the University computer system, special interview training rooms, and specialized audiovisual materials.

The MSW curriculum is designed to prepare students for advanced-level professional Social Work practice, and builds upon a solid base of coursework in human behavior, practice methods, research, and policy. The MSW program is accredited by the Council on Social Work Education and can prepare students for state certification requirements.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Relevant application materials must be submitted to both the Graduate School and HBSSW and will be accepted for admission in the Fall semester only. All applications must be completed and submitted on or before January 2. Applications received after January 2 will be considered only if space is available after other applications are reviewed.

Students who apply and are accepted to the joint MSW/PhD program will be able to earn both the Master of Social Work and Doctor of Philosophy in Social Welfare and will not be required to apply to the PhD program after earning the MSW degree, assuming their progress is satisfactory. Applicants who are not offered admission to the joint program will still be considered for admission into the MSW-only program.

All applicants must meet Graduate School requirements plus the following HBSSW requirements:

1. Have an undergraduate grade point average of 2.75 or better.
2. Have completed at least 21 semester credits in the social and behavioral sciences (i.e., psychology, sociology, political science, economics, anthropology, and/or their equivalents).
3. Indicate the following In the Personal Statement section of the Graduate School application form:
  - Which of the program’s four areas of specialization (Applied Behavioral Health, Applied Gerontology, Criminal Justice, or Family and Child Welfare) they wish to pursue.
  - Their reasons for seeking a doctoral degree in social welfare.
  - Their goals as future scholars.
  - topic or issue in the field that they consider to be particularly challenging and worthy of study.
4. In materials submitted to the HBSSW, applicants must:
  - Provide a current copy of a professional résumé or curriculum vitae. This should contain information on:
  - All post-secondary education, including institutions, degrees and dates of completed programs of study, plus institutions, dates, and types of study that did not lead to a degree.
  - All employment by the applicant in social work or criminal justice and related areas, including dates and employing organizations.
  - Employment unrelated to social work or criminal justice within the past five years.
  - Information on any past or current professional licenses held.
5. Submit scores from within the past five years on the Graduate Record Examination (GRE) (<http://uwm.edu/graduateschool/admission/#gre>) General Test.
6. Submit three letters of recommendation from persons familiar with the applicant’s achievements and academic potential, including at least one current or former academic instructor.
7. Submit a sample of written work that demonstrates: the applicant’s knowledge of social science theory, practice, and research; ability to think analytically; and writing skills. The sample should be at least 1000 words in length and represent work for which the applicant was the sole author, or if it is jointly authored should indicate which sections were primarily done by the applicant.

### Advisement

The HBSSW will assign each MSW/PhD student a major professor. This assignment is based on congruence between the applicant’s interests and the expertise of the major professor. In consultation with the director of the PhD program, the student may change major professors after beginning the program, but no applicant will be admitted unless a

doctoral faculty member in social welfare agrees to serve as major professor.

### Financial Assistance

Through a combination of tuition remission, teaching assistantships, research assistantships, fellowships, and other options, the program will attempt to provide financial assistance to all admitted students during their first four years in the program. Applicants needing additional information on other sources of financial assistance, such as student loans, should contact the campus’s Office of Financial Aid.

## Credits and Courses

### MSW Requirements

The MSW portion of the joint curriculum requires a minimum of 22 graduate credits for students admitted to the Advanced Curriculum. Another 12 credits normally required in the Advanced Curriculum will be replaced by the same number of Ph.D- level credits. Students admitted into the joint curriculum who have not earned a bachelor’s degree from an accredited social work program within the past five years are required to complete 22 credits in the Professional Foundation prior to beginning courses in the Advanced Curriculum.

### Professional Foundation

The purpose of the Professional Foundation is to orient students to the profession and to provide a knowledge, values and skills base for later course. Credits in the Professional Foundation are not included in the 22 Advanced Curriculum credits required for completion of the MSW degree, nor do they apply to the required 12 Ph.D-level credits.

Code	Title	Credits
SOC WRK 604	Social Systems and Social Work Practice	3
SOC WRK 662	Methods of Social Welfare Research	3
SOC WRK 665	Cultural Diversity and Social Work	3
SOC WRK 705	Individual Behavior and Social Welfare	3
SOC WRK 708	Social Work Methods I: Individuals and Families	3
SOC WRK 709	Social Work Methods II: Groups, Organizations and Communities	2
SOC WRK 721	Field Instruction I	3
SOC WRK 750	Social Welfare Policy Development and Implementation	2

### MSW-level Advanced Curriculum

Code	Title	Credits
SOC WRK 711 or SOC WRK 713	Direct Social Work Practice I Community Organization, Planning and Human Service Administration I	3
SOC WRK 722	Field Instruction II	3
SOC WRK 753	Adult Psychopathology	3
SOC WRK 811	Direct Social Work Practice II:	3
SOC WRK 820	Seminar in Social Work Practice:	2
SOC WRK 821	Field Instruction III	4
SOC WRK 822	Field Instruction IV	4

**Total Credits 22**

**MSW courses in the Advanced Curriculum to be replaced by PhD-level courses are:**

- SOC WRK 793 replaced by SOC WRK 961
- SOC WRK 794 replaced by SOC WRK 951 or SOC WRK 952
- SOC WRK 851 (subtitled) replaced by SOC WRK 931 or SOC WRK 945
- SOC WRK 791 replaced by SOC WRK 901 or SOC WRK 932
- SOC WRK 791 replaced by SOC WRK 963 or doctoral elective

### Exemptions

Students who have, within the 5 years preceding admission, completed coursework which substantially duplicates MSW Professional Foundation courses may apply to the Chair of the Social Work Department for an exemption from the relevant courses. Exemption examinations are also offered on a scheduled basis for these courses. Exemption of the field experience (SOC WRK 721) may be authorized by the Director of Field Programs for students having sufficient supervised employment experience. Students interested in securing an exemption should request course exemption forms upon notification of admission to the program.

All requests for exemptions must be made at the time of initial enrollment. Exemption requests will not be accepted following the end of the first semester of coursework.

### PhD Requirements

A minimum of 39 credits of PhD-level coursework is required. At least 33 of these must be earned in residence at UWM. Required courses include:

Code	Title	Credits
<b>Foundation</b>		
SOC WRK 901	Philosophy of Science	3
<b>Specialization Seminars</b>		
Select 9 credits (3 from area of specialization) Examples include:		9
SOC WRK 931	Theories of Poverty and Social Welfare Policy	
SOC WRK 932	Theories and Research on Behavior Change	
SOC WRK 945	Family and Long-Term Care Across the Life Course	
SOC WRK 791	Current Topics in Social Work: (Family and Child Welfare Specialization)	
<b>Research Methods</b>		
SOC WRK 951	Quantitative Research Methods	3
SOC WRK 952	Qualitative Research Methods in Social Work	3
<b>Statistics</b>		
SOC WRK 961	Introduction to Statistical Methods	4
SOC WRK 962	Applied Multiple Regression Analysis	3
SOC WRK 963	Measurement Methods and Related Multivariate Statistics	3

SOC WRK/CRM JST 999	Independent Reading in Social Work	1-3
<b>Electives</b>		
Select two approved external doctoral-level courses in area of specialization (2-3 cr. each)		4-6
<b>Total Credits</b>		<b>39-43</b>

## Additional Requirements

### Preliminary Examination

All students must pass a preliminary examination subsequent to successfully completing all required coursework and prior to being admitted to doctoral candidacy. The examination assesses students' ability to articulate their research interests, analyze and synthesize empirical knowledge and relevant theoretical concepts, explain how theory may affect the generation of knowledge, and show familiarity with relevant scientific methodologies. In keeping with Graduate School rules, the preliminary examination should be completed within five years of enrollment.

An Application for the Doctoral Preliminary Examination (<http://uwm.edu/graduateschool/doctoral-requirements/>) must be completed by the student and signed and submitted to the PhD Program Committee by the major professor six weeks prior to the first examination. Students who fail the preliminary examination may not proceed to the dissertation. The exam may be retaken only once. Complete policies regarding forming a preliminary examination committee, writing the proposal, and taking the examination are available in the Social Welfare PhD program handbook.

### Dissertation Proposal Defense

All students must successfully complete an oral defense of their dissertation proposal to determine their preparation for independent research. The defense must be completed successfully within four years of initial enrollment.

### Dissertation

Students who have passed the Preliminary Examination and have submitted a one-page preliminary dissertation proposal are formally admitted to doctoral candidacy. In accordance with Graduate School policies, students must then register for three research or thesis/dissertation credits each semester until the dissertation is submitted to the Graduate School. To meet the requirements for the dissertation, the candidate must complete an original independent research project that adds meaningfully to the existing body of knowledge in social work or criminal justice. It should be of a caliber that warrants publication in respected journals in the field.

### Dissertation Defense

As the final step toward the degree, the candidate must pass an oral examination before his/her doctoral committee in defense of the dissertation. The examination may also cover general topics relevant to the student's area of study. This requirement may not be completed until all other degree requirements are satisfied.

### Residence

Students must meet minimum Graduate School residency requirements.

### Time Limit

It is expected that most students will complete all degree requirements within seven years of initial enrollment in the joint MSW/PhD program. All requirements MUST be completed within ten years from the date of initial enrollment.

## Social Work, MSW/Women's and Gender Studies, MA

The College of Letters and Science and the Helen Bader School of Social Welfare located in the College of Community Engagement & Professions collaboratively offer a program designed to provide students with theoretical and practical exposure to evolving professional practice

and the field of feminist research and scholarship. Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students are admitted to both graduate programs separately, and admission requirements (<http://uwm.edu/graduateschool/admission/>) are consistent with those specified by the UWM Graduate School, the MA in Women’s and Gender Studies (p. 1329) program in the College of Letters and Science, and the MSW in Social Work (<http://uwm.edu/graduateschool/social-work/>) of the Helen Bader School of Social Welfare.

## Credit and Courses

The MA in Women’s and Gender Studies (WGS) normally has a minimum requirement of 30 credits from Women’s and Gender Studies courses. For the coordinated WGS MA/MSW degree program, however, students can substitute 6 credits in Social Work courses for 6 credits of WGS courses. Similarly, the Social Work master’s program will accept 6 credits of WGS course work to satisfy the 6 required elective credits for the MSW degree. Because the MSW degree has a distinction in the number of credits required depending on bachelor’s degree type, the total number of credits required to complete the Coordinated WGS/MSW program will range from 52 credits (24 from WGS and 28 from MSW when holding a bachelor’s in social work) to 76 credits (24 from WGS and 52 from MSW when a bachelor’s degree is from another discipline and needing to complete the Foundation Curriculum in addition to the Advanced Curriculum).

## Women’s and Gender Studies

Code	Title	Credits
<b>Required</b>		
WGS 700	Feminist Issues and Scholarship	3
WGS 701	Feminisms in Global Context	3
WGS 710	Advanced Feminist Theory	3
WGS 711	Feminist Epistemologies and Research Practices	3
WGS 740	Advanced Queer Theory	3
Select one G or U/G WGS course <sup>1</sup>		3
<b>Electives</b>		
Select 6 elective credits in WGS or WGS cross-listed courses (not SOC WRK), in consultation with the WGS Director of Graduate Studies. Of these electives, 3 credits may be thesis credits (WGS 990).		6
<b>Total Credits</b>		<b>24</b>

<sup>1</sup> Excluding WGS 497, WGS 700, WGS 990, and WGS 999.

Total WGS credits: 24 (maximum of 6 U/G cr; and maximum 3 cr of WGS 999)

## Master of Social Work

Code	Title	Credits
<b>Social Work Foundation Curriculum (required before the Advanced Curriculum for students without a bachelor’s degree in social work)</b>		
SOC WRK 604	Social Systems and Social Work Practice (U/G)	3
SOC WRK 662	Methods of Social Welfare Research (U/G)	3
SOC WRK 665	Cultural Diversity and Social Work (U/G)	3
SOC WRK 705	Individual Behavior and Social Welfare (G)	3
SOC WRK 708	Social Work Methods I: Individuals and Families (G)	3
SOC WRK 709	Social Work Methods II: Groups, Organizations and Communities (G)	3
SOC WRK 721	Field Instruction I (G)	3
SOC WRK 750	Social Welfare Policy Development and Implementation (G)	3

### Social Work Advanced Practice Curriculum

#### Required Core Courses

SOC WRK 711	Direct Social Work Practice I (G)	3
SOC WRK 712	Advanced Practice and Leadership in Organizations and Communities	3
SOC WRK 795	Evaluation of Social Work Practice and Programs	3
SOC WRK 851	Social Issue and Policy Analysis: (Subtitled) (G)	3

#### Required Field Placement Courses

SOC WRK 722	Field Instruction II	3
SOC WRK 821	Field Instruction III	3-4
SOC WRK 822	Field Instruction IV	3-4

#### Electives

Select 6 credits from Women’s and Gender Studies courses in consultation with faculty advisor

Remaining elective credits for MSW degree selected from Social Work graduate courses in consultation with MSW advisor	7
---	---

**Total Credits 52-54**

**Minimum Total Credits for Coordinated Program: 52 (for those admitted to the MSW Social Work Advanced Curriculum - Advanced Standing).**

**For students without a social work baccalaureate or otherwise needing the Foundation Coursework, the total credits will sum to 76.**

## Additional Requirements

### Time Limit

Students in the coordinated MA/MSW degree program must complete all degree requirements within seven years of the first enrollment semester as a degree student.

## Suicide Prevention Across the Lifespan, Undergraduate Microcredential

This microcredential offers the opportunity to gain knowledge and skills in social work and related fields in working with client systems affected by suicide. A focus on human behavior in the social environment is first examined, followed by specific knowledge and skills on the epidemiology, assessment, and prevention of suicide across the lifespan.

### Requirements

Code	Title	Credits
<b>Required Courses</b>		
SOC WRK 250	Human Behavior and the Social Environment	3
SOC WRK 591	Special Topics: Social Welfare and Social Work: (Suicide Prevention: A Life Course Perspective)	3
<b>Total Credits</b>		<b>6</b>

### Admission

This microcredential is available to any interested undergraduate student at the University of Wisconsin-Milwaukee. In addition to taking SOC WRK 250: Human Behavior and the Social Environment and SOC WRK 591: Suicide Prevention: A Life Course Perspective, students would need to satisfy the prerequisite requirement for SOC WRK 250.

## Trauma Informed Care, Graduate Certificate (Helen Bader School of Social Welfare, Department of Social Work)

The Certificate in Trauma-Informed Care will expose graduate students in several helping professions to the theory and practice of trauma-related service delivery. This is a multidisciplinary program that integrates knowledge from the social, behavioral, and health sciences. The primary goal of the program is to train graduate students from the helping professions in specialized knowledge and skills related to psychological trauma.

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).

- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Admission

Students in good standing currently in a graduate program or those who have already completed a graduate degree are eligible for the certificate.

### Credits and Courses

All students participating in the certificate program will complete 15 academic credits related to trauma theory and practice.

Code	Title	Credits
<b>Core</b>		
SOC WRK/COUNS/NURS/OCCTHPY 774	Trauma Counseling I: Theory and Research	3
SOC WRK/COUNS/NURS/OCCTHPY 775	Trauma Counseling II: Diagnosis and Treatment	3
<b>Electives</b>		
Select 9 elective credits (see Potential Electives and Recommended Field Work lists below)		9
<i>Recommended Field Work</i>		
Select 3-6 credits from the following: <sup>1</sup>		
SOC WRK 721	Field Instruction I	
SOC WRK 722	Field Instruction II	
SOC WRK 821	Field Instruction III	
SOC WRK 822	Field Instruction IV	
SOC WRK 921	Field Instruction V	
COUNS 764	Supervised Practicum 1 in School Counseling	
COUNS 765	Supervised Practicum 1 in Clinical Mental Health Counseling	
NURS 899	Practicum in Nursing:	
OCCTHPY 725	Occupational Therapy Field Service I	
OCCTHPY 735	Occupational Therapy Field Service II	
<b>Total Credits</b>		<b>15</b>

<sup>1</sup> Students also have an opportunity to complete anywhere from 3 to 6 additional qualifying program credits through participation in in trauma-informed practice field settings, contingent on the respective department's field credit policy. Four departments are participating in this interdisciplinary certificate program—Social Work, Educational Psychology, Nursing, and Rehabilitation Sciences & Technology—and accordingly, the program curriculum will consist of courses offered via multiple campus departments.

### Potential Electives

Code	Title	Credits
SOC WRK/CRM JST 497	Study Abroad: (Bristol or South Africa or Austria)	1-6
SOC WRK 680G	Death and Dying	3
SOC WRK 690G	Mindfulness and Community Building	3

SOC WRK 753	Adult Psychopathology	3
SOC WRK 754	Child and Adolescent Psychopathology	3
SOC WRK 791	Current Topics in Social Work: (subtopic: Technology in Social Work Practice)	3
SOC WRK 818	Treatment of Co-Occurring Disorders	3
SOC WRK 820	Seminar in Social Work Practice: (Qualifying topics: Violent & Traumatized Families; Motivational Interviewing; or Interventions for Substance Misuse and Screening Brief Intervention and Referral to Treatment for Substance Misuse)	3
PSYCH 711	Current Topics in Psychology: (Qualifying topics: Functional Assessment and Intervention or Neurobiology of Learning & Memory)	1-4
PSYCH 727	Cognitive Neuroscience	3
MSP 770	Conflict Analysis and Restorative Practices	3
COUNS 704 & COUNS 705	Multicultural Mental Health Guidelines and Ethics Overview and Multicultural Practice: Awareness and Knowledge of Others <sup>1</sup>	6
COUNS 715	Multicultural Counseling	3
COUNS 744	Multicultural Mental Health Guidelines, Working with First Nations Persons	3
COUNS 812	Clinical Studies in Counseling	3
COUNS 816	Counseling Children and Adolescents	3
COUNS 820	Counseling Appraisal and Clinical Decision-Making	3
COUNS 904	Family Systems Theory, Research, and Practice	3
OCCTHPY 519	Therapeutic Communication	3
OCCTHPY 719	Occupational Therapy in Psychosocial Practice	3
CRM JST 830	Intervention Strategies for Correctional Clients	3
CRM JST 970	Readings in Criminal Justice Research: (Qualifying topics: Victimology; Women and the Criminal Justice System)	3

<sup>1</sup> COUNS 704 and COUNS 705 must be taken together to fulfill this requirement.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

## Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

## Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

# ENGINEERING AND APPLIED SCIENCE (COLLEGE OF)

UWM's College of Engineering & Applied Science is a dynamic research institution with award-winning faculty, state-of-the-art facilities and established business connections that provide context for our work.

One of only two doctorate-granting institutions in the state of Wisconsin, UW-Milwaukee is recognized by the Carnegie Classification of Institutions of Higher Education as one of the nation's top research institutions. UWM's location offers unique benefits to engineering students and faculty alike. Seven Fortune 500 companies' international headquarters are located within easy driving distance of the university – as are many leading manufacturers' facilities.

This has real and lasting impact on the UWM engineering community. Collaborative research, corporate partnerships, and real-world work experience (<http://uwm.edu/engineering/current-students/career-services/co-ops-and-internships/>) are an integral part of the UWM experience.

We invite you to learn more about our research as well as our undergraduate and graduate programs. You'll see why UWM is the right choice when you are ready to build your future and change the world.

## Mission

To educate students to become creative problem solvers, conduct leading-edge research with global impacts, and act as a catalyst for improved economic development and quality of life in Wisconsin.

## Vision

To become a globally prominent engineering education and research institution.

Our location in the major industrial center of the state of Wisconsin offers engineering and computer science students several advantages. Professional engineers and computer scientists from the industrial community share their expertise with the College in the classroom, research laboratory, and on the College's advisory committees. Our very successful co-op and internship programs give students work experience in their field of study before graduation. Many of the projects that students work on in the classroom are real projects brought to us by local companies. In short, Milwaukee-area companies offer our students a real-world laboratory to gain valuable insights and skills in their major field.

## Accreditation

UWM is accredited by the Higher Learning Commission. In addition, the College's bachelor's programs in biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET. The computer science program is accredited by the Computing Accreditation Commission of ABET. The newer environmental engineering program will be reviewed for accreditation in an upcoming review cycle.

  - Industrial Engineering, Minor (p. 660)
- Integrated BS-MS Degree (p. 660)
- Materials Engineering (p. 661)
  - Materials Engineering, BSE (p. 662)
  - Materials Engineering, Minor (p. 665)
- Mechanical Engineering (p. 666)
  - Mechanical Engineering, BSE (p. 667)
  - Mechanical Engineering, Minor (p. 670)
  - Mechanical Engineering, PhD (p. 670)

## Requirements for Employment, Licensing, or Professional Organizations

Students should be aware that some professions, occupations, and employers are subject to licensing and/or bonding requirements. When a course of study includes clinical or field training, practice teaching, internships, or the like, students may be subjected to a check of criminal conviction records prior to acceptance of a student by the placement site. Students are responsible for obtaining the necessary information about these requirements and for planning their studies accordingly. Please contact the appropriate department or program office for further information.

## Co-op and Internship Program

In today's competitive job market, it takes more than a college degree to find employment upon graduation. The Career Services Office in the College provides the link between your education and the real world. This office is dedicated to helping all CEAS students secure engineering or computer science-related work experience before graduation, because

related work experience in combination with good academics are the criteria most employers use to select new hires.

The College offers students two ways to gain that experience: internships and co-ops. The principal goals of the programs are to provide career orientation to students and enhance their professional development. All internships and co-ops are paid at a rate commensurate with educational background and experience. For more information, contact the Career Services Office at (414) 229-6960 or ceascareers@uwm.edu.

# Biomedical and Health Informatics Programs

The PhD in Biomedical and Health Informatics (p. 563) is an interdisciplinary doctoral program offered by UWM through collaboration between several academic units at UWM and the Medical College of Wisconsin. The Program is housed in the UWM Department of Electrical Engineering and Computer Science. It is guided by a Steering Committee consisting of faculty from the academic units participating in the Program.

Biomedical and health informatics is a field that is concerned with the cognitive, information processing, and communication aspects of medicine and healthcare including the information sciences and technology to support these tasks. The field covers the application of information technology in clinical medicine, medical record keeping, medical instrumentation, and healthcare management.

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Roshan D'Souza	Associate Professor (College of Engineering and Applied Science)	PhD	University of California Berkeley	✓	
Adam Greenberg	Assistant Professor (Medical College of Wisconsin faculty)	PhD	Johns Hopkins University		
Yi Hu	Assistant Professor (College of Engineering and Applied Science)	PhD	University of Texas at Dallas	✓	
Chiang-Ching Huang	Associate Professor (Zilber School of Public Health)	PhD	University of Michigan-AnnArbor	✓	
Rohit Kate	Assistant Professor (College of Health Sciences)	PhD	University of Texas at Austin	✓	
Chiu-tai Law	Associate Professor (College of Engineering and Applied Science)	PhD	Purdue University	✓	
Jake Luo	Assistant Professor (College of Health Sciences)	PhD	Queen's University, Belfast, U.K.	✓	
Amol Mali	Associate Professor (College of Engineering and Applied Science)	PhD	Arizona State University	✓	
Susan McRoy	Professor (College of Engineering and Applied Science)	PhD	University of Toronto	✓	
Devendra Misra	Professor (College of Engineering and Applied Science)	PhD	Michigan State University	✓	
Ethan Munson	Professor (College of Engineering and Applied Science)	PhD	University of California-Berkeley	✓	
Derek Nazareth	Associate Professor (Lubar School of Business)	PhD	Case Western Reserve University	✓	
Jessica Olson	Assistant Professor (Medical College of Wisconsin faculty)	PhD	Medical College of Wisconsin		
Anna Palatnik	MD, Obstetrics and Gynecology	MD	Sackler School of Medicine at Tel-Aviv University		

Mohammad Habib Rahman	Assistant Professor (College of Engineering and Applied Science)	PhD	Université of Québec, Canada	✓
Nathan Salowitz	Assistant Professor (College of Engineering and Applied Science)	PhD	Stanford University	✓
Mathew Scanlon	Professor (Medical College of Wisconsin faculty)	MD	Loyola Stritch School of Medicine, Chicago	
Atish Sinha	Professor (Lubar School of Business)	PhD	University of Pittsburgh	✓
Ehsan S. Soofi	Professor (Lubar School of Business)	PhD	University of California-Riverside	✓
Yongjin Sung	Assistant Professor (College of Engineering and Applied Science)	PhD	Massachusetts Institute of Technology	✓
AkkeNeel Talsma	Associate Professor (College of Nursing)	PhD	University of Michigan-Ann Arbor	✓
Weizhong Wang	Associate Professor (College of Engineering and Applied Science)	PhD	University of Maryland	✓
Min Wu	Associate Professor (College of Health Sciences)	PhD	University of North Carolina at Chapel Hill	✓
Zeyun Yu	Associate Professor (College of Engineering and Applied Science)	PhD	University of Texas-Austin	✓
Jun Zhang	Professor (College of Engineering and Applied Science)	PhD	Rensselaer Polytechnic Institute	✓
Tian Zhao	Associate Professor (College of Engineering and Applied Science)	PhD	Purdue University	✓

## Biomedical and Health Informatics, PhD

The PhD in Biomedical and Health Informatics is an interdisciplinary doctoral program offered by UWM through collaboration between several academic units at UWM and the Medical College of Wisconsin. The Program is housed in the UWM Department of Electrical Engineering and Computer Science. It is guided by a Steering Committee consisting of faculty from the academic units participating in the Program.

Biomedical and health informatics is a field that is concerned with the cognitive, information processing, and communication aspects of medicine and healthcare including the information sciences and technology to support these tasks. The field covers the application of information technology in clinical medicine, medical record keeping, medical instrumentation, and healthcare management.

The main goal of the PhD program is to prepare graduates to perform advanced research in the discipline and to assume leadership roles in medical and healthcare industries. The degree is philosophically conceptualized as involving several disciplines in a collaborative learning process with the goal of fostering inter-professional interactions and inquiry. This degree will build upon existing graduate programs and research in the participating units. Qualified students with strong academic records in any of these programs will be considered for admission.

Other participating units:

- College of Health Sciences
- College of Nursing
- Lubar School of Business
- School of Information Studies
- Zilber School of Public Health
- The Medical College of Wisconsin

## Requirements

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Admission

An applicant must meet the UWM Graduate School requirements as well as the following to be considered for admission to the program:

Master's degree in biomedical and health informatics or a related area such as Computer Science, Electrical Engineering, Health Sciences, Business Administration, Nursing; or an MD degree. Exceptionally

strong candidates with Bachelor's degree in a related area will also be considered for admission.

1. At least two letters of recommendation that attest to academic and/or professional qualifications.
2. Scores from the GRE (general) or GMAT or MCAT (test taken within the last five years.)

For applicants who intend to satisfy the English proficiency requirement by submission of test scores, a score of at least 79 on the computer-based Test of English as a Foreign Language (TOEFL) IBT is required. A score of 6.5 on the international English Language Testing Systems (IELTS) examination will be required in lieu of the TOEFL.

Requests for financial support must also be submitted below:

Co Director  
Biomedical and Health Informatics Program  
College of Engineering and Applied Science  
University of Wisconsin-Milwaukee  
Milwaukee, WI 53201

## Areas of Concentration

The PhD program requires a student to follow one of the following six areas of concentration. (At the time of application, each applicant should indicate a preferred area of concentration in their statement of Reasons for Graduate Study.)

### Translational Bioinformatics Track

The track in Translational Bioinformatics centers on driving the flow of knowledge from "bench to bedside", bridging the gap between basic and clinical informatics research. This discipline has applications to drug development, genetics research, and the use of animal models to develop new understandings or treatments, which has implications both to basic science and to commercialization.

### Knowledge Based Systems Track

The Knowledge Based Systems track is designed to train students in the development of techniques to support decision-making in medical practice (including both clinical and administrative decision-making) and customized instruction on health and medical topics for patients and health care providers. Technical areas include decision analysis, expected utility theory and cost-effectiveness analysis, computer-based decision support systems, user modeling and user interface design, intelligent tutoring systems, knowledge representation, structured reporting, and data mining and knowledge discovery.

### Health Services Management & Policy Track

Health services management and policy research is broad in scope and touches on all of the standard functional business areas (e.g., management, strategy and marketing, finance/economics, management information systems, human resources management) in addition to government health policy/reimbursement/regulation, insurance and other payer mechanisms, dealing with health professionals, and illness/health in individuals and in populations. The track is designed to equip students to deal with both management information and with population health and illness information and research to understand the implications of such information and research, and to transform inferences from that information and research into practical recommendations on the national, state, and local level. By its nature, it is applied to health services settings including hospitals, skilled-nursing facilities, medical group practices, public health agencies, mental health services, managed care organizations, and integrated health networks.

### Health Information Systems Track

The track in Health Information Systems is designed to explore the role of administrative and clinical information systems in health care organizations. Attention will be directed at the design, implementation, and maintenance of the broad array of computer applications used in the health care industry. An interdisciplinary approach will be taken drawing on expertise from the health professions, management information systems, and library and information science. Curricular content will range from systems analysis and design, system efficacy and management, to e-commerce.

### Medical Imaging and Instrumentation Track

The track in Medical Imaging and Instrumentation is designed to train students in understanding and developing medical imaging systems and medical electronic instrumentation. The aspects emphasized in this track are medical imaging systems, image processing, computer vision, pattern recognition, medical instrumentation development and optimization, computer modeling, applications of electric and magnetic fields, and wireless communication.

### Public Health Informatics Track

The Public Health Informatics track is designed to train students in the development of techniques, methods and tools to conduct public health research and to provide public health programs and tools for practical use. Graduates of this track will also be able to provide customized instruction on public health and related biomedical topics for public health workers, the public and others such as those in public health policy who will benefit from public health informatics. Technical areas include databases, tools and techniques for acquiring, processing, warehousing, and analyzing public health data. Other areas of expertise include utility theory and cost-effectiveness analysis, computer-based decision support systems, user modeling and user interface design, intelligent tutoring systems, structured reporting, and data mining.

## Credits and Courses

Students enrolled in this program must follow all UWM Graduate School requirements and regulations. The minimum requirement for the Ph.D. in Biomedical and Health Informatics will be 58-63 credits beyond the bachelor's degree. Up to 24 credits from a related master's degree may be applied toward the Ph.D.

The curriculum will consist of a common set of core courses for all tracks, required and elective courses for each individual track, and the dissertation. The purpose of the core is to ensure that all graduates of the program share a basic common knowledge in biomedical and health informatics. The purpose of the tracks is to enable the students to develop significant strengths in specific sub-areas within biomedical and health informatics. The courses identified in the curriculum are offered by UWM or MCW and, in some case, by both institutions. Following are descriptions of these components and their corresponding credit requirements.

### Core Courses

The core courses provide a comprehensive structure for the foundations needed for all students in biomedical and health informatics irrespective of their special interests. This includes a series of seminars that deal with different aspects of biomedical and health informatics. All students must take the following core courses or must have taken equivalent courses in previous study.

Code	Title	Credits
<b>Core Courses</b>		
Select one of the following:		2-3
MCW 13200(A,B)	Medical Informatics, 6 quarter cr	
HI 700	Introduction to Health Care Informatics	
Select one of the following:		3
BMS 701	Human Pathophysiology I	
HCA XXX	Physiology and Disease Informatics	
Select the following for four 1-credit semesters		4
COMPSCI 870	Medical Informatics Seminar (or at MCW)	
COMPSCI 557	Introduction to Database Systems	3
or BUS ADM 749	Data and Information Management	
Select one of the following:		1-3
HI 722	Legal, Ethical and Social Issues in Health Care Informatics	
MCW 12202	Medical Ethics (1cr)	
MCW 10222	Ethics and Integrity in Science (1cr)	
<b>Total Credits</b>		<b>13-16</b>

**Knowledge Based Systems Track**

Code	Title	Credits
<b>Required</b>		
COMPSCI 535	Algorithm Design and Analysis	3
COMPSCI 710	Artificial Intelligence	3
or HI 742	Computational Intelligence in Health Informatics	
BUS ADM 741	Web Mining and Analytics	3
or COMPSCI 425	Introduction to Data Mining	
COMPSCI 743	Intelligent User Interfaces	3
or COMPSCI 747	Principles & Practices of User Interface Design	

**Required Mathematics & Quantitative Methods**

<i>Statistics</i>		
Select one of the following:		3
BUS ADM 795	Seminar-in-Management:	
BUS ADM 995	Doctoral Seminar in Decision Sciences:	
ED PSY 624	Educational Statistical Methods I	
MTHSTAT 871	Mathematical Statistics I	

*Probability*

ECON 413	Statistics for Economists	3
or MATH 883	Theory of Probability	

**Track Electives**

<i>Computing and Applications</i>		
Select 12-15 credits with approval of advisor and steering committee		12-15

*Quantitative Analysis*

Select up to 6 credits with approval of advisor and steering committee		6
--	--	---

**Dissertation**

Select 12 credits from the following (use course from program of major advisor):		12
BUS ADM 997	Doctoral Dissertation	
COMPSCI 998	Doctoral Thesis	

ELECENG 998	Doctoral Thesis	
HI 890	Health Care Informatics Research and Thesis	
INFOST 998	Doctoral Dissertation	
NURS 997	Doctoral Dissertation	
PH 990	Research and Dissertation	

**Total Credits 48-51**

**Health Services Management & Policy Track**

Code	Title	Credits
<b>Required</b>		
BUS ADM 755	Health Care Administration and Delivery Systems	3
BUS ADM 757	Managed Care and Integrated Health Networks	3
BUS ADM 744	Information Technology Strategy and Management	3
BUSMGMT 720	Strategic Management in Health Care Organizations	3
BUSMGMT 727	Health Care Accounting, Law and Ethics	3
BUS ADM 990	Doctoral Seminar in Strategic Management:	3
BUS ADM 996	Doctoral Seminar in Organizations:	3

**Required Mathematics & Quantitative Methods**

BUS ADM 918	Doctoral Seminar in Behavioral Research Methods in Management	3
Select one of the following:		3
BUS ADM 714	Multivariate Techniques in Management Research	
ECON 513	Introduction to Econometrics	
ED PSY 624	Educational Statistical Methods I	
ECON 710	Applied Econometrics	

**Track Electives**

Select 9 credits with approval of advisor and steering committee		9
--	--	---

**Dissertation**

Select 12 credits from the following (use course from program of major advisor):		12
BUS ADM 997	Doctoral Dissertation	
COMPSCI 998	Doctoral Thesis	
ELECENG 998	Doctoral Thesis	
HI 890	Health Care Informatics Research and Thesis	
INFOST 998	Doctoral Dissertation	
NURS 997	Doctoral Dissertation	
PH 990	Research and Dissertation	

**Total Credits 48**

**Health Information Systems Track**

Code	Title	Credits
<b>Required</b>		
BUS ADM 744	Information Technology Strategy and Management	3
BUS ADM 747	Service-Oriented Analysis and Design	3
BUS ADM 817	Connected Systems for Business	3
or COMPSCI 759	Data Security	

COMPSCI 720	Computational Models of Decision Making	3
HI 721	Health Information Technology Procurement	3
HI 723	Health Care Systems Applications - Administrative and Clinical	3
or HI 760	Biomedical and Healthcare Terminology and Ontology	

**Research Methods**

Select one of the following: 3

IND ENG 716	Engineering Statistical Analysis	
BUS ADM 714	Multivariate Techniques in Management Research	
BUS ADM 918	Doctoral Seminar in Behavioral Research Methods in Management	
BUS ADM 991	MIS Doctoral Seminar II: (Subtitled)	
NURS 882	Qualitative Methods in Health Research	
NURS 883	Quantitative Methods in Health Research	

**Track Electives**

Select 12 credits with approval of advisor and steering committee 12

**Dissertation**

Select 12 credits from the following (use course from program of major advisor): 12

BUS ADM 997	Doctoral Dissertation	
COMPSCI 998	Doctoral Thesis	
ELECENG 998	Doctoral Thesis	
HI 890	Health Care Informatics Research and Thesis	
INFOST 998	Doctoral Dissertation	
NURS 997	Doctoral Dissertation	
PH 990	Research and Dissertation	

**Total Credits** 45**Medical Imaging & Instrumentation Track**

Code	Title	Credits
<b>Required</b>		
ELECENG 436	Introduction to Medical Instrumentation	3
ELECENG 437	Introduction to Biomedical Imaging	3
ELECENG 439	Introduction to Biomedical Optics	3
ELECENG/COMPSCI 712	Image Processing	3
or ELECENG 716	Tomography: Imaging and Image Reconstruction	
ELECENG 737	Medical Imaging Signals and Systems	3
or ELECENG 765	Introduction to Fourier Optics and Optical Signal Processing	

**Track Electives**

Select 21 credits with approval of advisor and steering committee 21

**Dissertation**

Select 12 credits from the following (use course from program of major advisor): 12

BUS ADM 997	Doctoral Dissertation	
COMPSCI 998	Doctoral Thesis	
ELECENG 998	Doctoral Thesis	

HI 890	Health Care Informatics Research and Thesis	
INFOST 998	Doctoral Dissertation	
NURS 997	Doctoral Dissertation	
PH 990	Research and Dissertation	

**Total Credits** 48**Public Health Informatics Track**

Code	Title	Credits
<b>Required</b>		
PH 701	Public Health Principles and Practice	3
PH 704	Principles and Methods of Epidemiology	3
PH 709		3
COMPSCI 535	Algorithm Design and Analysis	3
<b>Required Statistics &amp; Quantitative Methods</b>		
PH 702	Introduction to Biostatistics	3
PH XXX	Seminar in Biostatistics and Bioinformatics	1
PH 713		3
PH XXX	Data Management, Visualization, and Advanced Statistical Computing	3

**Track Electives***Computing and Applications*

Select 6 credits with approval of advisor and steering committee 6

*Quantitative Analysis*

Select 6 credits with approval of advisor and steering committee 6

**Dissertation**

Select 12 credits from the following (use course from program of major advisor): 12

BUS ADM 997	Doctoral Dissertation	
COMPSCI 998	Doctoral Thesis	
ELECENG 998	Doctoral Thesis	
HI 890	Health Care Informatics Research and Thesis	
INFOST 998	Doctoral Dissertation	
NURS 997	Doctoral Dissertation	
PH 990	Research and Dissertation	

**Total Credits** 46**Translational Bioinformatics Track**

Code	Title	Credits
<b>Required</b>		
Select one of the following: 2-3		
BIO SCI 490	Molecular Genetics	
MCW 20240	Translational Genetics, 2 cr	
Select one of the following: 3		
PH XXX	Introduction to Bioinformatics, 3 cr	
MCW 17201	Bioinformatics I: Introduction to Bioinformatics, 3 cr	
MARQ BIIN 6000	Introduction to Bioinformatics, 3 cr	
MARQ BIOL 5201	Genomics and Bioinformatics, 3 cr	
Select one of the following: 2-3		
PH XXX	Translational Bioinformatics, 3 cr	

Or both of the following:		
MCW 20100	Introduction to Clinical and Translational Research, 1 cr	
and MCW 20261	Clinical Trial Design, 1 cr	
Select one of the following:		3
COMPSCI 425	Introduction to Data Mining	
ELECENG/COMPSCI 711	Introduction to Machine Learning	
BUS ADM 741	Web Mining and Analytics	
MARQ ENMA 6060	Innovation and Technology, 3cr	
Select one of the following:		3
HI 760	Biomedical and Healthcare Terminology and Ontology	
BUS ADM 814	Enterprise Knowledge & Semantic Management	
COMPSCI 810	Knowledge Representation	
InfoSt 714	Metadata, 3cr	
Select one of the following:		2-3
HI 723	Health Care Systems Applications - Administrative and Clinical	
MCW 14230	Product Development of Medical Devices, 2 cr	

**Quantitative Methods**

Select 9 credits from the following:		9
NURS 883	Quantitative Methods in Health Research	
MATH 883	Theory of Probability	
PH 702	Introduction to Biostatistics	
PH XXX	Statistical Genetics and Genetic Epidemiology, 3cr	
PH XXX	Applied Quantitative Methods for Studying Population Health and Health Disparities, 3 cr	

Select a maximum of one of the following:

MCW 11200	Introduction to Epidemiology, 3 cr
PH 704	Principles and Methods of Epidemiology

Select a maximum of one of the following:

PH 711	Intermediate Biostatistics
MCW 04201	Biostatistics II, 3cr

**Track Electives**

Select 9 credits with approval of advisor and steering committee	9
--	---

**Dissertation**

Select 12 credits from the following (use course from program of major advisor):	12
BUS ADM 997	Doctoral Dissertation
COMPSCI 998	Doctoral Thesis
ELECENG 998	Doctoral Thesis
HI 890	Health Care Informatics Research and Thesis
INFOST 998	Doctoral Dissertation
NURS 997	Doctoral Dissertation

PH 990	Research and Dissertation	
<b>Total Credits</b>		<b>45-48</b>

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student have a major professor to advise, supervise and approve the program of study before registering for courses. The Biomedical and Health Informatics Steering Committee will assign the incoming student to a temporary Program Advisor at the time of admission. Prior to the completion of 12 credit (9 credits for a part-time student), the student must select a major professor who will be the student's dissertation advisor. The student, in consultation with the major professor, develops a program of study which is submitted to the Biomedical and Health Informatics Steering Committee for approval. For subsequent changes, the student must file a revised program of study for approval.

### Doctoral Program Committee

The Doctoral Program Committee is proposed by the Major Professor in consultation with the student by the end of the student's first year of enrollment. The Program Committee, subject to the approval of the Biomedical and Health Informatics Steering Committee, shall consist of the Major Professor and at least four graduate faculty members, including at least one with health care and/or medical background, and one with informatics background.

### Residence

The student must meet Graduate School residence requirements.

### Qualifying Examination

A qualifying examination must be taken to determine whether the student is qualified to perform advanced doctoral level work in biomedical and health informatics. This examination is administered by the steering committee and must be taken prior to the completion of 21 credits of coursework in the program.

### Doctoral Preliminary Examination

The student is also required to take a preliminary examination after all the coursework is completed and prior to the advancement of candidacy to determine the student's preparation for independent research. Prior to the examination, the student must present a proposal for a doctoral dissertation. The preliminary examination may cover both graduate course material and the dissertation proposal. The preliminary examination must be successfully completed within five years of initial enrollment.

### Dissertation

The candidate must complete a dissertation presenting independent original research that adds to the existing body of knowledge in biomedical and health informatics. It should be of such caliber that warrants publication in respected journals.

### Dissertation Defense

The final oral examination will be an oral defense of the dissertation but may also cover the general field of the primary area of study. The examination may not be taken until all other degree requirements are satisfied. A majority of the examination committee members must approve the dissertation in order for the student to pass. The final oral examination must be taken within five years after passing the preliminary examination. Candidates who exceed this time limit may be required

to retake the preliminary examination and be admitted to candidacy a second time.

### Time Limit

All components of the PhD program must be completed within 10 years of matriculation.

## Biomedical Engineering

Biomedical engineers apply mathematics, science, and engineering knowledge to solve healthcare-related problems that improve quality of life and reduce the cost of healthcare to society. They design assistive,

diagnostic, and therapeutic tools, in collaboration with healthcare professionals. They work in research institutions, clinics, and industry.

According to the United States Bureau of Labor Statistics, employment of biomedical engineers is projected to grow 23 percent from 2014 to 2024, much faster than the average for all occupations. Growing technology and its application to medical equipment and devices, along with an aging population, will increase demand for the work of biomedical engineers.

### Programs

- Biomedical Engineering, BSE (p. 568)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Mahsa Dabagh	Assistant Professor	PhD	Lappeenranta University of Technology	✓	
Ranjan Dash	Adjunct Associate Professor (Medical College of Wisconsin faculty)	PhD	Indian Institute of Technology		
Guilherme Garcia	Adjunct Associate Professor (Medical College of Wisconsin faculty)	PhD	Universidade Federal de Minas Gerais, Brazil		
Veysi Malkoc	Visiting Assistant Professor	PhD	The Ohio State University		
Devendra Misra	Professor, Chair	PhD	Michigan State University	✓	
Priyatha Premnath	Assistant Professor	PhD	Ryerson University	✓	
Jacob Rammer	Assistant Professor	PhD	Marquette University	✓	
Pradeep Rohatgi	UWM Distinguished Professor	ScD	Massachusetts Institute of Technology		
Brooke Slavens	Associate Professor	PhD	Marquette University	✓	

## Biomedical Engineering, BSE

Biomedical engineering (BME) students at UWM will learn to translate engineering principles into clinical methods. Students will also engage in collaborative and interdisciplinary research projects with labs in the College of Engineering & Applied Science, College of Letters & Science, College of Health Sciences, School of Nursing, School of Public Health, and with local industry.

The BME undergraduate program emphasizes engineering design in preparation for employment in biomedical industries or launching startups in this fast-growing field. Freshmen and sophomores take a core curriculum that provides a foundation of engineering principles and tools, software application, anatomy and physiology, and communication skills. Juniors take courses on sensors and actuators, biomedical signal processing and medical devices. Seniors also work on capstone design projects and the Product Realization course in multidisciplinary teams. A wide variety of elective courses allow juniors and seniors to specialize in the area of their choice.

#### Current focus areas include:

- Assistive Technology
- Biomechanics
- Medical Imaging
- Medical Instrumentation
- Rehabilitation Engineering

#### Key aspects of the undergraduate program include:

- **Design projects**, throughout the curriculum
- **Hands-on laboratories**
- **Flexibility in biomedical engineering** with depth through specialization areas
- **Industry cooperatives/internship opportunities**
- **Research opportunities in world-class labs** that make UWM one of the nation's top research universities (rated R1 by the Carnegie Classification of Institutions of Higher Education); the only one in southeastern Wisconsin

#### Career Paths

Biomedical engineers work with medical scientists, other medical researchers, and manufacturers to address a wide range of injuries and physical disabilities. Their ability to work on different activities with other professionals is enlarging the range of applications for biomedical products and services, particularly in healthcare.

- Clinical or Field Engineer
- Staff Engineer
- Manufacturing Engineer
- Researcher
- Quality Engineer
- Sales Engineer

## New Freshmen

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile, grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology, chemistry, and physics). The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

## Transfer Students

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

## Biomedical Engineering Curriculum

The minimum number of credits required to complete the Bachelor of Science in Biomedical Engineering is 120.

Code	Title	Credits
<b>Major Requirement - 51 credits</b>		
BIO SCI 202	Anatomy and Physiology I	4
BIO SCI 203	Anatomy and Physiology II	4
BME 101	Fundamentals of Biomedical Engineering	3
BME 296	Fundamentals of Biomaterials	4
BME 302	Analysis and Modeling of Dynamic Systems	4
BME 306	Introduction to Engineering Biomechanics	4
BME 310	Biomedical Signals and Systems	3
BME 320	Engineering of Biomedical Devices I	4
BME 325	Engineering of Biomedical Devices II	3
BME 495	Biomedical Instrumentation Laboratory	3
BME 595	Capstone Design Project	4
EAS 110	Fundamentals of Smart Systems Engineering I	2
EAS 200	Professional Seminar	1

EAS 210	Fundamentals of Smart Systems Engineering II	2
COMPSCI 202	Introductory Programming Using Python	3
or COMPSCI 250	Introductory Computer Programming	
KIN 270	Statistics in the Health Professions: Theory and Practice	3

<b>Engineering Requirement- 15 credits</b>		
Select any 15 credits from 200 or higher-level courses from BME, CIV ENG, ELECENG, IND ENG, MATLENG, MECHENG; at least 9 of these credits must be from 300 or higher-level courses. Courses cannot be double counted as part of other requirements of the program.		15

<b>Mathematics Requirement - 16 credits <sup>1</sup></b>		
MATH 231	Calculus and Analytic Geometry I	4
MATH 232	Calculus and Analytic Geometry II	4
MATH 233	Calculus and Analytic Geometry III	4
ELECENG 234	Analytical Methods in Engineering	4

<b>Physics Requirement - 8 credits</b>		
PHYSICS 209	Physics I (Calculus Treatment)	4
PHYSICS 210	Physics II (Calculus Treatment)	4

<b>Technical Electives - 9 credits</b>		
Select 9 credits from the approved technical electives list below: <sup>2</sup>		9

BIO SCI 150	Foundations of Biological Sciences I	
BIO SCI 152	Foundations of Biological Sciences II	
BME 585	Advanced Biomaterials	
BME 599	Senior Thesis	
BME 690	Topics in Biomedical Engineering:	
BME 699	Independent Study	
BUS ADM 447	Entrepreneurship	
CHEM 102	General Chemistry	
CHEM 104	General Chemistry and Qualitative Analysis	
CHEM 343	Organic Chemistry	
CHEM 344	Organic Chemistry Laboratory	
CHEM 345	Organic Chemistry	
CIV ENG 311	Introduction to Energy, Environment and Sustainability	
COMPSCI 411	Machine Learning and Applications	
EAS 1	Engineering Co-op Work Period	
EAS 497	Study Abroad:	
ELECENG 361	Electromagnetic Fields	
ELECENG 410	Digital Signal Processing	
ELECENG 436	Introduction to Medical Instrumentation	
ELECENG 437	Introduction to Biomedical Imaging	
IND ENG 360	Engineering Economic Analysis	
MECHENG 320	Introduction to Fluid Mechanics	
MECHENG 474	Introduction to Control Systems	

<b>GER Distribution Requirement - 15 credits</b>		
Arts		3
Humanities		3
Social Science		6
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	3

Cultural Diversity - Arts, Humanities, or Social Science course must also satisfy UWM Cultural Diversity Requirement

<b>Free Electives</b>	<b>6</b>
<b>Students must also satisfy Oral and Written Communication (OWA) Part A<sup>3</sup></b>	<b>0-6</b>
<b>Students must also Satisfy the UWM Foreign Language requirements (0-8)<sup>3</sup></b>	<b>0-8</b>
<b>Total Credits</b>	<b>120</b>

<sup>1</sup> MATH 221 and MATH 222 may substitute for MATH 231, MATH 232, and MATH 233.

<sup>2</sup> The following courses are approved technical electives, but are currently inactive: ELECENG 437, ELECENG 438, ELECENG 539.

<sup>3</sup> See General Education Requirements (p. 30).

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.
2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation, course selection, program planning, and credit transfer evaluation. Students are assigned to a permanent professional advisor as soon as

they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,
- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## Honors in the Major

Students in Biomedical Engineering who meet all of the following criteria can be awarded honors in the major upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all CEAS courses counting toward the Biomedical Engineering major;
3. A 3.500 GPA over all upper-division (300 level and higher) BME courses; and
4. At least one of the following:
  - a. Successful completion of 3 credits of research experience via senior thesis (BME 599) and/or an approved independent study (BME 699).
  - b. Participation in the Accelerated MS program with successful completion of 6 credits in approved courses for the Biomedical Engineering concentration in the MS in Engineering Program.

Students who believe they may qualify for honors in Biomedical Engineering should apply to the College of Engineering & Applied Science during their last semester of study.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses

### Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

### Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program. For more information, contact the Office of Student Services at (414) 229-4667.

## Civil and Environmental Engineering

Civil engineering is a profession that deals with the infrastructure of society. Civil engineers design bridges, buildings, and other structures;

develop and design water resources, waste treatment, and environmental management facilities; plan and design highway and transportation systems; and design foundations, earth and rock structures, and tunnels. Students completing a civil engineering program have an opportunity for professional employment with industry; utilities; consulting firms; contractors; local, state, and federal government agencies; research laboratories; and academia.

## Mission Statement

The mission of the UWM undergraduate Civil Engineering Program is to educate students to become civil engineering professionals who plan,

design, build, and manage the infrastructure needed for a modern urban society and the environment.

## Programs

- Civil Engineering, BSE (p. 572)
- Environmental Engineering, BSE (p. 576)
- Professional Practice in Civil Engineering Infrastructure, Graduate Certificate (p. 580)
- Structural Engineering, Minor (p. 581)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Edward A. Beimborn	Professor	PhD, PE			✓
Hector R. Bravo	Professor, Chair	PhD	University of Iowa		✓
Erik R. Christensen	Professor	PhD, PE			✓
Rani El-Hajjar	Associate Professor	PhD	University of Nebraska	✓	
Al Ghorbanpoor	Professor	PhD, PE	University of Maryland		✓
Andrew Graettinger	Professor, Associate Dean for Research	PhD	Northwestern University	✓	
Sam Helwany	Professor	PhD, PE	University of Boulder, Colorado	✓	
Alan J. Horowitz	Professor	PhD, PE			✓
Kwang K. Lee	Professor	PhD, PE			✓
Jin Li	Professor	PhD	University of Cincinnati	✓	
Qian Liao	Associate Professor	PhD	Cornell University	✓	
Tarun R. Naik	Professor	PhD, PE			✓
Xiao Qin	Professor	PhD	University of Connecticut	✓	
Adeeb Rahman	Associate Professor	PhD	University of Wisconsin-Madison	✓	
Konstantin Sobolev	Professor	PhD	Research Institute of Concrete and Reinforced Concrete, Russia	✓	
Habibollah Tabatabai	Associate Professor	PhD, PE	University of Florida, Gainesville	✓	
Hani H. Titi	Professor	PhD, PE	Louisiana State University	✓	
Yin Wang	Assistant Professor	PhD	Washington University in St. Louis	✓	
Jian Zhao	Associate Professor	PhD	University of Minnesota, Minneapolis	✓	

## Civil Engineering, BSE

Civil Engineering is a profession that deals with the infrastructure of society and impacts your everyday life. From the roads and bridges you use every day to the drinking water that comes out of your tap at home, civil engineers work to develop safe, efficient and sustainable ways to continually improve our infrastructure.

### Concentrations

- Geotechnical engineering
- Structural engineering
- Transportation and municipal engineering
- Water resources and environmental engineering

### Research

Work with faculty engaged in leading-edge research in areas such as:

- Social and environmental impacts of transportation development
- Flexible pavement design
- Fatigue and fracture mechanics
- Hydrodynamic modeling
- Environmental fluid mechanics
- Application of nanomaterials in construction

### Career Paths

Civil engineers work in all levels of government and throughout the private sector.

- Structural Designer
- Construction Manager
- City Engineer
- Stormwater Manager
- Foundation Engineer
- Resident Engineer

## Accreditation

The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET: <https://www.abet.org> (<https://tinyurl.com/u7fsfevw/>).

## New Freshmen

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile, grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology, chemistry, and physics). The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

## Transfer Students

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

## Civil Engineering Curriculum

The minimum number of credits required to complete the Bachelor of Science in Engineering with a major in civil engineering is 120.

Code	Title	Credits
<b>Engineering Core (23 Credits)</b>		
CIV ENG 203	Introduction to Solid Mechanics	4
CIV ENG 202	Dynamics	3
EAS 200	Professional Seminar	1
IND ENG 111	Introduction to Engineering <sup>1</sup>	3
IND ENG 112	Engineering Drawing & Computer Aided Design/Drafting <sup>1</sup>	3
IND ENG 360	Engineering Economic Analysis	3
IND ENG 367	Introductory Statistics for Physical Sciences and Engineering Students	3
MECHENG 320	Introduction to Fluid Mechanics	3
<b>Major Requirements (26 Credits)</b>		
CIV ENG 250	Engineering Surveying	3

CIV ENG 335	Soil Mechanics	3
CIV ENG 372	Introduction to Structural Design	4
CIV ENG 411	Engineering Principles of Water Resources Design	3
CIV ENG 413	Environmental Engineering	3
CIV ENG 431	Materials of Construction <sup>2</sup>	3
CIV ENG 490	Transportation Engineering	3
CIV ENG 494	Principles of Civil Engineering Design	1
CIV ENG 495	Senior Design	3
<b>Mathematics Requirement (16 Credits) <sup>3</sup></b>		
MATH 231	Calculus and Analytic Geometry I	4
MATH 232	Calculus and Analytic Geometry II	4
MATH 233	Calculus and Analytic Geometry III	4
ELECENG 234	Analytical Methods in Engineering	4
<b>Chemistry Requirement (5 Credits)</b>		
CHEM 105 or CHEM 102	General Chemistry for Engineering General Chemistry	5
<b>Physics Requirement (8 Credits)</b>		
PHYSICS 209 & PHYSICS 210	Physics I (Calculus Treatment) and Physics II (Calculus Treatment)	8
<b>Technical Electives - Select 21 credits from approved lists</b>		<b>21</b>
<b>GER Distribution Requirement (15 Credits)</b>		
Select 3 credits in Art		3
Select 3 credits in Humanities		3
Select 6 credits of Social Science		6
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	3
Cultural Diversity - One of the arts, humanities, or social science courses selected must also meet the UWM cultural diversity requirement.		
<b>Free Electives - Select 6 credits of free electives</b>		<b>6</b>
<b>Students must also satisfy Oral and Written Communication (OWA) Part A <sup>4</sup></b>		<b>0-6</b>
<b>Students must also Satisfy the UWM Foreign Language requirements <sup>4</sup></b>		<b>0-8</b>
<b>Total Credits</b>		<b>120</b>

<sup>1</sup> MECHENG 110 and MECHENG 111 may substitute for IND ENG 111 and IND ENG 112 for students transferring from another engineering major.

<sup>2</sup> Civil engineering majors may take MATLENG 201 in place of CIV ENG 431.

<sup>3</sup> MATH 221, MATH 222 and two free elective credits may substitute for MATH 231, MATH 232 and MATH 233.

<sup>4</sup> See General Education Requirements (p. 30).

## Technical Electives

A minimum of 21 technical elective credits are required. At least 15-21 credits are required from Group A Technical Electives and 0-6 credits from Group B Technical Electives. Normally a minimum of 12 credits will be taken in an area of concentration.

**Code Title Credits**

**Group A Technical Electives - Take 15 to 21 credits of Group A electives. All non-required Civ Eng courses 400-699 are Group A Technical Electives.**

CIV ENG 311	Introduction to Energy, Environment and Sustainability	
CIV ENG 360	Introduction to Structural Analysis	
CIV ENG 401	Intermediate Strength of Materials	
CIV ENG 412	Applied Hydrology	
CIV ENG 431	Materials of Construction	
CIV ENG 455	Construction Planning, Equipment, and Methods	
CIV ENG 456	Foundation Engineering	
CIV ENG 463	Introduction to Finite Elements	
CIV ENG 466	Design of Composite Structures	
CIV ENG 480	Software Applications for Civil Engineering	
CIV ENG 492	Environmental Impact Assessment	
CIV ENG 502	Experimental Stress Analysis	
CIV ENG 511	Water Supply and Sewerage	
CIV ENG 521	Water Quality Assessment	
CIV ENG 555	Sustainable Construction Materials and Technologies	
CIV ENG 560	Intermediate Structural Analysis	
CIV ENG 571	Design of Concrete Structures	
CIV ENG 572	Design of Steel Structures	
CIV ENG 573	Design of Masonry and Wood Structures	
CIV ENG 574	Design of Prestressed Concrete Structures	
CIV ENG 579	Earthquake Engineering	
CIV ENG 590	Urban Transportation Planning	
CIV ENG 592	Traffic Control	
CIV ENG 594	Physical Planning and Municipal Engineering	
CIV ENG 596	Transportation Facilities Design	
CIV ENG 598	Pavement Analysis and Design	
CIV ENG 610	Introduction to Water and Sewage Treatment	
CIV ENG 614	Hazardous Waste Management	
CIV ENG 616	Computational Hydraulics and Environmental Flows	
CIV ENG 691	Topics in Civil Engineering:	

**Group B Technical Electives**

Select no more than 6 credits from the following list:

Any Chemistry course 200-level or above	
Any Engineering or Mathematics course at the 400-level or above	
Any Physics course 300-level or above	
CHEM 104	General Chemistry and Qualitative Analysis <sup>1</sup>
COMPSCI 250	Introductory Computer Programming <sup>2</sup>
EAS 1	Engineering Co-op Work Period <sup>3</sup>
ENGLISH 206	Technical Writing

ELECENG 301	Electrical Circuits I
GEOG 215	Introduction to Geographic Information Science
GEOG 403	Remote Sensing: Environmental and Land Use Analysis
MATH 313	Linear Programming and Optimization
MATH 322	Introduction to Partial Differential Equations
PHYSICS 214	Lab Physics I (Calculus Treatment)
PHYSICS 215	Lab Physics II (Calculus Treatment)
URBPLAN 591	Introduction to Urban Geographic Information Systems (GIS) in Planning

<sup>1</sup> Students who take CHEM 104 satisfy 3 credits of Group B Electives.

<sup>2</sup> COMPSCI 202 Introductory Programming Using Python is an acceptable alternative.

<sup>3</sup> Students who earn 3 or more credits of Co-op may use 3 of those credits as approved technical electives.

## Areas of Concentration

The Civil & Environmental Engineering Department offers numerous elective courses that allow students to work in one of four areas of concentration.

Code	Title	Credits
<b>Geotechnical Engineering</b>		
Students in this concentration should complete:		
CIV ENG 456	Foundation Engineering	
And at least three of the following courses:		
CIV ENG 360	Introduction to Structural Analysis	
CIV ENG 401	Intermediate Strength of Materials	
CIV ENG 412	Applied Hydrology	
CIV ENG 463	Introduction to Finite Elements	
CIV ENG 492	Environmental Impact Assessment	
CIV ENG 598	Pavement Analysis and Design	
<b>Municipal and Transportation Engineering</b>		
Students in this concentration should complete at least three of the following:		
CIV ENG 492	Environmental Impact Assessment	
CIV ENG 590	Urban Transportation Planning	
CIV ENG 592	Traffic Control	
CIV ENG 594	Physical Planning and Municipal Engineering	
CIV ENG 596	Transportation Facilities Design	
CIV ENG 598	Pavement Analysis and Design	
CIV ENG 610	Introduction to Water and Sewage Treatment	

## Structural Engineering

Students in this concentration should complete:

CIV ENG 360	Introduction to Structural Analysis
CIV ENG 401	Intermediate Strength of Materials
And at least two of the following courses:	
CIV ENG 431	Materials of Construction
CIV ENG 456	Foundation Engineering
CIV ENG 463	Introduction to Finite Elements

CIV ENG 466	Design of Composite Structures
CIV ENG 560	Intermediate Structural Analysis
CIV ENG 571	Design of Concrete Structures
CIV ENG 572	Design of Steel Structures
CIV ENG 573	Design of Masonry and Wood Structures
CIV ENG 574	Design of Prestressed Concrete Structures
CIV ENG 579	Earthquake Engineering

### Water Resources and Environmental Engineering

Students in this concentration should complete at least three of the following:

CIV ENG 311	Introduction to Energy, Environment and Sustainability
CIV ENG 412	Applied Hydrology
CIV ENG 511	Water Supply and Sewerage
CIV ENG 521	Water Quality Assessment
CIV ENG 610	Introduction to Water and Sewage Treatment
CIV ENG 614	Hazardous Waste Management

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.

2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising

from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation, course selection, program planning, and credit transfer evaluation. Students are assigned to a permanent professional advisor as soon as they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,
- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## Honors in the Major

Students in Civil Engineering who meet all of the following criteria can be awarded honors in the major upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all upper-division (300-level and higher) Civ Eng courses;
3. Participation in the Accelerated MS Degree program with successful completion of 6 credits at the undergraduate level that can apply towards the MS degree program.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold

cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses

### Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

### Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program. For more information, contact the Office of Student Services at (414) 229-4667.

## Environmental Engineering, BSE

### Environmental Engineering at UWM

Environmental engineers use the principles of engineering, soil science, biology and chemistry to develop solutions to environmental problems. Environmental engineers work to improve drinking water supply, public

health, recycling, sustainability, to control water and air pollution, and manage waste.

**Areas of Specialization**

- Water and wastewater treatment
- Air quality
- Environmental remediation
- Environmental technology
- Energy and sustainability
- Water resources management
- Environmental health

**Career Paths**

- Engineering services
- Consulting, scientific and management services
- Environmental engineering in all levels of government and throughout the private sector
- Water project manager
- Environmental health and safety engineer

**New Freshmen**

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile, grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology, chemistry, and physics). The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

**Transfer Students**

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

**Environmental Engineering Curriculum**

The minimum number of credits required to complete the Bachelor of Science in Engineering with a major in environmental engineering is 120.

Code	Title	Credits

URBPLAN 591	Introduction to Urban Geographic Information Systems (GIS) in Planning

**Total Credits****120**

<sup>1</sup> MECHENG 110 and MECHENG 111 may substitute for IND ENG 111 and IND ENG 112 for students transferring from another engineering major.

<sup>2</sup> Environmental engineering majors may take CIV ENG 431 (<https://catalog.uwm.edu/search/?P=CIV%20ENG%20431>) (with proper prerequisites) in place of MATLENG 201 (<https://catalog.uwm.edu/search/?P=MATLENG%20201>).

<sup>3</sup> MATH 221, MATH 222 and two free electives may substitute for MATH 231, MATH 232 and MATH 233.

<sup>4</sup> CHEM 102 and CHEM 104 may substitute for CHEM 105.

<sup>5</sup> See General Education Requirements (p. 30) for details.

<sup>6</sup> COMPSCI 202 Introductory Programming Using Python is an acceptable alternative.

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.
2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation, course selection, program planning, and credit transfer evaluation. Students are assigned to a permanent professional advisor as soon as they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,

- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## Honors in the Major

Students in Environmental Engineering who meet all of the following criteria can be awarded honors in the major upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all upper-division (300-level and higher) Civ Eng courses;
3. Participation in the Accelerated MS program with successful completion of 6 credits that can apply towards the MS degree program.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

## Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin

Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program. For more information, contact the Office of Student Services at (414) 229-4667.

## Professional Practice in Civil Engineering Infrastructure, Graduate Certificate

The certificate in **Professional Practice in Civil Engineering Infrastructure** offers an opportunity for practicing engineers seeking professional growth to pursue graduate education on a flexible part-time or full-time basis. The program of study is individualized to accommodate the many different focus areas in Civil and Environmental Engineering. This five-course graduate-level program will allow a student to broaden and strengthen knowledge in the areas of engineering mechanics, or environmental, geotechnical, structures, transportation, or water resource engineering by learning the most up-to-date engineering theory and techniques taught by UWM's renowned faculty.

### Certificate Features

- Student will work with the department chair and program coordinator to design a program tailored to meet the student's individual goals.
- No GRE is required for admission into the certificate program. Credits and courses required for the certificate can count towards meeting the MS degree requirements (*See Requirements tab*).
- Addresses the gap between the curriculum completed at the undergraduate level and the required knowledge required in licensure in civil engineering.
- Learn the latest theory and practice methods using the most up-to-date design codes and practices.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

The minimum GPA for admission is 2.75 in the prior bachelor's or post-baccalaureate degree. Applicants should generally have a prior degree in civil engineering or related fields. Applicants with other prior degrees will be considered via holistic assessment of the academic record and professional experience, with a focus on substantial work experience in the areas related to the certificate focus areas in engineering.

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

Code	Title	Credits
Select 15 credits of electives from any graduate level (G or U/G) courses offered by the Department of Civil and Environmental Engineering. A minimum of 6 credits are required at the 700-level or above.		15
<b>Total Credits</b>		<b>15</b>

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the

degree. (Note: Students in PhD programs must still complete the minimum residency requirements)

- Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
  3. A course may count toward no more than one certificate and one degree.
  4. Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Structural Engineering, Minor

Structural engineers focus on the design and physical integrity of buildings and other large structures, assuring they are safe and stable. They frequently work with architects and contractors. In addition to new construction, they often inspect and design plans for maintenance or renovation of existing structures.

The minor in structural engineering is designed especially for students in the following majors:

- Architecture
- Mechanical Engineering
- Industrial and Manufacturing Engineering
- Materials
- Geology
- Physics

This minor is not available to civil engineering majors.

## Requirements

The 19-credit minor requires the following:

Code	Title	Credits
<b>Required</b>		
CIV ENG 335	Soil Mechanics	3
CIV ENG 360	Introduction to Structural Analysis	3
CIV ENG 372	Introduction to Structural Design	4
CIV ENG 571	Design of Concrete Structures	3
or CIV ENG 572	Design of Steel Structures	
<b>Electives</b>		
Select two electives (see below)		6
<b>Total Credits</b>		<b>19</b>

## Electives

Code	Title	Credits
CIV ENG 401	Intermediate Strength of Materials	3
CIV ENG 431	Materials of Construction	3
CIV ENG 456	Foundation Engineering	3
CIV ENG 463	Introduction to Finite Elements	3
CIV ENG 502	Experimental Stress Analysis	3
CIV ENG 560	Intermediate Structural Analysis	3
CIV ENG 571	Design of Concrete Structures	3
CIV ENG 572	Design of Steel Structures	3
CIV ENG 573	Design of Masonry and Wood Structures	3
CIV ENG 574	Design of Prestressed Concrete Structures	3
CIV ENG 579	Earthquake Engineering	3
ARCH 321	Building Technology I	3
ARCH 421	Building Technology III	3
ARCH 422	Building Technology IV	3

More information on the minor may be obtained from the CEAS Office of Student Services: (414) 229-4667, EMS Room E386.

## Computer Engineering, BS

The Computer Engineering major is offered through the Electrical Engineering and Computer Science departments at UWM. Computer engineering pertains to the design, implementation and maintenance of hardware and software components of computers and computer-controlled equipment.

Our program provides students with a broad and strong technical background in the field. It also helps students develop a solid grounding in computing, mathematics and engineering. Students will learn to apply these theoretical principles to design hardware, software, networks, and computerized equipment for diverse application domains.

## Accreditation

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET: <https://www.abet.org> (<https://nam02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.abet.org%2F&data=02%7C01%7Cebilicki%40uwm.edu%7Cbcb1f9a3ce174b5fcecc08d863abd8be%7C0bca7ac3fcb64efd89eb6de97603cf21%7C0%7C637368937031393544&sc=2Fz8V8KR7ONCyAdv22g40jpM9w%3D&reserved=0>).

## New Freshmen

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile, grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology, chemistry, and physics). The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

## Transfer Students

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

## Laptop Requirement

A laptop is required hardware for Computer Science and Computer Engineering students beginning in the sophomore year, and for all graduate students. The specific requirements can be found here (<https://uwm.edu/engineering/laptop-requirement-cs-and-ce/>).

## Computer Engineering Curriculum

The minimum number of credits required to complete the Bachelor of Science in Computer Engineering is 120.

Code	Title	Credits
<b>Engineering Core - 17 Credits</b>		
ELECENG 140	Intro to Embedded Computing I: Digital Logic and Microprocessors	3
ELECENG 240	Intro to Embedded Computing II: C Programming for Embedded Applications	4
COMPSCI 250	Introductory Computer Programming	3
EAS 200	Professional Seminar	1
ELECENG 301	Electrical Circuits I	3
IND ENG 367	Introductory Statistics for Physical Sciences and Engineering Students	3
<b>Major Requirements - 44 Credits</b>		
COMPSCI 251	Intermediate Computer Programming	3
COMPSCI 317	Discrete Information Structures	3
COMPSCI 351	Data Structures and Algorithms	3
COMPSCI 361	Introduction to Software Engineering	3
COMPSCI 395	Social, Professional, and Ethical Issues	3
COMPSCI 458	Computer Architecture	3
COMPSCI 520	Computer Networks	3
COMPSCI 535	Algorithm Design and Analysis	3
ELECENG 305	Electrical Circuits II	4
ELECENG 310	Signals and Systems	3
ELECENG 330	Electronics I	4

ELECENG 340	Embedded Systems I: C and C++ Programming for Embedded Applications	3
ELECENG 440	Embedded Systems II: Advanced Embedded Systems	3
ELECENG 457	Digital Logic Laboratory	3
<b>Mathematics Requirement - 16 Credits <sup>1</sup></b>		
MATH 231	Calculus and Analytic Geometry I	4
MATH 232	Calculus and Analytic Geometry II	4
MATH 233	Calculus and Analytic Geometry III	4
ELECENG 234	Analytical Methods in Engineering	4
<b>Chemistry or Biology Requirement - 4-5 Credits</b>		
Select one of the following:		4-5
CHEM 105	General Chemistry for Engineering	
CHEM 102	General Chemistry	
BIO SCI 150	Foundations of Biological Sciences I	
BIO SCI 202	Anatomy and Physiology I	
<b>Physics Requirement - 8 Credits</b>		
PHYSICS 209 & PHYSICS 210	Physics I (Calculus Treatment) and Physics II (Calculus Treatment)	8
<b>Technical Electives - 13 Credits</b>		
<i>Group A Technical Electives - Select 6 to 9 credits from the following list. All COMPSCI and ELECENG courses numbered 300-699 that are not explicitly listed as Engineering Core, Major, Group B or Group C</i>		
COMPSCI 315	Introduction to Computer Organization and Assembly Language Programming	
COMPSCI 318	Topics in Discrete Mathematics	
COMPSCI 337	System Programming	
COMPSCI 411	Machine Learning and Applications	
COMPSCI 417	Introduction to the Theory of Computation	
COMPSCI 422	Introduction to Artificial Intelligence	
COMPSCI 423	Introduction to Natural Language Processing	
COMPSCI 425	Introduction to Data Mining	
COMPSCI 431	Programming Languages Concepts	
COMPSCI 443	Intelligent User Interfaces and Usability Assessment	
COMPSCI 459	Fundamentals of Computer Graphics	
COMPSCI 469	Introduction to Computer Security	
COMPSCI 511	Symbolic Logic	
COMPSCI 522	Computer Game Design	
COMPSCI 530	Computer Networks Laboratory	
COMPSCI 536	Software Engineering	
COMPSCI 537	Introduction to Operating Systems	
COMPSCI 545	FPGA Embedded CPUs & Firmware Development	
COMPSCI 547	User-Centered Interaction Design	
COMPSCI 557	Introduction to Database Systems	
COMPSCI 654	Introduction to Compilers	
COMPSCI 655	Compiler Implementation Laboratory	
COMPSCI 657	Topics in Computer Science:	
COMPSCI 699	Independent Study	
ELECENG 335	Electronics II	

ELECENG 361	Electromagnetic Fields
ELECENG 362	Electromechanical Energy Conversion
ELECENG 410	Digital Signal Processing
ELECENG 420	Random Signals and Systems
ELECENG 421	Communication Systems
ELECENG 430	Energy Modeling
ELECENG 436	Introduction to Medical Instrumentation
ELECENG 437	Introduction to Biomedical Imaging
ELECENG 439	Introduction to Biomedical Optics
ELECENG 451	Introduction to VLSI Design
ELECENG 461	Microwave Engineering
ELECENG 462	Antenna Theory
ELECENG 464	Fundamentals of Photonics
ELECENG 465	Broadband Optical Networks
ELECENG 474	Introduction to Control Systems
ELECENG 482	Introduction to Nanoelectronics
ELECENG 490	Topics in Electrical Engineering:
ELECENG 541	Integrated Circuits and Systems
ELECENG 545	FPGA Embedded CPUs & Firmware Development
ELECENG 562	Telecommunication Circuits
ELECENG 568	Applications of Digital Signal Processing
ELECENG 572	Power Electronics
ELECENG 574	Intermediate Control Systems
ELECENG 575	Analysis of Electric Machines and Motor Drives
ELECENG 588	Fundamentals of Nanotechnology
ELECENG 699	Independent Study
IND ENG 475	Simulation Methodology
IND ENG 572	Reliability Engineering

*Group B Technical Electives - 4-5 credits*

Select one of the following sequences:

COMPSCI 594 & COMPSCI 595	Capstone Project Preparation and Capstone Project
ELECENG 596 & ELECENG 597	Capstone Design I and Capstone Design II

*Group C Technical Electives - Select 0 to 3 credits from the following list*

BIO SCI 150	Foundations of Biological Sciences I <sup>2</sup>
BIO SCI 152	Foundations of Biological Sciences II
BUS ADM 292	Introduction to Entrepreneurship and Small Business Formation
BUS ADM 447	Entrepreneurship
COMPSCI 481	Server-side Internet Programming
COMPSCI 482	Rich Internet Applications
COMPSCI 581	Web Languages and Standards
COMPSCI 658	Topics in Applied Computing:
EAS 1	Engineering Co-op Work Period <sup>3</sup>
EAS 497	Study Abroad:
ELECENG 471	Electric Power Systems
ELECENG 472	Introduction to Wind Energy
ELECENG 481	Electronic Materials

ENGLISH 206	Technical Writing
IND ENG 360	Engineering Economic Analysis
MATLENG 481	Electronic Materials
MECHENG 301	Basic Engineering Thermodynamics
MECHENG 321	Basic Heat Transfer
MECHENG 542	Introduction to Technology Entrepreneurship
MECHENG 543	Introduction to Technology Management and Innovation

**GER Distribution Requirement - 15 Credits**

Arts		3
Humanities		3
Social Science		6
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	3

Cultural Diversity - Arts, Humanities, or Social Science course must also satisfy UWM Cultural Diversity Requirement

**English Composition Requirement**

Select one of the following: 0-6

- Earning a satisfactory score on the English placement test, or other appropriate test as determined by the English Department; or
- Earning a grade of C or higher in ENGLISH 102; or
- Transferring a grade of C or higher in a course equivalent to ENGLISH 102 or higher expository writing course

**Foreign Language Requirement**

The foreign language requirement can be completed with one of these options: 0-8

- Two years of a single foreign language in high school
- Two semesters of a single foreign language in college
- Demonstrate ability by examination

**Free Electives (2-3 Credits) 2-3**

**Total Credits 119-120**

<sup>1</sup> MATH 221, MATH 222, and 2 credits of Free Electives may substitute for MATH 231, MATH 232 and MATH 233  
<sup>2</sup> Cannot be counted as a technical elective if taken to fulfill Chemistry or Biology Requirement above  
<sup>3</sup> Students who earn 3 or more credits of EAS 1 may use 3 of those credits as technical electives

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.
2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-

time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation, course selection, program planning, and credit transfer evaluation. Students are assigned to a permanent professional advisor as soon as they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,
- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses

### Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

### Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent

coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program. For more information, contact the Office of Student Services at (414) 229-4667.

## Computer Science

The discipline of computer science pertains to the study and design of computer systems, hardware and software, computing techniques, and underlying theory. Our program provides a student with a broad technical background in computer science. It is a flexible program providing breadth and permitting a student to develop strengths in selected areas within computer science, as well as in related areas such as electrical engineering, mathematics, or business, depending on a student's interests. Technical electives available in the Computer Science major span courses in a broad spectrum of areas such as Networks, Computer Security, Artificial Intelligence, and Database Systems.

## Laptop Requirement

A laptop is required hardware for Computer Science and Computer Engineering students beginning in the sophomore year, and for all graduate students. The specific requirements can be found here (<https://uwm.edu/engineering/laptop-requirement-cs-and-ce/>).

## Mission Statement

The Department of Electrical Engineering and Computer Science is committed to outstanding undergraduate and graduate education, distinguished research programs, and strong service to our students, professional and technical societies, and the community.

## Programs

- Applied Computing, BS (p. 586)
- Applied Math and Computer Science, BS (College of Engineering and Applied Science, Department of Computer Science) (p. 587)

## Applied Computing, BS

The B.S. in Applied Computing is a fully online 21-course, 61-credit undergraduate program.

As technology continues to expand into every field and industry, from the environment to education to politics, the market for skilled hands-on technicians grows increasingly competitive. The Bachelor of Science in Applied Computing was designed to produce graduates who can perform programming, software engineering, graphic applications, networking, and operating systems management in a variety of environments, while at the same time promoting power skills such as business communications, ethics, and project management.

The applied nature of the degree implies that graduates will have the competencies to solve real-world business problems through the application of technology. Its curriculum puts a deeper focus on fundamental computer science, software engineering, tech security issues, computing solutions for business problems, and data management. A poll of industry representatives indicates that they see a skills gap in computer and information technology related positions which the multidisciplinary focus of this degree would fill.

## Accreditation

The UW Bachelor of Science in Applied Computing program is approved by the University of Wisconsin Board of Regents and approved by the Higher Learning Commission (<http://www.ncahlc.org/>).

## Admissions Process and Requirements

A successful applicant will have:

- A minimum combined grade point average of 2.0 for college credits taken;
- About 60 transferable college credits or an associate degree from an accredited university;
- prerequisite work in college algebra;
- completed online application for undergraduate study; and
- transcripts sent directly from previous institutions to UWM.

## Tuition, Fees, and Financial Aid

Tuition is \$495 per credit or \$30,195 total for 61 credits. Textbooks are purchased separately and are not included in tuition. Students who take at least six credits each term may be eligible for financial assistance.

## General Education Requirements (GERs)

UW-Milwaukee has General Education Requirements (p. 29) that must be met in order to earn a bachelor's degree. Please review the requirements and consult with your academic advisor.

## Program Requirements

Code	Title	Credits
APC 300	Programming 1	3
APC 310	Math for Computer Science	3
APC 320	Introduction to Business	3
APC 330	Technical and Professional Communication	3
APC 340	Legal and Ethical Responsibilities of the IT Professional	3
APC 350	Programming 2	3
APC 360	Database Management 1	3
APC 370	System Analysis and Design	3
APC 380	Project Management Techniques	3
APC 390	Object Oriented Programming	3

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Contact Information

## Applied Math and Computer Science, BS (College of Engineering and Applied Science, Department of Computer Science)

The Applied Mathematics and Computer Science (AMCS) program is a special degree program that blends courses from both the College of Letters & Science and the College of Engineering & Applied Science. It is a structured curriculum offering courses from both applied math and computer science so that students get the benefit of both majors without having to double major.

The job outlook for individuals with math majors is extremely favorable, as is the job outlook for computer science majors. A student with combined knowledge in both areas is likely to be in high demand on the job market.

Our program is highly technical in nature yet still retains elements of a classic liberal arts degree. Students take courses in the humanities, social sciences, and natural sciences on their way to a degree. Why? Because math and computer science are not applied in a world without humans. Regardless of the type of industry, the applications being worked on have impact and consequences for human beings. A broad world view of cultures, history, and society only leads to better decision-making in scientific careers, and strong communication skills only make our graduates even more attractive.

## Applied Math and Computer Science Major Requirements

Students who intend to complete the program in four years will need to begin taking mathematics in their first semester. Such students should have a University of Wisconsin-Milwaukee mathematics placement level of 30 (ready for precalculus) or better.

### Admission

As soon as students realize their interest in the AMCS degree, they should consult with an AMCS advisor either in College of Engineering and Applied Science or College of Letters and Science, who assists in planning a program. Admission to the program requires a GPA of at least 2.500 in 8 credits of mathematics courses at or above the 200 level and 6 credits of computer science courses at or above the 200 level.

### Degree Requirements

For the BS (AMCS) degree, 120 credits are required, of which 60 must be taken from the College of Letters and Science. Students must satisfy the general education requirements (GER) (p. 29) of the University. Students must take at least 8 credits of natural sciences outside of mathematics or mathematical statistics.

An overall GPA of 2.000 on all coursework attempted at UWM is required for this degree. In addition, students must achieve a 2.000 GPA on all coursework attempted, including transfer work. A minimum 2.000 GPA

must be earned on all 300-level and above courses taken to satisfy the advanced requirements. Students satisfy the residency requirement for the degree by completing at UWM both a minimum of 15 credits of the required advanced courses and one of the following:

- The last 30 credits;
- 45 of the last 60 credits;
- Any 90 credits.

Code	Title	Credits
<b>Core Requirements</b>		
COMPSCI 250	Introductory Computer Programming	3
COMPSCI 251	Intermediate Computer Programming	3
COMPSCI 317	Discrete Information Structures <sup>1</sup>	3
Select the following (or an equivalent sequence):		12
MATH 231	Calculus and Analytic Geometry I	
MATH 232	Calculus and Analytic Geometry II	
MATH 233	Calculus and Analytic Geometry III	
MATH 234	Linear Algebra and Differential Equations	4
or MATH 240	Matrices and Applications	
MATH 341	Seminar: Introduction to the Language and Practice of Mathematics	3
<b>Advanced Requirements</b>		
COMPSCI 351	Data Structures and Algorithms	3
COMPSCI 535	Algorithm Design and Analysis	3
Select 9 credits in COMPSCI at the 300 level or above		9
Select 12 credits from MATH and/or MTHSTAT and/or ACTSCI at the 300 level or above		12
Select 9 additional credits from CompSci, Math, MthStat, and ActSci courses at the 300 level or above, beyond the "Core" as well as the above "Advanced" Requirements; included in these 9 cr must be a Capstone or Internship Course.		9
<i>Capstone and Internship courses</i>		
MATH 489	Internship in Mathematics, Upper Division	
MTHSTAT 489	Internship in Mathematical Statistics, Upper Division	
MATH 575	High School Mathematics from an Advanced Viewpoint	
MATH 599	Capstone Experience	
ACTSCI 590	Actuarial Internship	
ACTSCI 599	Capstone Experience	
COMPSCI 594	Capstone Project Preparation	
COMPSCI 595	Capstone Project	
COMPSCI 599	Senior Thesis	
<b>Total Credits</b>		<b>64</b>

<sup>1</sup> COMPSCI 317 is waived for students who earn credit for MTHSTAT 361, which counts towards the math electives for the program. Students who have COMPSCI 317 waived in this case do not need to take any additional credits.

**Additional Requirements**

Students completing a Data Science BS who wish to also earn an AMCS BS must complete 9 credits upper division ActSci/Math/MthStat/

CompSci beyond the courses in those curricular areas used to fulfill the Data Science Major requirements.

**Potential Course of Study**

<b>Year 1</b>		
<b>Fall</b>		
COMPSCI 250	Introductory Computer Programming	3
ENGLISH 101	Introduction to College Writing	3
MATH 115	Precalculus	4
1st semester foreign language		3-5
<b>Credits</b>		<b>13-15</b>
<b>Spring</b>		
COMPSCI 251	Intermediate Computer Programming	3

<b>Credits</b>		<b>15</b>
<b>Year 4</b>		
<b>Fall</b>		
CompSci advanced elective		3
Math advanced elective		3
Math or CompSci capstone or internship, plus Math/CS advanced elective if needed to get to 3 cr min		3
Humanities + OWCB		3
Electives as needed to reach cr requirements		6-0
<b>Credits</b>		<b>18-12</b>
<b>Spring</b>		
Electives as needed to reach cr requirements <sup>1</sup>		13-12

Social Science GER	3
<b>Credits</b>	<b>16-15</b>
<b>Total Credits</b>	<b>120</b>

<sup>1</sup> Select a sufficient number of elective credits from the College of Letters and Science to earn a minimum of 60 L&S credits.

## Honors in the Degree

Students in AMCS who meet all of the following criteria can be awarded honors in the degree upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all UWM courses attempted that count toward the AMCS degree;
3. A 3.500 GPA over all upper division UWM courses counting toward the AMCS degree;
4. A grade of B+ or better in one of: MATH 599, MATH 699, COMPSCI 595, or COMPSCI 699;
5. Completion of 3 credits in Mathematical Sciences (curricular areas MATH or MTHSTAT) or Computer Science in a course numbered 600 or higher that is different from MATH 699 and COMPSCI 699.

Students who believe they may qualify for honors in Applied Mathematics & Computer Science should apply to the Department of Mathematical Sciences during their last semester of study.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

# Artificial Intelligence and Machine Learning, Graduate Certificate (Department of Computer Science)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

The minimum GPA for admission is 2.75 in a prior bachelor's or post-baccalaureate degree (or cumulative credits after admission to a dual bachelor-masters degree program). Applicants should generally have a prior degree in science, engineering, computer science, economics, finance or any other area that requires academic preparation in math and programming. Applicants with other prior degrees will also be considered via holistic assessment of the academic record and professional experience, with a focus on substantial work experience in the quantitative analysis, programming, and adequate mathematics preparation for the required coursework.

## Credits and Courses

The Artificial Intelligence and Machine Learning Graduate Certificate requires a minimum of 15 credits, as described below. At least 12 credits must be taken at UWM.

Code	Title	Credits
<b>Required Courses</b>		
COMPSCI 557G or COMPSCI 715	Introduction to Database Systems Programming for Machine Learning	3
COMPSCI/ELECENG 711 or COMPSCI 411G	Introduction to Machine Learning Machine Learning and Applications	3
<b>Electives <sup>1</sup></b>		<b>9</b>
<i>Application Electives</i>		
COMPSCI/ELECENG 712	Image Processing	
COMPSCI 722	Artificial Intelligence Planning Techniques	
COMPSCI 723 or COMPSCI 423G	Natural Language Processing Introduction to Natural Language Processing	
COMPSCI 744 or COMPSCI 444G	Text Retrieval and Its Applications in Biomedicine Introduction to Text Retrieval and Its Applications in Biomedicine	
ELECENG 574G	Intermediate Control Systems	
ELECENG 810	Foundations for Advanced Machine Learning and Signal Processing	
ELECENG/COMPSCI 811	Advanced Machine Learning	
ELECENG 816	Optimal Control Theory	
MECHENG 476G	Introduction to Robotics	

IND ENG 717	Operations Research in Engineering Management
<i>Generic Electives</i>	
COMPSCI 425G	Introduction to Data Mining
COMPSCI/ELECENG 710	Artificial Intelligence
ELECENG 420G	Random Signals and Systems
ELECENG 474G	Introduction to Control Systems
IND ENG 716	Engineering Statistical Analysis
IND ENG 590/890	Topics in Industrial and Systems Engineering: (Introduction to Connected Systems)
IND ENG 590/890	Topics in Industrial and Systems Engineering: (Engineering Data Analytics)
<b>Total Credits</b>	<b>15</b>

<sup>1</sup> Students must enroll in 3 elective courses. At least 2 must be selected from the Applications Electives section, and at least 2 must be at the 700 level or above.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.

- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Computer Science, BA

Computer science is the study and design of computer systems, networks, software, and computing techniques. It is a dynamic field with a growing impact on the world today.

The Computer Science BA program is intended to permit students to combine interest in an alternate area (in humanities, arts, the professions or even natural science) with computer science in order to gain skills that increase their desirability with employers. Burning Glass found that adding software development or computer programming skills permits graduates to gain a 30+% salary premium over those without.

## New Freshmen

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile, grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology, chemistry, and physics). The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

## Transfer Students

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

## Requirements

### Laptop Requirement

A laptop is required hardware for Computer Science and Computer Engineering students beginning in the sophomore year, and for all graduate students. The specific requirements can be found here (<https://uwm.edu/engineering/laptop-requirement-cs-and-ce/>).

## General Education Requirements (GERs)

UW-Milwaukee has General Education Requirements (p. 29) that must be met in order to earn a bachelor's degree. Some of the requirements of the program may fulfill the campus GERs. Please review the requirements and consult with your academic advisor.

## Computer Science Curriculum

Minimum Credit Hours Required: 120

The program requires one semester of calculus (see Mathematics requirements below) and also 34 credits of major course requirements (22 credits of fixed courses and 12 credits of electives within the major). In addition, a student must either complete (or have completed) a second major, or demonstrate two minor areas of concentration. The alternate major or minor areas of concentration must overlap no more than six credits total with major course requirements of this degree. Furthermore, at least fifteen credits of the major course requirements must be completed at UW-Milwaukee.

### Mathematics Requirements

Choose one of the following:

Code	Title	Credits
MATH 211	Survey in Calculus and Analytic Geometry I	4
MATH 213	Calculus with Life Sciences Applications	4
MATH 221	Honors Calculus I	5
MATH 231	Calculus and Analytic Geometry I	4

### Major Course Requirements

Code	Title	Credits
COMPSCI 150	Survey of Computer Science <sup>1</sup>	3
COMPSCI 250	Introductory Computer Programming	3
COMPSCI 251	Intermediate Computer Programming	3
COMPSCI 317	Discrete Information Structures	3
COMPSCI 351	Data Structures and Algorithms	3
COMPSCI 395	Social, Professional, and Ethical Issues <sup>2</sup>	3
COMPSCI 458	Computer Architecture <sup>3</sup>	3
EAS 200	Professional Seminar	1
<b>Technical Electives - Select 12 credits of COMPSCI 300 level or above <sup>4</sup></b>		<b>12</b>
<b>Total Credits</b>		<b>34</b>

<sup>1</sup> COMPSCI 150 may be substituted by any non-required COMPSCI 200+ course for any student who has already completed a COMPSCI 300+ level course.

<sup>2</sup> COMPSCI 395 may be substituted by INFOST 120 or BUS ADM 393.

<sup>3</sup> COMPSCI 458 may be substituted by COMPSCI 315.

<sup>4</sup> INFOST 695 may be counted as a technical elective.

### Second Major and Minor Areas of Concentration

For the purposes of this degree program, an Associate of Applied Science in Information Technology will be considered as a "second major".

Other Associate's degrees are subject to review by the department to be considered for satisfying the second major requirement.

For the purposes of this degree program, a "minor area of concentration" can be any of the following:

- An Associate's degree at UWM or another school;
- A declared UWM Minor;
- A declared UWM Certificate; or
- At least fifteen credits of courses in a single curricular code (other than COMPSCI), of which at least six credits are at the 300-level or higher.

As described above, the two minor areas of concentration can overlap with the major course requirements by no more than six credits total.

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.
2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation, course selection, program planning, and credit transfer evaluation. Students are assigned to a permanent professional advisor as soon as

they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,
- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses

### Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent

coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

## Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program. For more information, contact the Office of Student Services at (414) 229-4667.

## Computer Science, BS

Computer science is the study and design of computer systems, networks, software, and computing techniques. But more importantly, it is a dynamic field with a growing impact on the world today. According to the U.S. Bureau of Labor Statistics, employment in computer and information technology occupations is projected to grow 13 percent from 2020 to 2030, faster than average for all occupations.

### Concentrations

- Artificial Intelligence
- Programming Language Design and Implementation
- Software Engineering
- Computer Networking
- Algorithm Design

### Research

Work with faculty (<http://uwm.edu/engineering/classification/faculty/computer-science/>) engaged in leading-edge research in areas such as:

- Object-oriented programming
- Cryptography
- Computational robotics
- Intelligent dialog systems

- Artificial intelligence
- Extensible languages

### Career Paths

Computer Science opens up a multitude of career options with great income potential within both the public and private sectors.

- Software Engineer
- Systems Integration Consultant
- Information Technology Manager
- Game Developer
- Application Developer/Programmer
- Data Analyst

## Accreditation

The Computer Science program is accredited by the Computing Accreditation Commission of ABET: <https://www.abet.org> (<https://nam02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.abet.org%2F&data=02%7C01%7Cebilicki%40uwm.edu%7C6ce2c28ec5ad4a0c130408d8696f0413%7C0bca7ac3fcb64efd89eb6de97603cf%2BpzMal3jOBSze7g%3D&reserved=0>).

## New Freshmen

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile, grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology, chemistry, and physics). The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

## Transfer Students

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

## Laptop Requirement

A laptop is required hardware for Computer Science and Computer Engineering students beginning in the sophomore year, and for all graduate students. The specific requirements can be found here (<https://uwm.edu/engineering/laptop-requirement-cs-and-ce/>).

## Computer Science Curriculum

The minimum number of credits required to complete the Bachelor of Science in Computer Science with a major in Computer Science is 120.

Code	Title	Credits
<b>Major Requirements</b>		
COMPSCI 250	Introductory Computer Programming	3
COMPSCI 251	Intermediate Computer Programming	3
COMPSCI 317	Discrete Information Structures	3
COMPSCI 337	System Programming	3
COMPSCI 351	Data Structures and Algorithms	3
COMPSCI 361	Introduction to Software Engineering	3
COMPSCI 395	Social, Professional, and Ethical Issues	3
COMPSCI 431	Programming Languages Concepts	3
COMPSCI 458	Computer Architecture	3
COMPSCI 535	Algorithm Design and Analysis	3
COMPSCI 537	Introduction to Operating Systems	3
COMPSCI 594	Capstone Project Preparation	1
COMPSCI 595	Capstone Project	3
EAS 200	Professional Seminar	1
<b>Mathematics Requirement</b>		<b>4</b>
Select one of the following:		
MATH 211	Survey in Calculus and Analytic Geometry I	
MATH 213	Calculus with Life Sciences Applications	
MATH 221	Honors Calculus I	
MATH 231	Calculus and Analytic Geometry I	
<b>Natural Science Requirement - Complete 6 credits including 1 laboratory credit from approved list.</b>		<b>6</b>
<b>Technical Electives - Complete 9 credits from approved list.</b>		<b>9</b>
<b>Applied Mathematics Electives - Complete 9 credits from approved list.</b>		<b>9</b>
<b>Free Electives</b>		<b>39</b>
<b>GER Distribution Requirement</b>		
Arts		3
Humanities		3
Social Science		6
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	3
Cultural Diversity - Arts, Humanities, or Social Science course must also satisfy UWM Cultural Diversity Requirement		
Students must also satisfy Oral and Written Communication (OWA) Part A <sup>1</sup>		0-6
Students must also Satisfy the UWM Foreign Language requirements (0-8) <sup>1</sup>		0-8
<b>Total Credits</b>		<b>120</b>

## Approved Natural Science Courses

Code	Title	Credits
<i>Select 6 credits from the following including at least 1 laboratory credit:</i>		
<b>Natural Science courses with laboratory (NS+)</b>		
ASTRON 104	Astronomy Laboratory	
BIO SCI 150	Foundations of Biological Sciences I	
BIO SCI 152	Foundations of Biological Sciences II	
BIO SCI 201	Human Structure and Function	
BIO SCI 203	Anatomy and Physiology II	
CHEM 102	General Chemistry	
CHEM 104	General Chemistry and Qualitative Analysis	
CHEM 105	General Chemistry for Engineering	
GEO SCI 100	Introduction to the Earth	
GEO SCI 102	Principles of Historical Geology	
GEO SCI 120	Geology of the Planets	
GEO SCI 151	Ocean Sciences Laboratory	
GEOG 120	Our Physical Environment	
PHYSICS 121	General Physics Laboratory I (Non-Calculus Treatment)	
PHYSICS 123	General Physics Laboratory II (Non-Calculus Treatment)	
PHYSICS 214	Lab Physics I (Calculus Treatment)	
PHYSICS 215	Lab Physics II (Calculus Treatment)	
PHYSICS 219	Physics I: Calculus-Based, Studio Format	
PHYSICS 220	Physics II: Calculus-Based, Studio Format	
<b>Natural Science courses without laboratory (NS)</b>		
ASTRON 103	Survey of Astronomy	
ATM SCI 194	First-Year Seminar:	
ATM SCI 297	Study Abroad:	
ATM SCI 381	Honors Seminar:	
ATM SCI 497	Study Abroad:	
BIO SCI 194	First-Year Seminar:	
BIO SCI 206	Biology of Women	
BIO SCI 380	Honors Seminar:	
CES 210	Introduction to Conservation and Environmental Science	
CHEM 100	Chemical Science	
GEOG 125	Introduction to Environmental Geography	
GEO SCI 150	Introduction to Ocean Sciences	
GEO SCI 194	First-Year Seminar:	
GEO SCI 381	Honors Seminar:	
PHYSICS 120	General Physics I (Non-Calculus Treatment)	
PHYSICS 122	General Physics II (Non-Calculus Treatment)	
PHYSICS 209	Physics I (Calculus Treatment)	
PHYSICS 210	Physics II (Calculus Treatment)	

## Technical Electives

Code	Title	Credits
<i>Select 9 credits from the following list. All non-required CompSci courses numbered 400-699 are Technical Electives.</i>		
COMPSCI 315	Introduction to Computer Organization and Assembly Language Programming	
COMPSCI 417	Introduction to the Theory of Computation	
COMPSCI 422	Introduction to Artificial Intelligence	
COMPSCI 423	Introduction to Natural Language Processing	
COMPSCI 425	Introduction to Data Mining	
COMPSCI 443	Intelligent User Interfaces and Usability Assessment	
COMPSCI 444	Introduction to Text Retrieval and Its Applications in Biomedicine	
COMPSCI 459	Fundamentals of Computer Graphics	
COMPSCI 469	Introduction to Computer Security	
COMPSCI 481	Server-side Internet Programming	
COMPSCI 482	Rich Internet Applications	
COMPSCI 511	Symbolic Logic	
COMPSCI 520	Computer Networks	
COMPSCI 530	Computer Networks Laboratory	
COMPSCI 536	Software Engineering	
COMPSCI 552	Advanced Object-Oriented Programming	
COMPSCI 557	Introduction to Database Systems	
COMPSCI 581	Web Languages and Standards	
COMPSCI 599	Senior Thesis	
COMPSCI 654	Introduction to Compilers	
COMPSCI 655	Compiler Implementation Laboratory	
COMPSCI 657	Topics in Computer Science:	
COMPSCI 658	Topics in Applied Computing:	
COMPSCI 699	Independent Study	
ELECENG 301	Electrical Circuits I	
ELECENG 305	Electrical Circuits II	
ELECENG 310	Signals and Systems	
ELECENG 330	Electronics I	
ELECENG 340	Embedded Systems I: C and C++ Programming for Embedded Applications	
ELECENG 354	Digital Logic	
ELECENG 440	Embedded Systems II: Advanced Embedded Systems	
ELECENG 367	Introduction to Microprocessors	
ELECENG 451	Introduction to VLSI Design	
ELECENG 457	Digital Logic Laboratory	

## Applied Mathematics Electives

Code	Title	Credits
<i>Select 9 credits from the following:</i>		
IND ENG 367	Introductory Statistics for Physical Sciences and Engineering Students <sup>2</sup>	

MATH 205	Introductory Finite Mathematics
MATH 212	Survey in Calculus and Analytic Geometry II
MATH 222	Honors Calculus II
MATH 232	Calculus and Analytic Geometry II
MATH 233	Calculus and Analytic Geometry III
MATH 234	Linear Algebra and Differential Equations <sup>3,4</sup>
ELECENG 234	Analytical Methods in Engineering <sup>3,4</sup>
MATH 240	Matrices and Applications <sup>3</sup>
MATH 320	Introduction to Differential Equations <sup>4</sup>
MATH 305	Introduction to Mathematical and Computational Modeling
MATH 313	Linear Programming and Optimization
MATH 315	Mathematical Programming and Optimization
MATH 341	Seminar: Introduction to the Language and Practice of Mathematics
MATH 405	Mathematical Models and Applications
MATH 431	Modern Algebra with Applications
MATH 451	Axiomatic Geometry
MTHSTAT 215	Elementary Statistical Analysis <sup>2</sup>
MTHSTAT 361	Introduction to Mathematical Statistics I
MTHSTAT 563	Regression Analysis

<sup>1</sup> See General Education Requirements (p. 30) for details.

<sup>2</sup> A student cannot use more than one of IND ENG 367 and MTHSTAT 215.

<sup>3</sup> Must include exactly one of MATH 240, MATH 234, ELECENG 234.

<sup>4</sup> May include only one of MATH 320, MATH 234, ELECENG 234.

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.
2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a

program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation, course selection, program planning, and credit transfer evaluation. Students are assigned to a permanent professional advisor as soon as they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,
- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## Honors in the Major

Students in Computer Science who meet all of the following criteria can be awarded honors in the major upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all upper-division (300 level and higher) Computer Science courses; and
3. At least one of the following:
  - a. Successful completion of 3 credits of research experience via senior thesis (COMPSCI 599) and/or an approved independent study (COMPSCI 699).
  - b. Participation in the Accelerated MS program with successful completion of 6 credits in approved courses for the Master of Science in Computer Science program.

- c. Successful completion of 4 credit team-based, faculty supervised, research experience via a capstone via (COMPSCI 594) and (COMPSCI 595), subject to approval by supervising faculty.

Students who believe they may qualify for honors in Computer Science should apply to the College of Engineering & Applied Science during their last semester of study.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses

### Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

### Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering

program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program. For more information, contact the Office of Student Services at (414) 229-4667.

## Computer Science, Minor

The computer science minor is directed toward those students wishing to develop some strength and background in computer science. This minor also is available to those who have already graduated.

## Requirements

- The minor requires 18 credits selected from Computer Science courses.
- Minimum of 9 credits from 300-level coursework or higher. May not include COMPSCI 395 and prior consent is required to include COMPSCI 657 or COMPSCI 658.
- Minimum of 12 credits of minor coursework must be completed at UWM.
- The student must obtain a minimum GPA, as specified by the department, in the courses used to complete the minor.
- If a bachelor's degree was obtained at another institution, upon completion of the minor requirements the student will be awarded a Certificate of Minor.

## Computer Science, MS

The MS in Computer Science program is a rigorous graduate program designed to meet the needs of any student wishing to gain advanced understanding of the principles and practices needed to harness the power of computing to help society and the world. The program can be a stepping stone on the way to further studies and the pursuit of advanced research, such as can be obtained by pursuing the PhD. Or the program can provide a pathway to professional advancement through greater technical knowledge and intellectual maturity.

## Tracks

The Master of Science in Computer Science (MSCS) degree offers a regular track and a professional track. The regular track is designed to prepare students for PhD research in Computer Science. The professional track is designed to prepare students, possibly with undergraduate majors other than computer science, for success in their industrial careers. Students in the professional track are not eligible for financial aid from Computer Science department.

- MSCS Regular Track
- The Professional Track

## Requirements

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Credits and Courses

### MSCS Regular Track

An applicant must meet Graduate School requirements to be considered for admission. Additionally, the applicants must meet either of the following program requirements:

- Undergraduate major in Computer Science.
- Satisfactory completion of two programming courses (such as COMPSCI 250 and COMPSCI 251); at least 6 additional credits of coursework in CS; and one course in calculus (such as MATH 211 or MATH 231).

Applicants without sufficient Computer Science background are encouraged to apply to the professional track. Applicants not admitted to the regular track may be offered admission to the professional track instead. Applicants may be admitted with specific program-defined course deficiencies provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the Graduate School and the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree.

The student must have taken five Computer Science courses (specified below) or their equivalents prior to completion of the MS Program. Appropriate courses taken by a student in another program that are considered equivalent to the courses below can be used to satisfy this requirement with the approval of the Department. The five courses are:

Code	Title	Credits
COMPSCI 317	Discrete Information Structures	3
COMPSCI 351	Data Structures and Algorithms	3
COMPSCI 458	Computer Architecture	3
COMPSCI 535	Algorithm Design and Analysis	3
COMPSCI 537	Introduction to Operating Systems	3
<b>Total Credits</b>		<b>15</b>

All students must submit an approved Undergraduate Requirements Assessment (which explains how the requirement will be met) prior to registering for any courses.

The students in the regular track must write a thesis or complete a capstone project.

#### Thesis Option

The minimum credit requirement is 30, comprising:

Code	Title	Credits
EAS 701	Effective Academic Writing	1
EAS 702	Preparing Future Engineering Faculty & Professionals	2
Select 15 additional credits of 700 or higher level courses, including 9 credits of courses listed in the Qualifying Examination Day 2 Syllabus <sup>1</sup>		15
Select 6 credits of additional courses that carry graduate credit <sup>1</sup>		6
Take 6 credits:		6
COMPSCI 990	Masters Thesis	
<b>Total Credits</b>		<b>30</b>

<sup>1</sup> Excluding COMPSCI 990.

All courses must be approved in the Program of Study, which must not include any more than one credit of COMPSCI 870. The student must not register for more than 4 credits of COMPSCI 990 in any one semester. The student must write an acceptable thesis under the supervision of a faculty advisor and pass a final comprehensive examination, which will normally focus on the thesis. Once a student begins a thesis under the supervision of an advisor, the graduate program director must approve any change to a new thesis advisor.

#### Capstone Option

The minimum credit requirement is 31, comprising:

Code	Title	Credits
EAS 701	Effective Academic Writing	1
COMPSCI 995	Master's Capstone Project	3
Select 18 additional credits of 700 or higher level courses, including 9 credits of courses listed in the Qualifying Examination Day 2 Syllabus		18
Select 9 credits of additional courses that carry graduate credit		9
<b>Total Credits</b>		<b>31</b>

The student must complete a capstone project under the supervision of a faculty advisor and pass COMPSCI 995 with a grade of B or better. COMPSCI 700 may be used as a substitute for EAS 701, but may not otherwise be used to meet credit requirements. EAS 702 may not be used to meet credit requirements. No more than one credit in COMPSCI 870 can be used to satisfy program requirements.

### The Professional Track

An applicant must meet Graduate School requirements to be considered for admission. We expect that students admitted to the professional track will have knowledge of computer programming to the extent of COMPSCI 250 and COMPSCI 251. Applicants can demonstrate this knowledge via academic coursework or online courses. Applicants can also explain in their Statement of Purpose if they gained this knowledge via work experience. All admitted students are assigned a placement level concerning their knowledge of computer programming. The students may be required to take COMPSCI 250 and/or COMPSCI 251 (or equivalents) based on their placement level.

The student must demonstrate knowledge equivalent to the following four Computer Science courses prior to completion of the MS Program:

Code	Title	Credits
COMPSCI 317	Discrete Information Structures	3
COMPSCI 351	Data Structures and Algorithms	3
COMPSCI 535	Algorithm Design and Analysis	3
COMPSCI 537 or COMPSCI 431	Introduction to Operating Systems Programming Languages Concepts	3
<b>Total Credits</b>		<b>12</b>

This requirement can be met in one of the following ways:

- A grade of "C-" or better in these courses or equivalent CompSt courses.
- Passing the sufficiency exams offered by the department.
- Prior academic coursework approved by the academic advisor (not available for COMPSCI 351).

Graduate credits earned while taking these courses as a graduate student may be used to meet the credit requirements of the program. All students must submit an approved Undergraduate Requirements Assessment (which explains how the requirement will be met) prior to registering for any courses.

The minimum credit requirement is 31 graduate credits, comprising:

Code	Title	Credits
EAS 701	Effective Academic Writing	1
Select at least 15 credits of 700-level (or higher) CompSci courses, including at least 3 credits from courses designated integrative		15
Select up to 9 graduate credits of courses from a pre-approved list of non-CompSci courses considered useful for professionals in CompSci-related industries		9
Select the remaining credits from graduate-level or U/G-level CompSci courses		6
<b>Total Credits</b>		<b>31</b>

Up to 12 credits of prior graduate-level course work (including up to 6 credits of prior graduate-level Computer Science courses) can be used to meet the credit requirements. COMPSCI 700 may be used as a substitute for EAS 701, but may not otherwise be used to meet credit requirements. EAS 702 may not be used to meet credit requirements. No more than one credit in COMPSCI 870 may be used to meet the requirements. All courses must be approved in the Program of Study. Any non-CompSci courses must be approved prior to registration.

## Industrial Internship

With faculty advisor's approval, one credit per semester of COMPSCI 999 may be satisfied with a supervised industrial internship for a maximum of three credits.

## Additional Requirements

### Major Professor as Advisor

The student is assigned an initial faculty advisor at the time of admission. The student selects a faculty member as a thesis or capstone advisor, respectively, as they follow the regular or professional track, after consultation with that faculty member. Any change in faculty advisor requires the documented permission of the new faculty member and the Department. An initial Program of Study with student, advisor and Department approval should be completed prior to the completion of 9

credits in the program. The final Program of Study must be approved by the thesis or capstone advisor, as appropriate.

## Switching between Tracks

A student in the regular track may switch to the professional track at any time. However, such a student will no longer be eligible for research/teaching/project assistantships or any other financial aid from the Computer Science department. A student switching to the professional track may need to take the equivalent of COMPSCI 351. A student admitted under the professional track may switch to the regular track after completing at least 9 credits of 700-level CompSci courses or COMPST 751 with at least 3.5 cumulative GPA. Note that not all courses acceptable under the professional track may be acceptable under the regular track.

## Financial Aid

Students enrolled in the professional track are not eligible for financial aid from the Computer Science department including research assistantships, teaching assistantships, project assistantships, fellowships and/or tuition waivers. However, such students are still eligible for financial aid available elsewhere on the campus.

## Time Limit

All students must complete the degree requirements within five years of initial enrollment.

# Data Science, BS (College of Engineering and Applied Science, Department of Computer Science)

The Bachelor of Science in Data Science (BSDS) program is a special degree program that blends courses from both the College of Letters & Science and the College of Engineering & Applied Science. It is a structured curriculum offering courses from both statistics and computer science, in addition to electives from other departments and colleges.

The job outlook for individuals with data science degrees is extremely favorable. A student with combined skills in statistical analysis and computer programming is likely to be in high demand on the job market.

Our program is highly technical in nature yet still retains elements of a classic liberal arts degree. Students take courses in the humanities, social sciences, and natural sciences as part of the general education requirements, in addition to mandatory courses on the ethical implications of data science and on writing and communication. A broad world view of cultures, history, and society leads to better decision-making in scientific careers, and strong communication skills make graduates even more attractive in the job market.

## Data Science Program Requirements

Students who intend to complete the BS in Data Science (BSDS) program in four years will need to begin taking mathematics in their first semester. Such students should have a University of Wisconsin-Milwaukee mathematics placement level of 30 (ready for precalculus) or better.

## Admission

For admission to the BSDS program, students need only meet the general requirements of admission to UW-Milwaukee.

As soon as students realize their interest in the BSDS degree, they should consult with an BSDS advisor either in the College of Engineering and Applied Science or College of Letters and Science, who will assist in planning a program.

## Degree Requirements

The program requires at least 120 credits, which include University-wide General Education Requirements (<https://catalog.uwm.edu/policies/undergraduate-policies/#bachelorsdegreegeneraleducation>), 23-28 credits of mandatory preparatory courses, 36 credits of mandatory advanced core courses, a capstone course or an internship at the end of the coursework, and additional elective courses to fulfill the overall credit requirement.

An average GPA of 2.000 on all coursework attempted at UWM is required for this degree. In addition, students must achieve an average 2.000 GPA on all coursework attempted, including transfer work. A minimum 2.000 GPA must be earned, on average, on 300-level and above courses taken to satisfy the advanced requirements. Students satisfy the residency requirement for the degree by completing at UWM both a minimum of 15 credits of the required advanced courses and one of the following:

- The last 30 credits;
- 45 of the last 60 credits;
- Any 90 credits.

Code	Title	Credits
<b>Preparatory Courses</b>		
<i>Mathematics</i>		
One of the following calculus sequences (or an equivalent) <sup>1</sup>		8-12
MATH 231 & MATH 232 & MATH 233	Calculus and Analytic Geometry I and Calculus and Analytic Geometry II and Calculus and Analytic Geometry III	
MATH 211 & MATH 212	Survey in Calculus and Analytic Geometry I and Survey in Calculus and Analytic Geometry II	
MATH 234 or MATH 240	Linear Algebra and Differential Equations Matrices and Applications	3-4
<i>Computer Science</i>		
COMPSCI 250	Introductory Computer Programming	3
COMPSCI 251	Intermediate Computer Programming	3
<i>Statistics</i>		
MTHSTAT 215 or IND ENG 367	Elementary Statistical Analysis Introductory Statistics for Physical Sciences and Engineering Students	3
MTHSTAT 216	Introduction to Statistical Computing and Data Science	3
<b>Total Credits</b>		<b>23-28</b>

<sup>1</sup> One equivalent sequence accepted is MATH 221 & MATH 222, or a student may replace MATH 211 or MATH 231 with MATH 213 (for other combinations see advisor).

Code	Title	Credits
<b>Core Courses</b>		
<i>Statistics</i>		

MTHSTAT 361	Introduction to Mathematical Statistics I	3
MTHSTAT 362	Introduction to Mathematical Statistics II	3
MTHSTAT 563	Regression Analysis	3
MTHSTAT 566	Computational Statistics	3
MTHSTAT 568	Multivariate Statistical Analysis	3
<i>Computer Science</i>		
COMPSCI 317 or MATH 341	Discrete Information Structures Seminar: Introduction to the Language and Practice of Mathematics	3
COMPSCI 351	Data Structures and Algorithms	3
COMPSCI 395 or PHILOS 237	Social, Professional, and Ethical Issues Technology, Values, and Society	3
COMPSCI 422	Introduction to Artificial Intelligence	3
COMPSCI 411 or COMPSCI 425	Machine Learning and Applications Introduction to Data Mining	3
COMPSCI 557	Introduction to Database Systems	3
<i>Communication and Ethics</i>		
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	3
<b>Total Credits</b>		<b>36</b>

Code	Title	Credits
<b>Capstone Experience (select one of the options below)</b>		
MTHSTAT 489	Internship in Mathematical Statistics, Upper Division	1-6
MATH 599	Capstone Experience	1
COMPSCI 595	Capstone Project	3
COMPSCI 599	Senior Thesis	3
<b>Electives (to reach 120 total credits)</b>		
Suggested are courses with substantial data analysis, data processing, or computational content, such as:		
COMPSCI 315	Introduction to Computer Organization and Assembly Language Programming	3
COMPSCI 411	Machine Learning and Applications	3
COMPSCI 423	Introduction to Natural Language Processing	3
COMPSCI 425	Introduction to Data Mining	3
COMPSCI 444	Introduction to Text Retrieval and Its Applications in Biomedicine	3
COMPSCI 459	Fundamentals of Computer Graphics	3
COMPSCI 469	Introduction to Computer Security	3
COMPSCI 535	Algorithm Design and Analysis	3
MTHSTAT 562	Design of Experiments	3
MTHSTAT 564	Time Series Analysis	3
MTHSTAT 565	Nonparametric Statistics	3
MATH 315	Mathematical Programming and Optimization	3
MATH 318	Topics in Discrete Mathematics	3
MATH 583	Introduction to Probability Models	3
INFOST 120	Information Technology Ethics	3

INFOST 315	Knowledge Organization for Information Science and Technology	3
INFOST 465	Legal Aspects of Information Products and Services	3
INFOST 660	Information Policy	3
INFOST 661	Information Ethics	3

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Web Development, Undergraduate Certificate

The Web Development Certificate is designed to offer students the opportunity to complement their major field of study with an additional concentration in web programming. This certificate is also available to those who have already graduated.

## Requirements

At least 8 credits must be completed at UWM. The student must maintain a minimum GPA, as specified by department, in courses used to complete the certificate. No course may be taken on a credit/no credit basis.

The 18-credit certificate requires the following:

Code	Title	Credits
<b>Computer Programming (3 credits) - Select one of the following:</b>		<b>3</b>
COMPSCI 202	Introductory Programming Using Python	3
COMPSCI 351	Data Structures and Algorithms	3
<b>Web Documents (3 credits) - Select one of the following:</b>		<b>3</b>
ART 325	Web Design II	3
COMPSCI 113	Introduction to Web Document Production	3
INFOST 320	Web Design II	3

<b>Web Programming (3 credits) - Select one of the following:</b>		<b>3</b>
COMPSCI 361	Introduction to Software Engineering	3
COMPSCI 481	Server-side Internet Programming	3
<b>Web Applications (3 credits) - Must complete this course</b>		<b>3</b>
COMPSCI 482	Rich Internet Applications	3

## Electives

Code	Title	Credits
<b>Electives (6 credits) - Select 2 courses from the following list:</b>		<b>6</b>
ART 218	Moving Images and Sound in Art & Design	3
ART 224	Dynamic Typography	3
ART 325	Web Design II	3
BUS ADM 531	Developing Applications for Interconnected Systems	3
BUS ADM 532	Web Development for Open Business Systems	3
COMMUN 313	Human Communication and Technology	3
COMMUN 413	Rhetoric and the Internet	3
COMPSCI 112	Introduction to the Internet and the World Wide Web	3
COMPSCI 150	Survey of Computer Science	3
COMPSCI 425	Introduction to Data Mining	3
COMPSCI 444	Introduction to Text Retrieval and Its Applications in Biomedicine	3
COMPSCI 469	Introduction to Computer Security	3
COMPSCI 530	Computer Networks Laboratory	3
COMPSCI 552	Advanced Object-Oriented Programming	3
COMPSCI 557	Introduction to Database Systems	3
CURRINS 530	Workshop in Computer Instruction in the Schools	3
CURRINS 547	Curricular Applications of the Internet	3
ENGLISH 439	Information Design	3
HCA 444	Introduction to Text Retrieval and Its Applications in Biomedicine	3
HCA 542	Healthcare Database Design and Management	3
INFOST 325	Information Security I	3
INFOST 370	Data Analysis and Visualization for the Information Professional	3
INFOST 375	Multimedia Web Design	3
INFOST 685	Electronic Publishing and Web Design	3

## Electrical Engineering

Electrical engineers are at the forefront of developing technologies to improve and enhance our society. They are involved with understanding the fundamentals of nature to improve design methods and techniques, as well as applying their creativity to solving challenging problems. Electrical engineers design and analyze systems for supplying electric power; navigation systems for automobiles, aircraft, and spacecraft; audio and visual communication systems; and systems for information processing and computing.

The major in electrical engineering provides the undergraduate student with a broad understanding of the many areas within the field of electrical engineering. At the same time, the curriculum provides a choice of technical electives designed to strengthen the student in a chosen area of specialization.

## Mission Statement

The Department of Electrical Engineering is committed to outstanding undergraduate and graduate education, distinguished research programs,

and strong service to our students, professional and technical societies, and the community.

## Programs

- Artificial Intelligence and Machine Learning, Graduate Certificate (Department of Electrical Engineering) (p. 603)
- Electrical Engineering, BSE (p. 604)
- Electrical Engineering, Minor (p. 608)
- Electrical Engineering, PhD (p. 608)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Brian Armstrong	Professor, Co-Chair	PhD	Stanford University	✓	
John T. Boyland	Professor, Co-Chair	PhD	University of California, Berkeley	✓	
Christine T. Cheng	Associate Professor	PhD	Johns Hopkins University	✓	
Robert Cuzner	Associate Professor	PhD	University of Wisconsin-Madison	✓	
Adrian Dumitrescu	Professor	PhD	Rutgers, The State University of New Jersey		✓
Mukul Goyal	Associate Professor	PhD	Ohio State University	✓	
George Hanson	Professor	PhD	Michigan State University		✓
Seyed Hosseini	Professor	PhD	University of Iowa		✓
Yi Hu	Associate Professor	PhD	University of Texas at Dallas	✓	
Charles E. Kahn Jr.	Adjunct Professor	MD	University of Illinois at Chicago		
Nikolai A. Kouklin	Professor	PhD	University of Nebraska - Lincoln	✓	
Robert J. Krueger	Professor	PhD			✓
Chiu T. Law	Associate Professor	PhD	Purdue University	✓	
Amol D. Mali	Associate Professor	PhD	Arizona State University	✓	
David McClanahan	Faculty Associate	MSEE	University of Wisconsin-Milwaukee		✓
Susan McRoy	Professor	PhD	University of Toronto	✓	
Devendra K. Misra	Professor	PhD	Michigan State University	✓

Ali Reza	Professor	PhD			✓
Ichiro Suzuki	Professor	PhD	Osaka University, Japan		✓
Lingfeng Wang	Professor	PhD	Texas A&M University	✓	
Weizhong Wang	Associate Professor	PhD	University of Maryland, College Park	✓	
Guangwu Xu	Associate Professor	PhD	University at Buffalo, SUNY		✓
David C. Yu	Professor	PhD	University of Oklahoma		✓
Zeyun Yu	Associate Professor	PhD	The Ohio State University	✓	
Jun Zhang	Professor	PhD	Rensselaer Polytechnic Institute	✓	
Tian Zhao	Associate Professor	PhD	Purdue University	✓	

# Artificial Intelligence and Machine Learning, Graduate Certificate (Department of Electrical Engineering)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

The minimum GPA for admission is 2.75 in a prior bachelor's or post-baccalaureate degree (or cumulative credits after admission to a dual bachelor-masters degree program). Applicants should generally have a prior degree in science, engineering, computer science, economics, finance or any other area that requires academic preparation in math and programming. Applicants with other prior degrees will also be considered via holistic assessment of the academic record and professional experience, with a focus on substantial work experience in the quantitative analysis, programming, and adequate mathematics preparation for the required coursework.

## Credits and Courses

The Artificial Intelligence and Machine Learning Graduate Certificate requires a minimum of 15 credits, as described below. At least 12 credits must be taken at UWM.

Code	Title	Credits
<b>Required Courses</b>		
COMPSCI 557G or COMPSCI 715	Introduction to Database Systems Programming for Machine Learning	3
COMPSCI/ELECENG 711 or COMPSCI 411G	Introduction to Machine Learning Machine Learning and Applications	3
<b>Electives <sup>1</sup></b>		<b>9</b>
<i>Application Electives</i>		
COMPSCI/ELECENG 712	Image Processing	
COMPSCI 722	Artificial Intelligence Planning Techniques	
COMPSCI 723 or COMPSCI 423G	Natural Language Processing Introduction to Natural Language Processing	
COMPSCI 744 or COMPSCI 444G	Text Retrieval and Its Applications in Biomedicine Introduction to Text Retrieval and Its Applications in Biomedicine	
ELECENG 574G	Intermediate Control Systems	
ELECENG 810	Foundations for Advanced Machine Learning and Signal Processing	
ELECENG/COMPSCI 811	Advanced Machine Learning	
ELECENG 816	Optimal Control Theory	
MECHENG 476G	Introduction to Robotics	

IND ENG 717	Operations Research in Engineering Management
<i>Generic Electives</i>	
COMPSCI 425G	Introduction to Data Mining
COMPSCI/ELECENG 710	Artificial Intelligence
ELECENG 420G	Random Signals and Systems
ELECENG 474G	Introduction to Control Systems
IND ENG 716	Engineering Statistical Analysis
IND ENG 590/890	Topics in Industrial and Systems Engineering: (Introduction to Connected Systems)
IND ENG 590/890	Topics in Industrial and Systems Engineering: (Engineering Data Analytics)
<b>Total Credits</b>	<b>15</b>

<sup>1</sup> Students must enroll in 3 elective courses. At least 2 must be selected from the Applications Electives section, and at least 2 must be at the 700 level or above.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.

- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Electrical Engineering, BSE

Electrical engineering graduates pursue careers in fields such as energy generation and transmission, renewable energy, power electronics, bio-imaging and devices, signal and image processing, communications, optical and photonic circuits and devices, controls and automation, and many other areas.

### Concentrations

Several possible technical elective course groupings are listed below, as an aid in choosing technical electives. Electrical engineering students do not need to follow any particular grouping – the listings described below are provided as a guide only. In the long term, students will be better prepared for an engineering career having a broad exposure to different technical areas, rather than a narrow focus in one specialized area.

- Power Electronics and Power Systems
- Optics
- Nanotechnology/Nanoengineering
- Microwave/Radio-Frequency Engineering
- Electronics
- Controls
- Computer Systems
- Communications and Signal Processing
- Biomedical Imaging
- Embedded Systems

### Research

Work with faculty (<http://uwm.edu/engineering/classification/faculty/electrical-engineering/>) engaged in leading-edge research in areas such as:

- Optics and photonics in neuroscience
- Renewable energy
- Machine learning
- Artificial intelligence
- Data visualization
- Electric vehicles, aircraft and ships

## Accreditation

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET: <https://www.abet.org> (<https://tinyurl.com/u7fsfevw/>).

## New Freshmen

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile, grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology,

chemistry, and physics). The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

## Transfer Students

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

## Electrical Engineering Curriculum

The minimum number of credits required to complete the Bachelor of Science in Engineering with a major in Electrical Engineering is 120.

Code	Title	Credits
<b>Electrical Engineering Major Requirements with mini-tracks (35 credits)</b>		
EAS 200	Professional Seminar	1
ELECENG 101	Fundamentals of Electrical Engineering 1	3
ELECENG 140	Intro to Embedded Computing I: Digital Logic and Microprocessors	3
ELECENG 240	Intro to Embedded Computing II: C Programming for Embedded Applications	4
ELECENG 301	Electrical Circuits I	3
ELECENG 310	Signals and Systems	3
ELECENG 330	Electronics I	4
ELECENG 420	Random Signals and Systems	3
ELECENG 596	Capstone Design I	3
ELECENG 597	Capstone Design II	2
<b>Mini-Track Courses</b>		<b>6</b>
Select One from the following Options. If the chosen mini-track carries more than 6 credits, the extra credits will be counted as Group A technical Elective credits.		
<i>Option I</i>		
ELECENG 340	Embedded Systems I: C and C++ Programming for Embedded Applications	
ELECENG 440	Embedded Systems II: Advanced Embedded Systems	
<i>Option II</i>		

ELECENG 305	Electrical Circuits II	
ELECENG 335	Electronics II	
<b>Option III</b>		
ELECENG 361	Electromagnetic Fields	
ELECENG 362	Electromechanical Energy Conversion	
<b>Mathematics Requirement (16 credits)<sup>2</sup></b>		
MATH 231	Calculus and Analytic Geometry I	4
MATH 232	Calculus and Analytic Geometry II	4
MATH 233	Calculus and Analytic Geometry III	4
ELECENG 234	Analytical Methods in Engineering	4
<b>Chemistry and Biology Requirements (4 credits)</b>		
Select One from the following options		4
<i>Option I (4 credits will be counted here and 1 credit will be counted as Group A technical elective credit)</i>		
CHEM 105	General Chemistry for Engineering	
or CHEM 102	General Chemistry	
<i>Option II</i>		
BIO SCI 202	Anatomy and Physiology I	
<b>Physics Requirement (10 credits)</b>		
PHYSICS 209	Physics I (Calculus Treatment)	5
& PHYSICS 214	and Lab Physics I (Calculus Treatment)	
PHYSICS 210	Physics II (Calculus Treatment)	5
& PHYSICS 215	and Lab Physics II (Calculus Treatment)	
<b>Technical Electives - Select 31 credits from approved lists</b>		<b>31</b>
<b>GER Distribution Requirement (15 credits)</b>		
Arts		3
Humanities		3
Social Science		6
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	3
Cultural Diversity - Arts, Humanities, or Social Science course must also satisfy UWM Cultural Diversity Requirement		
<b>Free Electives (9 Credits)</b>		<b>9</b>
<b>Students must also satisfy Oral and Written Communication (OWA) Part A<sup>3</sup></b>		<b>0-6</b>
<b>Students must also satisfy the UWM Foreign Language requirements<sup>3</sup></b>		<b>0-8</b>
<b>Total Credits</b>		<b>120</b>

<sup>1</sup> Any CEAS Freshman Engineering course or approved transfer Freshman Engineering course will meet the ELECENG 101 requirement.  
<sup>2</sup> MATH 221, MATH 222 and two free electives may substitute for MATH 231, MATH 232 and MATH 233.  
<sup>3</sup> See General Education Requirements (p. 30).

### Technical Electives

The electrical engineering program requires a total of 31 credits of technical electives, chosen as follows. All non-required Electrical Engineering courses numbered 400-699 are Group A Technical Electives.

Code	Title	Credits
<b>Group A Technical Electives</b>		
Select at least 25 credits from the following or any mini-track course which hasn't been used to satisfy the mini-track requirement. The extra credits above 6 in the chosen mini-track and 1 extra credit from CHEM 102 or CHEM 105 are also counted towards Group A technical elective credits.		25-31
BUS ADM 447	Entrepreneurship	
COMPSCI 459	Fundamentals of Computer Graphics	
COMPSCI 520	Computer Networks	
COMPSCI 530	Computer Networks Laboratory	
EAS 1	Engineering Co-op Work Period <sup>1</sup>	
EAS 497	Study Abroad: <sup>2</sup>	
ELECENG 410	Digital Signal Processing	
ELECENG 421	Communication Systems	
ELECENG 436	Introduction to Medical Instrumentation	
ELECENG 437	Introduction to Biomedical Imaging	
ELECENG 440	Embedded Systems II: Advanced Embedded Systems	
ELECENG 451	Introduction to VLSI Design	
ELECENG 457	Digital Logic Laboratory	
ELECENG 458	Computer Architecture	
ELECENG 461	Microwave Engineering	
ELECENG 462	Antenna Theory	
ELECENG 464	Fundamentals of Photonics	
ELECENG 465	Broadband Optical Networks	
ELECENG 471	Electric Power Systems	
ELECENG 472	Introduction to Wind Energy	
ELECENG 474	Introduction to Control Systems	
ELECENG 481	Electronic Materials	
ELECENG 482	Introduction to Nanoelectronics	
ELECENG 490	Topics in Electrical Engineering:	
ELECENG 541	Integrated Circuits and Systems	
ELECENG 545	FPGA Embedded CPUs & Firmware Development	
ELECENG 562	Telecommunication Circuits	
ELECENG 565	Optical Communication	
ELECENG 568	Applications of Digital Signal Processing	
ELECENG 572	Power Electronics	
ELECENG 574	Intermediate Control Systems	
ELECENG 575	Analysis of Electric Machines and Motor Drives	
ELECENG 588	Fundamentals of Nanotechnology	
ELECENG 599	Senior Thesis	
IND ENG 360	Engineering Economic Analysis	
IND ENG 550	Control of Automated Manufacturing Systems	
MECHENG 301	Basic Engineering Thermodynamics	
MECHENG 321	Basic Heat Transfer	
<b>Group B Technical Electives</b>		
Select up to 6 credits from the following:		0-6
Any ATM SCI course 100-level or above		
Any BIO SCI course 150-level or above <sup>3</sup>		

Any CHEM course 200-level or above, or CHEM 104<sup>4</sup>

Any COMPSCI course 200-level or above

Any MATH course 400-level or above, or MATH 313, MATH 322, or MATH 325

Any PHYSICS course 300-level or above

MATLENG 201      Engineering Materials

- <sup>1</sup> Students who earn 3 or more credits of Co-op may use 3 of those credits as approved technical electives.
- <sup>2</sup> Students who earn 3 or more credits of Study Abroad may use 3 of those credits as approved technical electives.
- <sup>3</sup> Students who take BIO SCI 202 to satisfy Chemistry and Biology requirements cannot double count 4 credits here.
- <sup>4</sup> Students who take CHEM 102 and CHEM 104 (equaling a minimum of 8 credits) may use up to 3 credits of CHEM 104 as Group B technical electives.

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.
2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet

all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation,

course selection, program planning, and credit transfer evaluation. Students are assigned to a permanent professional advisor as soon as they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,
- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## Honors in the Major

Students in Electrical Engineering who meet all of the following criteria can be awarded honors in the major upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all CEAS courses counting toward the EE major;
3. A 3.500 GPA over all upper-division (300 level and higher) EE courses; and
4. At least one of the following:
  - a. Successful completion of 3-cr of research experience via senior thesis (ELECENG 599).
  - b. Participation in accelerated MS program with successful completion of 6 credits in approved courses for the EE concentration in MS in Engineering program.

Students who believe they may qualify for honors in Electrical Engineering should apply to the College of Engineering & Applied Science during their last semester of study.

NOTE: The Senior Thesis consists of working with a professor to define a project, perform the project, and write up results of the project to present to a three-professor committee for acceptance. A typical Senior Thesis report would be 15-30 pages consisting of project description, literature search, what was done, and conclusions.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses

### Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

### Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program.

For more information, contact the Office of Student Services at (414) 229-4667.

## Electrical Engineering, Minor

The minor in electrical engineering is designed for students in engineering and science majors. The minor is not available to electrical engineering majors.

### Requirements

It requires students to take a minimum of 21 credits, of which not more than 6 credits overlap with the student's major. Students must attain a minimum GPA of 2.0 in the minor.

Code	Title	Credits
<b>Core</b>		
Select 15 credits from the following:		15
ELECENG 301	Electrical Circuits I	
ELECENG 305	Electrical Circuits II	
ELECENG 310	Signals and Systems	
ELECENG 330	Electronics I	
ELECENG 335	Electronics II	
ELECENG 354	Digital Logic	
ELECENG 361	Electromagnetic Fields	
ELECENG 362	Electromechanical Energy Conversion	
ELECENG 367	Introduction to Microprocessors	
ELECENG 595	Capstone Design Project	
<b>Electives</b>		
Select 6 electives (see below)		6
<b>Total Credits</b>		<b>21</b>

### Electives

No more than 6 credits from the following list may be counted towards the minor:

Code	Title	Credits
COMPSCI 458	Computer Architecture	3
COMPSCI 459	Fundamentals of Computer Graphics	3
COMPSCI 536	Software Engineering	3
ELECENG 410	Digital Signal Processing	3
ELECENG 420	Random Signals and Systems	3
ELECENG 421	Communication Systems	3
ELECENG 436	Introduction to Medical Instrumentation	3
ELECENG 439	Introduction to Biomedical Optics	3
ELECENG 437	Introduction to Biomedical Imaging	3
ELECENG 451	Introduction to VLSI Design	3
ELECENG 457	Digital Logic Laboratory	3
ELECENG 461	Microwave Engineering	3
ELECENG 462	Antenna Theory	3
ELECENG 465	Broadband Optical Networks	3
ELECENG 471	Electric Power Systems	3
ELECENG/MECHENG 474	Introduction to Control Systems	4
MECHENG 490	Topics in Mechanical Engineering:	1-3
ELECENG 541	Integrated Circuits and Systems	3

ELECENG 562	Telecommunication Circuits	3
ELECENG 565	Optical Communication	3
ELECENG 572	Power Electronics	3
ELECENG/MECHENG 574	Intermediate Control Systems	3
MATLENG 481	Electronic Materials	3
MECHENG 321	Basic Heat Transfer	4

More information on the minor may be obtained from the CEAS Office of Student Services (414) 229-4667, EMS Room E386.

## Electrical Engineering, PhD

The Doctor of Philosophy, the highest degree offered by the University, is conferred in recognition of marked scholarship in a broad field of knowledge as well as distinguished critical or creative achievement within a special area of the general field (the special area being the subject of the doctoral dissertation). The Doctor of Philosophy (PhD) program in Electrical Engineering provides a program of coursework and in-depth scholarly research in an area of Electrical Engineering.

The PhD degree requires a minimum of 54 credits beyond the baccalaureate, including a dissertation. The student must also satisfy a residence requirement.

Many of the courses leading toward graduate degrees in CEAS are offered in the late afternoon or evening. So, students can complete much of their coursework on a part-time basis.

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Admission

The program follows the College's **existing Ph.D. admission requirements**, which are:

- Bachelor's or Master's degree in electrical engineering.
- If you have BS or MS degrees outside of electrical engineering, you may be admitted with no more than two course deficiencies.
- Minimum GPA of 3.0 in the highest degree granted based on a 4.0 scale.
- A brief statement describing your professional goals (i.e., Statement of Purpose, SoP) and two letters of reference.
- The Graduate Record Examination (GRE) is required for all international and domestic applicants.
- International students require proof of English language proficiency.

### Credits and Courses

The electrical engineering doctoral program will be comprised of 54 graduate credits beyond the Bachelor's degree with minimum credit distribution as follows:

Code	Title	Credits
<b>Electrical Engineering Topics</b>		<b>21</b>
<b>Approved Minor Area (within or outside of Electrical Engineering)</b>		<b>6</b>

<b>Approved Electives</b>	<b>9</b>
<b>CEAS Graduate Seminars</b>	
EAS 701 Effective Academic Writing	1
EAS 702 Preparing Future Engineering Faculty & Professionals	2
<b>Doctoral Thesis</b>	<b>15</b>
ELECENG 998 Doctoral Thesis	
<b>Total Credits</b>	<b>54</b>

A minimum of 27 credits (including thesis) must be completed in the Ph.D. program at UWM, and a minimum of 21 credits, excluding dissertation, must be at the 700 level or higher.

Courses are chosen by the student in consultation with her/his advisors.

The minor must be taken using courses outside of Electrical Engineering (and excluding cross-listed courses) in other CEAS programs, or in the physical sciences, management sciences, or mathematics. However, in some cases there may be a subdomain of Electrical Engineering that is clearly separate yet necessary and complementary to their major area courses. In this case, the student may create a Program of Study that specifies a set of minor courses taken from within Electrical Engineering. These minor courses must be approved by the advisor \*prior\* to taking any of them.

A maximum of 24 credits may be considered for transfer from prior graduate work, including a Master's degree earned at UWM or elsewhere provided the course work taken falls within the appropriate areas and has earned a grade of "B" or better. Students entering the program without an applicable Master's degree are limited to a maximum transfer of 9 credits for courses taken elsewhere.

Independent study courses (699 and 999) may be included in the minimum course credit requirements provided approval by the CEAS Graduate Studies Office has been obtained prior to registration in such courses. Typically no more than six credits of independent study are allowed in the PhD program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Studies Office.

ELECENG 990	Masters Thesis	1-9
ELECENG 998	Doctoral Thesis	1-12
ELECENG 999	Advanced Independent Study	1-3

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student must have a major professor to advise, supervise, and approve the program of study before registering for courses. The department will assign the incoming student to an initial Program Advisor at the time of admission. Prior to the completion of 12 credits (9 credits for part-time students), the student must select a major professor who will be the student's thesis advisor. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Representative for approval. For subsequent changes, the student must file a revised program of study for approval.

### Foreign Language

There is no foreign language requirement for the degree.

### Residence

The program residence requirement is satisfied either by completing 8 or more graduate credits in each of two consecutive semesters, inclusive of summer sessions, or by completing 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions.

### Qualifying Examination

Each student in the program must take and pass a Qualifying Examination to demonstrate that the student is qualified for doctoral-level work. The Qualifying Examination is a written exam and is structured in two parts: Part 1 and Part 2. The examination is offered twice a year during the regular academic year. The content of the examination reflects the major areas of Electrical Engineering.

Students entering with only a bachelor's degree or with a master's degree in an area unrelated to their major area may take the Qualifying Examination for the first time after earning 12 credits of graduate work at UWM and must successfully pass the exam before earning 30 credits of graduate work at UWM.

Students admitted after completing an appropriate master's degree must take this examination no later than the semester immediately after 18 credits of graduate work have been earned at UWM.

A student may take the Qualifying Examination twice. On the first attempt, the student must attempt both Part 1 and Part 2 of the examination.

- If the student passes both parts, then the student has passed the entire examination and will be permitted to proceed toward the Doctor of Philosophy degree.
- If the student fails both parts, then the student must take the entire exam again at its next offering.
- If a student passes only one of the two parts, then the student must take the examination again at its next offering, but may choose to take only the part of the examination that was not passed on the first attempt.
- If a passing grade is not obtained on the second attempt of the Qualifying Examination, the student will not be permitted to proceed toward the Doctor of Philosophy degree.

A student who fails the qualifying exam twice is subject to dismissal from the PhD in Electrical Engineering program. A student may appeal the failure and dismissal within 30 days of being notified of the failure. If the student does not appeal or the appeal is not granted, the College will recommend to the Graduate School that the student be dismissed. A student who is dismissed from the PhD in Electrical Engineering program

because of failing the qualifying exam may not be enrolled in the PhD in Electrical Engineering program for a complete calendar year. This does not preclude the student from being enrolled in any other degree program offered by the University. A student who wishes to re-enroll in the program after a calendar year has passed must apply as any other student would, including payment of fees. A student readmitted after having failed the qualifying exam twice must take the qualifying exam in the first semester of matriculation and this will count as the student's first attempt at the exam. The student may appeal this requirement prior to the first scheduled day of classes. If the student fails the qualifying exam on this first attempt, the student is permitted the customary second attempt as described above. All appeals must be in writing and directed to the CEAS Associate Dean for Academic Affairs.

### Doctoral Program Committee

The Doctoral Program Committee is proposed by the major professor in consultation with the student and the department. The Committee must include at least five graduate faculty (three from major area, one from minor area, and one from any area, including the major and minor areas). The last member may be a person from outside the University (such as another university, a research laboratory, or a 7 relevant industrial partner), provided that person meets Graduate School requirements. The Committee may have more than five members, provided that the majority of the Committee members are from the student's major field. The Major Professor is generally a faculty member from the EECS Department who has Graduate Faculty status.

### Doctoral Preliminary Examination

A student is admitted to candidacy only after successful completion of the doctoral preliminary examination conducted by the Doctoral Program Committee. This examination, which normally is oral, must be taken before the completion of 48 credits of graduate work toward the Doctor of Philosophy degree in Electrical Engineering and should be taken within the first five years in the program. Prior to the examination, the student must present a proposal for a doctoral dissertation project. The examination may cover both graduate course material and items related to the proposed dissertation project.

### Dissertation and Dissertator Status

The student must carry out a creative effort in the major area under the supervision of the major professor and report the results in an acceptable dissertation. The effort of the student and the major professor to produce the dissertation is reflected in the PhD in Electrical Engineering program requirement that the student complete at least 18 credits of doctoral thesis. After the student has successfully completed all degree requirements except the dissertation, the student may apply for Dissertator Status.

Achieving Dissertator Status requires successful completion of the Doctoral Preliminary Examination and prior approval of the student's advisor and the Doctoral Program Committee of a dissertation proposal that outlines the scope of the project, the research method, and the goals to be achieved. Any proposal that may involve a financial commitment by the University also must be approved by the Office of the Dean. After having achieved Dissertator Status, the student must continue to register for 3 credits of doctoral thesis per semester during the academic year until the dissertation is completed.

### Dissertation Defense

The final examination, which is oral, consists of a defense of the dissertation project. The doctoral defense examination may only be taken

after all coursework and other requirements have been completed. The student must have Dissertator Status at the time of the defense.

### Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

## Engineering and Applied Science (Graduate Programs)

With the exception of the Master of Science in Computer Science, the graduate programs offered by the College of Engineering and Applied Science are college-wide programs, and the responsibility for these programs is vested in the graduate faculty of the College operating via an interdepartmental committee, the Graduate Program Subcommittee (GPSC).

The engineering master's program offered by the College is the Master of Science in Engineering.

The program provides breadth by requiring a program of coursework and depth through participation in research or design synthesis. The research or design synthesis effort is documented in a thesis that is presented and defended by the student at the final degree examination. For those with prior engineering/scientific work experience which includes appropriate report writing, the program offers a non-thesis option which requires additional coursework in lieu of thesis.

Since the program does not require a rigid set of courses, each student, in consultation with faculty, has the flexibility to put together a program of study which is compatible with the student's career objectives. The flexibility of customizing the program of study makes the Master of Science in Engineering Program suitable as a terminal degree as well as a stepping stone for doctoral level study.

### Related Certificates

- Certificate in Energy Engineering (p. 611)
- Certificate in Ergonomics (p. 653)
- Certificate in Modern Engineering Leadership (p. 654)

## Energy Engineering, Graduate Certificate

With the rapid dwindling of energy resources, there is a great demand for workers in various fields to keep themselves abreast of the latest technology in solving and planning for the energy shortage and efficient use of energy. This interdisciplinary Certificate in Energy Engineering Program is open to post-baccalaureate students who are interested in continuing education for career development or gaining experience in the energy area. In particular, the Program will provide basic knowledge on the design of electrical and mechanical devices and systems and yet has adequate flexibility for students to focus on certain areas in energy according to their own discretion in advanced courses.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students must have a baccalaureate degree. A minimum 2.75 cumulative undergraduate grade point average is required.

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

To obtain the certificate, students are required to complete a minimum of 15 credits from the lists of Groups A and B courses of which at least 12 credits must be taken at UWM.

Students must complete at least two courses from Group A to obtain an Energy Engineering Certificate. Additional electives can be chosen from Group B. At least 6 credits must be 700-level or above. A maximum of 3 credits of independent study may be applied toward the certificate.

### Group A Credits

Code	Title	Credits
ELECENG 471	Electric Power Systems	3
ELECENG 572	Power Electronics	3
ELECENG 574	Intermediate Control Systems	3
ELECENG 575	Analysis of Electric Machines and Motor Drives	3
MECHENG 432	Internal Combustion Engines	3
MECHENG 434	Air Conditioning System Design	3
MECHENG 435	Power Plant Theory and Design	3
MECHENG 436	Solar Engineering	3
ELECENG 781	Advanced Synchronous Machinery	3
ELECENG 872	Computer Analysis of Electric Power Systems	3
ELECENG 890	Special Topics: (Advanced Power Electronics)	3
ELECENG 890	Special Topics: (Automotive Power Systems (New Course))	3
ELECENG 890	Special Topics: (Renewable Energy Systems (New Course))	3
ELECENG 999	Advanced Independent Study	1-3
MECHENG 702	Advanced Engineering Thermodynamics	3
MECHENG 703	Principles of Combustion	3
MECHENG 710	Advanced Transport Processes	2
MECHENG 711	Thermal Radiation and Conduction	3
MECHENG 712	Convection Heat and Mass Transfer	3
MECHENG 714	Energy Transport in Microscale Systems	3
MECHENG 721	Fundamentals of Fluid Flow	3
MECHENG 722	Advanced Fluid Mechanics	3
MECHENG 723	Computational Fluid Dynamics and Heat Transfer	3
MECHENG 725	Fluid Power and Turbomachinery	2
MECHENG 999	Advanced Independent Study	1-3

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be transferred from energy-related, graduate-level coursework taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:

- Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
  3. A course may count toward no more than one certificate and one degree.
  4. Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Engineering, MS

The Master of Science in Engineering program is a flexible program designed to meet the needs of a wide variety of students. The program can be a stepping-stone on the way to further studies and the pursuit of advanced research, such as can be obtained by pursuing the PhD. Or the program can provide a pathway to professional advancement through greater technical knowledge and intellectual maturity. The student, with the help and approval of a major advisor, can choose from a wide range of courses from throughout the College of Engineering and Applied Science (CEAS), and where appropriate, from other schools and colleges.

Students entering the Master of Science in Engineering program must choose an area of concentration, from among the numerous choices offered. It is possible to complete the MS in Engineering without a concentration, but almost all students do complete one. The MS in Engineering program currently offers the following areas of concentration:

- Biomedical Engineering
- Civil Engineering
- Electrical and Computer Engineering
- Energy Engineering
- Engineering Management (admission to this concentration is suspended)
- Engineering Mechanics
- Industrial and Systems Engineering
- Manufacturing Engineering
- Materials Engineering
- Mechanical Engineering
- Occupational Biomechanics/Ergonomics

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. Undergraduate major in engineering, mathematics or a natural science.
2. Submission of official GRE (<http://uwm.edu/graduateschool/admission/#gre>) scores from a test taken within the last 5 years.

Applicants may be admitted with specific program-defined course deficiencies provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree.

## Credits and Courses

Minimum degree requirements are 30 credits for the thesis option and 31 credits for the non-thesis option as outlined below. Of the courses offered in the College only those numbered 400 and above may be taken for graduate credit for this degree. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided approval of a program of study including them has been obtained prior to registration in such courses. Typically, no more than three credits of independent study are allowed in the MS Program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Programs Office. A student may not use courses that formed part of the requirements of a baccalaureate degree for subsequent graduate credit, except when those courses were part of CEAS Integrated BS/MS program.

### Thesis and Non-Thesis Options

Students will be required to either the Thesis or Non-Thesis option in their program of study. If the student chooses the Non-Thesis option, then as permitted by the student's department, the student must also choose between two methods of final evaluation: the Capstone Option and the Comprehensive Examination Option.

After 12 credits of coursework are completed, changes from Thesis to Non-Thesis option will not be allowed, except under exceptional circumstances to be considered on a case-by-case basis. Students may always change from a Non-Thesis to a Thesis option. Departments and faculty may make pursuing the Thesis option a requirement (or preference) of employment for TA's, RA's, and PA's.

### Thesis Option

All students are encouraged to undertake the thesis option. The degree requires the following:

Code	Title	Credits
	Select a minimum of 12 credits in an approved technical program of studies	12

	Select 9 credits of approved electives	9
EAS 701	Effective Academic Writing	1
EAS 702	Preparing Future Engineering Faculty & Professionals	2
	Select 6 credits of thesis	6
<b>Total Credits</b>		<b>30</b>

At least 12 credits, not including thesis or the CEAS Graduate Seminar Course, must be in courses of 700 level or higher. At least 12 credits, including thesis, must be earned at UWM. The thesis may be written in absentia provided prior permission has been obtained from the major professor and the Associate Dean for Academic Affairs in the College of Engineering & Applied Science. Students in the thesis option must pass a final comprehensive examination, administered by the Master's Program Committee, partially in defense of the thesis.

### Non-Thesis Capstone Option

Code	Title	Credits
	Select a minimum of 18 credits in an approved technical program of studies	18
	Select 9 credits of approved electives	9
EAS 701	Effective Academic Writing	1
	Select 3 credits of a capstone project, using a 3 credit course that allows flexible independent study (either the Independent Study course or a specific capstone course)	3
<b>Total Credits</b>		<b>31</b>

In addition to the requirements listed in the table above, at least 15 credits must be of 700 level or above.

For the capstone project, the student must submit a written proposal and receive approval from the advisor. The capstone project should be designed with the intent of leading to creative work based on the student's background, and should be the equivalent of 3 credits of work to be completed over a single semester. Upon completion of the capstone, the student must submit a written report and give an oral presentation of the project to the Master's Program Committee for approval.

### Non-Thesis Comprehensive Examination Option

Code	Title	Credits
	Select a minimum of 21 credits in an approved technical program of studies	21
	Select 9 credits of approved electives	9
EAS 701	Effective Academic Writing	1
<b>Total Credits</b>		<b>31</b>

In addition to the requirements listed in the table above, at least 15 credits must be of 700 level or above.

Mastery of the courses taken in the program of study may be demonstrated by one of the following:

1. The student submits a dossier of work, and passes an oral examination given by the Master's Program Committee. Or
2. The student passes a written master's comprehensive examination when it is offered by the department.

Departments allowing a written examination option will offer such exams at least once per semester, and will announce the date of the exam at least 60 days prior to the exam. The department also must provide a

written description of the topics covered on the exam, including text books and chapters.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student have a major professor to advise, supervise, and approve the Program of Study before registering for courses. The College will assign the incoming student to an initial advisor at the time of admission. A student may change advisors with the consent of the new advisor, approval by the Associate Dean for Academic Affairs, and upon notification of the student's current advisor.

### Program of Study

During the first semester the student, in consultation with the major professor, develops a program of study, obtains the consent of the advisor and submits it to the CEAS Graduate Programs Office for approval by the Associate Dean. To make subsequent changes, the student must follow the same process. Graduation requires successful completion of courses from an approved program of study. Students are recommended to obtain approval for an amended program of study before taking a course not on the current program of study.

### Master's Program Committee

The Master's Program Committee is proposed by the major professor in consultation with the student. The Committee must include at least three graduate faculty, not all of whom are in the same department.

### Time Limit

The student must complete all degree requirements within five years of initial enrollment.

## Engineering, MS/Urban Planning, MUP

In cooperation with the Department of Urban Planning, the College of Engineering and Applied Science offers a Master of Science in Engineering/Master of Urban Planning program to prepare students for positions in transportation, public works or similar areas.

### Cooperating Departments:

Civil Engineering  
Electrical Engineering and Computer Science  
Industrial and Manufacturing Engineering  
Materials  
Mechanical Engineering

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Credits and Courses

Students are required to meet the College of Engineering and Applied Science requirements for the Master of Science in Engineering degree as well as the requirements for a Master of Urban Planning degree as set by the Department of Urban Planning. Students in this program are required to take 15 credits in an approved program of technical studies

in the College of Engineering and Applied Science, and 6 credits in nontransportation related engineering approved electives.

Students in the MS/MUP program are required to take 6 credits in the Department of Urban Planning as well as an additional 24 credits of core courses in the Department of Urban Planning. The total credit requirement for the MS/MUP program is 54 credits. Students in the MS/MUP program must also take and pass a comprehensive exam in Urban Planning.

### Important

You must refer to the catalog pages of both individual master's programs to ensure that you meet all requirements for both degrees.

Code	Title	Credits
<b>Urban Planning Core Courses</b>		<b>27</b>
URBPLAN 701	Introduction to Land Use Planning	
URBPLAN 702	Introduction to Planning Law	
URBPLAN 711	Planning Theories and Practice	
URBPLAN 720	Urban Development Theory and Planning	
URBPLAN 721	Applied Planning Methods

### Civil Engineering Concentration

A minimum of 15 credits of qualifying graduate courses in Civil Engineering.

#### Qualifying Courses

Code	Title	Credits
Any Civ Eng courses numbered between 701 and 999, excluding 888 and 998.		15
May include up to 3 credits each of:		
CIV ENG 990	Masters Thesis	
CIV ENG 999	Advanced Independent Study	
<b>Total Credits</b>		<b>15</b>

## Additional Requirements

### Degree Requirements

Students in the program will concurrently pursue a Master of Science in Engineering degree and a Master of Urban Planning degree from the School of Architecture and Urban Planning. Prerequisite to the award of either degree in this program is the simultaneous award of its counterpart degree. Candidates seeking admission to the MS/MUP must apply to and be admitted to both programs. The requirements for admission to the Master of Urban Planning degree program are detailed in the Urban Planning section of the Catalog.

### Time Limit

Students in the MS/MUP program are allowed up to five years from time of initial enrollment to complete all requirements for both degrees.

## Engineering, MS: Biomedical Engineering

The Master of Science in Engineering program is a flexible program designed to meet the needs of a wide variety of students. The program can be a stepping-stone on the way to further studies and the pursuit of advanced research, such as can be obtained by pursuing the PhD. Or the program can provide a pathway to professional advancement through greater technical knowledge and intellectual maturity. The student, with the help and approval of a major advisor, can choose from a wide range of courses from throughout the College of Engineering and Applied Science (CEAS), and where appropriate, from other schools and colleges.

Students entering the Master of Science in Engineering program must choose an area of concentration, from among the numerous choices offered. It is possible to complete the MS in Engineering without a concentration, but almost all students do complete one. The MS in Engineering program currently offers the following areas of concentration:

- Biomedical Engineering
- Civil Engineering
- Electrical and Computer Engineering
- Energy Engineering
- Engineering Management (admission to this concentration is suspended)
- Engineering Mechanics

- Industrial and Systems Engineering
- Manufacturing Engineering
- Materials Engineering
- Mechanical Engineering
- Occupational Biomechanics/Ergonomics

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. Undergraduate major in engineering, mathematics or a natural science.
2. Submission of official GRE (<http://uwm.edu/graduateschool/admission/#gre>) scores from a test taken within the last 5 years.

Applicants may be admitted with specific program-defined course deficiencies provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree.

## Credits and Courses

Minimum degree requirements are 30 credits for the thesis option and 31 credits for the non-thesis option as outlined below. Of the courses offered in the College only those numbered 400 and above may be taken for graduate credit for this degree. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided approval of a program of study including them has been obtained prior to registration in such courses. Typically, no more than three credits of independent study are allowed in the MS Program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Programs Office. A student may not use courses that formed part of the requirements of a baccalaureate degree for subsequent graduate credit, except when those courses were part of CEAS Integrated BS/MS program.

### Thesis and Non-Thesis Options

Students will be required to either the Thesis or Non-Thesis option in their program of study. If the student chooses the Non-Thesis option, then as permitted by the student's department, the student must also choose between two methods of final evaluation: the Capstone Option and the Comprehensive Examination Option.

After 12 credits of coursework are completed, changes from Thesis to Non-Thesis option will not be allowed, except under exceptional circumstances to be considered on a case-by-case basis. Students may always change from a Non-Thesis to a Thesis option. Departments and faculty may make pursuing the Thesis option a requirement (or preference) of employment for TA's, RA's, and PA's.

### Thesis Option

All students are encouraged to undertake the thesis option. The degree requires the following:

Code	Title	Credits
Select a minimum of 12 credits in an approved technical program of studies		12
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
EAS 702	Preparing Future Engineering Faculty & Professionals	2
Select 6 credits of thesis		6
<b>Total Credits</b>		<b>30</b>

At least 12 credits, not including thesis or the CEAS Graduate Seminar Course, must be in courses of 700 level or higher. At least 12 credits, including thesis, must be earned at UWM. The thesis may be written in absentia provided prior permission has been obtained from the major professor and the Associate Dean for Academic Affairs in the College of Engineering & Applied Science. Students in the thesis option must pass a final comprehensive examination, administered by the Master's Program Committee, partially in defense of the thesis.

### Non-Thesis Capstone Option

Code	Title	Credits
Select a minimum of 18 credits in an approved technical program of studies		18
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
Select 3 credits of a capstone project, using a 3 credit course that allows flexible independent study (either the Independent Study course or a specific capstone course)		3
<b>Total Credits</b>		<b>31</b>

In addition to the requirements listed in the table above, at least 15 credits must be of 700 level or above.

For the capstone project, the student must submit a written proposal and receive approval from the advisor. The capstone project should be designed with the intent of leading to creative work based on the student's background, and should be the equivalent of 3 credits of work to be completed over a single semester. Upon completion of the capstone, the student must submit a written report and give an oral presentation of the project to the Master's Program Committee for approval.

### Non-Thesis Comprehensive Examination Option

Code	Title	Credits
Select a minimum of 21 credits in an approved technical program of studies		21
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
<b>Total Credits</b>		<b>31</b>

In addition to the requirements listed in the table above, at least 15 credits must be of 700 level or above.

Mastery of the courses taken in the program of study may be demonstrated by one of the following:

1. The student submits a dossier of work, and passes an oral examination given by the Master's Program Committee. Or
2. The student passes a written master's comprehensive examination when it is offered by the department.

Departments allowing a written examination option will offer such exams at least once per semester, and will announce the date of the exam at least 60 days prior to the exam. The department also must provide a written description of the topics covered on the exam, including text books and chapters.

### Biomedical Engineering Concentration

A minimum of 15 credits of qualifying graduate courses from the list below. May include up to 3 credits each of BME 990 and BME 999. Also, students must take at least 16 credits of engineering courses.

#### Qualifying Courses

Code	Title	Credits
BME 733	Sensors and Systems	3
BME 890	Special Topics:	3
BME 990	Masters Thesis *	1-9
BME 999	Advanced Independent Study *	1-3
COMPSCI/ELECENG 710	Artificial Intelligence	3
ELECENG/MECHENG 701	Advanced Linear System Analysis	3
COMPSCI/ELECENG 711	Introduction to Machine Learning	3
COMPSCI/ELECENG 712	Image Processing	3
ELECENG/MECHENG 718	Nonlinear Control Systems	3
ELECENG 737	Medical Imaging Signals and Systems	3
ELECENG 765	Introduction to Fourier Optics and Optical Signal Processing	3
ELECENG 810	Foundations for Advanced Machine Learning and Signal Processing	3
MECHENG 715	Numerical Methods in Engineering	3
BMS 765	Molecular Pathophysiology	3
OCCTHPY 701	Advanced Measurement and Instrumentation in Health Care	3
PH 702	Introduction to Biostatistics	3
PH 704	Principles and Methods of Epidemiology	3
PH 706	Perspectives on Community & Behavioral Health	3
PH 711	Intermediate Biostatistics	3
PH 712	Probability and Statistical Inference	3
PHYSICS 705	Molecular, Cellular, and System Biophysics	3
PHYSICS 706	Biophotonics	3
PHYSICS 782	Physics of Medical Imaging	3

\* A maximum of 3 credits of BME 990 or 999 may be included.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student have a major professor to advise, supervise, and approve the Program of Study before registering for courses. The College will assign the incoming student to an initial

advisor at the time of admission. A student may change advisors with the consent of the new advisor, approval by the Associate Dean for Academic Affairs, and upon notification of the student's current advisor.

### Program of Study

During the first semester the student, in consultation with the major professor, develops a program of study, obtains the consent of the advisor and submits it to the CEAS Graduate Programs Office for approval by the Associate Dean. To make subsequent changes, the student must follow the same process. Graduation requires successful completion of courses from an approved program of study. Students are recommended to obtain approval for an amended program of study before taking a course not on the current program of study.

### Master's Program Committee

The Master's Program Committee is proposed by the major professor in consultation with the student. The Committee must include at least three graduate faculty, not all of whom are in the same department.

### Time Limit

The student must complete all degree requirements within five years of initial enrollment.

## Engineering, MS: Civil Engineering

The Master of Science in Engineering program is a flexible program designed to meet the needs of a wide variety of students. The program can be a stepping-stone on the way to further studies and the pursuit of advanced research, such as can be obtained by pursuing the PhD. The MS in Engineering program currently offers the following areas of concentration:

- Biomedical Engineering
- Civil Engineering
- Electrical and Computer Engineering
- Energy Engineering
- Engineering Management (admission to this concentration is suspended)
- Engineering Mechanics
- Industrial and Systems Engineering
- Manufacturing Engineering
- Materials Engineering
- Mechanical Engineering
- Occupational Biomechanics/Ergonomics

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. Undergraduate major in engineering, mathematics or a natural science.
2. Submission of official GRE (<http://uwm.edu/graduateschool/admission/#gre>) scores from a test taken within the last 5 years.

Applicants may be admitted with specific program-defined course deficiencies provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree.

## Credits and Courses

Minimum degree requirements are 30 credits for the thesis option and 31 credits for the non-thesis option as outlined below. Of the courses

offered in the College only those numbered 400 and above may be taken for graduate credit for this degree. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided approval of a program of study including them has been obtained prior to registration in such courses. Typically, no more than three credits of independent study are allowed in the MS Program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Programs Office. A student may not use courses that formed part of the requirements of a baccalaureate degree for subsequent graduate credit, except when those courses were part of CEAS Integrated BS/MS program.

### Thesis and Non-Thesis Options

Students will be required to either the Thesis or Non-Thesis option in their program of study. If the student chooses the Non-Thesis option, then as permitted by the student's department, the student must also choose between two methods of final evaluation: the Capstone Option and the Comprehensive Examination Option.

After 12 credits of coursework are completed, changes from Thesis to Non-Thesis option will not be allowed, except under exceptional circumstances to be considered on a case-by-case basis. Students may always change from a Non-Thesis to a Thesis option. Departments and faculty may make pursuing the Thesis option a requirement (or preference) of employment for TA's , RA's, and PA's.

### Thesis Option

All students are encouraged to undertake the thesis option. The degree requires the following:

Code	Title	Credits
Select a minimum of 12 credits in an approved technical program of studies		12
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
EAS 702	Preparing Future Engineering Faculty & Professionals	2
Select 6 credits of thesis		6
<b>Total Credits</b>		<b>30</b>

At least 12 credits, not including thesis or the CEAS Graduate Seminar Course, must be in courses of 700 level or higher. At least 12 credits, including thesis, must be earned at UWM. The thesis may be written in absentia provided prior permission has been obtained from the major professor and the Associate Dean for Academic Affairs in the College of Engineering & Applied Science. Students in the thesis option must pass a final comprehensive examination, administered by the Master's Program Committee, partially in defense of the thesis.

### Non-Thesis Capstone Option

Code	Title	Credits
Select a minimum of 18 credits in an approved technical program of studies		18
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
Select 3 credits of a capstone project, using a 3 credit course that allows flexible independent study (either the Independent Study course or a specific capstone course)		3
<b>Total Credits</b>		<b>31</b>

In addition to the requirements listed in the table above, at least 15 credits must be of 700 level or above.

For the capstone project, the student must submit a written proposal and receive approval from the advisor. The capstone project should be designed with the intent of leading to creative work based on the student's background, and should be the equivalent of 3 credits of work to be completed over a single semester. Upon completion of the capstone, the student must submit a written report and give an oral presentation of the project to the Master's Program Committee for approval.

### Non-Thesis Comprehensive Examination Option

Code	Title	Credits
Select a minimum of 21 credits in an approved technical program of studies		21
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
<b>Total Credits</b>		<b>31</b>

In addition to the requirements listed in the table above, at least 15 credits must be of 700 level or above.

Mastery of the courses taken in the program of study may be demonstrated by one of the following:

1. The student submits a dossier of work, and passes an oral examination given by the Master's Program Committee. Or
2. The student passes a written master's comprehensive examination when it is offered by the department.

Departments allowing a written examination option will offer such exams at least once per semester, and will announce the date of the exam at least 60 days prior to the exam. The department also must provide a written description of the topics covered on the exam, including text books and chapters.

### Energy Engineering Concentration

A minimum of 15 credits of qualifying graduate courses in Electrical Engineering or Mechanical Engineering.

### Qualifying Courses

Code	Title	Credits
MECHENG 425	Aerodynamics of Wind Turbines	3
MECHENG 432	Internal Combustion Engines	3
MECHENG 434	Air Conditioning System Design	3
MECHENG 435	Power Plant Theory and Design	3
MECHENG 436	Solar Engineering	3
ELECENG 471	Electric Power Systems	3
ELECENG/MECHENG 472	Introduction to Wind Energy	3
ELECENG 572	Power Electronics	3
ELECENG/MECHENG 574	Intermediate Control Systems	3
ELECENG 575	Analysis of Electric Machines and Motor Drives	3
ELECENG/MECHENG 701	Advanced Linear System Analysis	3
MECHENG 702	Advanced Engineering Thermodynamics	3

MECHENG 710	Advanced Transport Processes	2
MECHENG 711	Thermal Radiation and Conduction	3
MECHENG 712	Convection Heat and Mass Transfer	3
ELECENG/MECHENG 718	Nonlinear Control Systems	3
MECHENG 721	Fundamentals of Fluid Flow	3
MECHENG 722	Advanced Fluid Mechanics	3
MECHENG 723	Computational Fluid Dynamics and Heat Transfer	3
MECHENG 725	Fluid Power and Turbomachinery	2
ELECENG/MECHENG 819	Adaptive Control Theory	3

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student have a major professor to advise, supervise, and approve the Program of Study before registering for courses. The College will assign the incoming student to an initial advisor at the time of admission. A student may change advisors with the consent of the new advisor, approval by the Associate Dean for Academic Affairs, and upon notification of the student's current advisor.

### Program of Study

During the first semester the student, in consultation with the major professor, develops a program of study, obtains the consent of the advisor and submits it to the CEAS Graduate Programs Office for approval by the Associate Dean. To make subsequent changes, the student must follow the same process. Graduation requires successful completion of courses from an approved program of study. Students are recommended to obtain approval for an amended program of study before taking a course not on the current program of study.

### Master's Program Committee

The Master's Program Committee is proposed by the major professor in consultation with the student. The Committee must include at least three graduate faculty, not all of whom are in the same department.

### Time Limit

The student must complete all degree requirements within five years of initial enrollment.

## Engineering, MS: Engineering Management

This concentration has been suspended.

This concentration has been suspended.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

The Master's Program Committee is proposed by the major professor in consultation with the student. The Committee must include at least three graduate faculty, not all of whom are in the same department.

### Time Limit

The student must complete all degree requirements within five years of initial enrollment.

## Engineering, MS: Engineering Mechanics

The Master of Science in Engineering program is a flexible program designed to meet the needs of a wide variety of students. The program can be a stepping-stone on the way to further studies and the pursuit of advanced research, such as can be obtained by pursuing the PhD. Or the program can provide a pathway to professional advancement through greater technical knowledge and intellectual maturity. The student, with the help and approval of a major advisor, can choose from a wide range of courses from throughout the College of Engineering and Applied Science (CEAS), and where appropriate, from other schools and colleges.

Students entering the Master of Science in Engineering program must choose an area of concentration, from among the numerous choices offered. It is possible to complete the MS in Engineering without a concentration, but almost all students do complete one. The MS in Engineering program currently offers the following areas of concentration:

- Biomedical Engineering
- Civil Engineering
- Electrical and Computer Engineering
- Energy Engineering
- Engineering Management (admission to this concentration is suspended)

- Engineering Mechanics
- Industrial and Systems Engineering
- Manufacturing Engineering
- Materials Engineering
- Mechanical Engineering
- Occupational Biomechanics/Ergonomics

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

The department also must provide a written description of the topics covered on the exam, including text books and chapters.

### Engineering Mechanics Concentration

A minimum of 15 graduate credits selected from the following list<sup>1</sup>; may include up to 3 credits each of Civ Eng 990 and Civ Eng 999.

#### Qualifying Courses

Code	Title	Credits
CIV ENG 401	Intermediate Strength of Materials	3
CIV ENG 463	Introduction to Finite Elements	3
CIV ENG 466	Design of Composite Structures	3
CIV ENG 469	Introduction to Biomechanical Engineering	3
CIV ENG 502	Experimental Stress Analysis	3
CIV ENG 580	Engineering Analysis in Applied Mechanics	3
CIV ENG 701	Advanced Strength of Materials	3
CIV ENG 702	Elastic Stability	3
CIV ENG 725	Finite Element Methods in Engineering	3
CIV ENG 726	Mechanical Vibrations	3
CIV ENG 732	Fatigue in Engineering Materials	3
CIV ENG 773	Advanced Dynamics	3
CIV ENG 774	Shock and Vibration Analysis	3
CIV ENG 804	Theory of Plasticity	3
CIV ENG 880	Bioengineering Seminar	1
CIV ENG 990	Masters Thesis	1-9
CIV ENG 999	Advanced Independent Study	1-3

<sup>1</sup> The following course(s) are part of the approved course list, but are currently inactive: CIV ENG 890.

## Additional Requirements

The student, with the help and approval of a major advisor, can choose from a wide range of courses from throughout the College of Engineering and Applied Science (CEAS), and where appropriate, from other schools and colleges.

Students entering the Master of Science in Engineering program must choose an area of concentration, from among the numerous choices offered. It is possible to complete the MS in Engineering without a concentration, but almost all students do complete one.

The MS in Engineering program currently offers the following areas of concentration:

- Biomedical Engineering
- Civil Engineering
- Electrical and Computer Engineering
- Energy Engineering
- Engineering Management (admission to this concentration is suspended)
- Engineering Mechanics
- Industrial and Systems Engineering
- Manufacturing Engineering
- Materials Engineering
- Mechanical Engineering
- Occupational Biomechanics/Ergonomics

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. Undergraduate major in engineering, mathematics or a natural science.
2. Submission of official GRE (<http://uwm.edu/graduateschool/admission/#gre>) scores from a test taken within the last 5 years.

Applicants may be admitted with specific program-defined course deficiencies provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree.

## Credits and Courses

Minimum degree requirements are 30 credits for the thesis option and 31 credits for the non-thesis option as outlined below. Of the courses offered in the College only those numbered 400 and above may be taken for graduate credit for this degree. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided approval of a program of study including them has been obtained prior to registration in such courses. Typically, no more than three credits of independent study are allowed in the MS Program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Programs Office. A student may not use courses that formed part of the requirements of a baccalaureate degree for subsequent graduate credit, except when those courses were part of CEAS Integrated BS/MS program.

### Thesis and Non-Thesis Options

Students will be required to either the Thesis or Non-Thesis option in their program of study. If the student chooses the Non-Thesis option, then as permitted by the student's department, the student must also choose

between two methods of final evaluation: the Capstone Option and the Comprehensive Examination Option.

After 12 credits of coursework are completed, changes from Thesis to Non-Thesis option will not be allowed, except under exceptional circumstances to be considered on a case-by-case basis. Students may always change from a Non-Thesis to a Thesis option. Departments and faculty may make pursuing the Thesis option a requirement (or preference) of employment for TA's, RA's, and PA's.

### Thesis Option

All students are encouraged to undertake the thesis option. The degree requires the following:

Code	Title	Credits
Select a minimum of 12 credits in an approved technical program of studies		12
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
EAS 702	Preparing Future Engineering Faculty & Professionals	2
Select 6 credits of thesis		6
<b>Total Credits</b>		<b>30</b>

At least 12 credits, not including thesis or the CEAS Graduate Seminar Course, must be in courses of 700 level or higher. At least 12 credits, including thesis, must be earned at UWM. The thesis may be written in absentia provided prior permission has been obtained from the major professor and the Associate Dean for Academic Affairs in the College of Engineering & Applied Science. Students in the thesis option must pass a final comprehensive examination, administered by the Master's Program Committee, partially in defense of the thesis.

### Non-Thesis Capstone Option

Code	Title	Credits
Select a minimum of 18 credits in an approved technical program of studies		18
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
Select 3 credits of a capstone project, using a 3 credit course that allows flexible independent study (either the Independent Study course or a specific capstone course)		3
<b>Total Credits</b>		<b>31</b>

In addition to the requirements listed in the table above, at least 15 credits must be of 700 level or above.

For the capstone project, the student must submit a written proposal and receive approval from the advisor. The capstone project should be designed with the intent of leading to creative work based on the student's background, and should be the equivalent of 3 credits of work to be completed over a single semester. Upon completion of the capstone, the student must submit a written report and give an oral presentation of the project to the Master's Program Committee for approval.

### Non-Thesis Comprehensive Examination Option

Code	Title	Credits
Select a minimum of 21 credits in an approved technical program of studies		21
Select 9 credits of approved electives		9

EAS 701	Effective Academic Writing	1
<b>Total Credits</b>		<b>31</b>

In addition to the requirements listed in the table above, at least 15 credits must be of 700 level or above.

Mastery of the courses taken in the program of study may be demonstrated by one of the following:

1. The student submits a dossier of work, and passes an oral examination given by the Master's Program Committee. Or
2. The student passes a written master's comprehensive examination when it is offered by the department.

Departments allowing a written examination option will offer such exams at least once per semester, and will announce the date of the exam at least 60 days prior to the exam. The department also must provide a written description of the topics covered on the exam, including text books and chapters.

### Manufacturing Engineering Concentration

A minimum of 15 credits of qualifying graduate courses in Industrial and Manufacturing Engineering<sup>1</sup>; may include up to 3 credits each of Ind Eng 990 and Ind Eng 999.

#### Qualifying Courses

Code	Title	Credits
IND ENG 550	Control of Automated Manufacturing Systems	3
IND ENG 571	Quality Control	3
IND ENG 575	Design of Experiments	3
IND ENG 582	Ergonomic Job Evaluation Techniques	3
IND ENG 583	Facility Layout and Material Handling	3
IND ENG 587	Lean Production Systems	3
IND ENG 716	Engineering Statistical Analysis	3
IND ENG 751	Flexible Manufacturing Systems	3
IND ENG 880	Bioengineering Seminar	1
IND ENG 890	Advanced Topics in Industrial and Systems Engineering: <sup>*</sup>	1-3
IND ENG 990	Masters Thesis	1-9
IND ENG 999	Advanced Independent Study	1-3

\* Qualifying topics: Sustainable Energy Systems & Industrial Management; Connected Enterprise

<sup>1</sup> The following qualifying course(s) are currently inactive: IND ENG 740.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student have a major professor to advise, supervise, and approve the Program of Study before registering for courses. The College will assign the incoming student to an initial advisor at the time of admission. A student may change advisors with the consent of the new advisor, approval by the Associate Dean for Academic Affairs, and upon notification of the student's current advisor.

### Program of Study

During the first semester the student, in consultation with the major professor, develops a program of study, obtains the consent of the advisor and submits it to the CEAS Graduate Programs Office for approval by the Associate Dean. To make subsequent changes, the

student must follow the same process. Graduation requires successful completion of courses from an approved program of study. Students are recommended to obtain approval for an amended program of study before taking a course not on the current program of study.

### Master's Program Committee

The Master's Program Committee is proposed by the major professor in consultation with the student. The Committee must include at least three graduate faculty, not all of whom are in the same department.

### Time Limit

The student must complete all degree requirements within five years of initial enrollment.

## Engineering, MS: Materials Engineering

The Master of Science in Engineering program is a flexible program designed to meet the needs of a wide variety of students. The program can be a stepping-stone on the way to further studies and the pursuit of advanced research, such as can be obtained by pursuing the PhD. Or the program can provide a pathway to professional advancement through greater technical knowledge and intellectual maturity. The student, with the help and approval of a major advisor, can choose from a wide range of courses from throughout the College of Engineering and Applied Science (CEAS), and where appropriate, from other schools and colleges.

Students entering the Master of Science in Engineering program must choose an area of concentration, from among the numerous choices offered. It is possible to complete the MS in Engineering without a concentration, but almost all students do complete one. The MS in Engineering program currently offers the following areas of concentration:

- Biomedical Engineering

The department also must provide a written description of the topics covered on the exam, including text books and chapters.

### Occupational Biomechanics/Ergonomics Concentration

- Students must complete at least 6 credits of qualifying courses from Group A.
- Thesis option students must complete at least 18 credits combined of qualifying courses from Group A and Group B.
- Non-thesis option students must complete at least 24 credits combined from Group A and Group B.
- Students must complete at least 2, but no more than 3 credits, of INDENG 880.
- Any remaining credits in the MS in Engineering program of study may be taken as free electives.

### Qualifying Courses

Code	Title	Credits
<b>Group A</b>		
IND ENG 580	Ergonomics	3
IND ENG 590/890	Topics in Industrial and Systems Engineering:	1-3
OCCTHPY 625	Design and Disability	3

**Group B**

IND ENG 880	Bioengineering Seminar	1
IND ENG 575	Design of Experiments	3
IND ENG 582	Ergonomic Job Evaluation Techniques	3
KIN 520	Introduction to Biomechanics Research	3
IND ENG 780	Advanced Ergonomics - Low Back Pain	3
IND ENG 783	Advanced Ergonomics - Upper Extremity	3
IND ENG 716	Engineering Statistical Analysis	3
IND ENG 890	Advanced Topics in Industrial and Systems Engineering: *	1-3
MATLENG 710	Advanced Mechanical Behavior of Materials	3
PH 711	Intermediate Biostatistics	3
PH 759	Intro to Regression for Understanding the SDOH	3
PH 777	Quantitative Research Methods for Public Health Policy	3
KIN 720	Advanced Biomechanics Research	3
KIN 725	Interdisciplinary Themes in Biomechanics	3

\* Qualifying Topics: Human Factors, Instrument in Ergonomics & Biomechanics, Connected Enterprise

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student have a major professor to advise, supervise, and approve the Program of Study before registering for courses. The College will assign the incoming student to an initial advisor at the time of admission. A student may change advisors with the consent of the new advisor, approval by the Associate Dean for Academic Affairs, and upon notification of the student's current advisor.

### Program of Study

During the first semester the student, in consultation with the major professor, develops a program of study, obtains the consent of the advisor and submits it to the CEAS Graduate Programs Office for approval by the Associate Dean. To make subsequent changes, the student must follow the same process. Graduation requires successful completion of courses from an approved program of study. Students are recommended to obtain approval for an amended program of study before taking a course not on the current program of study.

### Master's Program Committee

The Master's Program Committee is proposed by the major professor in consultation with the student. The Committee must include at least three graduate faculty, not all of whom are in the same department.

### Time Limit

The student must complete all degree requirements within five years of initial enrollment.

## Engineering, PhD

The Doctor of Philosophy, the highest degree offered by the University, is conferred in recognition of marked scholarship in a broad field of knowledge as well as distinguished critical or creative achievement within a special area of the general field (the special area being the

subject of the doctoral dissertation). The Doctor of Philosophy (PhD) program in the College of Engineering and Applied Science (CEAS) is designed to meet the traditional high standards for such programs. The PhD in Engineering is administered by the CEAS Graduate Program Subcommittee (GPSC). Some aspects of the program are delegated to the CEAS Graduate Office and to the various departments of the College.

There are six major areas in the PhD program:

- Biomedical Engineering
- Civil Engineering
- Computer Science
- Electrical Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering

Each major is flexible, allowing the student to develop a plan of studies tailored to meet individual needs. Evaluation of the study plan is based on its appropriateness as an engineering or computer science program, the availability within the University of appropriate course offerings, and the availability within the College of a faculty member who is qualified to serve as the student's major professor.

The PhD degree requires a minimum of 66 credits beyond the baccalaureate, including a dissertation. The student must also satisfy a residence requirement.

Many of the courses leading toward graduate degrees in CEAS are offered in the late afternoon or evening. So, students can complete much of their coursework on a part-time basis.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. A bachelor's or master's degree:
  - a. Applicants holding a BS or MS degree in engineering or computer science, depending on the major area selected will generally be admitted without deficiencies.
  - b. Applicants holding BS or MS degrees from domains outside of engineering or computer science may be admitted with specific program-defined course deficiencies, provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the Graduate School and the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree. For the Engineering major areas, the BS or MS preparation generally must include mathematics equivalent to ELECENG 234 or MATH 234. For the Computer Science major area, the mathematics preparation

must generally include mathematics equivalent to MATH 232. Otherwise, the made-up deficiencies must be sufficient to assure the Graduate Program Subcommittee that the applicant is able to proceed with advanced work directed toward the doctoral degree.

2. A minimum grade point average of 3.0 on the basis of 4.0, in the highest degree granted. An applicant with a master's degree in engineering or computer science having a GPA of less than 3.0, but at least equal to 2.75, may be admitted if substantial evidence can be submitted demonstrating that the applicant has the capacity to perform satisfactory doctoral work.
3. All applicants are required to submit a brief (1 or 2 page) statement describing their professional goals and at least two letters of reference.
4. The Graduate Record Examination (GRE) is required for all international and domestic applicants.
5. International students require proof of English language proficiency. Complete information is available at the UWM Center for International Education (<http://www.uwm.edu/Dept/CIE/>)
6. Applicants with a relevant master's degree who intend to complete an additional master's in engineering at UWM should announce their plans at the time of admission, and not later than the start of their second year into the PhD program.

### Reapplication

A student who receives a master's degree at UWM must formally apply for admission to the Graduate School as a doctoral student before continuing studies that will be credited toward the Doctor of Philosophy in Engineering.

## Credits and Courses

The minimum degree requirement is 66 graduate credits beyond the bachelor's degree. The minimum credit distribution of coursework to be undertaken must be as follows depending on the option selected.

Code	Title	Credits
Select 21 credits in the major area of concentration		21
Select 9 credits in an approved minor area		9
Select 6 credits in mathematics and/or quantitative methods		6
Select 18 credits of doctoral thesis		18
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
EAS 702	Preparing Future Engineering Faculty & Professionals	2
<b>Total Credits</b>		<b>66</b>

The 6-credit requirement in mathematics and/or quantitative methods may be met by satisfactorily completing certain courses specified by the GPSC or by taking the minor in mathematics. When such courses also count for either the major or the minor area, the remaining credits may be taken as approved electives.

The student must achieve a 3.0 GPA separately in each of the following areas: the major area, the minor area, and the quantitative methods area.

The major area of concentration must be in one of the seven areas approved for the PhD degree in the College. These areas are:

- Biomedical Engineering
- Civil Engineering
- Computer Science

- Electrical Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering

The minor is normally in another area offered in the College or in the physical sciences or mathematics or in management sciences. Consideration of any other area as a minor requires the prior approval of the GPSC.

A minimum of 26 credits, excluding doctoral thesis, must be at the 700 level or higher.

A minimum of 33 credits, including doctoral thesis, must be completed while enrolled at UWM in the PhD degree program. For students entering with a relevant master's degree who intend to complete a second master's and a PhD in Engineering at UWM, a minimum of 27 credits, including doctoral thesis, must be completed while enrolled in the doctoral program.

Students entering the program without a prior applicable master's degree are limited to a total maximum transfer of 9 credits for courses taken elsewhere. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided GPSC approval has been obtained prior to registration in such course. Typically no more than six credits of independent study are allowed in the PhD program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Studies Office.

The GPSC or the major department may require candidates to complete certain courses as part of the requirement for the specific major or to meet the mathematics and/or quantitative methods requirement.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student must have a major professor to advise, supervise, and approve the program of study before registering for courses. The GPSC or its delegates will assign the incoming student to an initial Program Advisor at the time of admission. Prior to the completion of 12 credits (9 credits for part-time students), the student must select a major professor who will be the student's thesis advisor. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Subcommittee for approval. For subsequent changes, the student must file a revised program of study for approval.

### Foreign Language

There is no foreign language requirement for the degree.

### Residence

The program residence requirement is satisfied either by completing 8 or more graduate credits in two consecutive semesters, exclusive of summer sessions, or by completing 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions.

### Qualifying Examination

Each student in the program must take and pass a Qualifying Examination to demonstrate that the student is qualified for doctoral-level work. The Qualifying Examination is a written exam and is structured in two parts: Part 1 and Part 2. The examination is offered twice a year during the regular academic year. The content of the examination varies among the major areas of the PhD in Engineering program.

Students entering with only a bachelor's degree or with a master's degree in an area unrelated to their major area may take the Qualifying Examination for the first time after earning 12 credits of graduate work at UWM and must successfully pass the exam before earning 30 credits of graduate work at UWM.

Students admitted after completing an appropriate master's degree must take this examination no later than the semester immediately after 18 credits of graduate work have been earned at UWM.

A student may take the Qualifying Examination twice. On the first attempt, the student must attempt both Part 1 and Part 2 of the examination.

- If the student passes both parts, then the student has passed the entire examination and will be permitted to proceed toward the Doctor of Philosophy degree.
- If the student fails both parts, then the student must take the entire exam again at its next offering.
- If a student passes only one of the two parts, then the student must take the examination again at its next offering, but may choose to take only the part of the examination that was not passed on the first attempt.
- If a passing grade is not obtained on the second attempt of the Qualifying Examination, the student will not be permitted to proceed toward the Doctor of Philosophy degree.

A student who fails the qualifying exam twice is subject to dismissal from the PhD in Engineering program. A student may appeal the failure and dismissal within 30 days of being notified of the failure. If the student does not appeal or the appeal is not granted, the College will recommend to the Graduate School that the student be dismissed. A student who is dismissed from the PhD in Engineering program because of failing the qualifying exam may not be enrolled in the PhD in Engineering program for a complete calendar year. This does not preclude the student from being enrolled in any other degree program offered by the University. A student who wishes to re-enroll in the program after a calendar year has passed must apply as any other student would, including payment of fees. A student readmitted after having failed the qualifying exam twice must take the qualifying exam in the first semester of matriculation and this will count as the student's first attempt at the exam. The student may appeal this requirement prior to the first scheduled day of classes. If the student fails the qualifying exam on this first attempt, the student is permitted the customary second attempt as described above. All appeals must be in writing and directed to the CEAS Associate Dean for Academic Affairs.

### Doctoral Program Committee

The Doctoral Program Committee is proposed by the major professor in consultation with the student and the department. The Committee must include at least five graduate faculty (three from major area, one from minor area, and one from any area, including the major and minor areas). The last member may be a person from outside the University (such as another university, a research laboratory, or a relevant industrial partner), provided that person meets Graduate School requirements. The Committee may have more than five members, provided that the majority of the Committee members are from the student's major field.

### Doctoral Preliminary Examination

A student is admitted to candidacy only after successful completion of the doctoral preliminary examination conducted by the Doctoral Program Committee. This examination, which normally is oral, must be taken before the completion of 48 credits of graduate work toward

the Doctor of Philosophy degree in Engineering and should be taken within the first seven years in the program. Prior to the examination, the student must present a proposal for a doctoral dissertation project. The examination may cover both graduate course material and items related to the proposed dissertation project.

### Dissertation and Dissertator Status

The student must carry out a creative effort in the major area under the supervision of the major professor and report the results in an acceptable dissertation. The effort of the student and the major professor to produce the dissertation is reflected in the PhD in Engineering program requirement that the student complete at least 18 credits of doctoral thesis.

After the student has successfully completed all degree requirements except the dissertation, the student may enter Dissertator Status. Achieving Dissertator Status requires successful completion of the Doctoral Preliminary Examination and prior approval of the student's advisor, the Doctoral Program Committee, and the GPSC of a dissertation proposal that outlines the scope of the project, the research method, and the goals to be achieved. Any proposal that may involve a financial commitment by the University also must be approved by the Office of the Dean. After having achieved Dissertator Status, the student must continue to register for 3 credits of doctoral thesis per semester during the academic year until the dissertation is completed.

### Dissertation Defense

The final examination, which is oral, consists of a defense of the dissertation project. The doctoral defense examination may only be taken after all coursework and other requirements have been completed. The student must have Dissertator Status at the time of the defense.

### Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

For additional information see the Graduate School PhD requirements (<http://uwm.edu/graduateschool/doctoral-requirements/>).

## Engineering, PhD: Biomedical Engineering

The Doctor of Philosophy, the highest degree offered by the University, is conferred in recognition of marked scholarship in a broad field of knowledge as well as distinguished critical or creative achievement within a special area of the general field (the special area being the subject of the doctoral dissertation). The Doctor of Philosophy (PhD) program in the College of Engineering and Applied Science (CEAS) is designed to meet the traditional high standards for such programs. The PhD in Engineering is administered by the CEAS Graduate Program Subcommittee (GPSC). Some aspects of the program are delegated to the CEAS Graduate Office and to the various departments of the College.

There are six major areas in the PhD program:

- Biomedical Engineering
- Civil Engineering
- Computer Science
- Electrical Engineering
- Industrial Engineering

- Materials Engineering
- Mechanical Engineering

Each major is flexible, allowing the student to develop a plan of studies tailored to meet individual needs. Evaluation of the study plan is based on its appropriateness as an engineering or computer science program, the availability within the University of appropriate course offerings, and the availability within the College of a faculty member who is qualified to serve as the student's major professor.

The PhD degree requires a minimum of 66 credits beyond the baccalaureate, including a dissertation. The student must also satisfy a residence requirement.

Many of the courses leading toward graduate degrees in CEAS are offered in the late afternoon or evening. So, students can complete much of their coursework on a part-time basis.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. A bachelor's or master's degree:
  - a. Applicants holding a BS or MS degree in engineering or computer science, depending on the major area selected will generally be admitted without deficiencies.
  - b. Applicants holding BS or MS degrees from domains outside of engineering or computer science may be admitted with specific program-defined course deficiencies, provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the Graduate School and the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree. For the Engineering major areas, the BS or MS preparation generally must include mathematics equivalent to ELECENG 234 or MATH 234. For the Computer Science major area, the mathematics preparation must generally include mathematics equivalent to MATH 232. Otherwise, the made-up deficiencies must be sufficient to assure the Graduate Program Subcommittee that the applicant is able to proceed with advanced work directed toward the doctoral degree.
2. A minimum grade point average of 3.0 on the basis of 4.0, in the highest degree granted. An applicant with a master's degree in engineering or computer science having a GPA of less than 3.0, but at least equal to 2.75, may be admitted if substantial evidence can be submitted demonstrating that the applicant has the capacity to perform satisfactory doctoral work.
3. All applicants are required to submit a brief (1 or 2 page) statement describing their professional goals and at least two letters of reference.

4. The Graduate Record Examination (GRE) is required for all international and domestic applicants.
5. International students require proof of English language proficiency. Complete information is available at the UWM Center for International Education (<http://www.uwm.edu/Dept/CIE/>)
6. Applicants with a relevant master's degree who intend to complete an additional master's in engineering at UWM should announce their plans at the time of admission, and not later than the start of their second year into the PhD program.

### Reapplication

A student who receives a master's degree at UWM must formally apply for admission to the Graduate School as a doctoral student before continuing studies that will be credited toward the Doctor of Philosophy in Engineering.

## Credits and Courses

The minimum degree requirement is 66 graduate credits beyond the bachelor's degree. The minimum credit distribution of coursework to be undertaken must be as follows depending on the option selected.

Code	Title	Credits
Select 21 credits in the major area of concentration		21
Select 9 credits in an approved minor area		9
Select 6 credits in mathematics and/or quantitative methods		6
Select 18 credits of doctoral thesis		18
Select 9 credits of approved electives		9
EAS 701	Effective Academic Writing	1
EAS 702	Preparing Future Engineering Faculty & Professionals	2
<b>Total Credits</b>		<b>66</b>

The 6-credit requirement in mathematics and/or quantitative methods may be met by satisfactorily completing certain courses specified by the GPSC or by taking the minor in mathematics. When such courses also count for either the major or the minor area, the remaining credits may be taken as approved electives.

The student must achieve a 3.0 GPA separately in each of the following areas: the major area, the minor area, and the quantitative methods area.

The major area of concentration must be in one of the seven areas approved for the PhD degree in the College. These areas are:

- Biomedical Engineering
- Civil Engineering
- Computer Science
- Electrical Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering

The minor is normally in another area offered in the College or in the physical sciences or mathematics or in management sciences. Consideration of any other area as a minor requires the prior approval of the GPSC.

A minimum of 26 credits, excluding doctoral thesis, must be at the 700 level or higher.

A minimum of 33 credits, including doctoral thesis, must be completed while enrolled at UWM in the PhD degree program. For students entering with a relevant master's degree who intend to complete a second master's and a PhD in Engineering at UWM, a minimum of 27 credits, including doctoral thesis, must be completed while enrolled in the doctoral program.

Students entering the program without a prior applicable master's degree are limited to a total maximum transfer of 9 credits for courses taken elsewhere. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided GPSC approval has been obtained prior to registration in such course. Typically no more than six credits of independent study are allowed in the PhD program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Studies Office.

The GPSC or the major department may require candidates to complete certain courses as part of the requirement for the specific major or to meet the mathematics and/or quantitative methods requirement.

## Biomedical Engineering Concentration

Students will complete:

- A minimum of 15 credits of graduate courses from the following list and any new graduate courses that Biomedical Engineering Program introduces in the future with BME coding; and
- At least 18 credits of doctoral thesis (BME 998).

Only one credit of BME 999 will be counted towards this requirement.

Code	Title	Credits
<b>Qualifying Courses</b>		<b>15</b>
BME 705	Rehabilitation Robotics	
BME 720	Machine Perception	
BME 733	Sensors and Systems	
BME 890	Special Topics:	
BME 999	Advanced Independent Study	
COMPSCI/ELECENG 710	Artificial Intelligence	
COMPSCI/ELECENG 711	Introduction to Machine Learning	
COMPSCI/ELECENG 712	Image Processing	
ELECENG/MECHENG 701	Advanced Linear System Analysis	
ELECENG/MECHENG 718	Nonlinear Control Systems	
ELECENG 737	Medical Imaging Signals and Systems	
ELECENG 765	Introduction to Fourier Optics and Optical Signal Processing	
ELECENG 810	Foundations for Advanced Machine Learning and Signal Processing	
MECHENG 715	Numerical Methods in Engineering	
<b>Doctoral Thesis</b>		<b>18</b>
BME 998	Doctoral Thesis	

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student must have a major professor to advise, supervise, and approve the program of study before registering for courses. The GPSC or its delegates will assign the incoming student to an initial Program Advisor at the time of admission. Prior to the completion of 12 credits (9 credits for part-time students), the student must select a major professor who will be the student's thesis advisor. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Subcommittee for approval. For subsequent changes, the student must file a revised program of study for approval.

### Foreign Language

There is no foreign language requirement for the degree.

### Residence

The program residence requirement is satisfied either by completing 8 or more graduate credits in two consecutive semesters, exclusive of summer sessions, or by completing 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions.

### Qualifying Examination

Each student in the program must take and pass a Qualifying Examination to demonstrate that the student is qualified for doctoral-level work. The Qualifying Examination is a written exam and is structured in two parts: Part 1 and Part 2. The examination is offered twice a year during the regular academic year. The content of the examination varies among the major areas of the PhD in Engineering program.

Students entering with only a bachelor's degree or with a master's degree in an area unrelated to their major area may take the Qualifying Examination for the first time after earning 12 credits of graduate work at UWM and must successfully pass the exam before earning 30 credits of graduate work at UWM.

Students admitted after completing an appropriate master's degree must take this examination no later than the semester immediately after 18 credits of graduate work have been earned at UWM.

A student may take the Qualifying Examination twice. On the first attempt, the student must attempt both Part 1 and Part 2 of the examination.

- If the student passes both parts, then the student has passed the entire examination and will be permitted to proceed toward the Doctor of Philosophy degree.
- If the student fails both parts, then the student must take the entire exam again at its next offering.
- If a student passes only one of the two parts, then the student must take the examination again at its next offering, but may choose to take only the part of the examination that was not passed on the first attempt.
- If a passing grade is not obtained on the second attempt of the Qualifying Examination, the student will not be permitted to proceed toward the Doctor of Philosophy degree.

A student who fails the qualifying exam twice is subject to dismissal from the PhD in Engineering program. A student may appeal the failure and dismissal within 30 days of being notified of the failure. If the student does not appeal or the appeal is not granted, the College will recommend to the Graduate School that the student be dismissed. A student who is dismissed from the PhD in Engineering program because of failing the

qualifying exam may not be enrolled in the PhD in Engineering program for a complete calendar year. This does not preclude the student from being enrolled in any other degree program offered by the University. A student who wishes to re-enroll in the program after a calendar year has passed must apply as any other student would, including payment of fees. A student readmitted after having failed the qualifying exam twice must take the qualifying exam in the first semester of matriculation and this will count as the student's first attempt at the exam. The student may appeal this requirement prior to the first scheduled day of classes. If the student fails the qualifying exam on this first attempt, the student is permitted the customary second attempt as described above. All appeals must be in writing and directed to the CEAS Associate Dean for Academic Affairs.

### Doctoral Program Committee

The Doctoral Program Committee is proposed by the major professor in consultation with the student and the department. The Committee must include at least five graduate faculty (three from major area, one from minor area, and one from any area, including the major and minor areas). The last member may be a person from outside the University (such as another university, a research laboratory, or a relevant industrial partner), provided that person meets Graduate School requirements. The Committee may have more than five members, provided that the majority of the Committee members are from the student's major field.

### Doctoral Preliminary Examination

A student is admitted to candidacy only after successful completion of the doctoral preliminary examination conducted by the Doctoral Program Committee. This examination, which normally is oral, must be taken before the completion of 48 credits of graduate work toward the Doctor of Philosophy degree in Engineering and should be taken within the first seven years in the program. Prior to the examination, the student must present a proposal for a doctoral dissertation project. The examination may cover both graduate course material and items related to the proposed dissertation project.

### Dissertation and Dissertator Status

The student must carry out a creative effort in the major area under the supervision of the major professor and report the results in an acceptable dissertation. The effort of the student and the major professor to produce the dissertation is reflected in the PhD in Engineering program requirement that the student complete at least 18 credits of doctoral thesis.

After the student has successfully completed all degree requirements except the dissertation, the student may enter Dissertator Status. Achieving Dissertator Status requires successful completion of the Doctoral Preliminary Examination and prior approval of the student's advisor, the Doctoral Program Committee, and the GPSC of a dissertation proposal that outlines the scope of the project, the research method, and the goals to be achieved. Any proposal that may involve a financial commitment by the University also must be approved by the Office of the Dean. After having achieved Dissertator Status, the student must continue to register for 3 credits of doctoral thesis per semester during the academic year until the dissertation is completed.

### Dissertation Defense

The final examination, which is oral, consists of a defense of the dissertation project. The doctoral defense examination may only be taken after all coursework and other requirements have been completed. The student must have Dissertator Status at the time of the defense.

### Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

For additional information see the Graduate School PhD requirements (<http://uwm.edu/graduateschool/doctoral-requirements/>).

## Engineering, PhD: Civil Engineering

The Doctor of Philosophy, the highest degree offered by the University, is conferred in recognition of marked scholarship in a broad field of knowledge as well as distinguished critical or creative achievement within a special area of the general field (the special area being the subject of the doctoral dissertation). The Doctor of Philosophy (PhD) program in the College of Engineering and Applied Science (CEAS) is designed to meet the traditional high standards for such programs. The PhD in Engineering is administered by the CEAS Graduate Program Subcommittee (GPSC). Some aspects of the program are delegated to the CEAS Graduate Office and to the various departments of the College.

There are six major areas in the PhD program:

- Biomedical Engineering
- Civil Engineering
- Computer Science
- Electrical Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering

Each major is flexible, allowing the student to develop a plan of studies tailored to meet individual needs. Evaluation of the study plan is based on its appropriateness as an engineering or computer science program, the availability within the University of appropriate course offerings, and the availability within the College of a faculty member who is qualified to serve as the student's major professor.

The PhD degree requires a minimum of 66 credits beyond the baccalaureate, including a dissertation. The student must also satisfy a residence requirement.

Many of the courses leading toward graduate degrees in CEAS are offered in the late afternoon or evening. So, students can complete much of their coursework on a part-time basis.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. A bachelor's or master's degree:
  - a. Applicants holding a BS or MS degree in engineering or computer science, depending on the major area selected will generally be admitted without deficiencies.

- b. Applicants holding BS or MS degrees from domains outside of engineering or computer science may be admitted with specific program-defined course deficiencies, provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the Graduate School and the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree. For the Engineering major areas, the BS or MS preparation generally must include mathematics equivalent to ELECENG 234 or MATH 234. For the Computer Science major area, the mathematics preparation must generally include mathematics equivalent to MATH 232. Otherwise, the made-up deficiencies must be sufficient to assure the Graduate Program Subcommittee that the applicant is able to proceed with advanced work directed toward the doctoral degree.
2. A minimum grade point average of 3.0 on the basis of 4.0, in the highest degree granted. An applicant with a master's degree in engineering or computer science having a GPA of less than 3.0, but at least equal to 2.75, may be admitted if substantial evidence can be submitted demonstrating that the applicant has the capacity to perform satisfactory doctoral work.
  3. All applicants are required to submit a brief (1 or 2 page) statement describing their professional goals and at least two letters of reference.
  4. The Graduate Record Examination (GRE) is required for all international and domestic applicants.
  5. International students require proof of English language proficiency. Complete information is available at the UWM Center for International Education (<http://www.uwm.edu/Dept/CIE/>)
  6. Applicants with a relevant master's degree who intend to complete an additional master's in engineering at UWM should announce their plans at the time of admission, and not later than the start of their second year into the PhD program.

### Reapplication

A student who receives a master's degree at UWM must formally apply for admission to the Graduate School as a doctoral student before continuing studies that will be credited toward the Doctor of Philosophy in Engineering.

## Credits and Courses

The minimum degree requirement is 66 graduate credits beyond the bachelor's degree. The minimum credit distribution of coursework to be undertaken must be as follows depending on the option selected.

Code	Title	Credits
Select 21 credits in the major area of concentration		21
Select 9 credits in an approved minor area		9
Select 6 credits in mathematics and/or quantitative methods		6
Select 9 credits of approved electives		9
<b>Select 3 credits of:</b>		<b>3</b>
CIV ENG 700	CEAS Graduate Seminar	
<b>Select 18 credits of:</b>		<b>18</b>
CIV ENG 998	Doctoral Thesis	
<b>Total Credits</b>		<b>66</b>

The 6-credit requirement in mathematics and/or quantitative methods may be met by satisfactorily completing certain courses specified by the

GPSC or by taking the minor in mathematics. When such courses also count for either the major area or the minor area, the remaining credits may be taken as approved electives.

The Civil Engineering major area of concentration is one of the seven major areas of the PhD in Engineering. The student must achieve a 3.0 GPA separately in each of the following areas: the Civil Engineering major area, the minor area, and the quantitative methods area.

The minor is normally taken in one of the other major areas of the PhD in Engineering or in the physical sciences or mathematics or in business management. Consideration of any other area as a minor requires the prior approval of the GPSC.

A minimum of 33 credits, including doctoral thesis, must be completed while enrolled at UWM in the PhD degree program. For students entering with a relevant master's degree who intend to complete a second master's and a PhD in Engineering at UWM, a minimum of 27 credits, including doctoral thesis, must be completed while enrolled in the doctoral program.

Students entering the program without a prior applicable master's degree are limited to a total maximum transfer of 9 credits for courses taken elsewhere. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided GPSC approval has been obtained prior to registration in such course. Typically no more than six credits of independent study are allowed in the PhD program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Studies Office.

The GPSC or the major department may require candidates to complete certain courses as part of the requirement for the specific major or to meet the mathematics and/or quantitative methods requirement.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student must have a major professor to advise, supervise, and approve the program of study before registering for courses. The GPSC or its delegates will assign the incoming student to an initial Program Advisor at the time of admission. Prior to the completion of 12 credits (9 credits for part-time students), the student must select a major professor who will be the student's thesis advisor. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Subcommittee for approval. For subsequent changes, the student must file a revised program of study for approval.

### Foreign Language

There is no foreign language requirement for the degree.

### Residence

The program residence requirement is satisfied either by completing 8 or more graduate credits in two consecutive semesters, exclusive of summer sessions, or by completing 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions.

### Qualifying Examination

Each student in the program must take and pass a Qualifying Examination to demonstrate that the student is qualified for doctoral-level work. The Qualifying Examination is a written exam and is structured in two parts: Part 1 and Part 2. The examination is offered twice a year during the regular academic year. The content of the examination varies among the major areas of the PhD in Engineering program.

Students entering with only a bachelor's degree or with a master's degree in an area unrelated to their major area may take the Qualifying Examination for the first time after earning 12 credits of graduate work at UWM and must successfully pass the exam before earning 30 credits of graduate work at UWM.

Students admitted after completing an appropriate master's degree must take this examination no later than the semester immediately after 18 credits of graduate work have been earned at UWM.

A student may take the Qualifying Examination twice. On the first attempt, the student must attempt both Part 1 and Part 2 of the examination.

- If the student passes both parts, then the student has passed the entire examination and will be permitted to proceed toward the Doctor of Philosophy degree.
- If the student fails both parts, then the student must take the entire exam again at its next offering.
- If a student passes only one of the two parts, then the student must take the examination again at its next offering, but may choose to take only the part of the examination that was not passed on the first attempt.
- If a passing grade is not obtained on the second attempt of the Qualifying Examination, the student will not be permitted to proceed toward the Doctor of Philosophy degree.

A student who fails the qualifying exam twice is subject to dismissal from the PhD in Engineering program. A student may appeal the failure and dismissal within 30 days of being notified of the failure. If the student does not appeal or the appeal is not granted, the College will recommend to the Graduate School that the student be dismissed. A student who is dismissed from the PhD in Engineering program because of failing the qualifying exam may not be enrolled in the PhD in Engineering program for a complete calendar year. This does not preclude the student from being enrolled in any other degree program offered by the University. A student who wishes to re-enroll in the program after a calendar year has passed must apply as any other student would, including payment of fees. A student readmitted after having failed the qualifying exam twice must take the qualifying exam in the first semester of matriculation and this will count as the student's first attempt at the exam. The student may appeal this requirement prior to the first scheduled day of classes. If the student fails the qualifying exam on this first attempt, the student is permitted the customary second attempt as described above. All appeals must be in writing and directed to the CEAS Associate Dean for Academic Affairs.

### Doctoral Program Committee

The Doctoral Program Committee is proposed by the major professor in consultation with the student and the department. The Committee must include at least five graduate faculty (three from major area, one from minor area, and one from any area, including the major and minor areas). The last member may be a person from outside the University (such as another university, a research laboratory, or a relevant industrial partner), provided that person meets Graduate School requirements. The Committee may have more than five members, provided that the majority of the Committee members are from the student's major field.

### Doctoral Preliminary Examination

A student is admitted to candidacy only after successful completion of the doctoral preliminary examination conducted by the Doctoral Program Committee. This examination, which normally is oral, must be taken before the completion of 48 credits of graduate work toward

the Doctor of Philosophy degree in Engineering and should be taken within the first seven years in the program. Prior to the examination, the student must present a proposal for a doctoral dissertation project. The examination may cover both graduate course material and items related to the proposed dissertation project.

### Dissertation and Dissertator Status

The student must carry out a creative effort in the major area under the supervision of the major professor and report the results in an acceptable dissertation. The effort of the student and the major professor to produce the dissertation is reflected in the PhD in Engineering program requirement that the student complete at least 18 credits of doctoral thesis.

After the student has successfully completed all degree requirements except the dissertation, the student may enter Dissertator Status. Achieving Dissertator Status requires successful completion of the Doctoral Preliminary Examination and prior approval of the student's advisor, the Doctoral Program Committee, and the GPSC of a dissertation proposal that outlines the scope of the project, the research method, and the goals to be achieved. Any proposal that may involve a financial commitment by the University also must be approved by the Office of the Dean. After having achieved Dissertator Status, the student must continue to register for 3 credits of doctoral thesis per semester during the academic year until the dissertation is completed.

### Dissertation Defense

The final examination, which is oral, consists of a defense of the dissertation project. The doctoral defense examination may only be taken after all coursework and other requirements have been completed. The student must have Dissertator Status at the time of the defense.

### Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

For additional information see the Graduate School PhD requirements (<http://uwm.edu/graduateschool/doctoral-requirements/>).

## Engineering, PhD: Computer Science

The Doctor of Philosophy, the highest degree offered by the University, is conferred in recognition of marked scholarship in a broad field of knowledge as well as distinguished critical or creative achievement within a special area of the general field (the special area being the subject of the doctoral dissertation). The Doctor of Philosophy (PhD) program in the College of Engineering and Applied Science (CEAS) is designed to meet the traditional high standards for such programs. The PhD in Engineering is administered by the CEAS Graduate Program Subcommittee (GPSC). Some aspects of the program are delegated to the CEAS Graduate Office and to the various departments of the College.

There are six major areas in the PhD program:

- Biomedical Engineering
- Civil Engineering
- Computer Science
- Electrical Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering

Each major is flexible, allowing the student to develop a plan of studies tailored to meet individual needs. Evaluation of the study plan is based on its appropriateness as an engineering or computer science program, the availability within the University of appropriate course offerings, and the availability within the College of a faculty member who is qualified to serve as the student's major professor.

The PhD degree requires a minimum of 66 credits beyond the baccalaureate, including a dissertation. The student must also satisfy a residence requirement.

Many of the courses leading toward graduate degrees in CEAS are offered in the late afternoon or evening. So, students can complete much of their coursework on a part-time basis.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. A bachelor's or master's degree:
  - a. Applicants holding a BS or MS degree in engineering or computer science, depending on the major area selected will generally be admitted without deficiencies.
  - b. Applicants holding BS or MS degrees from domains outside of engineering or computer science may be admitted with specific program-defined course deficiencies, provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the Graduate School and the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree. For the Engineering major areas, the BS or MS preparation generally must include mathematics equivalent to ELECENG 234 or MATH 234. For the Computer Science major area, the mathematics preparation must generally include mathematics equivalent to MATH 232. Otherwise, the made-up deficiencies must be sufficient to assure the Graduate Program Subcommittee that the applicant is able to proceed with advanced work directed toward the doctoral degree.
2. A minimum grade point average of 3.0 on the basis of 4.0, in the highest degree granted. An applicant with a master's degree in engineering or computer science having a GPA of less than 3.0, but at least equal to 2.75, may be admitted if substantial evidence can be submitted demonstrating that the applicant has the capacity to perform satisfactory doctoral work.
3. All applicants are required to submit a brief (1 or 2 page) statement describing their professional goals and at least two letters of reference.
4. The Graduate Record Examination (GRE) is required for all international and domestic applicants.

5. International students require proof of English language proficiency. Complete information is available at the UWM Center for International Education (<http://www.uwm.edu/Dept/CIE/>)
6. Applicants with a relevant master's degree who intend to complete an additional master's in engineering at UWM should announce their plans at the time of admission, and not later than the start of their second year into the PhD program.

### Reapplication

A student who receives a master's degree at UWM must formally apply for admission to the Graduate School as a doctoral student before continuing studies that will be credited toward the Doctor of Philosophy in Engineering.

## Credits and Courses

The minimum degree requirement is 66 graduate credits beyond the bachelor's degree. The minimum credit distribution of coursework to be undertaken must be as follows depending on the option selected.

Code	Title	Credits
Select 21 credits in the major area of concentration		21
Select 9 credits in an approved minor area		9
Select 6 credits in mathematics and/or quantitative methods		6
Select 9 credits of approved electives		9
<b>Complete 3 credits of:</b>		<b>3</b>
COMPSCI 700	CEAS Graduate Seminar	
<b>Complete 18 credits of:</b>		<b>18</b>
COMPSCI 998	Doctoral Thesis	
<b>Total Credits</b>		<b>66</b>

The 6-credit requirement in mathematics and/or quantitative methods may be met by satisfactorily completing certain courses specified by the GPSC or by taking the minor in mathematics. When such courses also count for either the major area or the minor area, the remaining credits may be taken as approved electives.

The Computer Science major area of concentration is one of the seven major areas of the PhD in Engineering. The student must achieve a 3.0 GPA separately in each of the following areas: the Computer Science major area, the minor area, and the quantitative methods area.

The minor is normally taken in one of the other major areas of the PhD in Engineering or in the physical sciences or mathematics or in business management. Consideration of any other area as a minor requires the prior approval of the GPSC.

A minimum of 33 credits, including doctoral thesis, must be completed while enrolled at UWM in the PhD degree program. For students entering with a relevant master's degree who intend to complete a second master's and a PhD in Engineering at UWM, a minimum of 27 credits, including doctoral thesis, must be completed while enrolled in the doctoral program.

Students entering the program without a prior applicable master's degree are limited to a total maximum transfer of 9 credits for courses taken elsewhere. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided GPSC approval has been obtained prior to registration in such course. Typically no more than six credits of independent study are allowed in the PhD program.

Guidelines on acceptable independent study courses are available in the CEAS Graduate Studies Office.

The GPSC or the major department may require candidates to complete certain courses as part of the requirement for the specific major or to meet the mathematics and/or quantitative methods requirement.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student must have a major professor to advise, supervise, and approve the program of study before registering for courses. The GPSC or its delegates will assign the incoming student to an initial Program Advisor at the time of admission. Prior to the completion of 12 credits (9 credits for part-time students), the student must select a major professor who will be the student's thesis advisor. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Subcommittee for approval. For subsequent changes, the student must file a revised program of study for approval.

### Foreign Language

There is no foreign language requirement for the degree.

### Residence

The program residence requirement is satisfied either by completing 8 or more graduate credits in two consecutive semesters, exclusive of summer sessions, or by completing 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions.

### Qualifying Examination

Each student in the program must take and pass a Qualifying Examination to demonstrate that the student is qualified for doctoral-level work. The Qualifying Examination is a written exam and is structured in two parts: Part 1 and Part 2. The examination is offered twice a year during the regular academic year. The content of the examination varies among the major areas of the PhD in Engineering program.

Students entering with only a bachelor's degree or with a master's degree in an area unrelated to their major area may take the Qualifying Examination for the first time after earning 12 credits of graduate work at UWM and must successfully pass the exam before earning 30 credits of graduate work at UWM.

Students admitted after completing an appropriate master's degree must take this examination no later than the semester immediately after 18 credits of graduate work have been earned at UWM.

A student may take the Qualifying Examination twice. On the first attempt, the student must attempt both Part 1 and Part 2 of the examination.

- If the student passes both parts, then the student has passed the entire examination and will be permitted to proceed toward the Doctor of Philosophy degree.
- If the student fails both parts, then the student must take the entire exam again at its next offering.
- If a student passes only one of the two parts, then the student must take the examination again at its next offering, but may choose to take only the part of the examination that was not passed on the first attempt.

- If a passing grade is not obtained on the second attempt of the Qualifying Examination, the student will not be permitted to proceed toward the Doctor of Philosophy degree.

A student who fails the qualifying exam twice is subject to dismissal from the PhD in Engineering program. A student may appeal the failure and dismissal within 30 days of being notified of the failure. If the student does not appeal or the appeal is not granted, the College will recommend to the Graduate School that the student be dismissed. A student who is dismissed from the PhD in Engineering program because of failing the qualifying exam may not be enrolled in the PhD in Engineering program for a complete calendar year. This does not preclude the student from being enrolled in any other degree program offered by the University. A student who wishes to re-enroll in the program after a calendar year has passed must apply as any other student would, including payment of fees. A student readmitted after having failed the qualifying exam twice must take the qualifying exam in the first semester of matriculation and this will count as the student's first attempt at the exam. The student may appeal this requirement prior to the first scheduled day of classes. If the student fails the qualifying exam on this first attempt, the student is permitted the customary second attempt as described above. All appeals must be in writing and directed to the CEAS Associate Dean for Academic Affairs.

### Doctoral Program Committee

The Doctoral Program Committee is proposed by the major professor in consultation with the student and the department. The Committee must include at least five graduate faculty (three from major area, one from minor area, and one from any area, including the major and minor areas). The last member may be a person from outside the University (such as another university, a research laboratory, or a relevant industrial partner), provided that person meets Graduate School requirements. The Committee may have more than five members, provided that the majority of the Committee members are from the student's major field.

### Doctoral Preliminary Examination

A student is admitted to candidacy only after successful completion of the doctoral preliminary examination conducted by the Doctoral Program Committee. This examination, which normally is oral, must be taken before the completion of 48 credits of graduate work toward the Doctor of Philosophy degree in Engineering and should be taken within the first seven years in the program. Prior to the examination, the student must present a proposal for a doctoral dissertation project. The examination may cover both graduate course material and items related to the proposed dissertation project.

### Dissertation and Dissertator Status

The student must carry out a creative effort in the major area under the supervision of the major professor and report the results in an acceptable dissertation. The effort of the student and the major professor to produce the dissertation is reflected in the PhD in Engineering program requirement that the student complete at least 18 credits of doctoral thesis.

After the student has successfully completed all degree requirements except the dissertation, the student may enter Dissertator Status. Achieving Dissertator Status requires successful completion of the Doctoral Preliminary Examination and prior approval of the student's advisor, the Doctoral Program Committee, and the GPSC of a dissertation proposal that outlines the scope of the project, the research method, and the goals to be achieved. Any proposal that may involve a financial commitment by the University also must be approved by the Office of the Dean. After having achieved Dissertator Status, the student must

continue to register for 3 credits of doctoral thesis per semester during the academic year until the dissertation is completed.

### Dissertation Defense

The final examination, which is oral, consists of a defense of the dissertation project. The doctoral defense examination may only be taken after all coursework and other requirements have been completed. The student must have Dissertator Status at the time of the defense.

### Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

For additional information see the Graduate School PhD requirements (<http://uwm.edu/graduateschool/doctoral-requirements/>).

## Engineering, PhD: Electrical Engineering

The Doctor of Philosophy, the highest degree offered by the University, is conferred in recognition of marked scholarship in a broad field of knowledge as well as distinguished critical or creative achievement within a special area of the general field (the special area being the subject of the doctoral dissertation). The Doctor of Philosophy (PhD) program in the College of Engineering and Applied Science (CEAS) is designed to meet the traditional high standards for such programs. The PhD in Engineering is administered by the CEAS Graduate Program Subcommittee (GPSC). Some aspects of the program are delegated to the CEAS Graduate Office and to the various departments of the College.

There are six major areas in the PhD program:

- Biomedical Engineering
- Civil Engineering
- Computer Science
- Electrical Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering

Each major is flexible, allowing the student to develop a plan of studies tailored to meet individual needs. Evaluation of the study plan is based on its appropriateness as an engineering or computer science program, the availability within the University of appropriate course offerings, and the availability within the College of a faculty member who is qualified to serve as the student's major professor.

The PhD degree requires a minimum of 66 credits beyond the baccalaureate, including a dissertation. The student must also satisfy a residence requirement.

Many of the courses leading toward graduate degrees in CEAS are offered in the late afternoon or evening. So, students can complete much of their coursework on a part-time basis.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found

by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. A bachelor's or master's degree:
  - a. Applicants holding a BS or MS degree in engineering or computer science, depending on the major area selected will generally be admitted without deficiencies.
  - b. Applicants holding BS or MS degrees from domains outside of engineering or computer science may be admitted with specific program-defined course deficiencies, provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the Graduate School and the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree. For the Engineering major areas, the BS or MS preparation generally must include mathematics equivalent to ELECENG 234 or MATH 234. For the Computer Science major area, the mathematics preparation must generally include mathematics equivalent to MATH 232. Otherwise, the made-up deficiencies must be sufficient to assure the Graduate Program Subcommittee that the applicant is able to proceed with advanced work directed toward the doctoral degree.
2. A minimum grade point average of 3.0 on the basis of 4.0, in the highest degree granted. An applicant with a master's degree in engineering or computer science having a GPA of less than 3.0, but at least equal to 2.75, may be admitted if substantial evidence can be submitted demonstrating that the applicant has the capacity to perform satisfactory doctoral work.
3. All applicants are required to submit a brief (1 or 2 page) statement describing their professional goals and at least two letters of reference.

Prior to the completion of 12 credits (9 credits for part-time students), the student must select a major professor who will be the student's thesis advisor. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Subcommittee for approval. For subsequent changes, the student must file a revised program of study for approval.

### Foreign Language

There is no foreign language requirement for the degree.

## Residence

The program residence requirement is satisfied either by completing 8 or more graduate credits in two consecutive semesters, exclusive of summer sessions, or by completing 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions.

## Qualifying Examination

Each student in the program must take and pass a Qualifying Examination to demonstrate that the student is qualified for doctoral-level work. The Qualifying Examination is a written exam and is structured in two parts: Part 1 and Part 2. The examination is offered twice a year during the regular academic year. The content of the examination varies among the major areas of the PhD in Engineering program.

Students entering with only a bachelor's degree or with a master's degree in an area unrelated to their major area may take the Qualifying Examination for the first time after earning 12 credits of graduate work at UWM and must successfully pass the exam before earning 30 credits of graduate work at UWM.

Students admitted after completing an appropriate master's degree must take this examination no later than the semester immediately after 18 credits of graduate work have been earned at UWM.

A student may take the Qualifying Examination twice. On the first attempt, the student must attempt both Part 1 and Part 2 of the examination.

- If the student passes both parts, then the student has passed the entire examination and will be permitted to proceed toward the Doctor of Philosophy degree.
- If the student fails both parts, then the student must take the entire exam again at its next offering.
- If a student passes only one of the two parts, then the student must take the examination again at its next offering, but may choose to take only the part of the examination that was not passed on the first attempt.
- If a passing grade is not obtained on the second attempt of the Qualifying Examination, the student will not be permitted to proceed toward the Doctor of Philosophy degree.

A student who fails the qualifying exam twice is subject to dismissal from the PhD in Engineering program. A student may appeal the failure and dismissal within 30 days of being notified of the failure. If the student does not appeal or the appeal is not granted, the College will recommend to the Graduate School that the student be dismissed. A student who is dismissed from the PhD in Engineering program because of failing the qualifying exam may not be enrolled in the PhD in Engineering program for a complete calendar year. This does not preclude the student from being enrolled in any other degree program offered by the University. A student who wishes to re-enroll in the program after a calendar year has passed must apply as any other student would, including payment of fees. A student readmitted after having failed the qualifying exam twice must take the qualifying exam in the first semester of matriculation and this will count as the student's first attempt at the exam. The student may appeal this requirement prior to the first scheduled day of classes. If the student fails the qualifying exam on this first attempt, the student is permitted the customary second attempt as described above. All appeals must be in writing and directed to the CEAS Associate Dean for Academic Affairs.

### Doctoral Program Committee

The Doctoral Program Committee is proposed by the major professor in consultation with the student and the department. The Committee must include at least five graduate faculty (three from major area, one from minor area, and one from any area, including the major and minor areas). The last member may be a person from outside the University (such as another university, a research laboratory, or a relevant industrial partner), provided that person meets Graduate School requirements. The Committee may have more than five members, provided that the majority of the Committee members are from the student's major field.

### Doctoral Preliminary Examination

A student is admitted to candidacy only after successful completion of the doctoral preliminary examination conducted by the Doctoral Program Committee. This examination, which normally is oral, must be taken before the completion of 48 credits of graduate work toward the Doctor of Philosophy degree in Engineering and should be taken within the first seven years in the program. Prior to the examination, the student must present a proposal for a doctoral dissertation project. The examination may cover both graduate course material and items related to the proposed dissertation project.

### Dissertation and Dissertator Status

The student must carry out a creative effort in the major area under the supervision of the major professor and report the results in an acceptable dissertation. The effort of the student and the major professor to produce the dissertation is reflected in the PhD in Engineering program requirement that the student complete at least 18 credits of doctoral thesis.

After the student has successfully completed all degree requirements except the dissertation, the student may enter Dissertator Status. Achieving Dissertator Status requires successful completion of the Doctoral Preliminary Examination and prior approval of the student's advisor, the Doctoral Program Committee, and the GPSC of a dissertation proposal that outlines the scope of the project, the research method, and the goals to be achieved. Any proposal that may involve a financial commitment by the University also must be approved by the Office of the Dean. After having achieved Dissertator Status, the student must continue to register for 3 credits of doctoral thesis per semester during the academic year until the dissertation is completed.

### Dissertation Defense

The final examination, which is oral, consists of a defense of the dissertation project. The doctoral defense examination may only be taken after all coursework and other requirements have been completed. The student must have Dissertator Status at the time of the defense.

### Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

For additional information see the Graduate School PhD requirements (<http://uwm.edu/graduateschool/doctoral-requirements/>).

## Engineering, PhD: Industrial Engineering

The Doctor of Philosophy, the highest degree offered by the University, is conferred in recognition of marked scholarship in a broad field of knowledge as well as distinguished critical or creative achievement within a special area of the general field (the special area being the subject of the doctoral dissertation). The Doctor of Philosophy (PhD)

program in the College of Engineering and Applied Science (CEAS) is designed to meet the traditional high standards for such programs. The PhD in Engineering is administered by the CEAS Graduate Program Subcommittee (GPSC). Some aspects of the program are delegated to the CEAS Graduate Office and to the various departments of the College.

There are six major areas in the PhD program:

- Biomedical Engineering
- Civil Engineering
- Computer Science
- Electrical Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering

Each major is flexible, allowing the student to develop a plan of studies tailored to meet individual needs. Evaluation of the study plan is based on its appropriateness as an engineering or computer science program, the availability within the University of appropriate course offerings, and the availability within the College of a faculty member who is qualified to serve as the student's major professor.

The PhD degree requires a minimum of 66 credits beyond the baccalaureate, including a dissertation. The student must also satisfy a residence requirement.

Many of the courses leading toward graduate degrees in CEAS are offered in the late afternoon or evening. So, students can complete much of their coursework on a part-time basis.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. A bachelor's or master's degree:
  - a. Applicants holding a BS or MS degree in engineering or computer science, depending on the major area selected will generally be admitted without deficiencies.
  - b. Applicants holding BS or MS degrees from domains outside of engineering or computer science may be admitted with specific program-defined course deficiencies, provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the Graduate School and the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree. For the Engineering major areas, the BS or MS preparation generally must include mathematics equivalent to ELECENG 234 or MATH 234. For the Computer Science major area, the mathematics preparation must generally include mathematics equivalent to MATH 232.

Otherwise, the made-up deficiencies must be sufficient to assure the Graduate Program Subcommittee that the applicant is able to proceed with advanced work directed toward the doctoral degree.

2. A minimum grade point average of 3.0 on the basis of 4.0, in the highest degree granted. An applicant with a master's degree in engineering or computer science having a GPA of less than 3.0, but at least equal to 2.75, may be admitted if substantial evidence can be submitted demonstrating that the applicant has the capacity to perform satisfactory doctoral work.
3. All applicants are required to submit a brief (1 or 2 page) statement describing their professional goals and at least two letters of reference.
4. The Graduate Record Examination (GRE) is required for all international and domestic applicants.
5. International students require proof of English language proficiency. Complete information is available at the UWM Center for International Education (<http://www.uwm.edu/Dept/CIE/>)
6. Applicants with a relevant master's degree who intend to complete an additional master's in engineering at UWM should announce their plans at the time of admission, and not later than the start of their second year into the PhD program.

### Reapplication

A student who receives a master's degree at UWM must formally apply for admission to the Graduate School as a doctoral student before continuing studies that will be credited toward the Doctor of Philosophy in Engineering.

## Credits and Courses

The minimum degree requirement is 66 graduate credits beyond the bachelor's degree. The minimum credit distribution of coursework to be undertaken must be as follows depending on the option selected.

Code	Title	Credits
Select 21 credits in the major area of concentration		21
Select 9 credits in an approved minor area		9
Select 6 credits in mathematics and/or quantitative methods		6
Select 9 credits of approved electives		9
<b>Select 3 credits of:</b>		<b>3</b>
IND ENG 700	CEAS Graduate Seminar	
<b>Select 18 credits of:</b>		<b>18</b>
IND ENG 998	Doctoral Thesis	
<b>Total Credits</b>		<b>66</b>

The 6-credit requirement in mathematics and/or quantitative methods may be met by satisfactorily completing certain courses specified by the GPSC or by taking the minor in mathematics. When such courses also count for either the major area or the minor area, the remaining credits may be taken as approved electives.

The Industrial Engineering major area of concentration is one of the seven major areas of the PhD in Engineering. The student must achieve a 3.0 GPA separately in each of the following areas: the Industrial Engineering major area, the minor area, and the quantitative methods area.

The minor is normally taken in one of the other major areas of the PhD in Engineering or in the physical sciences or mathematics or in business

management. Consideration of any other area as a minor requires the prior approval of the GPSC.

A minimum of 33 credits, including doctoral thesis, must be completed while enrolled at UWM in the PhD degree program. For students entering with a relevant master's degree who intend to complete a second master's and a PhD in Engineering at UWM, a minimum of 27 credits, including doctoral thesis, must be completed while enrolled in the doctoral program.

Students entering the program without a prior applicable master's degree are limited to a total maximum transfer of 9 credits for courses taken elsewhere. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided GPSC approval has been obtained prior to registration in such course. Typically no more than six credits of independent study are allowed in the PhD program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Studies Office.

The GPSC or the major department may require candidates to complete certain courses as part of the requirement for the specific major or to meet the mathematics and/or quantitative methods requirement.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student must have a major professor to advise, supervise, and approve the program of study before registering for courses. The GPSC or its delegates will assign the incoming student to an initial Program Advisor at the time of admission. Prior to the completion of 12 credits (9 credits for part-time students), the student must select a major professor who will be the student's thesis advisor. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Subcommittee for approval. For subsequent changes, the student must file a revised program of study for approval.

### Foreign Language

There is no foreign language requirement for the degree.

### Residence

The program residence requirement is satisfied either by completing 8 or more graduate credits in two consecutive semesters, exclusive of summer sessions, or by completing 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions.

### Qualifying Examination

Each student in the program must take and pass a Qualifying Examination to demonstrate that the student is qualified for doctoral-level work. The Qualifying Examination is a written exam and is structured in two parts: Part 1 and Part 2. The examination is offered twice a year during the regular academic year. The content of the examination varies among the major areas of the PhD in Engineering program.

Students entering with only a bachelor's degree or with a master's degree in an area unrelated to their major area may take the Qualifying Examination for the first time after earning 12 credits of graduate work at UWM and must successfully pass the exam before earning 30 credits of graduate work at UWM.

Students admitted after completing an appropriate master's degree must take this examination no later than the semester immediately after 18 credits of graduate work have been earned at UWM.

A student may take the Qualifying Examination twice. On the first attempt, the student must attempt both Part 1 and Part 2 of the examination.

- If the student passes both parts, then the student has passed the entire examination and will be permitted to proceed toward the Doctor of Philosophy degree.
- If the student fails both parts, then the student must take the entire exam again at its next offering.
- If a student passes only one of the two parts, then the student must take the examination again at its next offering, but may choose to take only the part of the examination that was not passed on the first attempt.
- If a passing grade is not obtained on the second attempt of the Qualifying Examination, the student will not be permitted to proceed toward the Doctor of Philosophy degree.

A student who fails the qualifying exam twice is subject to dismissal from the PhD in Engineering program. A student may appeal the failure and dismissal within 30 days of being notified of the failure. If the student does not appeal or the appeal is not granted, the College will recommend to the Graduate School that the student be dismissed. A student who is dismissed from the PhD in Engineering program because of failing the qualifying exam may not be enrolled in the PhD in Engineering program for a complete calendar year. This does not preclude the student from being enrolled in any other degree program offered by the University. A student who wishes to re-enroll in the program after a calendar year has passed must apply as any other student would, including payment of fees. A student readmitted after having failed the qualifying exam twice must take the qualifying exam in the first semester of matriculation and this will count as the student's first attempt at the exam. The student may appeal this requirement prior to the first scheduled day of classes. If the student fails the qualifying exam on this first attempt, the student is permitted the customary second attempt as described above. All appeals must be in writing and directed to the CEAS Associate Dean for Academic Affairs.

### Doctoral Program Committee

The Doctoral Program Committee is proposed by the major professor in consultation with the student and the department. The Committee must include at least five graduate faculty (three from major area, one from minor area, and one from any area, including the major and minor areas). The last member may be a person from outside the University (such as another university, a research laboratory, or a relevant industrial partner), provided that person meets Graduate School requirements. The Committee may have more than five members, provided that the majority of the Committee members are from the student's major field.

### Doctoral Preliminary Examination

A student is admitted to candidacy only after successful completion of the doctoral preliminary examination conducted by the Doctoral Program Committee. This examination, which normally is oral, must be taken before the completion of 48 credits of graduate work toward the Doctor of Philosophy degree in Engineering and should be taken within the first seven years in the program. Prior to the examination, the student must present a proposal for a doctoral dissertation project. The examination may cover both graduate course material and items related to the proposed dissertation project.

### Dissertation and Dissertator Status

The student must carry out a creative effort in the major area under the supervision of the major professor and report the results in an acceptable dissertation. The effort of the student and the major professor to

produce the dissertation is reflected in the PhD in Engineering program requirement that the student complete at least 18 credits of doctoral thesis.

After the student has successfully completed all degree requirements except the dissertation, the student may enter Dissertator Status. Achieving Dissertator Status requires successful completion of the Doctoral Preliminary Examination and prior approval of the student's advisor, the Doctoral Program Committee, and the GPSC of a dissertation proposal that outlines the scope of the project, the research method, and the goals to be achieved. Any proposal that may involve a financial commitment by the University also must be approved by the Office of the Dean. After having achieved Dissertator Status, the student must continue to register for 3 credits of doctoral thesis per semester during the academic year until the dissertation is completed.

### Dissertation Defense

The final examination, which is oral, consists of a defense of the dissertation project. The doctoral defense examination may only be taken after all coursework and other requirements have been completed. The student must have Dissertator Status at the time of the defense.

### Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

For additional information see the Graduate School PhD requirements (<http://uwm.edu/graduateschool/doctoral-requirements/>).

## Engineering, PhD: Materials Engineering

The Doctor of Philosophy, the highest degree offered by the University, is conferred in recognition of marked scholarship in a broad field of knowledge as well as distinguished critical or creative achievement within a special area of the general field (the special area being the subject of the doctoral dissertation). The Doctor of Philosophy (PhD) program in the College of Engineering and Applied Science (CEAS) is designed to meet the traditional high standards for such programs. The PhD in Engineering is administered by the CEAS Graduate Program Subcommittee (GPSC). Some aspects of the program are delegated to the CEAS Graduate Office and to the various departments of the College.

There are six major areas in the PhD program:

- Biomedical Engineering
- Civil Engineering
- Computer Science
- Electrical Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering

Each major is flexible, allowing the student to develop a plan of studies tailored to meet individual needs. Evaluation of the study plan is based on its appropriateness as an engineering or computer science program, the availability within the University of appropriate course offerings, and the availability within the College of a faculty member who is qualified to serve as the student's major professor.

The PhD degree requires a minimum of 66 credits beyond the baccalaureate, including a dissertation. The student must also satisfy a residence requirement.

Many of the courses leading toward graduate degrees in CEAS are offered in the late afternoon or evening. So, students can complete much of their coursework on a part-time basis.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. A bachelor's or master's degree:
  - a. Applicants holding a BS or MS degree in engineering or computer science, depending on the major area selected will generally be admitted without deficiencies.
  - b. Applicants holding BS or MS degrees from domains outside of engineering or computer science may be admitted with specific program-defined course deficiencies, provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the Graduate School and the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree. For the Engineering major areas, the BS or MS preparation generally must include mathematics equivalent to ELECENG 234 or MATH 234. For the Computer Science major area, the mathematics preparation must generally include mathematics equivalent to MATH 232. Otherwise, the made-up deficiencies must be sufficient to assure the Graduate Program Subcommittee that the applicant is able to proceed with advanced work directed toward the doctoral degree.
2. A minimum grade point average of 3.0 on the basis of 4.0, in the highest degree granted. An applicant with a master's degree in engineering or computer science having a GPA of less than 3.0, but at least equal to 2.75, may be admitted if substantial evidence can be submitted demonstrating that the applicant has the capacity to perform satisfactory doctoral work.
3. All applicants are required to submit a brief (1 or 2 page) statement describing their professional goals and at least two letters of reference.
4. The Graduate Record Examination (GRE) is required for all international and domestic applicants.
5. International students require proof of English language proficiency. Complete information is available at the UWM Center for International Education (<http://www.uwm.edu/Dept/CIE/>)
6. Applicants with a relevant master's degree who intend to complete an additional master's in engineering at UWM should announce their plans at the time of admission, and not later than the start of their second year into the PhD program.

### Reapplication

A student who receives a master's degree at UWM must formally apply for admission to the Graduate School as a doctoral student before continuing studies that will be credited toward the Doctor of Philosophy in Engineering.

## Credits and Courses

The minimum degree requirement is 66 graduate credits beyond the bachelor's degree. The minimum credit distribution of coursework to be undertaken must be as follows depending on the option selected.

Code	Title	Credits
Select 21 credits in the major area of concentration		21
Select 9 credits in an approved minor area		9
Select 6 credits in mathematics and/or quantitative methods		6
Select 9 credits of approved electives		9
<b>Select 3 credits of:</b>		<b>3</b>
MATLENG 700	CEAS Graduate Seminar	
<b>Select 18 credits of:</b>		<b>18</b>
MATLENG 998	Doctoral Thesis	
<b>Total Credits</b>		<b>66</b>

The 6-credit requirement in mathematics and/or quantitative methods may be met by satisfactorily completing certain courses specified by the GPSC or by taking the minor in mathematics. When such courses also count for either the major area or the minor area, the remaining credits may be taken as approved electives.

The Materials Engineering major area of concentration is one of the seven major areas of the PhD in Engineering. The student must achieve a 3.0 GPA separately in each of the following areas: the Materials Engineering major area, the minor area, and the quantitative methods area.

The minor is normally taken in one of the other major areas of the PhD in Engineering or in the physical sciences or mathematics or in business management. Consideration of any other area as a minor requires the prior approval of the GPSC.

A minimum of 33 credits, including doctoral thesis, must be completed while enrolled at UWM in the PhD degree program. For students entering with a relevant master's degree who intend to complete a second master's and a PhD in Engineering at UWM, a minimum of 27 credits, including doctoral thesis, must be completed while enrolled in the doctoral program.

Students entering the program without a prior applicable master's degree are limited to a total maximum transfer of 9 credits for courses taken elsewhere. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided GPSC approval has been obtained prior to registration in such course. Typically no more than six credits of independent study are allowed in the PhD program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Studies Office.

The GPSC or the major department may require candidates to complete certain courses as part of the requirement for the specific major or to meet the mathematics and/or quantitative methods requirement.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student must have a major professor to advise, supervise, and approve the program of study before registering for courses. The GPSC or its delegates will assign the incoming student to an initial Program Advisor at the time of admission. Prior to the completion of 12 credits (9 credits for part-time students), the student must select a major professor who will be the student's thesis advisor. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Subcommittee for approval. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Subcommittee for approval. For subsequent changes, the student must file a revised program of study for approval.

### Foreign Language

There is no foreign language requirement for the degree.

### Residence

The program residence requirement is satisfied either by completing 8 or more graduate credits in two consecutive semesters, exclusive of summer sessions, or by completing 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions.

## Qualifying Examination

Each student in the program must take and pass a Qualifying Examination to demonstrate that the student is qualified for doctoral-level work. The Qualifying Examination is a written exam and is structured in two parts: Part 1 and Part 2. The examination is offered twice a year during the regular academic year. The content of the examination varies among the major areas of the PhD in Engineering program.

Students entering with only a bachelor's degree or with a master's degree in an area unrelated to their major area may take the Qualifying Examination for the first time after earning 12 credits of graduate work at UWM and must successfully pass the exam before earning 30 credits of graduate work at UWM.

Students admitted after completing an appropriate master's degree must take this examination no later than the semester immediately after 18 credits of graduate work have been earned at UWM.

A student may take the Qualifying Examination twice. On the first attempt, the student must attempt both Part 1 and Part 2 of the examination.

- If the student passes both parts, then the student has passed the entire examination and will be permitted to proceed toward the Doctor of Philosophy degree.
- If the student fails both parts, then the student must take the entire exam again at its next offering.
- If a student passes only one of the two parts, then the student must take the examination again at its next offering, but may choose to take only the part of the examination that was not passed on the first attempt.
- If a passing grade is not obtained on the second attempt of the Qualifying Examination, the student will not be permitted to proceed toward the Doctor of Philosophy degree.

A student who fails the qualifying exam twice is subject to dismissal from the PhD in Engineering program. A student may appeal the failure and dismissal within 30 days of being notified of the failure. If the student does not appeal or the appeal is not granted, the College will recommend to the Graduate School that the student be dismissed. A student who is dismissed from the PhD in Engineering program because of failing the qualifying exam may not be enrolled in the PhD in Engineering program for a complete calendar year. This does not preclude the student from being enrolled in any other degree program offered by the University. A student who wishes to re-enroll in the program after a calendar year has passed must apply as any other student would, including payment of fees. A student readmitted after having failed the qualifying exam twice must take the qualifying exam in the first semester of matriculation and this will count as the student's first attempt at the exam. The student may appeal this requirement prior to the first scheduled day of classes. If the student fails the qualifying exam on this first attempt, the student is permitted the customary second attempt as described above. All appeals must be in writing and directed to the CEAS Associate Dean for Academic Affairs.

## Doctoral Program Committee

The Doctoral Program Committee is proposed by the major professor in consultation with the student and the department. The Committee must include at least five graduate faculty (three from major area, one from minor area, and one from any area, including the major and minor areas). The last member may be a person from outside the University (such as another university, a research laboratory, or a relevant industrial partner), provided that person meets Graduate School requirements. The

Committee may have more than five members, provided that the majority of the Committee members are from the student's major field.

### Doctoral Preliminary Examination

A student is admitted to candidacy only after successful completion of the doctoral preliminary examination conducted by the Doctoral Program Committee. This examination, which normally is oral, must be taken before the completion of 48 credits of graduate work toward the Doctor of Philosophy degree in Engineering and should be taken within the first seven years in the program. Prior to the examination, the student must present a proposal for a doctoral dissertation project. The examination may cover both graduate course material and items related to the proposed dissertation project.

### Dissertation and Dissertator Status

The student must carry out a creative effort in the major area under the supervision of the major professor and report the results in an acceptable dissertation. The effort of the student and the major professor to produce the dissertation is reflected in the PhD in Engineering program requirement that the student complete at least 18 credits of doctoral thesis.

After the student has successfully completed all degree requirements except the dissertation, the student may enter Dissertator Status. Achieving Dissertator Status requires successful completion of the Doctoral Preliminary Examination and prior approval of the student's advisor, the Doctoral Program Committee, and the GPSC of a dissertation proposal that outlines the scope of the project, the research method, and the goals to be achieved. Any proposal that may involve a financial commitment by the University also must be approved by the Office of the Dean. After having achieved Dissertator Status, the student must continue to register for 3 credits of doctoral thesis per semester during the academic year until the dissertation is completed.

### Dissertation Defense

The final examination, which is oral, consists of a defense of the dissertation project. The doctoral defense examination may only be taken after all coursework and other requirements have been completed. The student must have Dissertator Status at the time of the defense.

### Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

For additional information see the Graduate School PhD requirements (<http://uwm.edu/graduateschool/doctoral-requirements/>).

## Ergonomics, Graduate Certificate

*The Certificate in Ergonomics is being revised; admission to the program is temporarily suspended.*

The Certificate in Ergonomics program is designed to provide a formal program of study for students who wish to pursue careers in ergonomics in industry, government, or academia.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found

by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students wishing to earn the certificate must be enrolled in a UWM master's or doctoral degree program in any department or be admitted as UWM non-degree graduate students (see below).

Graduate non-degree applicants can be admitted to CEAS provided they meet one of the following requirements:

- A bachelor's or higher degree with a GPA of 2.75 or better in engineering, medicine, industrial hygiene, safety, physical therapy, occupational therapy, nursing, educational psychology, human kinetics.
- A bachelor's or higher degree with a GPA of 2.75 or better with evidence of at least one year of experience in ergonomics and/or occupational health and safety related area.

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

Students must complete the required 15 credit hours with a GPA of 3.0 or better from the following group of courses:

Code	Title	Credits
IND ENG 790	Design Project	2-3
IND ENG 580	Ergonomics	3
IND ENG 780	Advanced Ergonomics - Low Back Pain	3
IND ENG 783	Advanced Ergonomics - Upper Extremity	3
IND ENG 786		3

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

## Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

# Modern Engineering Leadership, Graduate Certificate

The Graduate Certificate in Modern Engineering Leadership is designed to help engineering and computer science professionals gain the skills and knowledge to become leaders in their organizations. It builds on prior training in engineering and computing with required courses in management of people and projects and in data analytics (multivariate statistics and machine learning). The program's underlying philosophy is that *modern* engineering leadership is both about leading people and about making decisions based on data. Certificate students also take an elective course in a technical topic of their choosing.

The Graduate Certificate in Modern Engineering Leadership is a fully online program in order to provide convenient access to working professionals.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

The minimum GPA for admission is 2.75 in the prior bachelor's or post-baccalaureate degree. Applicants should generally have a prior degree

in engineering or computer science. Applicants with other prior degrees will be considered via holistic assessment of the academic record and professional experience, with a focus on substantial work experience in the engineering or computing fields and on adequate mathematics preparation for the required coursework.

## Credits and Courses

Code	Title	Credits
<b>Required Courses</b>		
EAS 710	Managing Human Resources and Teams	3
IND ENG 890	Advanced Topics in Industrial and Systems Engineering:	3
IND ENG 716	Engineering Statistical Analysis	3
COMPSCI 411G	Machine Learning and Applications	3
<b>Electives</b>		
Electives may be taken in any topic taught by the College of Engineering and Applied Science.		3
<b>Total Credits</b>		<b>15</b>

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

## Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Industrial and Manufacturing Engineering

Industrial and manufacturing engineers are concerned with the design, improvement, installation, and operation of integrated systems of people, material, information, and energy for the development of environmentally sound and globally competitive enterprises.

Industrial/manufacturing engineers are needed in industries ranging from medical products and equipment manufacturing to automotive and electronic components manufacturing. Their skills benefit organizations such as hospitals, banks, airlines, telecommunications companies, and more. Some activities of an industrial/manufacturing engineer include: methods improvement; plant layout; integration of automation components (CAD and CAM); logistics; supply chain management; economic analysis; optimization of resources; quality control; reliability analysis; and ergonomics, i.e., design of workplaces, equipment, and tools for maximum productivity and employee comfort and safety.

In manufacturing companies, industrial/manufacturing engineers may be responsible for production and inventory control, quality control, plant layout, and work station design, and may lead the effort for the introduction of new technologies and other advancements. In service organizations these engineers may develop methods for optimal utilization of resources, such as doctors, nurses, and medical equipment in a hospital; determine the optimal number of communication lines and service level for a telephone company; participate in the development of a total quality management system for a bank, etc.

## Mission Statement

The mission of the department is to provide a broad-based education in industrial and manufacturing engineering and to prepare students for a diversified career in industry, academia, government, and private sectors.

## Programs

- Connected Systems Engineering, MS (p. 655)
- Industrial Engineering, BSE (p. 657)
- Industrial Engineering, Minor (p. 660)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty

Edward W. Knoblock	Associate Professor	MS			✓
Wilkistar Otieno	Associate Professor	PhD	University of South Florida	✓	
Timothy Patrick	Associate Professor	PhD	University of Missouri-Columbia		✓
Matthew Petering	Associate Professor	PhD	University of Michigan	✓	
Brett Peters	Professor	PhD	Georgia Institute of Technology, Dean of CEAS	✓	
Umesh K. Saxena	Professor	PhD, PE			✓
Hamid K. Seifodini	Associate Professor	PhD	Oklahoma State University	✓	

## Connected Systems Engineering, MS

The MS program in Connected Systems Engineering is a 31-credit Capstone-based program which is offered by the Industrial and Manufacturing Engineering Department in the College of Engineering and Applied Sciences, in collaboration with UWM's Connected Systems Institute (CSI) and the Lubar School of Business. This program, the first of its kind in the state of Wisconsin, is designed for graduates with at least a bachelor's degree in engineering and related fields, to reskill or upskill, and gain key knowledge that is necessary for current and future jobs in the manufacturing and service industries. The program entails courses in Industrial Internet of Things (IIoT), data acquisition and data analytics, machine learning and artificial intelligence (AI), robotics/ automation and digital twins as well as the sustainability in technological advances, taking ethical and social ramifications. A unique aspect of this program is that the majority of the hands-on-experiential learning will take place in the state-of-the-art manufacturing testbeds and software that are available in the CSI. The technical elective courses will lead concentrations in industrial engineering, manufacturing engineering, enterprise resource planning, digital supply chain management,

mechatronics and robotics, artificial intelligence and machine learning, and cybersecurity.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admissions Eligibility Requirements

Applicants must meet UWM's Graduate School's mandated admissions requirements (<https://uwm.edu/graduateschool/students/admission/>). In addition:

1. Applicants should have a baccalaureate degree in engineering or related fields (mathematics, data science, statistics or a natural science) from an accredited college or university.

2. Applications will be reviewed by the Industrial and Manufacturing Engineering Department Faculty Committee to assess academic achievement and ability to do intensive graduate-level work.

## Credits and Courses

The program consists of 18 credits of required core courses, 3 credits of the capstone completion course, 1 credit of writing effectiveness and 9 credits of elective courses from a one or a mix of several focus areas as follows:

Code	Title	Credits
<b>Academic degree program or major course requirements (22 Credits)</b>		
IND ENG 540G	Foundations of Systems Engineering	3
IND ENG 555	Manufacturing Systems Integration	3
IND ENG 715	Data Acquisition and Visualization for Decision Making	3
IND ENG 716	Engineering Statistical Analysis	3
IND ENG 741	Foundational Technologies for Connected Systems	1
IND ENG 742	Cloud Architecture for Connected Systems	1
IND ENG 999	Advanced Independent Study	3
BUS ADM 788	Tracking and Tracing	1
BUS ADM 811	Process and Work-Flow Management	3
EAS 701	Effective Academic Writing	1
<b>Technical Electives (Pick 9 credits from one or a mix of the following focus areas)</b>		<b>9</b>
<i>Industrial Engineering Focus</i>		
IND ENG 455G	Operations Research I	
IND ENG 465G	Operations Research II	
IND ENG 475G	Simulation Methodology	
IND ENG 571G	Quality Control	
IND ENG 575G	Design of Experiments	
IND ENG 717	Operations Research in Engineering Management	
IND ENG 765	Operations Research Methods	
IND ENG 777	Scheduling and realtime resource management	
IND ENG 890	Advanced Topics in Industrial and Systems Engineering: <sup>1</sup>	
<i>Manufacturing Engineering Focus</i>		
IND ENG 550G	Control of Automated Manufacturing Systems	
IND ENG 572G	Reliability Engineering	
IND ENG 587G	Lean Production Systems	
IND ENG 751	Flexible Manufacturing Systems	
IND ENG 890	Advanced Topics in Industrial and Systems Engineering: <sup>1</sup>	
<i>Enterprise Resource Planning Focus</i>		
BUSMGMT 733	Enterprise Simulation Game	
BUS ADM 781	Enabling Supply Chains Using SAP	
BUS ADM 816	Business Intelligence Technologies & Solutions	

BUS ADM 818	Information Systems Practicum
<i>Digital Supply Chain Management Focus</i>	
BUS ADM 782	Supply Chain Technology and Simulation
BUS ADM 783	Modeling and Analytics in Supply Chains
BUS ADM 787	Managing Connected Supply Chains
BUS ADM 789	Service Operations Management
IND ENG 890	Advanced Topics in Industrial and Systems Engineering: <sup>1</sup>
<i>Mechatronics/Robotics/Digital Twin Focus</i>	
MECHENG 476G	Introduction to Robotics
MECHENG 479G	Advanced Mechatronics
MECHENG 733	Sensors and Systems
COMPSCI 725	Robot Motion Planning
COMPSCI 746	
IND ENG 890	Advanced Topics in Industrial and Systems Engineering: <sup>1</sup>
<i>AI/Machine Learning Focus</i>	
COMPSCI 425G	Introduction to Data Mining
COMPSCI 710	Artificial Intelligence
COMPSCI 711	Introduction to Machine Learning
COMPSCI 715	Programming for Machine Learning
INFOST 582G	Introduction to Data Science
<i>Cybersecurity Focus</i>	
COMPSCI 469G	Introduction to Computer Security
INFOST 583G	Survey of Information Security
INFOST 695G	Ethical Hacking I
INFOST 696G	Ethical Hacking II
INFOST 784	Information Security Management
IND ENG 890	Advanced Topics in Industrial and Systems Engineering: <sup>1</sup>
<b>Total Credits</b>	<b>31</b>

<sup>1</sup> Qualifying topics include Global Supply Chain and Sustainable Technologies: Social and Ethical Impacts.

## Additional Requirements

### Major Professor as Advisor

The student is assigned an initial faculty advisor at the time of admission. The student selects a faculty member as their capstone advisor after consultation with that faculty member. Any change in faculty advisor requires the documented permission of the new faculty member and their department. An initial Program of Study with student, advisor and department approval should be completed prior to the completion of 9 credits in the program. The final Program of Study must be approved by the initial advisor or capstone advisor as appropriate.

### Financial Aid

Students enrolled in this program are not eligible for financial aid from the Industrial and Manufacturing Engineering department including research assistantships, teaching assistantships, project assistantships, fellowships and/or tuition waivers. However, such students are still eligible for financial aid available elsewhere on the campus.

## Time Limit

All students must complete the degree requirements within five years of initial enrollment. A student requiring more time must submit a request for exemption to the graduate school.

## Industrial Engineering, BSE

Industrial & Manufacturing Engineering is an operations and optimization science, focused on productivity, quality and continuous improvement of all business operations from acquisition of raw materials/resources to delivery of finished products/services to customers.

Industrial & Manufacturing Engineering is among the most far-reaching disciplines of engineering. Industrial and Manufacturing Engineers work in diverse industries within both the public and private sectors. Because of the flexibility and value of industrial engineering skills, employment opportunities are numerous and diverse.

## Accreditation

The Industrial Engineering program is accredited by the Engineering Accreditation Commission of ABET: <https://www.abet.org> (<https://tinyurl.com/u7fsfevw/>).

## New Freshmen

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile, grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology, chemistry, and physics). The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

## Transfer Students

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

## Industrial Engineering Curriculum

The minimum number of credits required to complete the Bachelor of Science in Engineering with a major in industrial engineering is 120.

Code	Title	Credits
<b>Engineering Core - 24 Credits</b>		
CIV ENG 203	Introduction to Solid Mechanics <sup>1</sup>	4
EAS 200	Professional Seminar	1
COMPSCI 202	Introductory Programming Using Python <sup>2</sup>	3
ELECENG 301	Electrical Circuits I	3
IND ENG 111	Introduction to Engineering <sup>3</sup>	3
IND ENG 112	Engineering Drawing & Computer Aided Design/Drafting <sup>3</sup>	3
IND ENG 360	Engineering Economic Analysis	3
MATLENG 201	Engineering Materials	4
<b>Major Requirements - 36 credits</b>		
IND ENG 350	Manufacturing Processes	3
IND ENG 367	Introductory Statistics for Physical Sciences and Engineering Students	3
IND ENG 370	Introduction to Operations Analysis	3
IND ENG 455	Operations Research I	3
IND ENG 465	Operations Research II	3
IND ENG 470	Methods Engineering	3
IND ENG 475	Simulation Methodology	3
IND ENG 485	Senior Design Project	3
IND ENG 571	Quality Control	3
IND ENG 575	Design of Experiments	3
IND ENG 580	Ergonomics	3
IND ENG 583	Facility Layout and Material Handling	3
<b>Mathematics Requirement - 16 credits <sup>4</sup></b>		
MATH 231	Calculus and Analytic Geometry I	4
MATH 232	Calculus and Analytic Geometry II	4
MATH 233	Calculus and Analytic Geometry III	4
ELECENG 234	Analytical Methods in Engineering <sup>5</sup>	4
<b>Natural Science Requirement - 13 credits</b>		
CHEM 102 or CHEM 105	General Chemistry General Chemistry for Engineering	5
PHYSICS 209 & PHYSICS 210	Physics I (Calculus Treatment) and Physics II (Calculus Treatment)	8
<b>Technical Electives - 9 credits <sup>6</sup></b>		
Select 9 credits from approved technical electives list below. At least 6 credits must be in courses from IND ENG. All non-required IND ENG courses numbered between 400 and 699 are approved technical electives.		
BUS ADM 370	Introduction to Supply Chain Management	
EAS 1	Engineering Co-op Work Period	
EAS 497	Study Abroad:	
IND ENG 390	Senior Thesis	
IND ENG 550	Control of Automated Manufacturing Systems	
IND ENG 572	Reliability Engineering	
IND ENG 582	Ergonomic Job Evaluation Techniques	

IND ENG 587	Lean Production Systems	
IND ENG 590	Topics in Industrial and Systems Engineering:	
IND ENG 699	Independent Study	
<b>GER Distribution Requirement - 15 credits</b>		
Arts		3
Humanities		3
Social Science		6
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	3
Cultural Diversity - Arts, Humanities, or Social Science course must also satisfy UWM Cultural Diversity Requirement		
Students must also satisfy Oral and Written Communication (OWC) Part A <sup>7</sup>		0-6
Students must also satisfy the UWM Foreign Language Requirement <sup>7</sup>		0-8
<b>Free Electives - 7 credits</b>		<b>7</b>
<b>Total Credits</b>		<b>120</b>

<sup>1</sup> CIV ENG 201 or CIV ENG 202 may substitute for CIV ENG 203 for transferring students.

<sup>2</sup> COMPSCI 151, COMPSCI 240, COMPSCI 250, or MECHENG 101 may substitute for COMPSCI 202 for transferring students.

<sup>3</sup> MECHENG 110 and MECHENG 111 may substitute for IND ENG 111 and IND ENG 112 for transferring students.

<sup>4</sup> MATH 221 and MATH 222 may substitute for MATH 231, MATH 232, and MATH 233.

<sup>5</sup> MATH 234 may substitute for ELECENG 234 for transferring students.

<sup>6</sup> EAS 1 is open only to students who earn 3 or more credits. EAS 497 may be taken up to 6 credits.

<sup>7</sup> See General Education Requirements (p. 30) for details.

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.
2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a

program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation, course selection, program planning, and credit transfer evaluation.

Students are assigned to a permanent professional advisor as soon as they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,
- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## Honors in the Major

Students in Industrial Engineering who meet all of the following criteria can be awarded honors in the major upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all upper-division (300 level and higher) IND ENG courses;
3. At least one of the following:
  - a. Participation in the Accelerated MS program with successful completion of 6 credits in IND ENG approved courses.
  - b. Successful completion of 3 credits of faculty supervised research (IND ENG 699).
  - c. A- grade or better in IND ENG 485.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses

### Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

### Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent

coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program. For more information, contact the Office of Student Services at (414) 229-4667.

## Industrial Engineering, Minor

The minor in industrial and manufacturing engineering is ideally suited for:

- Business majors interested in strengthening their background in quantitative production operations management
- Computer Science majors interested in advanced optimization techniques
- Mechanical Engineering majors interested in development and implementation of integrated manufacturing systems
- Civil Engineering majors focusing on transportation where advanced optimization techniques may be useful

### Requirements - 21 Credits

The program of study to obtain the minor in industrial and manufacturing engineering consists of four required courses and three elective courses.

Code	Title	Credits
<b>Required Courses:</b>		
IND ENG 360	Engineering Economic Analysis	3
IND ENG 367	Introductory Statistics for Physical Sciences and Engineering Students	3
IND ENG 455	Operations Research I	3
IND ENG 470	Methods Engineering	3
<b>Elective Courses</b>		
IND ENG 350	Manufacturing Processes	3
IND ENG 370	Introduction to Operations Analysis	3
IND ENG 465	Operations Research II	3
IND ENG 475	Simulation Methodology	3
IND ENG 571	Quality Control	3
IND ENG 572	Reliability Engineering	3
IND ENG 580	Ergonomics	3
IND ENG 583	Facility Layout and Material Handling	3

If you are interested in an Industrial and Manufacturing Engineering minor, contact Student Services at [ceas-adv@uwm.edu](mailto:ceas-adv@uwm.edu) or (414) 229-4667. Student Services is located in the EMS building, Room E386.

## Integrated BS-MS Degree

### Requirements

#### Admission

An Integrated BS-MS program is available for exceptional undergraduate students. In this program, students take 6 graduate credits while completing the BS degree.

Minimum admission requirements:

- 3.2 GPA.
- 36 credits or less remaining for the BS.
- Approval from their major department.

### Application Process

- In consultation with their major professor, students must complete an Integrated BS/MS Program of Study Form. Students must indicate on the form which 6 graduate-level credits are being taken while completing the BS degree. Engineering students must have the form approved by the CEAS Office of Graduate Programs and Research. Computer Science students must have the form approved by the Graduate Program Representative for the CompSci MS Program. Students must have their Program of Study approved prior to the start of the final undergraduate semester and before starting graduate courses.
- Students must apply to the Graduate School. The MS degree requirements must be completed within five years of completion of the BS degree. Students in the Integrated Program are not required to take the GRE exam for admission to the Graduate School.

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Program of Study

Advanced standing will be granted to Integrated BS-MS students who have successfully completed six credits of pre-approved coursework at the graduate level with a grade of B or better. If a course has U/G status, the student must follow the syllabus and grading scale designated for graduate students. Once admitted to the Graduate School, students in the Integrated Program must meet the requirements listed in the following tables:

### Master of Science in Engineering

#### Thesis

- 24 course credits completed after admission to graduate status. Requires 3-credit Graduate Seminar course.
- 6 thesis credits
- Total 30 credits

#### Non-Thesis

- 31 course credits completed after admission to graduate status. Requires 1-credit Graduate Seminar course.
- Total 31 credits

## Master of Science in Computer Science

### Thesis

Code	Title	Credits
COMPSCI 700	CEAS Graduate Seminar	3
COMPSCI 704	Analysis of Algorithms	3
Select 12 additional credits of 700 or higher-level courses		12
Select 6 credits of additional courses that carry graduate credit		6
COMPSCI 990	Masters Thesis	6
<b>Total Credits</b>		<b>30</b>

### Non-Thesis 1

Code	Title	Credits
COMPSCI 700	CEAS Graduate Seminar	1
COMPSCI 704	Analysis of Algorithms	3
Select 15 additional credits of 700 or higher-level courses		15
Select 9 credits of additional courses that carry graduate credit		9
COMPSCI 995	Master's Capstone Project	3
<b>Total Credits</b>		<b>31</b>

The following is a common requirement for both options: The students must have taken six Computer Science courses (specified below) or their equivalent prior to completion of the MS Program.

Appropriate courses satisfy the common requirement with the approval of the department.

#### The six courses are:

Code	Title	Credits
COMPSCI 315	Introduction to Computer Organization and Assembly Language Programming	3
COMPSCI 317	Discrete Information Structures	3
COMPSCI 458	Computer Architecture	3
COMPSCI 535	Algorithm Design and Analysis	3
Select two of the following:		6
COMPSCI 417	Introduction to the Theory of Computation	
COMPSCI 431	Programming Languages Concepts	
COMPSCI 536	Software Engineering	
COMPSCI 537	Introduction to Operating Systems	
<b>Total Credits</b>		<b>18</b>

At most six credits of the above courses with UG credit may be used to satisfy the courses requirements of the two options.

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Nidal Abu-Zahra	Associate Professor, Chair	PhD	Cleveland State University	✓	
George S. Baker	Professor	PhD			✓
Benjamin Church	Associate Professor	PhD	Georgia Institute of Technology	✓	
Hugo F. Lopez	Professor	PhD	Ohio State University	✓	
Xiaoli Ma	Assistant Professor	PhD	Arizona State University	✓	
Joachim P. Neumann	Professor	PhD			✓
Junjie Niu	Assistant Professor	PhD	Zhejiang University	✓	

In the thesis option, the student must register for thesis credits (COMPSCI 990) in at least two semesters.

## Time Limit

The MS degree requirements must be completed within five years of the first enrollment in the Integrated Program.

## Graduation

Students who withdraw from the Integrated Program may continue in the BS program and be awarded the bachelor's degree.

## Materials Engineering

In today's world there is a constant demand for new materials of superior quality or with particular combinations of properties. It is the task of the materials engineer to use chemical and physical processes to provide new materials, more useful and valuable products, and improvements in the properties of existing materials on a cost-effective basis.

Materials engineering, like other branches of engineering, is based on mathematics, physics, and chemistry.

Necessarily, the engineer must work with every type of material, whether it be metal, glass, plastic, or naturally occurring rock or wood; and electrical conductors, semiconductors, or insulators, transparent or otherwise. The variety of available materials is as wide as the applications; to use them to good effect, the engineer must understand the nature of the substances that might be used for a particular purpose and the chemical and physical processes that are involved in their production.

Being in a central position in the development and design of new products, the materials engineer has excellent and varied career opportunities, extending from fundamental research through primary production processes and subsequent manufacturing to quality control and failure analysis.

## Mission Statement

The Materials Department is committed to provide comprehensive undergraduate and graduate education in Materials Engineering, outstanding research, and service to our students, College, the University of Wisconsin-Milwaukee, and the community, as well as to active participation in professional societies.

## Programs

- Materials Engineering, BSE (p. 662)
- Materials Engineering, Minor (p. 665)

Pradeep K. Rohatji	Wisconsin Distinguished Professor	ScD	Massachusetts Institute of Technology	✓
Dev Venugopalan	Associate Professor, Vice Provost	PhD	McMaster University	✓

## Materials Engineering, BSE

Everything we use is made of some material or combination of materials. Materials science is involved with all the processes that turn natural resources into useful products that impact all facets of our economy such as aerospace, electronics, transportation, communication, construction, recreation, entertainment and environment.

### Concentrations

- Biomaterials
- Materials for energy application
- Materials processing
- Advanced materials characterization
- Metal casting
- Specific courses in ceramics, polymers, composites, and electronic materials

### Research

Work with faculty (<http://uwm.edu/engineering/classification/faculty/materials-science-engineering/>) engaged in leading-edge research in areas such as:

- Polymer solar cells
- Materials for advanced drug delivery
- Manufacturing processes
- Structural analysis of aerospace materials
- Materials for energy storage
- Application of nanomaterials in construction
- Self-healing metals and advanced metal-matrix composites

### Career Paths

Materials engineers work in a wide range of jobs across diverse industries. Many of today's significant scientific and technological advances come from materials engineers.

- Research Scientist
- Application Technologist
- Materials and Process Engineer
- Quality Engineer
- Materials Engineering Manager
- Product Engineer
- Geotechnical / Materials Engineer

## Accreditation

The Materials Engineering program is accredited by the Engineering Accreditation Commission of ABET: <https://www.abet.org> (<https://tinyurl.com/u7fsfevw/>).

## New Freshmen

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile,

grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology, chemistry, and physics). The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

## Transfer Students

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

## Materials Engineering Curriculum

The minimum number of credits required to complete the Bachelor of Science in Engineering with a major in Materials Engineering is 120.

Code	Title	Credits
<b>Engineering Core (21 credits)</b>		
CIV ENG 203	Introduction to Solid Mechanics	4
CIV ENG 202	Dynamics	3
COMPSCI 240	Introduction to Engineering Programming <sup>1</sup>	3
EAS 200	Professional Seminar	1
ELECENG 301	Electrical Circuits I	3
IND ENG 367	Introductory Statistics for Physical Sciences and Engineering Students	3
MATLENG 201	Engineering Materials	4
<b>Major Requirements (28 credits)</b>		
MATLENG 316	Thermodynamics of Materials	3
MATLENG 330	Materials and Processes in Manufacturing	3
MATLENG 402	Physical Metallurgy	3
MATLENG 410	Mechanical Behavior of Materials	3
MATLENG 411	Materials Laboratory	3
MATLENG 443	Transport Phenomena in Materials Processing	3

MATLENG 452	Ceramic Materials	3
MATLENG 453	Polymeric Materials	3
MATLENG 490	Senior Design Projects I	1
MATLENG 491	Senior Design Projects II	3
<b>Mathematics Requirement (16 credits)<sup>2</sup></b>		
MATH 231	Calculus and Analytic Geometry I	4
MATH 232	Calculus and Analytic Geometry II	4
MATH 233	Calculus and Analytic Geometry III	4
ELECENG 234	Analytical Methods in Engineering <sup>3</sup>	4
<b>Chemistry Requirement (5-10 credits)</b>		
Select one of the following:		5-10
CHEM 105	General Chemistry for Engineering (Suggested)	
CHEM 102 & CHEM 104	General Chemistry and General Chemistry and Qualitative Analysis	
<b>Physics Requirement (10 credits)</b>		
Select one of the following options:		10
Option 1:		
PHYSICS 219 & PHYSICS 220	Physics I: Calculus-Based, Studio Format and Physics II: Calculus-Based, Studio Format (recommended)	
Option 2:		
PHYSICS 209 & PHYSICS 214	Physics I (Calculus Treatment) and Lab Physics I (Calculus Treatment)	
PHYSICS 210 & PHYSICS 215	Physics II (Calculus Treatment) and Lab Physics II (Calculus Treatment)	
<b>Technical Electives (24 credits)</b>		
Select 24 credits from approved technical elective lists.		24
<b>Free Electives (1 credit)</b>		
GER Distribution Requirement (15 credits)		
Arts		3
Humanities		3
Social Science		6
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	3
Cultural Diversity - Arts, Humanities, or Social Science course must also satisfy UWM Cultural Diversity Requirement		
Students must also satisfy Oral and Written Communication (OWC) Part A <sup>4</sup>		0-6
Students must also Satisfy the UWM Foreign Language requirements (0-8) <sup>4</sup>		0-8
<b>Total Credits</b>		<b>120</b>

<sup>1</sup> COMPSCI 151, COMPSCI 202 or COMPSCI 250 may substitute for COMPSCI 240.

<sup>2</sup> MATH 221, MATH 222 and two free electives may substitute for MATH 231, MATH 232 and MATH 233.

<sup>3</sup> MATH 234 may substitute for ELECENG 234.

<sup>4</sup> See General Education Requirements (p. 29) for details.

## Technical Electives

24 credits of technical electives are to be selected from the following lists. At least 12 of the credits of technical electives must come from Group A. Group C can account for no more than 6 credits. Group A may be substituted for groups B and C such that Group A credits can range from 12 - 24 credits.

Code	Title	Credits
<b>Group A Technical Electives</b>		
Select at least 4 courses from the following:		
MATLENG 380	Engineering Basis for Materials Selection	
MATLENG 385	Introduction to Biomaterials	
MATLENG 431	Welding Engineering	
MATLENG 456	Metal Casting Engineering	
MATLENG 457	Engineering Composites	
MATLENG 460	Nanomaterials and Nanomanufacturing	
MATLENG 461	Environmental Degradation of Materials	
MATLENG/MECHENG 465	Friction and Wear	
MATLENG 471	Heat Treatment of Materials	
MATLENG 481	Electronic Materials	
MATLENG 483	Materials for Energy Systems	
MATLENG 485	Introduction to Computational Materials Modeling and Simulations	
MATLENG 511	Advanced Materials Characterization	
MATLENG 585	Advanced Biomaterials	
MATLENG 690	Topics in Materials:	
MATLENG 699	Independent Study	
<b>Group B Technical Electives</b>		
Select up to 12 credits from the following. Group B and C can account for a maximum of 12 credits combined.		
Any BME, CIV ENG, COMPSCI, EAS, ELECENG, IND ENG, MECHENG course 100-level or above		
EAS 1	Engineering Co-op Work Period <sup>1</sup>	
CHEM 221	Elementary Quantitative Analysis	
Any CHEM course 300-level or above		
Any PHYSICS course 250-level or above		
ENGLISH 206	Technical Writing	
ENGLISH 428	Strategic Writing for Organizations	
ENGLISH 429	Technical Communications and Professional Leadership	
ENGLISH 435	Rhetoric and Professional Writing	
<b>Group C Technical Electives</b>		
Select no more than 6 credits.		
Any BIO SCI course 150-level or above		
CHEM 104	General Chemistry and Qualitative Analysis	
Any GEO SCI course 300-level or above		
Any MATH course 300-level or above		

<sup>1</sup> Students who earn 3 or more credits of Co-op may use 3 of those credits as approved technical electives.

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.
2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation, course selection, program planning, and credit transfer evaluation. Students are assigned to a permanent professional advisor as soon as they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,

- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## Honors in the Major

Students in the Materials Engineering major who meet all of the following criteria can be awarded honors in the major upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all CEAS courses counting toward the Materials Engineering major.
3. A 3.500 GPA over all upper-division (300 level and higher) Materials Engineering (MATLENG) courses; and
4. At least one of the following:
  - a. Successful completion of 3-cr of research experience via independent study MATLENG 699, subject to approval by the supervising faculty and department chair.
  - b. Participation in accelerated MS program with successful completion of 6 credits in approved MATLENG courses for the MS program.

Students who believe they may qualify for honors in Materials Engineering should apply to the College of Engineering & Applied Science during their last semester of study.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses

### Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

### Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program. For more information, contact the Office of Student Services at (414) 229-4667.

## Materials Engineering, Minor

The Materials minor is directed toward students who want to strengthen their background in materials engineering.

## Requirements

The 18-credit minor requires the following:

Code	Title	Credits
<b>Required</b>		
MATLENG 402	Physical Metallurgy	3
<b>Electives</b>		
Select 5 electives (see below)		15
<b>Total Credits</b>		<b>18</b>

## Electives

Code	Title	Credits
MATLENG 316	Thermodynamics of Materials	3
MATLENG 330	Materials and Processes in Manufacturing	3
MATLENG 380	Engineering Basis for Materials Selection	3
MATLENG 385	Introduction to Biomaterials	3
MATLENG 410	Mechanical Behavior of Materials	3
MATLENG 411	Materials Laboratory	3
MATLENG 431	Welding Engineering	3
MATLENG 452	Ceramic Materials	3
MATLENG 453	Polymeric Materials	3
MATLENG 456	Metal Casting Engineering	3
MATLENG 457	Engineering Composites	3
MATLENG 460	Nanomaterials and Nanomanufacturing	3
MATLENG 461	Environmental Degradation of Materials	3
MATLENG 465	Friction and Wear	3
MATLENG 471	Heat Treatment of Materials	3
MATLENG 481	Electronic Materials	3
MATLENG 483	Materials for Energy Systems	3
MATLENG 511	Advanced Materials Characterization	3
MATLENG 585	Advanced Biomaterials	3
MATLENG 690	Topics in Materials:	3

More information on the minor may be obtained from the CEAS Office of Student Services (414) 229-4667.

## Mechanical Engineering

Mechanical engineering is one of the broadest and most general fields of engineering. Combining some of the basic elements found in electrical and civil engineering with more in-depth use of mechanical design and

thermal science principles, a mechanical engineering education will provide its students with the tools required to solve a wide range of technological problems.

Mechanical engineers work on the design, development, analysis, production, and testing of a wide variety of devices, products, and systems. The devices and systems developed by mechanical engineers can be found in many fields, including energy conversion, power generation, environmental control, manufacturing, materials handling and processing, and transportation and construction equipment.

The mechanical engineering curriculum is based upon fundamental engineering science courses in mechanics, the thermal sciences, mechanical design, and controls. Students also take courses in experimentation, computer-aided engineering, vibrations, and mechatronics. A variety of technical elective courses are also offered. With these courses, a student can either pursue a general mechanical engineering education, or can tailor a program of study towards a concentration in either thermal sciences or mechanical systems.

## Mission Statement

The mission of the UWM Mechanical Engineering Department is:

1. To provide quality educational programs for undergraduate and graduate students planning careers in mechanical engineering or related fields.
  2. To create and disseminate knowledge through research, publications, and other scholarly activities.
  3. To foster a close partnership with industry and government.
  4. To engage in professional and academic service activities of value to the University and the community at large.
- Mechanical Engineering, BSE (p. 667)
  - Mechanical Engineering, Minor (p. 670)
  - Mechanical Engineering, PhD (p. 670)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty

Mohamed Yahiaoui	Lecturer	PhD	Massachusetts Institute of Technology	

## Mechanical Engineering, BSE

Mechanical engineering is one of the most general engineering fields. The engineer has the freedom to deal with virtually any aspect of the multi-faceted engineering process such as design, development, analysis, production and testing. The broad nature of the field also provides opportunities to work in various areas of interest ranging from energy conversion or environmental control to the production of transportation and construction equipment.

### Concentrations

- General mechanical engineering
- Thermal sciences
- Mechanical systems

### Research

Work with faculty engaged in leading-edge research in areas such as:

- Design optimization
- Nanotribology
- Technology innovation and entrepreneurship
- Sustainable design and manufacturing
- Marine robotics
- Biomimetic surfaces

### Career Paths

Materials engineers work primarily in engineering services, research and development, manufacturing and the federal government.

- Senior Mechanical Engineer
- Propulsion Engineer
- Process Engineer
- Mechanical Design Engineer
- Product Development Engineer
- Aerospace Structural Engineer

## Accreditation

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET: <https://www.abet.org> (<https://tinyurl.com/u7fsfevw/>).

## New Freshmen

Admission to the College of Engineering and Applied Science is based on an overall assessment of both academic and non-academic qualifications. The primary review factors for admission are the strength and quality of the high school curriculum, high school class percentile, grade point average, and the result of the ACT or SAT. Well-prepared freshman applicants will have four years of mathematics (including one-and-a-half years of algebra, one year of geometry, and one-half year of trigonometry) and four years of natural science (including biology, chemistry, and physics). The College also will consider non-academic

qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

## Transfer Students

Transfer student admission is based on an overall assessment of both academic and non-academic qualifications. For transfer applicants, the primary factors considered for admission are the grade point average on transferable courses and the level of curriculum completion. The College also will consider non-academic qualifications such as leadership skills, diversity in personal background, work experience, motivation, and maturity.

Applicants who do not meet the requirements for admission to the College of Engineering & Applied Science will automatically be considered for admission to the Pre-Engineering program in the UWM College of General Studies.

The Pre-Engineering program is an Associate degree level program offered jointly by the College of General Studies and the College of Engineering & Applied Science. The curriculum is designed to prepare students for the engineering program with emphasis on mathematics.

Questions on admission to CEAS or choosing a major should be directed to the Office of Student Services, (414) 229-4667.

## Mechanical Engineering Curriculum

The minimum number of credits required to complete the Bachelor of Science in Engineering with a major in Mechanical Engineering is 120.

Code	Title	Credits
<b>Engineering Core - 15 credits</b>		
CIV ENG 203	Introduction to Solid Mechanics	4
CIV ENG 202	Dynamics	3
EAS 200	Professional Seminar	1
MATLENG 201	Engineering Materials	4
MECHENG 301	Basic Engineering Thermodynamics	3
<b>Major Requirements - 44 credits</b>		
IND ENG 369	Introduction to Probability and Statistical Inference	1
MATLENG 330	Materials and Processes in Manufacturing	3
MECHENG 101	Computational Tools for Engineers	2
MECHENG 110	Engineering Fundamentals I	4
MECHENG 111	Engineering Fundamentals II	3
MECHENG 270	Computer Aided Engineering Laboratory	2
MECHENG 302	Introduction to System Dynamics	3
MECHENG 321	Basic Heat Transfer	4
MECHENG 324	Introduction to Fluid Mechanics	4
MECHENG 360	Mechanical Design I	3
MECHENG 364	Advanced Mechanics of Materials and Design of Machine Elements I	3

MECHENG 368	Design of Machine Elements 2	3
MECHENG 379	Introduction to Mechatronics	3
MECHENG 438	Mechanical Engineering Experimentation	3
MECHENG 496 or MECHENG 405	Senior Design Project Product Realization	3
<b>Mathematics Requirement - 16 credits</b> <sup>1</sup>		
MATH 231	Calculus and Analytic Geometry I	4
MATH 232	Calculus and Analytic Geometry II	4
MATH 233	Calculus and Analytic Geometry III	4
ELECENG 234	Analytical Methods in Engineering	4
<b>Chemistry Requirement - 5 credits</b>		
CHEM 105 or CHEM 102	General Chemistry for Engineering General Chemistry	5
<b>Physics Requirement - 10 credits</b>		
PHYSICS 209 & PHYSICS 214	Physics I (Calculus Treatment) and Lab Physics I (Calculus Treatment)	5
PHYSICS 210 & PHYSICS 215	Physics II (Calculus Treatment) and Lab Physics II (Calculus Treatment)	5
<b>Elective Requirement - 15 credits</b>		
Unrestricted (any non-required courses)		3
Non-required courses within CEAS, Math, or Physics		6
Non-required courses within MechEng at or above the 300 level		6
<b>GER Distribution Requirement - 15 credits</b>		
Arts		3
Humanities		3
Social Science		6
ENGLISH 310	Writing, Speaking, and Technoscience in the 21st Century	3
Cultural Diversity - Arts, Humanities, or Social Science course must also satisfy UWM Cultural Diversity Requirement		
Students must also satisfy Oral and Written Communication (OWC) Part A <sup>2</sup>		0-6
Students must also satisfy the UWM Foreign Language Requirement <sup>2</sup>		0-8
<b>Total Credits</b>		<b>120</b>

<sup>1</sup> MATH 221, MATH 222 and two free elective credits may substitute for MATH 231, MATH 232 and MATH 233.

<sup>2</sup> See General Education Requirements (p. 29) for details.

## Minimum Requirements

Students must maintain an average GPA of at least 2.00 on all work attempted at the University and in all courses offered by the College. Students majoring in biomedical engineering, computer engineering, computer science, industrial engineering, and materials engineering must maintain an average GPA of at least 2.00 in all 300-level and above courses in the student's major department. Students majoring in civil engineering, electrical engineering, and mechanical engineering must maintain an average GPA of at least 2.50 in all 300-level and above courses in the major department. Transferable courses will be included as appropriate. Advancement to major status is required for graduation.

In order to provide maximum flexibility while preserving the institutional identity of a UWM degree, the College requires residence:

1. during the last 30 credits, or
2. during 45 of the last 60 credits, or
3. during any 90 credits of a student's undergraduate career.

At least 15 credits of advanced work in the major must be completed in residence at UWM.

A student who does not maintain continuous registration during the academic year and is re-admitted to the College must meet the program and graduation requirements in effect at the time of re-entry.

Degree and major requirements must be completed within 10 years of initial enrollment at UW-Milwaukee. Should students not complete the major within the 10-year time frame, the students will switch to the most current degree and major requirements. A new 10-year time frame would then begin.

## Dual Majors

Students wishing to major in more than one field can do so in two ways:

1. Complete the requirements for more than one major before receiving a degree from the College. In this case, the degree will list both majors.
2. Be admitted to the College as a second degree candidate (after earning a bachelor's degree in any field), providing University and College entrance requirements are met. Such a student must meet all undergraduate degree requirements in the College and present a minimum of 30 credits beyond the previous bachelor's degree.

## Concurrent Registration at Other Institutions

CEAS students wishing to establish concurrent enrollment at another institution must obtain prior permission from their academic advisor.

## Student Academic Appeals

Students may appeal an academic action to the Office of Student Services. An appeal is a request for an exception to an established policy or rule. The content of each appeal is carefully reviewed in order to reach a decision. Appeals should be submitted in writing to the Office of Student Services. The appeals committee considers individual cases concerning the degree requirements and other academic rules and regulations established by the College of Engineering and Applied Science faculty.

The College of Engineering and Applied Science has established written procedures for undergraduate student academic grievances. Copies of the grievance procedure are available in the Office of Student Services. As a first step, students must discuss the grievance with the faculty member or administrator as soon as possible to attempt to resolve the issue, but not later than 30 days after the action that prompted the grievance/appeal.

## Computer Science and Engineering Programs

Detailed descriptions of the CEAS undergraduate programs are provided in this catalog. All courses are not offered every semester. A few technical elective courses may be offered only once every three to four semesters. In addition, since computer science and engineering curricula are continually evolving to keep current, students are encouraged to consult with their advisors to plan each semester's list of classes. Part-

time students should always maintain a plan that looks ahead two to three semesters to avoid scheduling difficulties.

The curricula outlined in the pages are applicable to new students entering CEAS in fall 2016 or later. Students who enrolled in computer science or engineering programs prior to that date should consult with the appropriate previous editions of this catalog for information about their program requirements. As a general rule, when program changes occur, continuing students have the choice of continuing in their existing program or following the new requirements. Occasionally, a program change will be required of all students regardless of their date of matriculation, so long as it does not increase the total credits needed for graduation.

These program descriptions represent the minimum requirements for graduation from UWM in computer science or engineering. In all cases, it is important that students consult with their advisor before making course selections to avoid errors in programming.

## Academic Advising

The Office of Student Services in the College of Engineering and Applied Science, located in Room E386 of the Engineering and Mathematical Sciences Building, offers undergraduate students academic advising from professional advisors who are familiar with the curriculum, College requirements, and the special needs of engineering and computer science students. These advisors provide services such as freshman orientation, course selection, program planning, and credit transfer evaluation. Students are assigned to a permanent professional advisor as soon as they are accepted into the College, and are urged to confer with their advisor at least once each semester. Students also are assigned to a faculty advisor who provides technical expertise specific to the student's area of study.

We understand that it can be a delicate balance managing school, work, family, and active social lives. The College of Engineering and Applied Science advisors are here to help you achieve that balance.

You will be assigned a professional academic advisor upon being admitted to the College of Engineering & Applied Science. Your advisor will work with you throughout your undergraduate experience, providing guidance on:

- course registration,
- graduation planning,
- career preparation,
- and serving as a liaison to the many other resources available on our campus.

Advisors are also a great source of information on student organizations, tutoring and scholarship opportunities.

In addition to professional academic advisors, you will also have access to faculty advisors. These advisors can provide insights into the technical aspects of the engineering and computer science curricula while mentoring you as you define your professional goals.

## Honors in the Major

Students in the Mechanical Engineering major who meet all the following criteria can be awarded honors in the major upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all CEAS courses counting toward the Mechanical Engineering major; and
3. At least one of the following:
  - a. Taking 15 Mechanical Engineering elective credits (MechEng 400 level or higher).
  - b. Participation in a three elective credit research (MECHENG 699) supervised by a Mechanical Engineering faculty member leading to a presentation to be defended before a three member committee.

Students who believe they may qualify for honors in Mechanical Engineering should apply to the College of Engineering & Applied Science during their last semester of study.

## College of Engineering and Applied Science Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Joint Programs with Other Campuses

### Pre-engineering

Qualified students may enroll in coordinated pre-engineering programs at UW-Green Bay, UW-Parkside, and UW-Waukesha for two years of pre-engineering coursework. These coordinated programs ensure equivalent coursework, appropriate advising, and early access to the Cooperative Education Program at UWM.

### Dual Degree Programs

Qualified students may enroll in coordinated dual degree programs at Alverno College, Carroll University, UW-Eau Claire, UW-Green Bay, UW-La Crosse, UW-Oshkosh, UW-Stevens Point, UW-Whitewater and Wisconsin Lutheran College. Students in these programs will earn a bachelor's degree at both universities in five years. Students transfer to UWM after three years at the partner university. For more information, contact the Office of Student Services at (414) 229-4667.

## Joint Programs with Wisconsin Technical Colleges

### Gateway Technical College

An agreement with GTC allows those students having associate degrees in the Electrical Engineering - Technology the opportunity to be given credit for courses required in the UWM bachelor of science in engineering program. For more information, contact the Office of Student Services at (414) 229-4667.

### Milwaukee Area Technical College

An agreement with MATC allows joint admission and enrollment at MATC and CEAS. Qualified students may take English, mathematics, chemistry, and general education courses at MATC. The program ensures equivalent coursework and appropriate advising. Students complete a bachelor of science degree in engineering or computer science at UWM.

### Waukesha County Technical College

An agreement with WCTC allows those students having associate degrees in the Industrial Occupations Division at WCTC the opportunity to be given credit for courses required in the UWM bachelor of science in engineering or bachelor of science in computer science program. For more information, contact the Office of Student Services at (414) 229-4667.

## Mechanical Engineering, Minor

The minor in mechanical engineering is designed for students in engineering, architecture, and physics. The minor is not available to mechanical engineering majors.

### Requirements

- 20 credits from Mechanical Engineering courses 301 and above.
- Minimum of 12 credits of the minor coursework must be completed at UWM.
- If a bachelor's degree was obtained at another institution, upon completion of the minor requirements the student will be awarded a Certificate of Minor.

## Mechanical Engineering, PhD

The Ph.D. in Mechanical Engineering program, focused on cutting-edge research and advanced education, serves the broad UW–Milwaukee mission for discovery, research, and education and supports the generation of new knowledge for the development and betterment of society and research collaborations with local industries.

Current research areas of strength of the Ph.D. in Mechanical Engineering include:

- Renewable Energy
- Power Storage
- Tribology
- Optics
- Robotics and Control
- Rehabilitation Engineering and Biomechanics
- Sensor Development
- Structural Health Monitoring
- Water Filtration

The Ph.D. in Mechanical Engineering requires a minimum of 66 graduate credits beyond the bachelor's degree, comprised of a minimum credit distribution of 21 credits in the major area; 9 credits in an approved minor area; 6 credits in mathematics and/or quantitative methods; 9 credits of approved electives; 3 credits of CEAS Graduate Seminar (Ethics and Engineering Communication); and 18 credits of doctoral thesis. A minimum of 26 credits, excluding dissertation, must be at the 700 level or higher. The student must also satisfy a residence requirement. Many of the courses leading toward graduate degrees in CEAS are offered in the late afternoon or evening. So, students can complete much of their coursework on a part-time basis.

Each student will develop their program of study in consultation with their major professor. The program of study will be tailored to each student based on their area of dissertation research and their prior academic background.

## Student Learning Program Outcomes

The student learning outcomes include the ability to:

1. Apply advanced knowledge of mathematics, science, and engineering to solve complex problems.
2. Use modern tools or techniques to solve complex problems, conduct research, and analyze and interpret data.
3. Demonstrate proficiency and competency in the area of specialization.
4. Identify, formulate, and solve complex problems with an original and/or significant contribution to the field.
5. Demonstrate familiarity with research in a related or complementary discipline.
6. Use quantitative methods appropriate to the field of research.
7. Understand academic, professional, and ethical responsibility.
8. Communicate effectively via technical writing and oral presentations.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these College requirements to be considered for admission to the program:

1. A bachelor's or master's degree:
  - a. Applicants holding a BS or MS degree in engineering or computer science, depending on the major area selected will generally be admitted without deficiencies.
  - b. Applicants holding BS or MS degrees from domains outside of engineering or computer science may be admitted with specific program-defined course deficiencies, provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. No course credits earned in making up deficiencies may be counted as program credits required for the degree. For the Engineering major areas, the BS or MS preparation generally must include mathematics equivalent

to ELECENG 234 or MATH 234. For the Computer Science major area, the mathematics preparation must generally include mathematics equivalent to MATH 232. Otherwise, the made-up deficiencies must be sufficient to assure the Graduate Program Subcommittee that the applicant is able to proceed with advanced work directed toward the doctoral degree.

- A minimum grade point average of 3.0 on the basis of 4.0, in the highest degree granted. An applicant with a master's degree in engineering or computer science having a GPA of less than 3.0, but at least equal to 2.75, may be admitted if substantial evidence can be submitted demonstrating that the applicant has the capacity to perform satisfactory doctoral work.
- All applicants are required to submit a brief (1 or 2 page) statement describing their professional goals and at least two letters of reference.
- The Graduate Record Examination (GRE) is required for all international and domestic applicants.
- International students require proof of English language proficiency. Complete information is available at the UWM Center for International Education (<http://www.uwm.edu/Dept/CIE/>).
- Applicants with a relevant master's degree who intend to complete an additional master's in engineering at UWM should announce their plans at the time of admission, and not later than the start of their second year into the PhD program.
- Applicants are required to submit an academic CV. The CV should list academic experience, professional work experience, research work experience, technical expertise and skills, publications (journals, conferences, posters, patents, etc.), and at least three references.

## Reapplication

A student who receives a master's degree at UWM must formally apply for admission to the Graduate School as a doctoral student before continuing studies that will be credited toward the Doctor of Philosophy in Engineering.

## Credits and Courses

The minimum degree requirement is 66 graduate credits beyond the bachelor's degree. The minimum credit distribution of coursework to be undertaken must be as follows, depending on the option selected.

Code	Title	Credits
Select 21 credits in the major area of concentration		21
Select 9 credits in an approved minor area		9
Select 6 credits in mathematics and/or quantitative methods		6
Select 9 credits of approved electives		9
<b>Select 3 credits of:</b>		<b>3</b>
MECHENG 700	CEAS Graduate Seminar	
<b>Select 18 credits of:</b>		<b>18</b>
MECHENG 998	Doctoral Thesis	
<b>Total Credits</b>		<b>66</b>

The 6-credit requirement in mathematics and/or quantitative methods may be met by satisfactorily completing certain courses specified by the GPSC or by taking the minor in mathematics. When such courses also count for either the major area or the minor area, the remaining credits may be taken as approved electives.

The department of Mechanical Engineering offers a PhD in Mechanical Engineering. The student must achieve a 3.0 GPA separately in each of

the following areas: the Mechanical Engineering major area, the minor area, and the quantitative methods area.

The minor is normally taken in one of the other major areas of the PhD in Engineering or in the physical sciences or mathematics or in business management. Consideration of any other area as a minor requires the prior approval of the thesis adviser and the chairperson of the Mechanical Engineering Department.

A minimum of 33 credits, including doctoral thesis, must be completed while enrolled at UWM in the PhD degree program. For students entering with a relevant master's degree who intend to complete a second master's and a PhD in Mechanical Engineering at UWM, a minimum of 27 credits, including doctoral thesis, must be completed while enrolled in the doctoral program.

Students entering the program without a prior applicable master's degree are limited to a total maximum transfer of 9 credits for courses taken elsewhere. Independent study courses (699 and 999) may be included in the minimum course credit requirements provided GPSC approval has been obtained prior to registration in such course. Typically no more than six credits of independent study are allowed in the PhD program. Guidelines on acceptable independent study courses are available in the CEAS Graduate Studies Office.

The GPSC or the major department may require candidates to complete certain courses as part of the requirement for the specific major or to meet the mathematics and/or quantitative methods requirement.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that the student must have a major professor to advise, supervise, and approve the program of study before registering for courses. The GPSC or its delegates will assign the incoming student to an initial Program Advisor at the time of admission. Prior to the completion of 12 credits (9 credits for part-time students), the student must select a major professor who will be the student's thesis advisor. The student, in consultation with the major professor, develops a proposed program of studies which is submitted to the Graduate Program Subcommittee for approval. For subsequent changes, the student must file a revised program of study for approval.

### Foreign Language

There is no foreign language requirement for the degree.

### Residence

The program residence requirement is satisfied either by completing 8 or more graduate credits in two consecutive semesters, exclusive of summer sessions, or by completing 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions.

### Qualifying Examination

Each student in the program must take and pass a Qualifying Examination (QE) to demonstrate that the student is qualified for doctoral-level work. The Qualifying Examination is a written open-book exam. The examination is offered twice a year during the regular academic year. The content of the examination varies among the major areas of the PhD in Engineering program.

Students entering with only a bachelor's degree or with a master's degree in an area unrelated to their major area may take the Qualifying Examination for the first time after earning 18 credits of graduate work

at UWM and must successfully pass the exam before earning 30 credits of graduate work at UWM. Students admitted to the Ph.D. program after completion of an appropriate Master's degree must take the QE by the 3<sup>rd</sup> Semester.

A student who fails the qualifying exam twice is subject to dismissal from the PhD in Engineering program. A student may appeal the failure and dismissal within 30 days of being notified of the failure. If the student does not appeal or the appeal is not granted, the College will recommend to the Graduate School that the student be dismissed. A student who is dismissed from the PhD in Engineering program because of failing the qualifying exam may not be enrolled in the PhD in Engineering program for a complete calendar year. This does not preclude the student from being enrolled in any other degree program offered by the University. A student who wishes to re-enroll in the program after a calendar year has passed must apply as any other student would, including payment of fees. A student readmitted after having failed the qualifying exam twice must take the qualifying exam in the first semester of matriculation and this will count as the student's first attempt at the exam. The student may appeal this requirement prior to the first scheduled day of classes. If the student fails the qualifying exam on this first attempt, the student is permitted the customary second attempt as described above. All appeals must be in writing and directed to the CEAS Associate Dean for Academic Affairs.

## Doctoral Program Committee

The Doctoral Program Committee is proposed by the major professor in consultation with the student and the department. The Committee must include at least five graduate faculty (three from major area, one from minor area, and one from any area, including the major and minor areas). The last member may be a person from outside the University (such as another university, a research laboratory, or a relevant industrial partner), provided that person meets Graduate School requirements. The Committee may have more than five members, provided that the majority of the Committee members are from the student's major field.

## Doctoral Preliminary Examination

The student must pass doctoral preliminary examinations (PE) within five years of initial doctoral program enrollment. The preliminary exam consists of a written component and an oral presentation.

1. **Written Component:** Accomplish **one of the two** following:
  - a. Publish preliminary research results (as a first author) in a Quartiles 1 or 2 (Q1/Q2) journal; **OR**
  - b. Prepare a manuscript in a style appropriate for technical journal/conference proceedings publication presenting preliminary work and results to date. This work is to be submitted to the three-member Preliminary Exam (PE) Committee to examine the quality/advancement of the research work.
2. **Oral Presentation:**

The student will present their research work to a three-member PE Committee as part of the preliminary examination process. The advisor will form the committee according to the Prelim Committee Guidelines. The committee will evaluate the presentation based on various criteria, including Problem Definition, Literature Review and Previous Work, Critical Analysis of Literature Review, Research Aims, Impact of the Proposed Research, Proposed Solutions, Contributions/Novelty of the proposed research, Expected Results/Deliverables, and Quality of Oral Communication. The student will receive a Pass/Fail score based on the committee's evaluation. In the event that a student fails the Preliminary Exam, they will be given another chance to revise their manuscript and presentation based on the committee's

suggestions. They must redo the manuscript and presentation by the end of the following Semester.

## Proposal Hearing

Students must complete a proposal in accordance with the graduate school guidelines that will be composed of a presentation of original research on the path to their PhD Advisor and committee members may request written components that may include technical publications or draft portions of a thesis. Students must submit the Prelim proposal draft to the PhD Program committee at least 14 days before the hearing date. Mechanical Engineering Graduate Program Committee (MEGPC) will monitor the time frame and approve the preliminary proposal hearing date.

## Dissertation and Dissertator Status

The student must carry out a creative effort in the major area under the supervision of the major professor and report the results in an acceptable dissertation. The effort of the student and the major professor to produce the dissertation is reflected in the PhD in Mechanical Engineering program requirement that the student complete at least 18 credits of doctoral thesis.

After the student has successfully completed all degree requirements except the dissertation, the student may enter Dissertator Status. Achieving Dissertator Status requires successful completion of the Proposal Hearing and prior approval of the student's advisor, the Doctoral Program Committee, and the GPSC of a dissertation proposal that outlines the scope of the project, the research method, and the goals to be achieved. Any proposal that may involve a financial commitment by the University also must be approved by the Office of the Dean. After having achieved Dissertator Status, the student must continue to register for 3 credits of doctoral thesis per semester during the academic year until the dissertation is completed.

## PhD Dissertation Review Period

Students must submit the dissertation draft to the PhD Program committee **at least 14 days before** the scheduled defense date.

## Dissertation Defense

The final examination, which is oral, consists of a defense of the dissertation project. The doctoral defense examination may only be taken after all coursework and other requirements have been completed. The student must have Dissertator Status at the time of the defense.

## Time Limit

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

For additional information see the Graduate School PhD requirements (<https://uwm.edu/graduateschool/students/academic-policies-and-procedures/doctoral-resources/doctoral-requirements/>).

# FRESHWATER SCIENCES (SCHOOL OF)

With a degree in freshwater sciences or atmospheric sciences, students can turn their passion for the environment into a fulfilling career. The School of Freshwater Sciences offers bachelor's, master's and doctoral degrees in freshwater and atmospheric sciences. These programs offer an interdisciplinary approach to training the next generation of scientists armed with the knowledge, skills, and experience to anticipate and address the environmental issues of the future.

Areas of study include:

- Freshwater Policy and Economics
- Freshwater System Dynamics
- Human and Ecosystem Health
- Freshwater Technology
- Weather and Climate

Undergraduate degree programs combine foundational coursework with multiple hands-on experiences to prepare students for the job market.

Graduate degree programs offer extensive research and internship

opportunities with faculty mentorship. Freshwater Sciences students have access to state-of-the-art labs and equipment, a genomics center, and research vessels that provide opportunities to develop skills in the latest scientific techniques. Atmospheric Sciences students meet all the requirements to be employed by the National Weather Service or another federal agency as a meteorologist.

## Programs

- Atmospheric Science, BS (p. 674)
- Atmospheric Science, Minor (p. 676)
- Atmospheric Science, MS (p. 676)
- Atmospheric Science, PhD (p. 677)
- Freshwater Sciences, BS: Aquatic Science (p. 679)
- Freshwater Sciences, BS: Water Policy (p. 681)
- Freshwater Sciences, Minor (p. 683)
- Freshwater Sciences, MS: Aquatic Science (Professional) (p. 683)
- Freshwater Sciences, MS: Aquatic Science (Thesis) (p. 685)
- Freshwater Sciences, MS: Water Policy (Professional) (p. 686)
- Freshwater Sciences, MS: Water Policy (Thesis) (p. 688)
- Freshwater Sciences, PhD (p. 689)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Carmen Aguilar	Associate Scientist	PhD	University of Wisconsin-Milwaukee		
Fred Binkowski	Senior Scientist	PhD	University of Wisconsin-Milwaukee		✓

## Atmospheric Science, BS

Atmospheric Science, of which Meteorology is a subset, is the study of short-term weather and long-term climate, involving activities such as weather forecasting, climate projections, air quality modeling, data analysis, and basic and applied research.

Through the Atmospheric Science major, students obtain a solid foundation in both weather and climate, the tools used to study them, and their consequences to people and organizations. Our major meets all guidelines for employment with the United States Government, including the National Oceanic and Atmospheric Administration and National Weather Service, as a Meteorologist.

A career in Atmospheric Science is very rewarding because of the impact weather and climate have on everyday life. You will find atmospheric scientists in many different roles: nearly 36% work in the private sector, which includes consulting firms and forecasting entities; 33% for governmental agencies such as NOAA and the NWS; 24% at educational institutions or laboratories; and 7% in the media. The strongest job prospects are currently in the private sector.

Our students have unique opportunities available to them that are not found at any other university in the state or region. Our Innovative Weather program provides students with paid internships in weather forecasting and communication, helping partners such as We Energies, Summerfest, and MMSD make decisions to protect their interests and communities against hazardous weather. Students can also become involved in undergraduate research, and several of our students have recently received national awards for their research! Our program is also home to the first-of-its-kind faculty-led study abroad program to Mexico, "Air Pollution and Ancient Cultures," which takes place each January. Finally, we have two active student-led clubs, The Climate Consensus and the Atmospheric Science Club at UWM!

## Requirements

Students must earn a minimum of 120 credits to complete the BS in Atmospheric Science degree. Students must complete at least 15 upper-division (300-level and above) credits in the major in residence at UWM, and must complete at least 30 credits in residence at UWM.

### General Education Requirements (GERs)

UW-Milwaukee has General Education Requirements (p. 30) that must be met in order to earn a bachelor's degree. Some of the requirements of your program fulfill the campus GERs. Please review the requirements and consult with your academic advisor.

## Atmospheric Science (BS) Major Requirements

### Preparatory Curriculum

Students in this major must complete MATH 231, MATH 232, and MATH 233 (or equivalents). MATH 221 and MATH 222 are equivalent to the sequence of MATH 231, MATH 232, and MATH 233. All majors must take either MATH 234 or MATH 240. Students in this major must complete preparatory work in mathematics, chemistry, physics, and computer science, as listed in the table below.

### Required Courses

The following courses are required for the atmospheric science major.

Code	Title	Credits
<b>Additional Preparatory Curriculum</b> <sup>1</sup>		
CHEM 102	General Chemistry	5
PHYSICS 209 & PHYSICS 214	Physics I (Calculus Treatment) and Lab Physics I (Calculus Treatment)	5
PHYSICS 210	Physics II (Calculus Treatment)	4
COMPSCI 202	Introductory Programming Using Python	3
<b>Core</b>		
ATM SCI 101	Preparing for a Career in Atmospheric Science	1
ATM SCI 240	Introduction to Meteorology	4
ATM SCI 250	Introduction to Climate Science	4
ATM SCI 330	Air-Pollution Meteorology	3
ATM SCI 350	Atmospheric Thermodynamics	3
ATM SCI 351	Dynamic Meteorology I	3
ATM SCI 352	Dynamic Meteorology II	3
ATM SCI 360	Synoptic Meteorology I	4
ATM SCI 361	Synoptic Meteorology II	4
ATM SCI 464	Physical Meteorology: Cloud Physics	3
ATM SCI 511	Seminar in Atmospheric Radiation and Remote Sensing	3
ATM SCI 600	Data Analytics	3
MATH 320	Introduction to Differential Equations	3
<b>Electives</b>		
Select at least 15 credits of the following:		15
ATM SCI 460	Mesoscale Circulations	
ATM SCI 470	Tropical Meteorology	
ATM SCI 480	The General Circulation and Climate Dynamics	
ATM SCI 497	Study Abroad:	
ATM SCI 500	Statistical Methods in Atmospheric Sciences	
ATM SCI 505	Micrometeorology	
ATM SCI 690	Seminar in Atmospheric Sciences:	
ATM SCI 695	Internship in Atmospheric Sciences, Upper Division	

CES 210	Introduction to Conservation and Environmental Science
CES 515	Environmental Law for Natural Resource Managers
CIV ENG 311	Introduction to Energy, Environment and Sustainability
CIV ENG 412	Applied Hydrology
ECON 328	Environmental Economics
ECON 525	The Economics of Water
FRSHWTR 391	Water and Natural Resource Economics
FRSHWTR 392	Water, Energy, Food, and Climate

Total Credits

73

<sup>1</sup> These courses are required, but do not count in calculating the major GPA.

## Honors in the Major

Students in Atmospheric Sciences who meet all of the following criteria can be awarded honors in the major upon graduation:

1. A 3.000 cumulative GPA in all UWM graded credits;
2. A 3.500 GPA over all UWM courses counting toward the Atmospheric Sciences major;
3. A 3.500 GPA over all upper-division UWM courses counting toward the Atmospheric Sciences major; and
4. Successful completion of at least two semesters of research and/or internship experiences. The research and internship experiences can include one or more of a directed independent study for credit (ATM SCI 699), an internship for credit (ATM SCI 695), the Atmospheric Sciences Study Abroad course (ATM SCI 497), undergraduate research for compensation, and participation in the Innovative Weather program as a paid staff member.

Students who believe they may qualify for honors in Atmospheric Sciences should apply to the School of Freshwater Sciences during their last semester of study.

## School of Freshwater Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Atmospheric Science, Minor

Atmospheric Science, of which Meteorology is a subset, is the study of short-term weather and long-term climate, involving activities such as weather forecasting, climate projections, air quality modeling, data analysis, and basic and applied research.

Through the Atmospheric Science minor, students obtain a solid foundation in both weather and climate, the tools used to study them, and their consequences to people and organizations. The Atmospheric Science minor is a great option for students pursuing environmental- and/or data-science-focused majors who would like to learn more about weather and climate to improve their job prospects and/or pursue an Atmospheric Science graduate degree.

### Requirements

Students must complete at least 9 upper-division (numbered 300 and above) credits in the minor in residence at UWM, and students must attain at least a 2.0 GPA on all credits in the minor attempted at UWM. In addition, students must attain a 2.0 GPA on all minor credits attempted, including any transfer work.

The minor consists of a minimum of 18 credits in atmospheric science, as follows.

Code	Title	Credits
ATM SCI 240	Introduction to Meteorology	4
Select 14 additional Atm Sci credits, at least 9 of which are at the 300 level or above		14
<b>Total Credits</b>		<b>18</b>

## Atmospheric Science, MS

Atmospheric Science faculty and graduate students engage in a wide range of atmospheric research, with specializations that include climate variability, numerical modeling, atmospheric dynamics, mesoscale and synoptic meteorology, air-pollution meteorology, and data analytics. Our program is an excellent place for graduate study because of our research excellence, close collaboration between faculty and students, friendly environment, and open-door policy for questions.

The Atmospheric Science M.S. program is a thesis-based program that is designed to prepare students for employment in weather, climate, or data-driven fields, or for continued study in pursuit of the Ph.D. The M.S. program typically requires two years to complete for students entering with a B.S. in Atmospheric Science or a related discipline. Students are typically supported as either Research or Teaching Assistantships.

Though it can be intimidating to do so, we highly encourage all prospective graduate students to reach out to the faculty members who do research in the areas of greatest interest to you. This does not have to be very formal: an e-mail that introduces yourself and lets us know that you are interested in learning more about our graduate programs is a great starting point! Reaching out helps you get more information about

our program, learn more about potential research opportunities, start to determine if one of us would be a good fit for you as a mentor, and ask any questions about the application process that you might have.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements plus these departmental requirements to be considered for admission to the program:

- A general background in both physics and mathematics, including calculus and ordinary differential equations. Students who lack this background may be admitted if the deficiencies amount to no more than two courses. Deficiencies must be made up within the first three enrolled semesters of graduate study.
- Submission of a Reason Statement. Statements are used to determine the appropriateness of your educational and professional goals and serves as an example of your ability to express yourself in writing. Your reason statement should include:

1. your reasons for pursuing graduate study
2. your specific background interests and background in the field
3. any relevant skills or training you've acquired
4. any academic awards or honors you have received
5. the name(s) of faculty members with whom your research interests most closely align

### Optional

Submission of scores on the Graduate Record Examination (GRE) (<http://uwm.edu/graduateschool/admission/#gre>).

## Credits and Courses

Students enrolled in the MS in Atmospheric Science degree program must complete a total of thirty (30) credits.

Code	Title	Credits
Select 9 credits at the ATM SCI or FRSHWTR 700-level or greater		9
Select 6 credits in approved graduate elective courses		6
Select one of the following:		6
MATH 703 & MATH 704	Advanced Engineering Mathematics I and Advanced Engineering Mathematics II	
ATM SCI 500 & ATM SCI 700	Statistical Methods in Atmospheric Sciences and Statistical Methods in Atmospheric Sciences II: Signal Detection	
Complete 9 thesis credits:		9
ATM SCI 990	Master's Thesis	
<b>Total Credits</b>		<b>30</b>

Students receiving financial support from the School of Freshwater Sciences must enroll in a minimum of fifteen (15) credits offered by the department during each academic year.

Courses in Atmospheric Science that may be taken for graduate credit are listed below.

Code	Title	Credits
ATM SCI 330	Air-Pollution Meteorology	3
ATM SCI 350	Atmospheric Thermodynamics	3
ATM SCI 351	Dynamic Meteorology I	3
ATM SCI 352	Dynamic Meteorology II	3
ATM SCI 360	Synoptic Meteorology I	4
ATM SCI 361	Synoptic Meteorology II	4
ATM SCI 460	Mesoscale Circulations	3
ATM SCI 464	Physical Meteorology: Cloud Physics	3
ATM SCI 470	Tropical Meteorology	3
ATM SCI 480	The General Circulation and Climate Dynamics	3
ATM SCI 497	Study Abroad: (subtitled)	3
ATM SCI 500	Statistical Methods in Atmospheric Sciences	3
ATM SCI 505	Micrometeorology	3
ATM SCI 511	Seminar in Atmospheric Radiation and Remote Sensing	3
ATM SCI 600	Data Analytics	3
ATM SCI 690	Seminar in Atmospheric Sciences:	3
ATM SCI 700	Statistical Methods in Atmospheric Sciences II: Signal Detection	3
ATM SCI 705	Air Pollution Modeling	3
ATM SCI 711	Cloud Dynamics	3
ATM SCI 730	Numerical Weather Prediction	3
ATM SCI 750	Nonlinear Time Series Analysis	3
ATM SCI 761	Advanced Synoptic/Mesoscale Meteorology	3
ATM SCI 950	Seminar on Topics in Atmospheric Sciences:	3
ATM SCI 990	Master's Thesis	1-8
ATM SCI 997	Doctoral Externship	1-12
ATM SCI 998	Doctoral Dissertation	1-12
ATM SCI 999	Advanced Independent Reading	1-4

## Additional Requirements

### Major Professor as Advisor

The student must have a major professor to advise and supervise the student's studies as specified in Graduate School regulations.

### Thesis

Prior to graduation, students, under the direction of a major professor and supervision of a three-member evaluation committee comprised of Atmospheric Science graduate faculty, must complete and orally defend an acceptable thesis. An acceptable thesis is defined as one representing an original contribution in the atmospheric science of sufficient caliber for publication in a peer-reviewed journal.

## Time Limit

Entering full-time students without deficiencies are expected to complete all degree requirements within two years of first enrollment. All degree requirements must be completed within five years of first enrollment.

## Contact Information

### Atmospheric Science

School of Freshwater Sciences  
600 E Greenfield Avenue

## Atmospheric Science, PhD

Atmospheric Science faculty and graduate students engage in a wide range of atmospheric research, with specializations that include climate variability, numerical modeling, atmospheric dynamics, mesoscale and synoptic meteorology, air-pollution meteorology, and data analytics. Our program is an excellent place for graduate study because of our research excellence, close collaboration between faculty and students, friendly environment, and open-door policy for questions.

The Atmospheric Science Ph.D. program is designed to equip students with the ability to conduct independent, cutting-edge research that advances our understanding of weather and climate. Students become adept at applying existing and developing novel theory and methods to generate this knowledge. They gain broad knowledge of fundamental tenets of the atmospheric sciences and advanced knowledge within their chosen research specialization. The Ph.D. program typically requires 3-4 years to complete for students entering with an M.S. in Atmospheric Science or a related discipline. Students are typically supported as either Research or Teaching Assistantships.

Though it can be intimidating to do so, we highly encourage all prospective graduate students to reach out to the faculty members who do research in the areas of greatest interest to you. This does not have to be very formal: an e-mail that introduces yourself and lets us know that you are interested in learning more about our graduate programs is a great starting point! Reaching out helps you get more information about our program, learn more about potential research opportunities, start to determine if one of us would be a good fit for you as a mentor, and ask any questions about the application process that you might have.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Students seeking admission to the PhD in Atmospheric Science degree program must meet all UWM Graduate School requirements. An earned Master of Science degree is not a prerequisite for admission; however, it is expected that most applicants will have an earned master of science degree in atmospheric science or a closely-related discipline.

Entering students without an earned master of science degree should have a general background in both physics and mathematics, including

calculus and ordinary differential equations. Students who lack this background may be admitted if the deficiencies amount to no more than two courses, and deficiencies must be made up within three enrolled semesters of graduate study.

Applicants are required to submit a Reason Statement. Statements are used to determine the appropriateness of your educational and professional goals and serves as an example of your ability to express yourself in writing. Your reason statement should include:

1. your reasons for pursuing graduate study
2. your specific background interests and background in the field
3. any relevant skills or training you've acquired
4. any academic awards or honors you have received
5. the name(s) of faculty members with whom your research interests most closely align

### Optional

Submission of scores on the Graduate Record Examination (GRE) (<http://uwm.edu/graduateschool/admission/#gre>).

## Credits and Courses

Students enrolled in the PhD in Atmospheric Science program must complete a total of fifty-four (54) graduate credits beyond the bachelor's degree with at least twenty-one (21) earned in residence at UWM.

Students receiving financial support from the School of Freshwater Sciences must enroll in a minimum of fifteen (15) credits offered by the School during each academic year. As part of their 54 credits, students admitted directly to the PhD program without an earned Master of Science in Atmospheric Science must complete the following twenty-one (21) credits:

Code	Title	Credits
Select 9 credits at or above the ATM SCI or FRSHWTR 700-level		9
Select 6 credits in approved graduate elective courses		6
Select one of the following:		6
MATH 703 & MATH 704	Advanced Engineering Mathematics I and Advanced Engineering Mathematics II	
ATM SCI 500 & ATM SCI 700	Statistical Methods in Atmospheric Sciences and Statistical Methods in Atmospheric Sciences II: Signal Detection	
<b>Total Credits</b>		<b>21</b>

Students admitted to the PhD program with an earned Master of Science in Atmospheric Science from UWM or elsewhere have fulfilled these requirements. In consultation with their major professor, students are expected to identify additional graduate courses that benefit their research or professional development. It is expected that most students will elect to supplement their formal Atmospheric Science coursework with formal coursework from other curricular areas. With the approval of the student's major professor, any graduate-level course at UWM may fulfill degree requirements. Assuming an earned MS degree, a typical PhD student's curriculum will consist of twelve credits of formal graduate coursework, at least half of which will be completed at the 700-level or above; three credits of ATM SCI 999; and nine to twelve credits of ATM SCI 998.

Code	Title	Credits
	Master's degree/pre-doctoral coursework	30
	Formal graduate coursework, at least half of which will be completed at the 700-level or above	12
	Additional approved courses, including 9-12 credits of ATM SCI 998	12
<b>Total Credits</b>		<b>54</b>

Courses in Atmospheric Science that may be taken for graduate credit are listed below.

Code	Title	Credits
ATM SCI 330	Air-Pollution Meteorology	3
ATM SCI 350	Atmospheric Thermodynamics	3
ATM SCI 351	Dynamic Meteorology I	3
ATM SCI 352	Dynamic Meteorology II	3
ATM SCI 360	Synoptic Meteorology I	4
ATM SCI 361	Synoptic Meteorology II	4
ATM SCI 460	Mesoscale Circulations	3
ATM SCI 464	Physical Meteorology: Cloud Physics	3
ATM SCI 470	Tropical Meteorology	3
ATM SCI 480	The General Circulation and Climate Dynamics	3
ATM SCI 497	Study Abroad: (subtitled)	3
ATM SCI 500	Statistical Methods in Atmospheric Sciences	3
ATM SCI 505	Micrometeorology	3
ATM SCI 511	Seminar in Atmospheric Radiation and Remote Sensing	3
ATM SCI 600	Data Analytics	3
ATM SCI 690	Seminar in Atmospheric Sciences:	3
ATM SCI 700	Statistical Methods in Atmospheric Sciences II: Signal Detection	3
ATM SCI 705	Air Pollution Modeling	3
ATM SCI 711	Cloud Dynamics	3
ATM SCI 730	Numerical Weather Prediction	3
ATM SCI 750	Nonlinear Time Series Analysis	3
ATM SCI 761	Advanced Synoptic/Mesoscale Meteorology	3
ATM SCI 950	Seminar on Topics in Atmospheric Sciences:	3
ATM SCI 990	Master's Thesis	1-8
ATM SCI 997	Doctoral Externship	1-12
ATM SCI 998	Doctoral Dissertation	1-12
ATM SCI 999	Advanced Independent Reading	1-4

## Additional Requirements

### Major Professor as Advisor

The student must have a major professor to advise and supervise the student's studies as specified in Graduate School regulations.

### Preliminary Examination

To qualify for dissertator status, students must successfully pass a preliminary examination in Atmospheric Science, focusing on three sub-disciplines of the field, and complete a dissertation proposal

hearing. With approval of their major professor, students may elect to substitute an area of mathematics for one of the three Atmospheric Science sub-disciplines on the preliminary examination. The preliminary examination must be attempted prior to the start of the third year of study, and students who fail the examination are permitted one retake. The preliminary examination and dissertation proposal hearing must both be completed no later than the end of the fourth year of study.

## Dissertation

To receive the degree, students, under the direction of a major professor and supervision of a five-member evaluation committee, must complete and successfully defend a dissertation representing an original contribution to the field of sufficient caliber for publication in a peer-reviewed journal. The evaluation committee is to be comprised of four Atmospheric Science graduate faculty members and one member external to the program.

## Time Limit

Entering full-time students with an earned Master of Science degree are expected to complete all degree requirements within three to four years of first enrollment. Entering full-time students without an earned Master of Science degree are expected to complete all degree requirements within five to six years of first enrollment. All degree requirements must be completed within ten years of first enrollment, consistent with UWM's campus-wide policy.

# Freshwater Sciences, BS: Aquatic Science

Freshwater scientists provide scientifically sound management of natural and constructed water systems for productive and equitable use while sustaining natural biota, diversity and freshwater availability. They also generate solutions to the problems facing freshwater through a complete understanding of water resources, the social systems in which they operate, and the application of technology, conservation, and sustainable management practices. Students take a broad curriculum within Freshwater Sciences and choose from the Water Policy or Aquatic Sciences track. Both tracks combine core classes in natural sciences, mathematics, economics and computer science with additional coursework in areas such as sustainability and environmental law.

Studies in Freshwater Sciences will help students prepare for careers in ecological and environmental sciences, natural resources, technology, and policy relevant to freshwater systems and resources. A degree in Freshwater Sciences also prepares students for professional careers in business and industry, government, non-profit organizations, as well as graduate studies in freshwater and environmental sciences.

## Requirements

Students must earn a minimum of 120 credits to complete the BS in Freshwater Sciences degree. Students in this program must complete at least 30 credits in residence at UWM and must maintain an average of at

least 2.00 in all 300-level and above courses in the freshwater sciences major.

## General Education Requirements (GERs)

UW-Milwaukee has General Education Requirements (p. 30) that must be met in order to earn a bachelor's degree. Some of the requirements of your program, including Foundation Courses, fulfill the campus GERs. Please review the requirements and consult with your academic advisor.

## Foundation Courses

### Electives

With the help of their academic advisor, students will select electives to complete the 120 total credits required for the degree. Electives are tailored to each student's interests and career goals. Students may choose a related area of specialization outside of the Freshwater Sciences by completing any minor or interdisciplinary certificate offered by UWM, typically comprised of 18-22 credits. In some cases, students may choose to study two related areas, or they may complement a certificate or minor with other courses of interest.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## School of Freshwater Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

Select one of the following:		3-4
FRSHWTR 464	Chemical Hydrogeology	
GEO SCI 400	Water Quality	
GEO SCI 562	Environmental Surface Hydrology	
FRSHWTR 660 or FRSHWTR 662	Professional and Capstone Planning Thesis Research Planning and Proposal Development	1
FRSHWTR 661 or FRSHWTR 663	Undergraduate Capstone Undergraduate Research and Thesis	3
GEOG 215	Introduction to Geographic Information Science	3
<b>Total Credits</b>		<b>30-31</b>

## Water Policy Track Requirements

Code	Title	Credits
<b>Required Courses</b>		
FRSHWTR 393	Water Law, Policy, and the Environment	3
<b>Electives</b>		
Choose at least 9 credits from the following list, including at least 3 FRSHWTR credits:		9
FRSHWTR 300	Topics in Freshwater Sciences:	
FRSHWTR 461	Politics and Policy of Sustainability	
FRSHWTR 510	Economics, Policy and Management of Water	
FRSHWTR 583	Cost-Benefit Analysis for Environmental Resource Decisions	
FRSHWTR 584	Aquatic Ecosystem Services Valuation	
FRSHWTR 585	Applied Water Statistics and Data Manipulation	
POL SCI 216	Environmental Politics	
ATM SCI 600	Data Analytics	
GEOG 525	Geographic Information Science	
GEOG 625	Intermediate Geographic Information Science	
ECON 210	Economic Statistics	
ECON 301	Intermediate Microeconomics	
ECON 310	Research Methods for Economics	
HIST 432	North American Environmental History	
<b>Total Credits</b>		<b>12</b>

### Electives

With the help of their academic advisor, students will select electives to complete the 120 total credits required for the degree. Electives are tailored to each student's interests and career goals. Students may choose a related area of specialization outside of the Freshwater Sciences by completing any minor or interdisciplinary certificate offered by UWM, typically comprised of 18-22 credits. In some cases, students may choose to study two related areas, or they may complement a certificate or minor with other courses of interest.

## Water Policy Example Pathway

Year 1		Credits
Semester 1		
FRSHWTR 120	Preparing for a Career in Freshwater Sciences	1
CHEM 100	Chemical Science	4

MATH 105	Introduction to College Algebra (QLA)	3
ENGLISH 101	Introduction to College Writing	3
Humanities GER		3
<b>Credits</b>		<b>14</b>
<b>Semester 2</b>

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## School of Freshwater Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Contact Information

**Freshwater Sciences**  
 School of Freshwater Sciences

 Milwaukee, WI 53204

<https://uwm.edu/freshwater/academics/freshwater-sciences/>

## Freshwater Sciences, Minor

Freshwater scientists provide scientifically sound management of natural and constructed water systems for productive and equitable use while sustaining natural biota, diversity and freshwater availability. They also generate solutions to the problems facing freshwater through a complete understanding of water resources, the social systems in which they operate, and the application of technology, conservation, and sustainable management practices.

Studies in Freshwater Sciences will help students prepare for careers in ecological and environmental sciences, natural resources, technology, policy, and business relevant to freshwater systems and resources. A minor in Freshwater Sciences also prepares students for professional careers in business and industry, government, non-profit organizations, as well as graduate studies in freshwater and environmental sciences.

## Requirements

At least 12 credits must be taken from courses listed 300 or above in residence at UWM. Students must maintain a GPA of 2.0 in minor courses attempted at UWM. In addition, students must attain a GPA of 2.0 in all minor courses attempted, including all transfer work. The minor consists of 18 credits in Freshwater Sciences.

Code	Title	Credits
Complete 6 credits from the following list:		6
FRSHWTR 101	Elements of Water	
FRSHWTR 201	The Water Environment	
FRSHWTR 202	Life in Water	
FRSHWTR 392	Water, Energy, Food, and Climate	
Choose 12 credits from the following electives:		12
FRSHWTR 300	Topics in Freshwater Sciences:	
FRSHWTR 321	Exploration of Inland Seas	
FRSHWTR 322	Ecology and Evolution of Freshwater Organisms	
FRSHWTR 341	Sanitation and Sustainability	
FRSHWTR 342	Water Pollution, Technology and Management	
FRSHWTR 361	Introduction to Environmental Data Systems	
FRSHWTR 362	Calculating Nature	
FRSHWTR 391	Water and Natural Resource Economics	
FRSHWTR 393	Water Law, Policy, and the Environment	
FRSHWTR 421	Molecular Level Tools to Understand Larger Scale Change	
FRSHWTR 461	Politics and Policy of Sustainability	
FRSHWTR 471	Introduction to Sensing Networks	
FRSHWTR 510	Economics, Policy and Management of Water	
FRSHWTR 583	Cost-Benefit Analysis for Environmental Resource Decisions	
FRSHWTR 584	Aquatic Ecosystem Services Valuation	
FRSHWTR 585	Applied Water Statistics and Data Manipulation	
<b>Total Credits</b>		<b>18</b>

## Freshwater Sciences, MS: Aquatic Science (Professional)

The School of Freshwater Sciences offers a graduate program of studies providing students with advanced training and education in four areas:

- Freshwater Policy and Economics
- Freshwater System Dynamics
- Human and Ecosystem Health
- Freshwater Technology

Each of these focus areas is interrelated with the others, and includes biologic, physical, technologic and policy aspects of freshwater.

The Master of Science program has two tracks designed to provide a strong foundation necessary for the training of graduates that will utilize novel approaches to the sustainable and equitable use and management

of freshwater systems worldwide. The Doctor of Philosophy program is a research degree designed to explore and discover novel approaches to the sustainable and equitable use and management of freshwater systems worldwide. These programs will create an interdisciplinary atmosphere for training the next generation of scientists armed with the knowledge, skills and experience to anticipate and address the freshwater issues of the future.

Timely application is encouraged for students seeking financial support. When applying for admission, applicants should describe as completely as possible their specific research interests within freshwater sciences. Applicants are strongly encouraged to establish contact, before or during the application process, with Freshwater Sciences faculty members whose research interests are closest to their own, regarding the likelihood of one serving as the student's major professor.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### MS Aquatic Science (Professional) Admission Requirements

#### Prerequisite Coursework

The following prerequisites are strongly recommended:

1. At least one semester coursework in three of the following at the college level: chemistry, biological sciences, physics, and calculus.
2. One additional semester of chemistry, biological sciences, or physics.

Admission will be considered based upon the applicant's academic and/or professional background, proposed course of study, and possible additional coursework once in the degree program, should important preparatory gaps be identified.

#### Other Admission Requirements

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these departmental requirements to be considered for admission to the program:

- A bachelor's degree in biology, chemistry, economics, geosciences, mathematics, physics, public policy, or other appropriate natural science, social science or engineering discipline.
- A minimum GPA of 3.0.
- Three letters of recommendation from persons familiar with the applicant's scholarship and/or research potential.
- Submission of a Reason Statement. Statements are used to determine the appropriateness of your educational and professional goals and serves as an example of your ability to express yourself in writing. Your reason statement should include:
  1. your reasons for pursuing graduate study
  2. your specific background interests and background in the field
  3. any relevant skills or training you've acquired
  4. any academic awards or honors you have received

5. the name(s) of faculty members with whom your research interests most closely align

## Credits and Courses

### MS Aquatic Science (Professional)

The minimum degree requirement for the MS Aquatic Science (Professional) track is 32 graduate credits.

Code	Title	Credits
<b>Required</b>		
FRSHWTR 502G	Aquatic Ecosystem Dynamics	3
FRSHWTR 504G	Quantitative Freshwater Analysis	3
FRSHWTR 513G	Field Experimentation and Analysis in Freshwater Sciences	3
FRSHWTR 514G	Analytical Techniques in Freshwater Sciences	3
FRSHWTR 810	Professional Development for Water Leaders	3
FRSHWTR 890	Science Communication	3
FRSHWTR 900	Colloquium in Freshwater Sciences	1
Select one of the following:		3
ATM SCI 500G	Statistical Methods in Atmospheric Sciences	
FRSHWTR 471G	Introduction to Sensing Networks	
FRSHWTR 506G	Environmental Health of Freshwater Ecosystems	
FRSHWTR 510G	Economics, Policy and Management of Water	
FRSHWTR 585G	Applied Water Statistics and Data Manipulation	
<b>Electives</b>		
Select 9 credits in consultation with the students major advisor		9
<b>Graduate Internship</b>		
FRSHWTR 980	Graduate Internship	1
<b>Total Credits</b>		<b>32</b>

## Additional Requirements

### Major Professor as Advisor

Upon admission to the program, each student in the professional track will be assigned an initial advisor based on their background. The initial advisor will provide counseling to the students and help to identify goals and objectives of their graduate education. Students should identify their permanent advisor during the first semester in the program. The advisor will oversee the student's internship.

A plan of study is required and planned by the student in consultation with their advisor and the internship coordinators of the program. The plan of study identifies the planned courses and timeline for completion of the degree coursework and internship.

### Internship

All students in the professional science track are required to participate in an internship research experience, generally between the first and second years of the program. Internship experiences focus on complex regional, national, and global water problems and often involve authentic, practical problems in the field. The program coordinators provide resources and internship opportunities with industry, government, and non-profit

organizations. It is the responsibility of the student and advisor to identify the internship and the direct supervisor within a specific organization and submit a proposal that identifies goals and objectives of the internship. Proposals will be reviewed and approved by the advisor. Alternatively, a group project may occur in lieu of an internship and should provide students with training and experience in performing professional-level work that involves managing group dynamics and applying technical expertise to solve complex, multidisciplinary water-related problems.

### Time Limit

The student must complete all degree requirements within seven years of initial enrollment.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

Select 9 credits in consultation with the students major advisor		9
<b>Master's Research and Thesis Credits</b>		
FRSHWTR 985	Master's Research and Thesis (Up to 6 credits)	6
<b>Total Credits</b>		<b>31</b>

## Additional Requirements

### Major Professor as Advisor

Students in the thesis track must be accepted by a faculty member who will serve as the initial major professor, and be primarily responsible for matriculation. Acceptance or agreement by a faculty member does not constitute formal acceptance into the School of Freshwater Sciences. Prospective thesis-track students are strongly encouraged to communicate with the prospective major professors early in the admission process. A plan of study is required that identifies the planned courses and timeline for completion of the degree. For the thesis track, this includes coursework and proposed research and is planned by the student in consultation with the major professor and must be approved by the Thesis Advisory Committee.

### Thesis Advisory Committee

The membership of the Thesis Advisory Committee should be established by the end of the student's first semester. The Committee must consist of three members including the M.S. student's advisor as chair (or co-advisors as co-chairs who are graduate faculty members from the School of Freshwater Sciences) and at least two additional members, one of whom must come from outside the student's research focus. Consideration will be given to the inclusion of one external, non-UWM member of the committee. If included as part of the committee, this person would participate in the thesis defense examination. The Committee must meet at least once a year to monitor the student's academic and research progress.

### Proposal Defense and Preliminary Oral Examination

The student must complete a formal oral defense of their written thesis proposal. This defense should be made before the end the third semester and will also serve as the preliminary oral examination. The Thesis Committee decides by simple majority whether the student passes, fails, or must repeat the examination or defense. At the discretion of the Committee, a student who fails the defense or examination may be allowed one additional attempt at successful completion.

### Thesis

The thesis is conducted with oversight from the student's Advisory Committee. The thesis research is expected to be of a caliber sufficient for publication in a peer-reviewed journal. Satisfactory completion of the

thesis, including successful defense, is required for graduation. Up to six credits may be awarded for thesis research.

Please see the Graduate School thesis and dissertation formatting requirements (<https://uwm.edu/graduateschool/gradresources/thesis-and-dissertation-formatting/>) for further information.

### Thesis Defense

The thesis defense is a public presentation of the thesis research followed by an oral defense administered by the Advisory Committee.

### Time Limit

All degree requirements must be completed within five years of initial enrollment.

For the thesis track, this includes coursework and proposed research and is planned by the student in consultation with the major professor and must be approved by the Thesis Advisory Committee.

### Thesis Advisory Committee

The membership of the Thesis Advisory Committee should be established by the end of the student's first semester. The Committee must consist of three members including the M.S. student's advisor as chair (or co-advisors as co-chairs who are graduate faculty members from the School of Freshwater Sciences) and at least two additional members, one of whom must come from outside the student's research focus. Consideration will be given to the inclusion of one external, non-UWM member of the committee. If included as part of the committee, this person would participate in the thesis defense examination. The Committee must meet at least once a year to monitor the student's academic and research progress.

### Proposal Defense and Preliminary Oral Examination

The student must complete a formal oral defense of their written thesis proposal. This defense should be made before the end the third semester and will also serve as the preliminary oral examination. The Thesis Committee decides by simple majority whether the student passes, fails, or must repeat the examination or defense. At the discretion of the Committee, a student who fails the defense or examination may be allowed one additional attempt at successful completion.

### Thesis

The thesis is conducted with oversight from the student's Advisory Committee. The thesis research is expected to be of a caliber sufficient for publication in a peer-reviewed journal. Satisfactory completion of the thesis, including successful defense, is required for graduation. Up to six credits may be awarded for thesis research.

Please see the Graduate School thesis and dissertation formatting requirements (<https://uwm.edu/graduateschool/gradresources/thesis-and-dissertation-formatting/>) for further information.

### Thesis Defense

The thesis defense is a public presentation of the thesis research followed by an oral defense administered by the Advisory Committee.

### Time Limit

All degree requirements must be completed within five years of initial enrollment.

## Contact Information

### Freshwater Sciences

School of Freshwater Sciences  
600 E Greenfield Avenue  
Milwaukee, WI 53204

<https://uwm.edu/freshwater/academics/ms-freshwater-sciences-technology-thesis-water-policy/>

## Freshwater Sciences, PhD

The School of Freshwater Sciences offers a graduate program of studies providing students with advanced training and education in four areas:

- Freshwater Policy and Economics
- Freshwater System Dynamics
- Human and Ecosystem Health
- Freshwater Technology

Each of these focus areas is interrelated with the others, and includes biologic, physical, technologic and policy aspects of freshwater.

The Master of Science program has two tracks designed to provide a strong foundation necessary for the training of graduates that will utilize novel approaches to the sustainable and equitable use and management of freshwater systems worldwide. The Doctor of Philosophy program is a research degree designed to explore and discover novel approaches to the sustainable and equitable use and management of freshwater systems worldwide. These programs will create an interdisciplinary atmosphere for training the next generation of scientists armed with the knowledge, skills and experience to anticipate and address the freshwater issues of the future.

Timely application is encouraged for students seeking financial support. When applying for admission, applicants should describe as completely as possible their specific research interests within freshwater sciences. Applicants are strongly encouraged to establish contact, before or during the application process, with Freshwater Sciences faculty members whose research interests are closest to their own, regarding the likelihood of one serving as the student's major professor.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

#### Prerequisite Coursework

The following prerequisites are strongly recommended:

1. At least one semester coursework in three of the following four areas: chemistry, biological sciences, physics, and calculus.
2. One additional semester of chemistry, biological sciences, or physics.

Admission will be considered based upon the applicant's academic and/or professional background, proposed course of study, and possible additional coursework once in the degree program, should important preparatory gaps be identified.

## Other Requirements

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus the following program requirements to be considered for admission:

- A degree in biology, chemistry, economics, geosciences, mathematics, physics, public policy or other appropriate natural science, social science or engineering discipline.
- An undergraduate GPA of at least 3.0 (4.0 basis).
- Submission of scores on the General Test of the Graduate Record Examination (<http://uwm.edu/graduateschool/admission/#gre>).
- Three letters of recommendation from persons familiar with the applicant's scholarship, research achievements and potential.
- Submission of a Reason Statement. Statements are used to determine the appropriateness of your educational and professional goals and serves as an example of your ability to express yourself in writing. Your reason statement should include:

1. your reasons for pursuing graduate study
2. your specific background interests and background in the field
3. any relevant skills or training you've acquired
4. any academic awards or honors you have received
5. the name(s) of faculty members with whom your research interests most closely align

A master's degree is not a prerequisite for admission to the PhD program.

Students in the PhD program must be accepted by a faculty member who will serve as the major professor, and be primarily responsible for matriculation. Acceptance or agreement by a faculty member does not constitute formal acceptance into the School of Freshwater Sciences. Applicants are strongly encouraged to communicate with prospective major professors early in the admission process.

## Reapplication

A student in the MS program, or who receives the master's degree at UWM, must formally reapply for admission to the Graduate School before continuing studies toward the PhD.

## Credits and Courses

Students must earn 54 credits beyond the bachelor's degree, of which 24 credits may be taken from formal coursework completed as part of a master's degree. A minimum of 27 credits must be earned in residence at UWM. Students may take up to a maximum of 6 credits of independent study counting toward the degree.

Code	Title	Credits
<b>Required</b>		
FRSHWTR 585G	Applied Water Statistics and Data Manipulation	3
FRSHWTR 890	Science Communication	3
FRSHWTR 900	Colloquium in Freshwater Sciences (taken twice, 1 credit each)	2
<b>Select one of the following:</b>		<b>3</b>
FRSHWTR 502G	Aquatic Ecosystem Dynamics	
FRSHWTR 504G	Quantitative Freshwater Analysis	

FRSHWTR 506G	Environmental Health of Freshwater Ecosystems	
FRSHWTR 510G	Economics, Policy and Management of Water	
<b>Electives</b>		<b>15</b>
Select 15 credits in consultation with the students major professor		
<b>Research, Dissertation, Independent Study, or Remaining Electives<sup>1</sup></b>		<b>28</b>
FRSHWTR 990	Doctoral Research and Dissertation	
FRSHWTR 999	Independent Study	
<b>Total Credits</b>		<b>54</b>

<sup>1</sup> Electives may be selected in consultation with the student's major professor.

A Program of Study, including coursework and proposed research, is planned by the student in consultation with the major professor, and must be approved by the Committee. A student must present an annual progress report and an updated plan of study to their Doctoral Advisory Committee. For students entering with advanced degrees, some of the coursework may already be completed. Requests for counting previously taken courses toward the degree requirements will be evaluated on a case-by-case basis. A minimal grade point average of 3.00 must be earned in coursework, not including research or seminars.

## Additional Requirements

### Residence

The student must meet Graduate School residence requirements (<https://uwm.edu/graduateschool/students/academic-policies-and-procedures/doctoral-resources/doctoral-requirements/>).

### Major Professor as Advisor

The student must have a major professor to advise and supervise the student's studies as specified in Graduate School regulations. Appointment of a major professor will be based on compatibility between a student's preferred research area or area of specialization and a professor's area of specialization.

### PhD Advisory Committee

The membership of the PhD Advisory Committee will be established by the end of the student's first year. PhD committees must have at least four members, including the major professor. At least three of the committee members must be UWM graduate faculty, at least two of which are from the School of Freshwater Sciences. The committee must have at least one external member that possesses the appropriate expertise and is approved by the Academic Program and Curriculum Committee of the School of Freshwater Sciences. Dissertators are allowed a maximum of six committee members for the defense. The Committee must meet at least once a year to monitor and formally report to the faculty on the student's academic and research progress.

### Doctoral Preliminary Examination

The preliminary examination must be passed by the end of the second year for the student to continue in the program. Extensions of this deadline must be approved by the PhD Advisory Committee. The examination is in two parts: written and oral. The content of the examination is determined in advance by the student's Advisory Committee, and will include subject matter that is broadly related to the

area of research that the student will specialize in, as well as content related to the core courses. The Doctoral Committee decides by simple majority whether the student passes, fails, or must retake part or all of the examination. At the discretion of the Committee, a student who fails the examination may be allowed one additional attempt of all or part of the examination. After successful completion of the preliminary examination, the student concentrates on the development and execution of original research.

## **Dissertation Proposal Hearing**

Following successful completion of the doctoral preliminary examination, the student submits a written dissertation proposal to the student's PhD Advisory Committee. The proposal must be submitted within one semester of the successful completion of preliminary exams, and defended by the end of the following semester. Extensions of this deadline must be approved by the PhD Advisory Committee.

## **Dissertator Status**

Specific requirements which must be completed before the Graduate School places a doctoral student in dissertator status are described in the Doctor of Philosophy Degree (<https://uwm.edu/graduateschool/students/academic-policies-and-procedures/doctoral-resources/doctoral-requirements/>) requirements section.

## **Dissertation**

During the final year of study, the candidate must present a public seminar on the dissertation research and subsequently prepare and successfully defend a dissertation reporting the results of the candidate's research to the Committee. The original research findings embodied in this dissertation are expected to be accepted for publication in one or more refereed journals.

Please see the Graduate School thesis and dissertation formatting requirements for further information.

## **Dissertation Defense**

As the final step toward the degree the candidate must defend the dissertation before the PhD Advisory Committee.

## **Time Limit**

All degree requirements must be completed within ten years from the date of initial enrollment in the doctoral program.

## **Contact Information**

# GENERAL STUDIES (COLLEGE OF)

The College of General Studies serves as the academic home for the Associate of Arts and Sciences (AAS) degree at UW-Milwaukee. The AAS curriculum provides a general education core that serves as the foundation for bachelor's degree programs. The College offers courses at a branch location in Waukesha.

## Programs

- Liberal Arts, AAS (p. 693)

## Policies and Regulations

### Grade Appeal Policy

This grade appeal policy is based on the following principles: (1) the instructor has responsibility for assignment of grades; (2) students should be free from prejudicial or capricious grading; and, (3) no grade may be assigned or changed without departmental faculty authorization. The following steps constitute the procedure to be followed by a UW-Milwaukee College of General Studies student wishing to appeal a grade:

1. A grade appeal should normally be initiated within 30 days of receipt of the grade report. Prior to making a formal appeal, the student should check with the instructor to make sure that no clerical error has been made.
2. The student shall submit a written appeal to the instructor detailing the basis on which the student believes the grade ought to have been different. During this first phase of the process, the student and instructor might meet to discuss the basis for the grade, if both are willing to do so. The instructor shall normally respond in writing to the student within 30 days.
3. The student may continue the appeal process by submitting his/her case, including copies of all correspondence to date, to the chair of the appropriate academic department or, in the case of a conflict of interest, to a designee appointed by the department's executive committee. This must be done within 30 days of receiving a written response from the instructor, and the department chair or designee shall acknowledge the appeal in writing with a copy to the instructor.
4. Each department must have a review process and review body to adjudicate grade appeals. The review body should examine available information to determine if any of the following grounds for changing a grade are present: inconsistent treatment, procedural errors, capricious judgments, or use of inappropriate criteria. The review body may request additional information from the instructor or student and/or may ask to see copies of the student's work. The department shall conclude its review within 60 days. After first securing the endorsement of the department chair, the chair of the reviewing body shall inform the instructor and student of the outcome of the review with copies to the Department Chair, the Assistant Dean for Student Affairs, and the Associate Dean for Academic Affairs. If the review process finds with the student and a change in grade is recommended, the department chair or designee shall notify the instructor, discuss the findings and suggest that the instructor change the grade and so notify the student. Should the instructor decline to change the grade, the chair or designee shall forward the findings to the Associate Dean for Academic Affairs who

will implement the grade change. If the review upholds the original grade, the department chair or designee, having already endorsed the review body's report, need take no further action.

5. The student may appeal a decision upholding the original grade to the Associate Dean for Academic Affairs, who shall examine the record created by the departmental review body, and shall uphold the decision of that body unless he or she finds:
  - a. The evidence of record does not support the findings and recommendations of the departmental review body;
  - b. Established procedures were not followed by the departmental review body and material prejudicial to the student resulted;
  - c. The decision was based on factors proscribed by state or federal law regarding equal educational opportunities; or
  - d. The decision was arbitrary and capricious.

Should the review by the Associate Dean for Academic Affairs find any of the above, he or she will remand the appeal to the department for action consistent with the finding.

### Late Add/Drops

Requests to add or drop a class that are outside of University published deadlines must go through the campus Academic Actions Committee. Contact your respective Solution Center or advisor for more information.

### Overload/Maximum Credit Policy

The maximum credit load in a Spring or Fall term:

- 18 credits (undergraduates)

The fall and spring registration limit using PAWS is 18 credits for undergraduates. Students wishing to enroll in an overload must obtain approval from their school/college advising office on an Add/Drop form.

The maximum credit load in a Summer term:

- You may enroll in a total of 12 credits for the full duration of the summer sessions, but no more than four credits during any session less than or equal to four weeks

The summer registration limit using PAWS is 12 credits for undergraduates. Students wishing to enroll in an overload must obtain approval from their school/college advising office on an Add/Drop form.

The maximum credit load in UWinteriM:

- You may enroll in a total of 4 credits for the full duration of the UWinteriM session

The UWinteriM registration limit using PAWS is 4 credits for undergraduates and, due to the short duration of the term, overloads are generally not permitted. Degree-seeking students wishing to enroll in an overload due to exceptional circumstances must obtain approval from their school/college advising office on an Add/Drop form.

Non-degree/guest students wishing to enroll in an overload must appeal to the Registrar's Office and requests will be reviewed with academic departments and school/college administrators.

Approval for overload does not waive any course prerequisites or permit enrollment in closed classes. Forms must be submitted to Mellencamp Hall 274 after the student's initial registration appointment time, and will be processed by Registrar's Office staff.

## Retroactive Application for Graduation

Students who either 1) earned or were close to having their AAS degree under the UW Colleges and who have completed the requirements for the AAS, or 2) who, while pursuing a bachelor's degree at UW Milwaukee have completed coursework that satisfies the requirements of the AAS, can apply to have the AAS degree retroactively posted. This is for students who did not apply for graduation but met the degree requirements. Such students need to complete a Retroactive Application for Graduation. Student must submit any transcripts from institutions other than UWM, prior to earning the AAS degree.

## Taking a Class on the Main/Kenwood Campus

Special permission is required for branch campus students who need to take a class at the main/Kenwood campus. Students must contact their advisor in the College of General Studies and there must be a significant reason why the course needs to be taken while concurrently enrolled in CGS. Very few exceptions will be made. Courses taken at the main campus will carry the tuition rate for that course of the main campus.

## UW College Courses Online

UW College Courses Online offers more than 125 fully accredited online courses. Courses are taught by UW faculty and widely transferable. Online courses through UW College Courses Online can help you complete your Associate of Arts and Science degree (p. 693), earn a certificate, or fulfill requirements for other degree programs. See the UW College Courses Online website (<https://online.uwc.edu>) for more information.

## Honors Program

The College of General Studies Honors Program is a challenge extended to our best students. Through enriched course content and a closer association with professors and other honor students, the college experience is broadened and enhanced through research, creative thought and independent learning. Students who have participated felt they were better prepared for subsequent university work and the ability to earn an Honors Degree at a four-year campus.

### Who Qualifies?

This program is designed for highly motivated, above-average associate degree students who are new or continuing at UWM.

Those who are eligible have accomplished at least one of the following:

- Graduated in the top 15 percent of their high school class
- Been enrolled in the UW System for at least one semester and earned a minimum GPA of 3.5
- Have an ACT score of 27 or higher
- If you transfer from a college or university outside of the UW System, you may participate in the Honors Program if your GPA is 3.4 or above.

If you do not meet these criteria, you may appeal to the College of General Studies Academic Actions Committee for admission to the program.

Continuing students will be invited to participate in the program after completing 12 credits or more with a 3.5 GPA or better. To continue in the program students need to maintain a GPA of 3.25 or better each semester.

## Honors Awards

If you are in the Honors Program, you may earn an Associate of Arts and Sciences Degree (p. 693) with Honors. To do this, the following must be accomplished:

- Earn a cumulative grade point average of 3.25
- Complete the Associate of Arts and Sciences Degree requirements (p. 693)
- Earn a grade of "B" or better in 12 of the degree credits earned in honors courses
- Earn at least six of the 12 honors credits, across the humanities, fine arts, social sciences, and/or mathematics/natural sciences

Those who have met the Associate of Arts and Sciences Degree with Honors requirements, need to apply for the degree the semester prior to completion.

## Phi Theta Kappa

Honors students with a 3.5 or above cumulative grade point average might wish to join Phi Theta Kappa (PTK), a national two-year honor society. Eligible Students will receive an invitation to join PTK (<http://www.ptk.org/>).

## Transferring

Many UW System four-year campuses have honors programs to obtain a bachelor's degree with honors. Others campuses may have enrichment studies which do not earn a special degree.

## How To Register

You can apply online for the Honors Program (<https://uwm.edu/generalstudies/students/honors-program/>). For more information about the program, please e-mail [leme@uwm.edu](mailto:leme@uwm.edu) or write to:

Professor Ellyn Lem  
Professor of English  
UWM at Waukesha  
1500 N. University Drive  
Waukesha, WI 53188

Anyone may enroll in courses for honors credit, but students not in the Honors Program must have the consent of the class instructor. You can add honors after registration in the first two weeks of classes by getting the signature of the instructor. You can drop honors at any time before the end of the semester. If you want to take a course for honors even though it is not listed for honors credit, you often can arrange to take it for honors by consulting the professor.

## Liberal Arts, AAS

The Associate of Arts and Sciences (AAS) degree program is a great place for students to begin their college careers. It provides a strong foundation for many bachelor programs. This degree also shows employers that you possess essential employability qualities, such as critical thinking, problem solving, and effective communication skills.

The AAS program allows you to explore courses related to your intended major while completing the general education classes required for most bachelor's degrees. Many bachelor's degree programs consider students with an AAS degree to have satisfied their general education requirements.

The AAS program is also perfect for returning students who need to fill in gaps in their general education requirements from their previous college work.

Students can complete the AAS degree in-person, online, or through a combination of both types of courses. The degree is also offered as an online, flexible option (<https://flex.wisconsin.edu/degrees-programs/associate-degree-online/>). This allows you to earn the credits you need at your own pace, on your schedule, building on knowledge you already have.

## Requirements

A minimum of 60 credits is required. At least 36 of the 60 credits, or, at least 12 of the final 24 credits must be earned at UWM. Students must have a cumulative GPA of 2.0 in credits attempted at UWM.

The Associate of Arts and Sciences degree requires that core requirements in writing and mathematics be completed as well as a distribution of credits in breadth of knowledge categories. The breadth categories in the degree are defined on the General Education (p. 29) page.

Code	Title	Credits
<b>Core Requirements</b> <sup>1</sup>		
CGS ENG 102	Critical Writing, Reading, and Research	3
Choose one of the following:		3
CGS MAT 102	Mathematical Literacy for College Students II	
CGS MAT 103	Contemporary Applications of Mathematics	
CGS MAT 105	Introduction to College Algebra	
CGS MAT 108	Algebraic Literacy II	
CGS MAT 110	College Algebra	
CGS MAT 116	College Algebra	
CGS MAT 175	Mathematical Explorations for Elementary Teachers I	
CGS MAT 176	Mathematical Explorations for Elementary Teachers II	
CGS MAT 215	Elementary Statistical Analysis	
<b>Breadth Categories</b>		
<i>Arts and Humanities</i>		9
Must include:		
1 Arts course		
1 Humanities course		
<i>Mathematics and Natural Sciences</i>		11
Must include:		
8 credits in 2 Natural Science areas		
1 laboratory science course		
Remaining credits can be any MS or NS courses		
<i>Social Sciences</i>		9
Must include credits from at least 2 disciplines		
<i>Cultural Diversity</i>		3
Courses may be counted toward another breadth category		
<i>Applied Scholarship</i>		3
Courses may be counted toward another breadth category		
<b>Electives</b>		

A student who has met the core requirements and the other breadth category minimums may complete the 60 credit minimum requirement with courses in this category.

- <sup>1</sup> Students must achieve a grade of C or better or receive an exemption.
- Exemption from the Core Writing requirement can be achieved by submitting a portfolio of written work that demonstrates achievement of the English 102 learning outcomes. Only students who have achieved an appropriate score on the English Placement Test (or other appropriate test, as determined by the Arts and Humanities Department) are eligible.
  - Exemption from the Core Math requirement can be achieved by earning a placement code of at least 30 on the Mathematics Placement Test (or other appropriate test, as determined by the Math and Natural Sciences Department).

Courses used to satisfy the writing and mathematics requirements and their prerequisites may not be used to satisfy a breadth requirement except that:

- A student who earns credit in one of the sequences below with a grade of C or better in at least one of the courses may use the other course to satisfy part of the Mathematics and Natural Sciences breadth requirement.

Code	Title	Credits
CGS MAT 102 & CGS MAT 103	Mathematical Literacy for College Students II and Contemporary Applications of Mathematics	6
CGS MAT 102 & CGS MAT 105	Mathematical Literacy for College Students II and Introduction to College Algebra	6
CGS MAT 102 & CGS MAT 108	Mathematical Literacy for College Students II and Algebraic Literacy II	6
CGS MAT 102 & CGS MAT 110	Mathematical Literacy for College Students II and College Algebra	6
CGS MAT 102 & CGS MAT 116	Mathematical Literacy for College Students II and College Algebra	6
CGS MAT 103 & CGS MAT 105	Contemporary Applications of Mathematics and Introduction to College Algebra	6
CGS MAT 103 & CGS MAT 108	Contemporary Applications of Mathematics and Algebraic Literacy II	6
CGS MAT 103 & CGS MAT 110	Contemporary Applications of Mathematics and College Algebra	6
CGS MAT 103 & CGS MAT 116	Contemporary Applications of Mathematics and College Algebra	6
CGS MAT 105 & CGS MAT 116	Introduction to College Algebra and College Algebra	6
CGS MAT 108 & CGS MAT 116	Algebraic Literacy II and College Algebra	6

2. A student who earns a C or better in one of the courses below may use the course to satisfy part of the Mathematics and Natural Sciences breadth requirement.

Code	Title	Credits
CGS MAT 115	Precalculus	4
CGS MAT 124	Pre-Calculus Mathematics	5

## Emphases

Students pursuing the Associate of Arts and Sciences Degree (AAS) may elect to receive a degree with emphasis: a concentration of coursework in a given discipline or in more than one discipline, in the case of an interdisciplinary emphasis. Students seeking an Associate of Arts and Sciences Degree with an emphasis must successfully complete the AAS requirements and the specific emphasis requirements.

### Anthropology Emphasis

Code	Title	Credits
<b>Required Course</b>		
CGS ANT 100	Introduction to Anthropology	3
<b>Elective Courses</b>		
Choose 3 additional Anthropology courses:		9-11
CGS ANT 102	Discovering our Past: An Introduction to Archaeology and the Prehistoric World	
CGS ANT 104	Introduction to Cultural Anthropology	
CGS ANT 105	Introduction to Biological Anthropology	
CGS ANT 150	Food, Culture, and Identity	
CGS ANT 314	American Indian Societies and Cultures	
CGS ANT 343	Religion, Magic and Witchcraft	
CGS ANT 350	Introduction to Medical Anthropology: Health and Healing	
<b>Total Credits</b>		<b>12-14</b>

### Art Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS ART 101	Introduction to Drawing	6
CGS ART 112	Three-Dimensional Design	
Choose 1 of the following:		3
CGS ART 181	Survey: Ancient and Medieval Art	
CGS ART 183	Survey: Renaissance - Modern Art	
CGS ART 187	Survey: Modern Art	
CGS ART 188	Survey: Modern Architecture and Design	
Choose 1 of the following:		3
CGS ART 102	Intermediate Drawing	
CGS ART 111	Two-Dimensional Design	
CGS ART 121	Introduction to Painting	
CGS ART 131	Introduction to Sculpture	
CGS ART 141	Introduction to Printmaking	
CGS ART 154	Introduction to Ceramics	
CGS ART 161	Introduction to Photography (Required courses)	
<b>Total Credits</b>		<b>12</b>

### Biological Sciences Emphasis

Code	Title	Credits
<b>Required Courses</b>		
Biological Sciences (CGS BIO) course		3-5
Biological Sciences (CGS BIO) course with lab component		3-5
Biological Sciences (CGS BIO) course with lab component		3-5
Biological Sciences (CGS BIO) course with lab component		3-5
<b>Total Credits</b>		<b>12-20</b>

### Business Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS BUS/CGS ENG 210	Business Communication	3
CGS BUS 201	Introductory Accounting	4
CGS BUS 230	Introduction to Management Information Systems	3
CGS BUS/CGS ECO 243	Economic and Business Statistics	3
CGS ECO 203	Economics - Macro	3
CGS ECO 204	Economics - Micro	3
Choose 1 of the following courses:		3-4
CGS BUS 202	Intermediate Accounting	
CGS BUS 204	Managerial Accounting	
<b>Total Credits</b>		<b>22-23</b>

### Chemistry Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS CHE 145	General Chemistry I	5
CGS CHE 155	General Chemistry II	5
CGS CHE 343	Organic Chemistry I	3
CGS CHE 363	Organic Chemistry II	3
<b>Total Credits</b>		<b>16</b>

### Communication Arts Emphasis

Completion of the following courses will fulfill the requirements for this emphasis.

Code	Title	Credits
<b>Required Course</b>		
CGS CTA 103	Introduction to Public Speaking	3
<b>Elective Courses</b>		
Choose 9 credits from the following:		9
CGS CTA 101	Introduction to Interpersonal Communication	
CGS CTA 115	Introduction to Business and Professional Communication	
CGS CTA 150	Introduction to Film	
CGS CTA 201	Introduction to Mass Communication	
CGS CTA 210	Introduction to Intercultural Communication	
CGS CTA 218	Popular Culture in the Media	
CGS CTA 294	Internship in Communication and Theatre Arts	

CGS CTA 298	Topics in Speech and Dramatic Arts	
<b>Total Credits</b>		<b>12</b>

## Education Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS EDU 201	Concepts, Issues, and Field Experience in Education	3
CGS EDU 230	Educational Psychology	3-4
Choose 1 of the following:		3-4
CGS PSY 201	Introductory Psychology	
CGS PSY 202	Introductory Psychology	
CGS EDU 300	The Exceptional Individual	
Choose 1 of the following:		3
CGS PSY 250	Life Span Developmental Psychology	
CGS PSY 360	Psychology of Childhood and Adolescence	
CGS HIS 101	History of the United States: From the Era of the Columbian Exchange to the Era of the Civil War	
CGS HIS 102	History of the United States: From the Era of the Civil War to the Present	
CGS POL 104	American Government and Politics	
<b>Total Credits</b>		<b>12-14</b>

## Engineering Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS EGR 105	Engineering Fundamentals	3
CGS EGR 201	Statics	3
Choose a minimum of 1 of the following:		3-5
CGS EGR 203	Mechanics of Materials	
CGS CPS 245	Computer Science I: Object-Oriented Programming	
Choose a minimum of 2 of the following:		6
CGS EGR 110	Engineering Graphics with Computer Aided Drafting	
CGS EGR 202	Dynamics	
CGS EGR 282	Engineering Economics	
CGS ECO 204	Economics - Micro	
<b>Total Credits</b>		<b>15-17</b>

## Environmental Studies Emphasis

Code	Title	Credits
Choose one of the following:		
CGS CHE 125	Introductory Chemistry	4-5
CGS BIO 101	Concepts of Biology	
CGS BIO 150	Foundations of Biological Sciences I	
CGS CHE 145	General Chemistry I	
CGS GEO 123	Physical Geography: Weather and Climate	
Choose one of the following:		3-4
CGS BIO 191	Environmental Science	
CGS BIO 310	General Ecology	

CGS INT 283	Interdisciplinary Studies: Local Applications of Global Sustainability	
Choose one of the following:		3
CGS PHI 244	Environmental Ethics	
CGS INT 284	Interdisciplinary Studies: Understanding Our Environment	
CGS SOC 355	Sociology of the Environment	
Choose one of the following:		3
CGS MAT 117	Trigonometry	
CGS MAT 215	Elementary Statistical Analysis	
CGS PSY 210	Statistical Methods in Psychology	
CGS ECO 243	Economic and Business Statistics	
CGS ECO 101	Intro to Economics	
CGS ECO 203	Economics - Macro	
CGS ECO 204	Economics - Micro	
<b>Total Credits</b>		<b>13-15</b>

## Gender, Sexuality, and Women's Studies Emphasis

Code	Title	Credits
<b>Required Courses</b>		
Choose 1 of the following courses:		
CGS GSW 101	Introduction to Gender, Sexuality, and Women's Studies	
CGS GSW 102	Women's Voices	
<b>Elective Courses</b>		
Choose 3 of the following courses (note: CGS GSW 102 can be counted as an elective if CGS GSW 101 was also completed):		
CGS GSW 201	Introduction to LGBTQ Studies	
CGS GSW 202	Feminist Philosophy	
CGS GSW 203	Gender in Popular Culture	
CGS GSW 204	Introduction to Masculinities	
CGS GSW 210	Women's Health & Sexuality in Society	
CGS GSW 231	Sex, Power and Public Policy	
CGS GSW 279	Women Writers	
<b>Total Credits</b>		<b>12</b>

## Geography Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS GEO 123	Physical Geography: Weather and Climate	4-5
CGS GEO 124	Physical Geography: Landforms	4-5
Choose one of the following:		3
CGS GEO 101	Introduction to Cultural Geography	
CGS GEO 110	World Regional Geography	
<b>Elective Course - Student/Advisor choice</b>		
CGS GEO XXX (Any other CGS GEO course)		3-5
<b>Total Credits</b>		<b>14-18</b>

## Geosciences Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS GLG 102	Historical Geology	4-5

CGS GLG 101	Physical Geology	4-5
or CGS GLG 169	Environmental Geology	
Choose 2 of the following, but cannot use both CGS PHY 120 and CGS PHY 209		8-10
CGS CHE 145	General Chemistry I	
CGS MAT 221	Calculus and Analytical Geometry I	
CGS PHY 120	General Physics I (Non-Calculus Treatment)	
CGS PHY 209	Physics I (Calculus Treatment)	
<b>Total Credits</b>		<b>16-20</b>

### Health Sciences Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS BIO 101	Concepts of Biology	5
Choose 1 of the following courses:		4
CGS BIO 202	Anatomy and Physiology 1	
CGS BIO 203	Anatomy and Physiology 2	
Choose 1 of the following courses:		5
CGS CHE 125	Introductory Chemistry	
CGS CHE 145	General Chemistry I	
Choose 1 of the following courses:		2-5
CGS MAT 117	Trigonometry	
CGS MAT 215	Elementary Statistical Analysis	
CGS BIO 251	General Survey of Microbiology	
Choose 1 of the following courses:		3-4
CGS PSY 201	Introductory Psychology	
CGS PSY 202	Introductory Psychology	
<b>Total Credits</b>		<b>19-23</b>

### History Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS HIS 101	History of the United States: From the Era of the Columbian Exchange to the Era of the Civil War	3
CGS HIS 102	History of the United States: From the Era of the Civil War to the Present	3
Any 200-level CGS HIS course		3
Choose 1 of the following courses:		3
CGS HIS 105	History of Western Civilization from Ancient Times to the Era of the Renaissance	
CGS HIS 161	World History to 1500	
Choose 1 of the following courses:		3
CGS HIS 106	History of Western Civilization from the Era of the Renaissance to Contemporary Times	
CGS HIS 162	World History Since 1500	
<b>Total Credits</b>		<b>15</b>

### Literature Emphasis

Code	Title	Credits
<b>Elective Courses</b>		
English (CGS ENG) course numbered 242-289		3
English (CGS ENG) course numbered 242-289		3
English (CGS ENG) course numbered 242-289		3
English (CGS ENG) course numbered 242-289		3
<b>Total Credits</b>		<b>12</b>

### Mathematics Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS MAT 221	Calculus and Analytical Geometry I	5
CGS MAT 232	Calculus and Analytic Geometry II	4
CGS MAT 233	Calculus and Analytic Geometry III	4
<b>Elective Courses</b>		
Choose from the following titles:		3-5
CGS MAT 215	Elementary Statistical Analysis *	
CGS MAT 210	Topics in Finite Mathematics	
CGS MAT 228	Statistical Analysis	
CGS MAT 229	Linear Algebra	
CGS MAT 271	Ordinary Differential Equations	
CGS ECO/CGS BUS 243	Economic and Business Statistics	
CGS PHY 201	University Physics I	
or CGS PHY 202	University Physics II	
CGS CPS 245	Computer Science I: Object-Oriented Programming	
CGS CPS 255	Computer Science II: Objects and Data Abstraction	
CGS EGR 263	Engineering Thermodynamics	
<b>Total Credits</b>		<b>16-18</b>

\* CGS MAT 215 is not recommended for students who intend to major in Mathematics.

### Music Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS MUS 171	Music Theory I	3
Choose 1 of the following courses:		1-2
CGS MUS 1	Beginning Piano	
CGS MUS 2	Beginning Piano	
CGS MUS 3	Elementary Piano	
CGS MUS 4	Elementary Piano	
Choose 2 of the following courses:		6
CGS MUS 172	Music Theory II	
CGS MUS 173	Music Literature and Appreciation	
CGS MUS 174	Music Literature and Appreciation	
CGS MUS 273	Jazz History and Appreciation	
CGS MUS 278	History of Rock and Roll	

CGS MUS 285	World Music	
<b>Total Credits</b>		<b>10-11</b>

### Philosophy Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS PHI 101	Introduction to Philosophy	3
CGS PHI 211	Elementary Logic	3
Choose 1 of the following courses:		3
CGS PHI 237	Technology, Values and Society	
CGS PHI 241	Ethics	
CGS PHI 244	Environmental Ethics	
CGS PHI 248	Biomedical Ethics	
<b>Elective Courses - Student/Advisor Choice</b>		
Choose two additional CGS PHI courses		6
<b>Total Credits</b>		<b>15</b>

### Physics Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS PHY 201	University Physics I	5
CGS PHY 202	University Physics II	5
CGS MAT 233	Calculus and Analytic Geometry III	4
<b>Total Credits</b>		<b>14</b>

### Political Science Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS POL 104	American Government and Politics	3
Choose 2 of the following courses:		6
CGS POL 120	Politics of Crime and Punishment	
CGS POL 160	Comparative Politics	
CGS POL 175	International Politics	
CGS POL 231	Sex, Power and Public Policy	
Choose 2 of the following courses:		6
CGS POL 210	Civil Liberties	
CGS POL 215	Media and Politics	
CGS POL 280	Terrorism	
<b>Total Credits</b>		<b>15</b>

### Pre-Nursing Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS BIO 251	General Survey of Microbiology	5
CGS BIO 202	Anatomy and Physiology 1	4
CGS BIO 203	Anatomy and Physiology 2	4
Choose 1 of the following courses:		3-5
CGS CHE 125	Introductory Chemistry	
CGS CHE 203	Survey of Biochemistry	
<b>Total Credits</b>		<b>16-18</b>

### Psychology Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS PSY 210	Statistical Methods in Psychology	3
Choose 1 of the following courses:		3-4
CGS PSY 201	Introductory Psychology	
CGS PSY 202	Introductory Psychology	
Choose 1 of the following courses:		3
CGS PSY 250	Life Span Developmental Psychology	
CGS PSY 360	Psychology of Childhood and Adolescence	
CGS PSY 362	Psychology of Adulthood and Aging	
Choose 1 of the following courses:		3-4
CGS BIO 180	Introduction to Human Biology	
CGS BIO 201	Human Structure & Function	
CGS BIO 202	Anatomy and Physiology 1	
<b>Total Credits</b>		<b>12-14</b>

### Sociology Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS SOC 101	Introduction to Sociology	3
CGS SOC 234	Sociology of Race and Ethnicity	3
<b>Elective Courses - Student/Advisor Choice</b>		
Choose 2 of the following courses:		6
CGS SOC 130	Contemporary Social Problems	
CGS SOC 160	Sociology of Human Sexuality	
CGS SOC 205	Global Social Problems	
CGS SOC 220	Sociology of Marriage and the Family	
CGS SOC 231	Crime and Criminal Justice	
CGS SOC 246	Juvenile Delinquency	
CGS SOC 250	People, Organizations, and Society	
CGS SOC 285	Sociology of Health and Illness	
CGS SOC 294	Practice in Applied Sociology	
CGS SOC 299	Independent Reading in Sociology	
CGS SOC 355	Sociology of the Environment	
<b>Total Credits</b>		<b>12</b>

### Sustainability Emphasis

Code	Title	Credits
<b>Required Courses</b>		
Choose 1 of the following courses:		3
CGS BUS 101	Introduction to Business	
CGS BUS 243	Economic and Business Statistics	
CGS ECO 101	Intro to Economics	
CGS ECO 203	Economics - Macro	
CGS ECO 204	Economics - Micro	
CGS EGR 105	Engineering Fundamentals	
CGS ECO 243	Economic and Business Statistics	
CGS MAT 215	Elementary Statistical Analysis	
Choose 2 of the following courses:		7-10
CGS BIO 101	Concepts of Biology	

CGS BIO 150	Foundations of Biological Sciences I	
CGS CHE 125	Introductory Chemistry	
CGS CHE 145	General Chemistry I	
CGS GLG 101	Physical Geology	
CGS GLG 135	Introduction to Environmental Geology	
CGS GLG 169	Environmental Geology	
Choose 2 of the following courses:		6-8
CGS BIO 191	Environmental Science	
CGS BIO 310	General Ecology	
CGS GEO 350	Environmental Conservation	
CGS INT 283	Interdisciplinary Studies: Local Applications of Global Sustainability	
CGS PHI 244	Environmental Ethics	
CGS SOC 355	Sociology of the Environment	
<b>Total Credits</b>		<b>16-21</b>

### Theatre Arts Emphasis

Completion of the following courses will fulfill the requirements for this emphasis.

Code	Title	Credits
<b>Required Courses</b>		
CGS CTA 130	Introduction to Theatre	3
CGS CTA 131	Theatre Laboratory *	3
<b>Elective Courses</b>		
Choose 9 credits from the following:		9
CGS CTA 131	Theatre Laboratory *	
CGS CTA 232	Introduction to Acting	
CGS CTA 150	Introduction to Film	
CGS CTA 294	Internship in Communication and Theatre Arts	
CGS CTA 298	Topics in Speech and Dramatic Arts	
CGS ENG 280	Introduction to Shakespeare	
CGS ART 101	Introduction to Drawing	
CGS ART 112	Three-Dimensional Design	
<b>Total Credits</b>		<b>15</b>

\* A minimum of 3 credits of CGS CTA 131 is required. An additional 1 to 3 credits can be taken of CGS CTA 131 to count towards the emphasis.

Students should be aware that the Theatre Arts Emphasis will give them the basic knowledge and individualized experience to successfully prepare them for a major/minor in Theatre Arts, but they will be required to take additional lower division courses in Theatre when they transfer.

### Writing Emphasis

Code	Title	Credits
<b>Required Courses</b>		
CGS ENG 201	Intermediate Composition	3
CGS ENG 203	Creative Writing I	3
CGS ENG/CGS BUS 210	Business Communication	3
Choose 1 of the following:		1-3
CGS ENG 202	Writing about Literature	
CGS ENG 204	Creative Writing II	

CGS ENG 291	Writing Tutor Seminar	
<b>Total Credits</b>		<b>10-12</b>

## College of General Studies Dean's Honor List

GPA of 3.750 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 20 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 30 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

# GRADUATE SCHOOL

As one of just two public research universities in the state, UWM offers 150+ master's, doctoral, professional, and graduate certificate programs, more than any other university in Southeastern Wisconsin. Our distinctive programs include the first School of Freshwater Sciences in America, the only dedicated public health school in the state and the only dedicated arts school in the University of Wisconsin System, among many other top-ranked programs.

UWM is also rated as an R1 university, one of the nation's top 146 research universities as recognized by the Carnegie Classification of Institutions of Higher Education. The R1 status reflects the depth and breadth of our work across dozens of doctoral programs and research centers. Our discoveries transform lives and fuel the region's economy.

Top research status is coveted among institutions that value excellence in cutting-edge research, forming strategic partnerships and integrating research across a broad curriculum. UWM faculty, staff, administrators, and students have worked toward this recognition for decades, demonstrating research excellence in laboratories and libraries, lecture halls and at international conferences.

Our nationally known professors are leaders in their fields who are passionate about developing the next generation of leaders. Graduate students work alongside faculty mentors to advance important and innovative research in UWM's 170+ centers, labs and institutes.

UWM is a vibrant community of nearly 25,000 students—including nearly 4,700 graduate students—from around the nation and more than 80 countries. Our campus is the most diverse in the UW System.

More than \$6 million in assistantships, fellowships and scholarships are awarded to graduate students each year. Assistantships offer full tuition remission, health coverage, and a monthly stipend, and travel awards are available to graduate students who present at professional conferences and meetings.

Whether you are interested in a professional master's degree, advancing your career with a certification, or conducting research and obtaining your doctorate, you can be confident that we are just as committed to your education as you are.

## Programs

- Data Science, MS (p. 700)
- Multidisciplinary Committee-Directed PhD (p. 703)

## Data Science, MS

### Data Everywhere

There has been an explosion of data over the last decade. Everything that people do like listening to music, streaming shows, using social media or rideshares generates data. In fact, almost everything that goes on in the world today is measured and recorded somewhere. Analyzing that data can vastly improve human lives and business performance. So, it's not surprising that analytics are now used routinely even in fields that did not use much data before like the Arts, Music, and Creative Writing. Analytics are also extensively deployed in Business, Engineering and Manufacturing and Government and even in many not-for-profit sectors like education, fundraising and social welfare. It is safe to say that virtually all human activity that affects our lives uses analytics in

some way today. Visit this link (<https://uwm.edu/data-science/>) *for more information on how UWM prepares students for careers in data science fields.*

## Why should you Consider a Master of Science in Data Science (MSDS)?

With every field turning to data to improve decision-making and performance, Data Science is one of the fastest growing professions today but there aren't enough trained data analysts to fill that need. A Master's degree in Data Science that trains you to analyze data can therefore help you in finding jobs with attractive salaries.

A report from the employment outlook firm Burning Glass produced jointly with IBM and the Business Higher Education Forum identified several job categories in the data science and analytics field, including data driven decision makers ("leverage data to inform strategic and operational decisions") and functional analysts ("utilize data and analytical models to inform specific functions and business decisions"). They estimated a national demand of 1.8 million job postings nationwide for 2020, with a 5-year growth rate of approximately 15%. Importantly, the report also states: "39% of Data Scientists and Advanced Analysts require a Master's or Ph.D. These degrees take additional years of schooling to complete, so it will take a significant time investment to train a larger pool of workers. Therefore, because these roles are already undersupplied and projected to grow rapidly, the skills shortage is in danger of worsening."

The Bureau of Labor Statistics also projects that Computer and Information Research Scientists category of jobs will grow 15% over the 2019-2029 period and describes this as: "...much faster than average for all occupations[1] (p. ). Job prospects are expected to be excellent" and states that the "median annual wage for computer and information research scientists was \$126,830 in May 2020." BLS also classifies this as a category in which most jobs require a master's degree.

Additional evidence of demand is also seen in investments made by employers like Northwestern Mutual that have invested significant resources of \$15 million in the establishment of the Northwestern Mutual Data Science Institute to support the launch and growth of undergraduate and graduate programs related to data including data science and data analytics.

## Flexible Curriculum

We understand the needs of working professionals and offer an in-person or online program that will both build your career and enhance your professional networking opportunities. Fulfill your professional goals through a wide selection of courses offered in on-campus, online, and hybrid delivery options.

## MS Data Science Courses

To see a list of current classes available for the MS Data Science degree please see our MS Data Science Current Classes (<https://uwm.edu/graduateschool/msds-current-classes/>) page.

For a complete listing of ALL classes related to the degree please see the Requirements tab (p. 701).

## Why UWM?

The MSDS at UWM is unique because its goal is to train graduates to practice data analytics in a field they are most passionate about. For example, if your interest is healthcare, you can become a data analyst in healthcare. If your passion is education, you can get the training to

become an analyst in the field of education. The MSDS is therefore designed to give you the flexibility to build a career in data science in whatever field you want.

## Ready to Apply?

The Data Science program is a multidisciplinary program. To apply, visit this link (<https://graduateschool-apply.uwm.edu/>) and click on the Apply Now tab to find the MS Data Science degree under **Multidisciplinary Programs**. Or go directly to the **MS Data Science application**.

[1] Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, Computer and Information Research Scientists, at <https://www.bls.gov/ooh/computer-and-information-technology/computer-and-information-research-scientists.htm> (visited *January 04, 2022*)

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

For admission to the M.S. in Data Science program, students must meet the general requirements of admission to a graduate program at UW-Milwaukee. As stated by the Graduate School, these requirements include: (1) a baccalaureate degree, or its equivalent as determined by the UWM Center on International Education, from a regionally accredited institution, completed before the first term of enrollment in the Graduate School; (2) Proficiency in the English language; and (3) A minimum cumulative undergraduate grade point average (GPA) of 2.75 on a 4.0 scale, or an equivalent measure on a grading system that does not use a 4.0 scale. Applications must include a reason statement, at least one letter of recommendation, and other materials as specified in the graduate application system. Incomplete applications will not be considered.

Students applying to the program are expected to have proficiency, demonstrated through coursework, exams or a portfolio, in the following areas: Linear Algebra (3 credits), Multivariable Calculus (4 credits), Statistics (3 credits), and Computer Literacy (6 credits). Those without these proficiencies may be admitted when they have 6 credits or fewer of the proficiency requirements remaining to be completed, but proficiency coursework does not count towards the MS.

## Ready to Apply?

The Data Science program is a multidisciplinary program. To apply go to: [graduateschool-apply.uwm.edu](https://graduateschool-apply.uwm.edu/) (<https://graduateschool-apply.uwm.edu/>) and click on the Apply Now tab to find the MS Data Science degree under **Multidisciplinary Programs**. Or go directly to the **MS Data Science application**.

## Credits and Courses

Code	Title	Credits
<b>Core Areas</b>		
Complete 18 credits; 1 course from each sub-area below:		

<i>Developing insights from data for applications</i>		3
Complete 1 course:		
ATM SCI 600G	Data Analytics	
COMPSCI 425G	Introduction to Data Mining	
INFOST 582G	Introduction to Data Science	
<i>Organizing and maintaining large data sets</i>		3
Complete 1 course:		
BUS ADM 749	Data and Information Management	
COMPSCI 557G	Introduction to Database Systems	
INFOST 691G	Special Topics in Information Science: (Topic: Data Management and Curation)	
INFOST 714	Metadata	
INFOST 785	Database Management Systems for Information Professionals	
PH 718	Data Management and Visualization in R	
<i>AI and Machine Learning to extract insight from Data</i>		3
Complete 1 course:		
BUS ADM 767	Ideas and Applications of Data Science in Different Fields	
COMPSCI 411G	Machine Learning and Applications	
COMPSCI 422G	Introduction to Artificial Intelligence	
COMPSCI 710	Artificial Intelligence	
COMPSCI 711	Introduction to Machine Learning	
ECON 710	Applied Econometrics	
INFOST 687G	Data Analysis for Data Science	
MATH 804	Industrial Mathematics II	
<i>Probabilistic methods to analyze uncertainty in data</i>		3
Complete 1 course:		
ATM SCI 500G	Statistical Methods in Atmospheric Sciences	
ATM SCI 700	Statistical Methods in Atmospheric Sciences II: Signal Detection	
BUS ADM 754	Statistical Analysis	
BUS ADM 713	Business Forecasting Methods	
BUS ADM 714	Multivariate Techniques in Management Research	
BUSMGMT 709	Predictive Analytics for Managers	
COMPSCI 720	Computational Models of Decision Making	
COMPST 701	Computing Fundamentals for IT Professionals	
ECON 411G	Economic Forecasting Methods	
ECON 413G	Statistics for Economists	
ECON 513G or ECON 703	Introduction to Econometrics Econometrics	
ECON 835	Econometric Methods II	
ED PSY 724	Educational Statistical Methods II	
ED PSY 820	Multiple Regression	
GEOG 737	Qualitative Research	
GEOG 747	Spatial Analysis	
IND ENG 575G	Design of Experiments	
IND ENG 765	Operations Research Methods	
MATH 783	Introduction to Probability Models	

MTHSTAT 361G	Introduction to Mathematical Statistics I	ART 526G	Research in Universal Design and Fabrication
MTHSTAT 362G	Introduction to Mathematical Statistics II	BUS ADM 741	Web Mining and Analytics
MTHSTAT 563G or MTHSTAT 763	Regression Analysis	BUS ADM 742	Big Data in Business
MTHSTAT 564G or MTHSTAT 764	Time Series Analysis	BUS ADM 745	Artificial Intelligence for Business
MTHSTAT 871	Mathematical Statistics I	BUS ADM 763	Marketing Analytics
MTHSTAT 872	Mathematical Statistics II	BUS ADM 769	Database Marketing
PH 702	Introduction to Biostatistics	BUS ADM 812	Machine Learning for Business
PH 711	Intermediate Biostatistics	BUS ADM 813	Social Media Analytics for Business
PH 818	Statistical Computing	BUS ADM 816	Business Intelligence Technologies & Solutions
POL SCI 701	Techniques of Political Science Research	BUS ADM 817	Connected Systems for Business
POL SCI 702	Advanced Techniques of Political Science Research	COMPSCI 423G	Introduction to Natural Language Processing
PSYCH 510G	Advanced Psychological Statistics	or COMPSCI 723	Natural Language Processing
PSYCH 610G	Experimental Design	COMPSCI 444G	Introduction to Text Retrieval and Its Applications in Biomedicine
SOCIOL 461G	Social Data Analysis Using Regression	or COMPSCI 744	Text Retrieval and Its Applications in Biomedicine
SOCIOL 760	Advanced Statistical Methods in Sociology	COMPSCI 469G	Introduction to Computer Security
SOCIOL 982	Advanced Quantitative Analysis	COMPSCI 535G	Algorithm Design and Analysis
<i>Advanced Programming for Data Collection and Data Science</i>		COMPSCI 704	Analysis of Algorithms
Complete 1 course:		COMPSCI 712	Image Processing
BUSMGMT 744	R Programming for Business Analytics	COMPSCI 725	Robot Motion Planning
COMPST 702	Introductory Programming Using Python	COMPSCI 755	Information and Coding Theory
COMPST 751	Data Structures and Algorithms	COMPSCI 759	Data Security
MTHSTAT 566G or MTHSTAT 766	Computational Statistics	COMPSCI 811	Advanced Machine Learning
URBPLAN 794	Internet Geographic Information Systems (GIS)	CRM JST 520G	Analysis Oriented Technology: Spatial Data Analysis; Crime Mapping; ArcGIS
<i>Ethics and Society</i>		CRM JST 713	Measuring Crime & Analyzing Crime Data
Complete 1 course:		CRM JST 716	Advanced Analytic Techniques for Crime Analysts
BUS ADM 743	Information Privacy, Security & Continuity	CRM JST 910	Methods and Practice Capstone for Crime Analysts
INFOST 465G	Legal Aspects of Information Products and Services	ECON 734	Foundation of Econometric Methods
INFOST 583G	Survey of Information Security	ECON 735	Econometric Methods I
INFOST 660G	Information Policy	ED PSY 821	Psychometric Theory and Practice
INFOST 661G	Information Ethics	ED PSY 822	Item Response Theory
INFOST 784	Information Security Management	ED PSY 823	Structural Equation Modeling
<b>Electives <sup>1</sup></b>		ED PSY 824	Advanced Experimental Design and Analysis
Complete 4 courses:		ED PSY 825	Multivariate Methods
ANTHRO 380G	Anthropological Applications of GIS	ED PSY 826	Analysis of Cross-Classified Categorical Data
ANTHRO 562G	Techniques and Problems in Archaeology	ED PSY 827	Survey Research Methods
ANTHRO 768	Topics in Advanced Research Design in Anthropology	ED PSY 832	Theory of Hierarchical Linear Modeling
ART 313G	Creative Coding	GEOG 704	Remote Sensing: Environmental and Land Use Analysis
ART 316G	Creative Interfaces	GEOG 705	Cartography
ART 317G	3D Environments and XR	GEOG 716	Watershed Analysis and Modeling
ART 427G	Advanced Design Workshop:	GEOG 726	Geographic Information Science
		GEOG 804	Advanced Remote Sensing

GEOG 826	Intermediate Geographic Information Science
INFOST 584G	Survey of Web and Mobile Content Development
INFOST 671G	Applied Web 3.0: Artificial Intelligence and Blockchain
INFOST 695G	Ethical Hacking I
INFOST 696G	Ethical Hacking II
INFOST 771	Data Curation
MATH 803	Industrial Mathematics I
PH 812	Statistical Learning & Data Mining
POL SCI 390G	Political Data Analysis
POL SCI 392G	Survey Research
SOCIOL 750	Research Methods in Sociology
SOCIOL 752	Fundamentals of Survey Methodology
SOCIOL 952	Social Network Analysis
URBPLAN 692G	Special Topics in Urban Planning: (Topic: Transportation Planning and GIS)
URBPLAN 791	Introduction to Urban Geographic Information Systems for Planning
URBPLAN 792	Using Urban Geographic Information Systems (GIS) for Planning
<i>Optional: Internship/Thesis Capstone</i> <sup>2</sup>	
BUS ADM 799	Reading and Research
COMPSCI 990	Masters Thesis
COMPSCI 995	Master's Capstone Project
ECON 790	Research Seminar for M.A. Students
ED PSY 790	Research or Thesis
ED PSY 799	Independent Reading
GEOG 798	GIS/Cartography Internship
GEOG 890	Research and Master Thesis
GEOG 999	Independent Work
INFOST 897	Information Science and Technology Independent Study
INFOST 991	Fieldwork in Information Science and Technology
MATH 890	Master's Thesis
MATH 892	Industrial Internship
URBPLAN 793	Applied Projects in Urban Geographic Information Systems
URBPLAN 991	Legislative/Administrative Agency Internship
URBPLAN 999	Independent Study

*Qualifying Exam*<sup>3</sup>

**Total Credits** **30**

<sup>1</sup> INFOST 691 (Topic: Artificial Intelligence and Disruptive Technologies) may also be used as an elective. Every student's program of electives must be approved by the program director; students may be able to count as Electives some courses in the "core" categories not applied to the core requirements (subject to Director's approval). Students wishing to apply other courses not listed here towards these electives must have each course approved by the program director.

<sup>2</sup> Of the required 12 elective credits, up to 3 degree credits may be awarded for a thesis or internship. Students who choose this option must complete a relevant thesis or internship that is approved by the program director. Students who choose to complete a thesis must work with a thesis advisor and have the thesis approved by the advisor and the program director. Students who choose to pursue an internship must also obtain approval from the program director. Students may select from courses such as those listed in the table or enroll for thesis credits with their thesis advisor (in the advisor's department).

<sup>3</sup> Students who do not choose to pursue the optional capstone course/thesis/internship option are required to pass a qualifying exam. During this exam, students are given a data set and a research problem to be addressed with the data, using data science techniques. Students must submit a final report in which they use the provided data set to address the research question and demonstrate that they have developed a sufficient level of expertise to work as a data scientist. This is a take-home exam and students have seven days to complete it.

## Additional Requirements

### Major Professor as Advisor

Admitted students are assigned a faculty advisor who will work with the student to assemble a program of study.

### Time Limit

The student must complete all degree requirements within five years of initial enrollment.

## Multidisciplinary Committee-Directed PhD

This option is designed to meet the needs of highly qualified and motivated doctoral students who have academic interests that cannot be met by a single, existing UWM doctoral program. The program crosses traditional disciplinary boundaries and opens new areas of instruction and research.

Those who have been admitted to this program typically have identified a multidisciplinary research topic before applying to a UWM doctoral program. It is the applicant's responsibility to identify members of the UWM graduate faculty who would provide the necessary expertise and guidance for developing the multidisciplinary program proposal, and to obtain confirmation from these faculty that they are willing to serve as committee members through the completion of the program.

Students in this program are subject to all general Graduate School requirements for doctoral programs, including, but not limited to, minimum credits, residency, time limit, preliminary examination, proposal hearing, committee membership, and the dissertation defense.

For more information about the program, contact the Doctoral Specialist at [gs-doctoralservices@uwm.edu](mailto:gs-doctoralservices@uwm.edu).

## Requirements

1. Prospective students who have an interest in a multidisciplinary PhD degree program should apply to the UWM doctoral degree program that is most closely related to their major interest.
2. When an existing doctoral program receives an application from a student who is considering a multidisciplinary degree program, it will treat it as it would all other applications for admission; all normal admissions criteria will be invoked. Since there can be no assurance

of an alternate degree route for the student at the time of admission, the doctoral program must assume full normal responsibility for any student it admits, including guidance toward the completion of its designated doctoral degree.

3. The application for the special committee degree must be submitted to the Dean of the Graduate School on behalf of the student by the proposed major professor, and with the approval of the major professor's doctoral program. All proposals for this degree program must meet minimum PhD requirements of the Graduate School. The application should clearly state:
  - The reasons the special committee program is needed with an explanation of why the student's needs cannot be met within existing programs.
  - The exact title of the proposed degree.
  - The proposed course and seminar program envisaged.
  - Any tool requirements of the dissertation (language, etc.) and how these requirements will be met.
  - The nature and scope of preliminary examinations.
  - The nature of the dissertation (general subject area).
  - The names of the chairperson and (a minimum of) four other graduate faculty members who have agreed to serve on the committee.
4. The major professor must be an approved doctoral advisor of the program to which the student is originally admitted. In signing off on the application for the Multidisciplinary Committee-Directed PhD the program agrees to retain and keep all the student's records.
5. Multidisciplinary degree program proposals must come to the Graduate School within one year after admission to the doctoral program (or before the student has completed 12 credits in courses in the doctoral program). They must come to the Graduate School in a timely fashion—that is, when there is still a substantial portion of the program ahead of the student.
6. All applications must be approved both by the Graduate Curriculum Committee (GCC) and the Dean of the Graduate School. In all cases the Graduate School and the GCC will review applications to determine whether the proposed multidisciplinary program can be carried out within an established department or program, utilizing major and minor requirements or other available mechanisms. The suitability and degree of commitment of the supervisory committee for the proposed program will be examined.
7. Students in multidisciplinary degree programs are eligible for all categories of financial aid. They may be assigned teaching assistantships in participating departments or research or project assistantships with appropriate faculty members. Nominations for Graduate School and Distinguished Dissertation Fellowships, AOP and other awards may be made by the GCC. Limitations set by the Fellowship Committee on the number of nominations to be made by individual programs will apply to the GCC, for multidisciplinary students.
8. The Graduate School is vitally concerned about maintaining active participation by all members of special degree committees in the on-going PhD programs of the students, and asks the individual members of the committees to assume all of the responsibilities which a department or program faculty provides in a conventional program.

# HEALTH PROFESSIONS AND SCIENCES (COLLEGE OF)

The University of Wisconsin – Milwaukee College of Health Professions and Sciences offers a wide array of health-related academic programs in biomedical sciences, global health, health care administration, nursing, the rehabilitation sciences, and sustainable peacebuilding.

The faculty and staff in these areas are training our graduates for high-demand careers. Many of our degree programs are nationally recognized and ranked and have achieved the highest accreditation possible.

The academic quality of our programs is excellent, and through our outreach and e-Learning programs, we have extended access to our educational resources to distant locations. Our interdisciplinary collaborations continue to expand, which has enabled us to establish a distinguished presence on campus and become an engine for innovation for southeastern Wisconsin.

Through research, our faculty, staff and students continue to break new ground and pioneer investigations that are helping advance discoveries critical to the health care professions and sciences.

We are proudly dedicated to serving our community through fruitful partnership with many organizations, alumni and friends.

## Biomedical Sciences

The Biomedical Sciences Department in the UWM College of Health Professions and Science offers a broad range of programs dedicated to the detection, diagnosis, prevention and treatment of diseases across the systems and parts of the body.

Available areas of study and professional preparation programs for learners interested in careers and research in the healthcare industry are:

- Laboratory based programs including master's and Ph.D. preparation (working with bodily fluids, tissues and cells).
- Diagnostic Imaging programs (working with organs, the vascular system and skeleton).
- Health Sciences including degree completion programs (application of science to health, including the study of medicine, nutrition, and other health-related topics and how they affect humans).

Please see the program page for details about each program.

## Programs

- Biomedical Sciences, BS: Biomedical Science (p. 707)
- Biomedical Sciences, BS: Cytotechnology (p. 709)
- Biomedical Sciences, BS: Diagnostic Imaging Completion (p. 712)
- Biomedical Sciences, BS: Diagnostic Medical Sonography (p. 713)
- Biomedical Sciences, BS: Health Science Completion (p. 716)
- Biomedical Sciences, BS: Health Sciences (p. 717)
- Biomedical Sciences, BS: Medical Laboratory Science (p. 718)
- Biomedical Sciences, BS: Public Health Microbiology (p. 721)
- Biomedical Sciences, BS: Radiologic Technology (p. 723)
- Biomedical Sciences, MS (p. 726)
- Blood Banking/Immunohematology, Undergraduate Certificate (p. 727)
- Death Investigation, Undergraduate Certificate (School of Biomedical Sciences and Health Care Administration) (p. 728)
- Forensic Science, Undergraduate Certificate (School of Biomedical Sciences and Health Care Administration) (p. 728)
- Forensic Toxicology, Undergraduate Certificate (School of Biomedical Sciences and Health Care Administration) (p. 729)
- Interprofessional Leadership in Healthcare, Undergraduate Microcredential (p. 730)
- Molecular Diagnostics, Undergraduate Certificate (p. 730)

## Biomedical Sciences and Health Care Administration (School of)

The UW-Milwaukee School of Biomedical Sciences & Health Care Administration offers two exciting areas of study.

The Biomedical Sciences programs focus on the detection, diagnosis and treatments of diseases across all systems and parts of the human body through laboratory-based testing and diagnostic imaging.

The Health Care Administration programs help develop basic business principles and tools that students need for effective decision-making in a health care setting.

## Departments and Programs

- Biomedical Sciences (p. 706)
  - Biomedical Sciences, BS: Biomedical Science (p. 707)
  - Biomedical Sciences, BS: Cytotechnology (p. 709)
  - Biomedical Sciences, BS: Diagnostic Imaging Completion (p. 712)
  - Biomedical Sciences, BS: Diagnostic Medical Sonography (p. 713)
  - Biomedical Sciences, BS: Health Science Completion (p. 716)
  - Biomedical Sciences, BS: Health Sciences (p. 717)
  - Biomedical Sciences, BS: Medical Laboratory Science (p. 718)
  - Biomedical Sciences, BS: Public Health Microbiology (p. 721)
  - Biomedical Sciences, BS: Radiologic Technology (p. 723)
  - Biomedical Sciences, MS (p. 726)
  - Blood Banking/Immunohematology, Undergraduate Certificate (p. 727)
  - Death Investigation, Undergraduate Certificate (School of Biomedical Sciences and Health Care Administration) (p. 728)
  - Forensic Science, Undergraduate Certificate (School of Biomedical Sciences and Health Care Administration) (p. 728)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Shahla Anders	Clinical Associate Professor	MEd, MLS(ASCP)CM	Carroll University		
Cindy Brown	Clinical Associate Professor Emerita	MEd	Central Michigan University		✓
Daniel Cordas	Clinical Assistant Professor	BS	University of Wisconsin-Milwaukee		
Bradley DePons	Clinical Assistant Professor	BS, MLS(ASCP)CM	University of Wisconsin-Milwaukee		
Richard Dettman	Clinical Assistant Professor	PhD	Walden University		
Jennifer Doll	Associate Professor	PhD	Washington University	✓	
Kaitlyn Doyle	Clinical Assistant Professor	BS	University of Wisconsin-Milwaukee		
Janis Eells	Professor	PhD	University of Iowa	✓	
Fang Yao Stephen Hou	Clinical Associate Professor	PhD, MB(ASCP)QCYM, MLS(ASCPi)	University of Wisconsin-Madison	✓	
Randall Lambrecht	Professor	PhD, MT(ASCP)	University of Wisconsin-Madison		✓
Elizabeth Liedhegner	Assistant Professor	PhD	Case Western Reserve University	✓	
Zac Lunak	Clinical Associate Professor	PhD, MLS, HTL(ASCP)CM	Marquette University		
Kristen Moose	Clinical Assistant Professor	MPH	University of Michigan		
Dean Nardelli	Associate Professor	PhD	University of Wisconsin-Madison	✓	
Jason Rentmeester	Clinical Assistant Professor	BS	University of Wisconsin-Milwaukee		
Troy Skwor	Assistant Professor	PhD	Texas A&M University	✓	
Susan Stalewski	Clinical Associate Professor	MBA, MLS(ASCP)CM	Keller Graduate School of Management		
Jayne Wisniewski	Clinical Associate Professor	MEd	Carroll University, WI		

## Biomedical Sciences, BS: Biomedical Science

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. Students choose from one of the following seven areas or submajors:

- Medical Laboratory Science
- Biomedical Science
- Cytotechnology
- Radiologic Technology
- Diagnostic Medical Sonography
- Diagnostic Imaging (degree completion program)
- Health Science (degree completion program)
- Public Health Microbiology

All students will be required to comply with a background check, drug screen, and maintain health insurance during the professional training experience.

### Biomedical Science

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. This submajor provides excellent preparation for medical, physician assistant, dental,

veterinary school, research and other related fields that require an advanced degree.

### Requirements

This program is intended for students who wish to pursue an education in a laboratory-based program with the intent of working in the healthcare industry or for pursuing graduate health profession study. Sufficient elective credits are included to facilitate custom degree pathways. The minimum number of credits required to complete this degree is 120. Students who need background preparation courses in math, English, foreign language, or chemistry may need additional credits. This program does not lead to certification as a Medical Laboratory Scientist.

The minimum degree requirement for completion is 120 credits including:

1. Completion of UWM's General Education Requirements (GER) (p. 30);
2. A cumulative UWM minimum grade point average of 2.5;
3. A cumulative minimum grade point average of 2.5 in specific, required science courses;
4. Completion of all required courses and electives (87 credits) through the second semester of junior year (per plan of study);
5. A grade of C or better in all junior-level courses.

## Biomedical Science Submajor Requirements

Code	Title	Credits
CHPS 100	New Student Seminar in Health Professions	1
BIO SCI 202	Anatomy and Physiology I <sup>1</sup>	4
CHEM 102	General Chemistry <sup>1</sup>	5
BIO SCI 203	Anatomy and Physiology II <sup>1</sup>	4
CHEM 104	General Chemistry and Qualitative Analysis <sup>1</sup>	5
HS 224	Computational Tools for Healthcare Professionals	3
THERREC 103	Life Balance: An Understanding of Leisure (or equivalent) <sup>2</sup>	3
BIO SCI 150	Foundations of Biological Sciences I <sup>1</sup>	4
BMS 301	Human Pathophysiology: Fundamentals <sup>1</sup>	1
BMS 302	Human Pathophysiology: Organ Systems I <sup>1</sup>	1
BMS 303	Human Pathophysiology: Organ Systems II <sup>1</sup>	1
CHEM 341	Introductory Survey of Organic Chemistry <sup>1</sup>	3
CHEM 342	Introductory Organic Chemistry Laboratory <sup>1</sup>	2
COMSDIS 250	Interprofessional Communication in the Health Sciences (or equivalent) <sup>3</sup>	3
BIO SCI 325	Genetics <sup>1</sup>	4
BMS 304	Human Pathophysiology: Organ Systems III <sup>1</sup>	1
BMS 305	Human Pathophysiology: Organ Systems IV <sup>1</sup>	1
BMS 245	Client Diversity in Health Sciences: An Interdisciplinary Perspective (or equivalent) <sup>4</sup>	3
ENGLISH 207	Health Science Writing (or equivalent)	3
BIO SCI 383	General Microbiology <sup>1</sup>	4
BMS 427	Clinical Immunology <sup>1</sup>	3
BMS 428	Clinical Immunology Laboratory <sup>1</sup>	1
CHEM 501	Introduction to Biochemistry <sup>1</sup>	3
BMS 420	Clinical Hematology	3
BMS 421	Introduction To Hematology Laboratory	1
BMS 431	Clinical Chemistry	3
BMS 432	Clinical Chemistry Laboratory Theory & Operations	1
BMS 517 or BMS 717	Laboratory Technology: Theory and Practice	2
BMS 518 or BMS 718	Experimental Design and Research in Biomedical Sciences	1
BMS 534	Medical Microbiology	3
BMS 535	Medical Microbiology Laboratory	2

BMS 560	Molecular and Genetic Diagnostics	2
BMS 561	Molecular Diagnostics Laboratory	1
BMS 547	Clinical Laboratory Diagnosis	3
BMS 555	Toxicology and Therapeutic Drug Monitoring	1
Additional Electives and GER Competencies <sup>5</sup>		31
KIN 270	Statistics in the Health Professions: Theory and Practice	3
<b>Total Credits</b>		<b>120</b>

<sup>1</sup> Required science courses - 2.5 average GPA.

<sup>2</sup> Fulfills 3 credits of GER Humanities.

<sup>3</sup> Fulfills 3 credits of GER Social Science.

<sup>4</sup> Fulfills 3 credits of both Cultural Diversity and Social Science.

<sup>5</sup> Electives posted in final year only necessary to complete credit requirement for graduation.

BMS 101, BMS 205, BMS 531 and BMS 549 are recommended, but not required.

### Suggested Elective Certificates

(Please consult advising regarding certificate requirements):

Molecular Diagnostics Certificate (p. 730)

Health Care Informatics Certificate (p. 734) (**available online**)

Health Care Administration Minor (p. 734) (**available online**)

## Biomedical Science Submajor Requirements

### Year 1

Semester 1		Credits
CHPS 100	New Student Seminar in Health Professions	1

<sup>1</sup> Required science courses - 2.5 average GPA.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Biomedical Sciences, BS: Cytotechnology

**Effective Fall 2024, the Cytotechnology submajor has suspended admission.**

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. Students choose from one of the following seven areas or submajors:

- Medical Laboratory Science
- Biomedical Science
- Cytotechnology
- Radiologic Technology
- Diagnostic Medical Sonography
- Diagnostic Imaging (degree completion program)
- Health Science (degree completion program)
- Public Health Microbiology

All students will be required to comply with a background check, drug screen, and maintain health insurance during the professional training experience.

## Cytotechnology

Cytotechnologists examine human cells under the microscope, looking for early signs of cancer or other diseases. When abnormal cells are detected, the cytotechnologist works with a pathologist to arrive at a final diagnosis. Students enrolled in the Cytotechnology Program will complete their senior year of professional clinical training at the UW / State Lab of Hygiene in Madison.

**Effective Fall 2024, the Cytotechnology submajor has suspended admission.**

## Requirements

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. All students, with the exception of students in the Diagnostic Imaging or Health Sciences degree completion program, will be required to comply with a background check and maintain health insurance during the professional training experience.

The process of application to the professional training occurs at the end of the first semester of the junior year.

Entry into professional training or internship is competitive and dependent upon:

1. Completion of UWM's General Education Requirements (GER) (p. 30);
2. A cumulative UWM minimum grade point average of 2.5;
3. A cumulative minimum grade point average of 2.5 in specific, required science courses;
4. Completion of:
  - a. all required courses and electives (87 credits) through the second semester of junior year for students pursuing Cytotechnology, or Medical Laboratory Science;
  - b. all required courses and electives (114 credits) through the first semester of senior year for students pursuing Public Health Microbiology; and
5. A grade of C or better in all junior-level courses.

Students who meet these minimum requirements for entry into professional training will be evaluated on the basis of their science GPA for placement at one of the training sites.

To remain eligible to continue in the professional training, students must earn a grade of C or better in all senior-level courses.

HS 224	Computational Tools for Healthcare Professionals	3
KIN 270	Statistics in the Health Professions: Theory and Practice	3

<sup>1</sup> Course counts towards a student's science GPA.

## Pre-Clinical Requirements

The junior year for students pursuing the Cytotechnology, or Medical Laboratory Science submajor consists primarily of pre-clinical courses, and the senior year is a 12-month professional training experience.

Medical Laboratory Science and Cytotechnology students must be prepared for full-time study (40 hours per week) that could also require additional study time at night and on weekends.

BMS 541	Urinalysis	1
BMS 542	Applied Clinical Chemistry	2
BMS 560	Molecular and Genetic Diagnostics	2
BMS 561	Molecular Diagnostics Laboratory	1

<sup>2</sup> BMS 101 and BMS 205 are highly recommended but not required.

## Cytotechnology Submajor Requirements

Code	Title	Credits
BMS 501	Introduction to Cytotechnology	1
BMS 575	Cytology of the Female Genital Tract - I	4
BMS 576	Cytology of the Female Genital Tract - II	4
BMS 577	Cytology of the Respiratory Tract	3
BMS 578	Cytology of the Gastrointestinal and the Genito-Urinary Tract	2
BMS 579	Cytology of Effusions and the Central Nervous System	3
BMS 580	Aspiration Cytology	4
BMS 581	Special Procedures in Cytology	1
BMS 582	Cytology of the Breast	1
BMS 583	Cytology Preparation Techniques	1
BMS 586	Cytology Lab Operations and Quality Control	1
BMS 587	Research Methods in Cytology	1
BMS 588	Diagnostic Microscopy in Cytology	5

Students apply to be admitted to the State Hygiene Lab in Madison, WI for their clinical rotations.

## Biomedical Sciences Requirements

Year 1		
Semester 1		Credits
BIO SCI 202	Anatomy and Physiology I	4
BMS 101	Introduction to Clinical Laboratory Sciences <sup>1</sup>	2
BMS 205	Introduction to Diagnostic Medicine <sup>1</sup>	3
CHEM 102	General Chemistry	5
GER Elective: Arts		3
<b>Credits</b>		<b>17</b>

Semester 2		
		Credits
BIO SCI 203	Anatomy and Physiology II	4
CHEM 104	General Chemistry and Qualitative Analysis	5
HS 224	Computational Tools for Healthcare Professionals	3
GER Elective: Humanities		3
<b>Credits</b>		<b>15</b>

Year 2		
Semester 1		Credits
BIO SCI 150	Foundations of Biological Sciences I	4
BMS 301	Human Pathophysiology: Fundamentals	1
BMS 302	Human Pathophysiology: Organ Systems I	1
BMS 303	Human Pathophysiology: Organ Systems II	1
CHEM 341	Introductory Survey of Organic Chemistry	3
CHEM 342	Introductory Organic Chemistry Laboratory	2
ENGLISH 207	Health Science Writing (DWCB) <sup>2</sup>	3
<b>Credits</b>		<b>15</b>

Semester 2		
		Credits
BIO SCI 325	Genetics	4
BMS 304	Human Pathophysiology: Organ Systems III	1
BMS 305	Human Pathophysiology: Organ Systems IV	1

KIN 270	Statistics in the Health Professions: Theory and Practice (QLB)	3
GER Elective: Social Science		3
GER Elective: Social Science		3
<b>Credits</b>		<b>15</b>

Year 3		
Semester 1		
BIO SCI 383	General Microbiology	4
BMS 427	Clinical Immunology	3
BMS 428	Clinical Immunology Laboratory	1
CHEM 501	Introduction to Biochemistry	3
GER Elective: Humanities		3
<b>Credits</b>		<b>14</b>

Semester 2		
		Credits
BMS 420	Clinical Hematology	3
BMS 421	Introduction To Hematology Laboratory	1
BMS 431	Clinical Chemistry	3
BMS 432	Clinical Chemistry Laboratory Theory & Operations	1
BMS 534	Medical Microbiology	3
BMS 535	Medical Microbiology Laboratory	2
BMS 560	Molecular and Genetic Diagnostics	2
BMS 561	Molecular Diagnostics Laboratory	1
<b>Credits</b>		<b>16</b>

Year 4		
Summer		
BMS 521	Applied Clinical Hematology	2
BMS 522	Hemostasis	1
BMS 536	Applied Clinical Microbiology	2
BMS 537	Medical Parasitology and Mycology	2
BMS 541	Urinalysis	1
BMS 542	Applied Clinical Chemistry	2
<b>Credits</b>		<b>10</b>
<b>Total Credits</b>		<b>102</b>

<sup>1</sup> BMS 101 and BMS 205 are highly recommended but not required.

<sup>2</sup> ENGLISH 207 is required for students without any credit prior to Fall 2013.

## Cytotechnology Submajor Requirements

Year 4		
Semester 1		Credits
BMS 501	Introduction to Cytotechnology	1
BMS 575	Cytology of the Female Genital Tract - I	4
BMS 576	Cytology of the Female Genital Tract - II	4
BMS 577	Cytology of the Respiratory Tract	3
<b>Credits</b>		<b>12</b>

Semester 2		
		Credits
BMS 578	Cytology of the Gastrointestinal and the Genito-Urinary Tract	2
BMS 579	Cytology of Effusions and the Central Nervous System	3
BMS 580	Aspiration Cytology	4
BMS 581	Special Procedures in Cytology	1
BMS 582	Cytology of the Breast	1
BMS 586	Cytology Lab Operations and Quality Control	1
<b>Credits</b>		<b>12</b>
<b>Total Credits</b>		<b>24</b>

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

# Biomedical Sciences, BS: Diagnostic Imaging Completion

## Diagnostic Imaging Degree Completion

An aging workforce, new technologies, and growing demand for Bachelor's prepared health professionals make this a great time to enroll in the Bachelor of Science in Biomedical Sciences: Diagnostic Imaging degree program.

Available in a fully online semester-based program or the competency-based UW Flexible Option program, this degree prepares you for a wide range of positions and leadership roles in the health care industry, including quality-assurance manager, healthcare administrator, diagnostic imaging educator, and others that require a bachelor's degree for entry to advanced education programs. With a Bachelor of Science in Diagnostic Imaging, you will also be qualified to expand your career into other areas of the medical imaging industry and health-related industries.

This degree completion is designed for healthcare professionals who hold active ARDMS (American Registry for Diagnostic Medical Sonography), ARMRIT (American Registry of Magnetic Resonance Imaging Technologists), ARRT (American Registry of Radiologic Technologists), or CCI (Cardiovascular Credentialing International) registry. **Students with active registries are awarded at least 60 advanced standing credits.** You'll complete a curriculum designed to learn the skills and knowledge most employers value. Please see the requirements tab for details of admission and program curriculum.

## Program Outcomes

- Integrate leadership, management, teaching/learning methods, and healthcare regulations into professional practice.
- Display effective communication skills as appropriate to a given situation or encounter.
- Demonstrate integrative problem-solving, analytical, and critical thinking skills.
- Demonstrate commitment to professional growth, ethical values, career development, scholarly activities, and contributions to the profession and post-baccalaureate education.
- Demonstrate the breadth and depth of the university educational preparation, including understanding culturally diverse communities.

Learn more about the UW Flexible Option (<https://flex.wisconsin.edu/degrees-programs/diagnostic-imaging/>).

## Requirements

Offered Online and in the UW FLEX Option format.

This interdisciplinary degree completion program in Diagnostic Imaging is open to professionals holding an active registry from ARRT, ARDMS, CCI, or equivalent professional imaging registry. Applicants with the required credentials are awarded 30 block credits plus natural transfer credits equaling a minimum of 60 credits and a maximum of 72 credits. (A maximum of 72-semester credits can be transferred from a single or combination of associate degree/2-year institutions. There is no maximum number of semester credits that can be transferred from a 4-year university). A minimum of 120 credits is required to complete the bachelor's degree including all required courses. The final 30 credits must be completed at UWM. Students with GER requirements or those planning application to specific professional graduate programs may need to complete more credits. Coursework may be completed online or in a flexible, competency-based format.

The minimum degree requirement for completion is 120 credits including:

1. Completion of UWM's General Education Requirements (GER) (p. 30) and competencies.
  - a. ENGLISH 206 or ENGLISH 207 and KIN 270 are recommended if competencies are not met on transfer.
2. A cumulative UWM GPA of 2.5.
3. The flexible option requires a B- or better grade in all required courses.
4. Completion of the following courses:

Code	Title	Credits
<b>Awarded for Active Registry</b>		
30 credits		
<b>Major Requirements</b>		
<i>Core requirements</i> <sup>1</sup>		
HS 102	Healthcare Delivery in the United States	3
BMS 205	Introduction to Diagnostic Medicine	3
HCA 220	Leading Healthcare Professionals	3
BMS 245	Client Diversity in Health Sciences: An Interdisciplinary Perspective	3
<i>Advanced Health Sciences/Imaging coursework</i> <sup>1</sup>

BMS 305	Human Pathophysiology: Organ Systems IV	1
HS 311	Law and Ethics for Healthcare Professionals	3
DMI 458	Seminar in Advanced Medical Imaging	3
DMI 463	Seminar in Education and Management in Medical Imaging	3
DMI 496	Professional Growth and Career Advancement in Diagnostic Imaging Professions	3
UWS NSG 453	Information Management and Healthcare Technology	3
BMS 435	Foundations of Interprofessional Education and Practice	3
<i>Electives</i> <sup>2</sup>		25
<b>Total Credits</b>		<b>60</b>

<sup>1</sup> Completed with a grade of C or better. Flexible option courses must be completed with a grade of B- or better.

<sup>2</sup> Electives to include QLB and OWCB if needed. KIN 270 or equivalent recommended for students planning on graduate education.

Students must complete all requirements within 6 years of entering the program.

Students interested in UW Flexible Option can find additional information here (<https://flex.wisconsin.edu/degrees-programs/diagnostic-imaging/>).

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Biomedical Sciences, BS: Diagnostic Medical Sonography

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. Students choose from one of the following seven areas or submajors:

- Medical Laboratory Science
- Biomedical Science
- Cytotechnology
- Radiologic Technology
- Diagnostic Medical Sonography
- Diagnostic Imaging (degree completion program)
- Health Science (degree completion program)
- Public Health Microbiology

All students will be required to comply with a background check, drug screen, and maintain health insurance during the professional training experience.

## Diagnostic Medical Sonography

By using high-frequency sound waves or ultrasound, sonographers produce images of soft tissue and blood flow to assist with the diagnostic process or administration of therapeutic application. Sonography is used to examine the abdomen, breast tissue, female reproductive system, urinary system, heart, and blood vessels. In addition, sound waves are used to guide fine-needle biopsy. Diagnostic Medical Sonography students complete the first two years of prerequisite courses on campus before applying for placement into the professional education portion of the curriculum. Once accepted into the professional education component of the program, students will take didactic and clinical education courses concurrently. Upon successful completion of the Bachelor of Science degree, students are eligible to write the national board exams offered through the American Registry for Diagnostic Medical Sonography ([www.ardms.org](http://www.ardms.org/) (<http://www.ardms.org/>)). The Diagnostic Medical Sonography professional education program is accredited by the Commission on Accreditation of Allied Health Education Programs ([www.caahep.org](http://www.caahep.org/) (<http://www.caahep.org/>)) upon recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography.

Commission on Accreditation of Allied Health Education Programs  
(CAAHEP)  
25400 U.S. Highway 19 North, Suite 158  
Clearwater, FL 33763  
(727) 210-2354

## Requirements

Students pursuing Diagnostic Medical Sonography complete their freshman and sophomore years on campus. Upon advancement to the major, students complete the professional training curriculum (junior and senior years) at one of three external clinical affiliate sites: Froedtert Hospital (Milwaukee), Advocate Aurora St. Luke's (Milwaukee), or UW Hospital and Clinics (Madison, WI). Two educational options

are available: General/Vascular Sonography or Echocardiography/Vascular Sonography. Students are responsible for any relocation and all living expenses during clinical training. Requirements for entry into the professional programs may vary by site; students should contact the Academic Advisor for this program, Bill Mueller, for the most current site/program requirements. Mr. Mueller may be reached via e-mail at [muellew@uwm.edu](mailto:muellew@uwm.edu).

Entry into the clinical major is competitive, with the minimum requirements listed below. Completion of the minimum requirements does not guarantee admission.

1. Completion of UWM's General Education Requirements (GER) (p. 30).
2. Completion of all required courses and electives (56 credits) in the preclinical semesters with a cumulative GPA of 3.0; a maximum of 4 courses may be repeated once.
3. Successful completion of the professional education application process to include an on-site interview with the external sonography programs.
4. Successful completion of a background check, health physical, drug screen, and maintenance of health insurance and CPR certification for the duration of the professional curriculum.
5. Students are required to earn a grade of C or better in the following:

Code	Title	Credits
DMI 300	Diagnostic Medical Imaging Fundamentals	2
BIO SCI 202	Anatomy and Physiology I	4
CHEM 100	Chemical Science	4
BIO SCI 203	Anatomy and Physiology II	4
BMS 301	Human Pathophysiology: Fundamentals	1
BMS 302	Human Pathophysiology: Organ Systems I	1
BMS 303	Human Pathophysiology: Organ Systems II	1
BMS 304	Human Pathophysiology: Organ Systems III	1
BMS 305	Human Pathophysiology: Organ Systems IV	1

6. Complete a minimum of eight hours shadowing a sonographer: four hours of cardiac sonography and four hours in general sonography with a Registered Diagnostic Medical Sonography professional prior to applying for placement into the professional education component.
7. Completion of a CNA (Certified Nursing Assistant) course is required for the clinical application and placement. View a list of WI nurse aide training programs at [www.dhs.wisconsin.gov/caregiver/](http://www.dhs.wisconsin.gov/caregiver/) (<http://www.dhs.wisconsin.gov/caregiver/>).

Admission into the professional training curriculum is highly competitive and final admission decisions rest with the program directors. Admission is not guaranteed. To remain eligible to continue in the professional training curriculum, students must adhere to all program policies and procedures.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Biomedical Sciences, BS: Health Science Completion

### Health Sciences Degree Completion

Health science is the application of science to health, including the study of medicine, nutrition, and other health-related topics and how they affect humans. An aging workforce, new technologies, and continuous demand for experienced healthcare professionals make this the perfect time to enroll in the Bachelor of Science in Biomedical Sciences: Health Sciences degree completion sub-major. Stay competitive in today's job market and improve your opportunity for career advancement or career change.

Available in a semester-based online format or and the self-paced, competency-based (<https://flex.wisconsin.edu/blog/competency-based-education-what-it-is-how-its-different-and-why-it-matters-to-you/>) UW Flexible Option format, this degree completion program offers you the opportunity to build on your previous education and develop or strengthen skills in critical thinking, problem-solving, information literacy, informatics, management, and education in the health professions. Graduates are prepared to assume roles in clinical and non-clinical settings such as hospitals and other patient care facilities, government organizations, or insurance companies. This program may also provide the foundation required for entry into advanced degree programs such as physical or occupational therapy, physician's assistance, and more.

This bachelor's degree is designed for learners returning to higher education with an associate degree in any field or at least 60 transferrable credits. **Associate degree holders are awarded at least 60 advanced standing credits.** You'll complete a curriculum designed to learn the skills and knowledge most employers value. Please see the requirements tab for details of admission and program curriculum.

### Program Outcomes

- Integrate leadership, management, teaching/learning methods, and healthcare regulations into professional practice.
- Display effective communication skills as appropriate to a given situation or encounter.
- Demonstrate integrative problem-solving, analytical, and critical thinking skills.
- Demonstrate commitment to professional growth, ethical values, career development, scholarly activities, and contributions to the profession and post-baccalaureate education.
- Demonstrate the breadth and depth of the university educational preparation, including understanding culturally diverse communities.

Learn more about the UW Flexible Option. (<https://flex.wisconsin.edu/degrees-programs/health-sciences/>)

## Requirements

Offered Online, Blended and in the UW Flexible Option format.

This interdisciplinary degree completion in Health Sciences is open to those holding an associate degree or with 60 transferrable credits. Applicants holding an associate degree are awarded 30 block credits plus

natural transfer credits equaling a minimum of 60 credits and a maximum of 72 credits. Applicants with 60 transferrable credits are awarded actual advanced standing credit. (A maximum of 72 semester credits can be transferred from a single or combination of associate degree/2-year institutions. There is no maximum number of semester credits that can be transferred from a 4-year university). A minimum of 120 credits is required to complete the bachelor's degree including all required courses. The final 30 credits must be completed at UWM. Students with GER requirements or those planning applications to specific professional graduate programs may need to complete more credits. Coursework may be completed online or in a flexible, competency-based format.

The minimum degree requirement for completion is 120 credits including:

1. Completion of UWM's General Education Requirements (GER) (p. 30), and
2. Completion of math and English competency requirements, and
  - a. ENGLISH 207 or ENGLISH 206 and KIN 270 are recommended if competencies are not previously completed
3. A cumulative UWM GPA of 2.5, and
4. A minimum of 30 credits from UWM.

BMS 435	Foundations of Interprofessional Education and Practice	3
THERREC 303	Inclusive and Disability Programs in the Community	3
<i>Electives</i>		24
<b>Total Credits</b>		<b>60</b>

Students must complete all requirements within 6 years of entering the program.

Students interested in UW Flexible Option can find additional information here (<https://flex.wisconsin.edu/degrees-programs/health-sciences/>).

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Biomedical Sciences, BS: Health Sciences

### Biomedical Sciences: Health Sciences

Have you completed at least thirty credits toward your bachelor's degree? Do you want to finish your bachelor's degree in a health-related field? Do you need a flexible curriculum that makes the most of your previously earned credits? An aging workforce, new technologies, and continuous demand for bachelor's prepared healthcare professionals make this the perfect time to finish your Bachelor of Science in Biomedical Sciences: Health Sciences degree.

The Biomedical Sciences: Health Sciences sub-major allows you to build on completed coursework and to develop or strengthen skills in critical thinking, problem-solving, information literacy, informatics, management, and education in the health professions. The flexible curriculum allows you to include undergraduate certificates related to disability, health and wellness, informatics, and healthcare administration.

### Program Competencies

- Integrate leadership, management, teaching/learning methods, and healthcare regulations.
- Display effective communication skills as appropriate to a given situation or encounter.
- Demonstrate integrative problem-solving and critical-thinking skills.
- Demonstrate commitment to professional growth, ethical values, career development, and teamwork.

- Demonstrate the breadth and depth of the university educational preparation, including the understanding of culturally diverse communities.
- Demonstrate technological and office skills.

Please see the requirements tab for the complete curriculum and contact Kenzie Kougale (mlkougale@uwm.edu) in the College of Health Professions and Sciences for more information. Don't leave your completed credits behind!

## Requirements

The interdisciplinary Biomedical Sciences: Health Sciences submajor is open to those who have successfully completed 30 or more credits as intended majors at a four year or two year institution. It is not open for new freshman.

The minimum degree requirement for completion is 120 credits including:

1. Completion of UWM's General Education requirements (GER) (p. 30), and
2. Completion of math and English competency requirements, and
3. A cumulative UWM GPA of 2.5, and
4. A final 30 credits from UW-Milwaukee.

Student plans of study are individualized based on previously completed coursework and student learning and professional goals. Credits must be distributed as follows:

Code	Title	Credits
GER and competencies		36
Lower division health credits (excess upper level credits may count for lower division health credit requirements) <sup>1</sup>		27
Upper division health credits; credits must be at the 300 level or above <sup>1</sup>		27
General electives		30
<i>BMS Required Coursework (12 credits)<sup>2</sup></i>		
BMS 433	Teamwork in the Health Professions	
BMS 434	Professional Development in the Health Sciences	
Additional BMS or DMI Course Electives (6 credits)		
<b>Total Credits</b>		<b>120</b>

<sup>1</sup> 30 credits must be earned with CHPS. CHPS credits may be earned in the following subject areas: BMS (p. 1518), COMSDIS (p. 1641), DMI (p. 1705), HCA (p. 1856), HS (p. 1863), NURS (p. 2026), OCCTHPY (p. 2046), PEACEST (p. 2055), and THERREC (p. 2154). The other 24 required health credits can be within CHPS or Zilber College of Public Health or as approved by the program director.

<sup>2</sup> 12 credits of BMS coursework is required. BMS 433 and BMS 434 will be applied to the 'Upper division health science credit'. The additional 6 BMS elective credits will be applied to lower or upper division credit depending on the course level.

## Admission to the Major

Students must have:

- Completion of 30 credits as intended majors at a four year or two year institution
- Satisfactory academic standing

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Biomedical Sciences, BS: Medical Laboratory Science

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. Students choose from one of the following seven areas or submajors:

- Medical Laboratory Science
- Biomedical Science
- Cytotechnology
- Radiologic Technology
- Diagnostic Medical Sonography
- Diagnostic Imaging (degree completion program)
- Health Science (degree completion program)
- Public Health Microbiology

All students will be required to comply with a background check, drug screen, and maintain health insurance during the professional training experience.

## Medical Laboratory Science

Medical laboratory scientists are trained in the theoretical and practical aspects of laboratory medicine, which are critical to the detection, diagnosis, and treatment of diseases. Medical Laboratory Science

offers a wide variety of career options, including hospitals, clinics, independent laboratories, public health facilities, and research. Students also may use this major to prepare for medical or graduate school. Students successfully completing this program are eligible to sit for a national certification exam offered by the American Society for Clinical Pathology (ASCP-BOC). The UWM Medical Laboratory Science Program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), [www.naacls.org](http://www.naacls.org) (<http://www.naacls.org>), located at 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119.

## Requirements

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. All students, with the exception of students in the Diagnostic Imaging or Health Sciences degree completion program, will be required to comply with a background check and maintain health insurance during the professional training experience.

The process of application to the professional training occurs at the end of the first semester of the junior year.

Entry into professional training or internship is competitive and dependent upon:

1. Completion of UWM's General Education Requirements (GER) (p. 30);
2. A cumulative UWM minimum grade point average of 2.5;
3. A cumulative minimum grade point average of 2.5 in specific, required science courses;
4. Completion of:
  - a. all required courses and electives (87 credits) through the second semester of junior year for students pursuing Cytotechnology, or Medical Laboratory Science;
  - b. all required courses and electives (114 credits) through the first semester of senior year for students pursuing Public Health Microbiology; and
5. A grade of C or better in all junior-level courses.

Students who meet these minimum requirements for entry into professional training will be evaluated on the basis of their science GPA for placement at one of the training sites.

To remain eligible to continue in the professional training, students must earn a grade of C or better in all senior-level courses.

## Pre-Clinical Requirements

The junior year for students pursuing the Cytotechnology, or Medical Laboratory Science submajor consists primarily of pre-clinical courses, and the senior year is a 12-month professional training experience.

Medical Laboratory Science and Cytotechnology students must be prepared for full-time study (40 hours per week) that could also require additional study time at night and on weekends.

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Biomedical Sciences, BS: Public Health Microbiology

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. Students choose from one of the following seven areas or submajors:

- Medical Laboratory Science
- Biomedical Science
- Cytotechnology
- Radiologic Technology
- Diagnostic Medical Sonography
- Diagnostic Imaging (degree completion program)
- Health Science (degree completion program)
- Public Health Microbiology

All students will be required to comply with a background check, drug screen, and maintain health insurance during the professional training experience.

## Public Health Microbiology

Public health microbiology prepares students for a career in the laboratory disciplines of public health. Specifically, students will be educated in a broad range of sciences in order to perform investigatory and laboratory-based analyses of environmental samples for microbial contaminants of interest. Emphasis is placed on pathogenic disease and the human populations that they affect. Graduates can work in a variety of settings, such as public health, hospital and research laboratories. Students successfully completing this program may sit for the American Society for Clinical Pathology (ASCP-BOC) Technologist in Microbiology national certification exam.

## Requirements

Students must achieve the satisfactory completion of 127 credits.

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. All students, with the exception of students in the Diagnostic Imaging or Health Sciences degree completion program, will be required to comply with a background check and maintain health insurance during the professional training experience.

The process of application to the professional training occurs at the end of the first semester of the junior year.

Entry into professional training or internship is competitive and dependent upon:

1. Completion of UWM's General Education Requirements (GER) (p. 30);
2. A cumulative UWM minimum grade point average of 2.5;
3. A cumulative minimum grade point average of 2.5 in specific, required science courses;
4. Completion of:
  - a. all required courses and electives (87 credits) through the second semester of junior year for students pursuing Cytotechnology, or Medical Laboratory Science;
  - b. all required courses and electives (114 credits) through the first semester of senior year for students pursuing Public Health Microbiology; and
5. A grade of C or better in all junior-level courses.

Students who meet these minimum requirements for entry into professional training will be evaluated on the basis of their science GPA for placement at one of the training sites.

To remain eligible to continue in the professional training, students must earn a grade of C or better in all senior-level courses.

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Biomedical Sciences, BS: Radiologic Technology

Students in the Biomedical Sciences major are awarded a Bachelor of Science degree upon completion of all requirements. Students choose from one of the following seven areas or submajors:

- Medical Laboratory Science
- Biomedical Science
- Cytotechnology
- Radiologic Technology
- Diagnostic Medical Sonography
- Diagnostic Imaging (degree completion program)
- Health Science (degree completion program)
- Public Health Microbiology

All students will be required to comply with a background check, drug screen, and maintain health insurance during the professional training experience.

## Radiologic Technology

Radiologic technologists, or radiographers, use X-Rays and administer contrast media to produce images of the human skeleton, chest, digestive tract, and urinary system. The radiographer works closely with the radiologist or physician. Students complete the first two years of prerequisite courses on campus before applying for placement into the professional education portion of the curriculum. Once accepted into the professional education component of the program, students will take didactic and clinical education courses concurrently. Upon successful completion of the Bachelor of Science degree, students are eligible to write the national registry exam administered by the American Registry of Radiologic Technologists ([www.arrt.org](https://www.arrt.org) (<https://www.arrt.org/>)).

The Radiologic Technology professional education programs are accredited by:

Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 N. Wacker Dr., Suite 2850, Chicago, IL 60606. [www.jrcert.org](http://www.jrcert.org) (<http://www.jrcert.org/>)

## Requirements

Students pursuing the Biomedical Sciences: Radiologic Technology submajor complete the freshman and sophomore years on campus. Students accepted into the professional education curriculum complete the junior and senior years at either the on-campus UWM radiography program or off campus through external radiography programs offered at Froedtert Hospital in Milwaukee, UW Hospital & Clinics in Madison, Wheaton Franciscan All Saints in Racine, and Wheaton Franciscan St. Joseph in Milwaukee. Students are responsible for any relocation and all living expenses during clinical education.

Entry into professional training is competitive and dependent upon:

1. Completion of UWM's General Education Requirements (GER) (p. 30);
2. Completion of all required courses and electives (56 credits) in the freshman and sophomore semesters with a cumulative GPA of 2.5; a maximum of 4 courses may be repeated once.
3. Successful completion of the professional education application process to include an interview with the UWM radiography program and on-site interviews with the affiliated radiography programs;
4. Successful completion of a background check, health physical, and drug screen prior to the beginning of the professional curriculum, and maintenance of health insurance and CPR certification for the duration of the professional curriculum;
5. Students are required to earn a grade of C or better in the following:

Code	Title	Credits
BIO SCI 202	Anatomy and Physiology I	4
BIO SCI 203	Anatomy and Physiology II	4
BMS 301	Human Pathophysiology: Fundamentals	1
BMS 302	Human Pathophysiology: Organ Systems I	1
BMS 303	Human Pathophysiology: Organ Systems II	1
BMS 304	Human Pathophysiology: Organ Systems III	1
BMS 305	Human Pathophysiology: Organ Systems IV	1
CHEM 100	Chemical Science	4
DMI 300	Diagnostic Medical Imaging Fundamentals	2

6. Completion of a job-shadowing experience in an imaging department with a Radiologic Technology professional prior to applying for placement into the professional education component is required; and
7. Completion of a CNA (Certified Nursing Assistant) course is highly recommended, but not required. View a list of WI nurse aide training programs at [www.dhs.wisconsin.gov/caregiver/](http://www.dhs.wisconsin.gov/caregiver/) (<http://www.dhs.wisconsin.gov/caregiver/>).

Admission into the professional curriculum is competitive and final admission decisions rest with the program directors. Admission is not guaranteed. To remain eligible to continue in the professional education curriculum, students must adhere to all policies and procedures of the program they are attending. Once accepted into the professional education curriculum students will be provided with a copy of the program's policies and procedures.

An example of the radiologic technology curriculum may be found on the Plan of Study tab.

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Biomedical Sciences, MS

The Biomedical Sciences Department offers a program of graduate education providing an advanced level of study for students interested in biology as it relates to human health, medicine, and disease. Major emphasis in the program is placed on developing an understanding of the mechanisms involved in human diseases and providing broad-based training in both basic and applied biomedical sciences. In-depth training is offered in selected areas of emphasis, such as immunology, the pathogenesis of infectious diseases, toxicology, pharmacology, neurodegeneration, and cancer biology. The MS degree has two tracks.

1. **Thesis Track** requirements include a thesis based on hypothesis-driven research conducted by the student to enhance problem-solving abilities and the student's capacity to function more effectively in the biomedical field.
2. The **Non-Thesis Track** is designed for students who want to gain knowledge in the biomedical sciences by taking courses focused on human health and disease without a research component. This track may be suitable for a variety of students, including those who currently work in a laboratory setting and wish to obtain a higher degree and those requiring a degree beyond the bachelor's level to teach.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus the following requirements to be considered for admission:

1. The program primarily enrolls individuals with backgrounds in biomedical sciences or related fields who have completed a bachelor's degree at an accredited institution. For students entering without a degree in a related area, the faculty determines deficiencies to be overcome prior to admission. Applications will not be reviewed until all required materials are obtained by the program. All completed applications received prior to February 1 will receive consideration for enrollment beginning the following Summer term for the Non-Thesis Track or Fall semester for the Thesis Track. Completed applications received after February 1 may be considered if space is available in the program. Students may enroll on a full-time or a part-time basis.
2. Applicants may be admitted to regular status if their grade point average is the equivalent of 2.75 or above (scale of 4.0). Averages below 2.75 may be considered for admission on a probationary basis, in which case particular attention is given to the last 60 hours completed in the undergraduate program, with special emphasis on performance in biomedical science-related courses. Probationary

status is removed after successful completion of the first eight graduate credits with a grade point average of 3.0 or above.

3. Graduate Record Examination (<http://uwm.edu/graduateschool/admission/#gre>) scores on the General Test are optional, although encouraged.
4. Three letters of reference, preferably from academic and/or research sources or supervisors, must be provided.
5. The applicant must provide a statement of not more than 1,000 words providing career objectives and reasons for seeking a degree in the UWM Biomedical Sciences Graduate Program.
6. Students **must identify**, at the time of applying, whether they seek enrollment in the Thesis Track or Non-Thesis Track. Students wishing to change tracks after admission must receive approval of the program.

## Credits and Courses

The minimum degree requirement is 32 graduate credits.

### Thesis Track

Eighteen (18) core curricular credits and a minimum of 8 credits in research (BMS 799) must be taken. Substitutions to these courses require approval of the Program.

Code	Title	Credits
BMS 710	Seminar in Biomedical Sciences (1 credit per semester; 3 credits total)	3
BMS 717	Laboratory Technology-Theory and Practice	2
BMS 718	Experimental Design and Research in Biomedical Sciences	1
Choose one of the following in Immunology:		3
BMS 750	Infection and Immunity	
BMS 751	Immunopathology	
Choose one of the following in Molecular Biology:		3
BMS 705	Molecular Pathology	
BMS 756	Current Concepts in Cancer	
BMS 765	Molecular Pathophysiology	
Choose one of the following in Pathogenesis:		3
BMS 701	Human Pathophysiology I	
BMS 702	Human Pathophysiology II	
BMS 775	Mechanisms of Infectious Disease	
Choose one of the following in Statistics:		3
PSYCH 510G	Advanced Psychological Statistics	
KIN 702	Statistical Analysis in the Health Sciences	
PH 702	Introduction to Biostatistics	
PH 712	Probability and Statistical Inference	
BMS 799	Research in Biomedical Sciences	8
<b>Total Credits</b>		<b>26</b>

The remaining 6 credits required for the degree are electives, of which at least 3 must be taken for graduate credit from within the BMS Program. Program approval is required for BMS 590 credits to be applied towards the degree. BMS 599: Independent Study does not count toward completion of the degree. No more than 3 credits of BMS 999: Advanced Independent Study will be counted for the Thesis Track.

## Non-Thesis Track

Fourteen (14) core curricular credits (one from each of the four categories below and BMS seminar), as well as the 2 credit Capstone Course (BMS 890) must be completed. Substitutions to these courses require approval of the Program.

Code	Title	Credits
BMS 710	Seminar in Biomedical Sciences (1 credit per semester; 2 credits total)	2
Choose one of the following in Immunology:		3
BMS 750	Infection and Immunity	
BMS 751	Immunopathology	
Choose one of the following in Molecular Biology:		3
BMS 705	Molecular Pathology	
BMS 756	Current Concepts in Cancer	
BMS 765	Molecular Pathophysiology	
Choose one of the following Pharmacology/Toxicology:		3
BMS 610G	Pharmacology	
BMS 615G	Cellular and Molecular Toxicology	
Choose one of the following in Pathogenesis:		3
BMS 701	Human Pathophysiology I	
BMS 702	Human Pathophysiology II	
BMS 775	Mechanisms of Infectious Disease	
BMS 890	Capstone Project	2
<b>Total Credits</b>		<b>16</b>

Of the remaining 16 credits required for the degree, a minimum of 6 credits (excluding BMS 999) must be taken for graduate credit within the BMS Program. Up to ten credits may be taken as elective courses at the graduate level. These elective courses may be within the BMS Program or outside of the Program. BMS 999 will not be counted toward the Non-Thesis Track without approval from the Program.

## Additional Requirements

### Major Professor as Advisor

For thesis track, the student must have a major professor to advise and supervise the student's studies. Non-thesis students should work with the Graduate Program Coordinator as their advisor throughout the program.

### Thesis (Thesis Track)/Capstone (Non-Thesis Track)

Students enrolled in the Thesis Track must write an acceptable thesis based on original research and pass a final oral examination in defense of the thesis under the supervision of a major professor. Students in the Non-Thesis Track must complete the course requirements, including the BMS Capstone Course (BMS 890).

### Time Limit

The student must complete all degree requirements within seven years of initial enrollment.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

## Blood Banking/Immunoematology, Undergraduate Certificate

The Certificate in Blood Banking trains students to meet the critical need for medical laboratory scientists in the workforce that make sure donated blood is safe for use in blood transfusions and other procedures. Students successfully completing this certificate are eligible to sit for the American Society for Clinical Pathology Board of Certification (ASCP-BOC) Technologist in Blood Bank exam and be employable in a medical laboratory or blood center.

## Requirements

Successful completion of the undergraduate certificate in Blood Banking/Immunoematology allows the individual to sit for the American Society of Clinical Pathology Board of Certification (ASCP-BOC) Technologist/Scientist in Blood Bank national certification exam and be employable in a medical laboratory or blood center. This curriculum meets entry level practitioner competency as outlined by the American Society for Clinical Laboratory Science.

Most of the required courses are delivered in face-to-face format.

Code	Title	Credits
BMS 427	Clinical Immunology	3
BMS 428	Clinical Immunology Laboratory	1
BMS 529	Introduction to Immunoematology	3
BMS 530	Immunoematology and Blood Banking Laboratory	1
BMS 532	Advanced Clinical Immunoematology and Immunology <sup>1</sup>	3
BMS 560	Molecular and Genetic Diagnostics	2
BMS 561	Molecular Diagnostics Laboratory	1
BMS 599	Independent Study	1
<b>Total Credits</b>		<b>15</b>

<sup>1</sup> BMS 532 is a 4-week capstone course (120 clinical hours) of practical training experience working in a clinical blood bank laboratory.

## Admission

Applicants are admitted to the certificate program in one of two categories:

1. Current UWM undergraduate student with a baccalaureate degree from a regionally accredited college/university with a major in biological science or chemistry, or baccalaureate degree from a regionally accredited college/university with a combination of 30 semester hours (45 quarter hours) of biology, chemistry and/or medical science courses including genetics within the last 5 years and a grade point average of 3.00 or above (4.00 scale.)
2. Post-baccalaureate students with a baccalaureate degree from a regionally accredited college/university with a major in biological science or chemistry, or baccalaureate degree from a regionally accredited college/university with a combination of 30 semester hours (45 quarter hours) of biology, chemistry and/or medical science courses including genetics within the last 5 years and a grade point average of 3.00 or above (4.00 scale.)

## Death Investigation, Undergraduate Certificate (School of Biomedical Sciences and Health Care Administration)

The Biomedical Sciences Program, Criminal Justice Program, and Departments of Anthropology and Chemistry cooperate in offering three certificates in the area of forensic sciences. Sponsored jointly by the College of Letters and Science, the College of Health Professions and Sciences, and the Helen Bader School of Social Welfare, these certificate curricula are designed to train students in basic skills that will provide the foundation for careers in the fields of law enforcement, death investigation, pathology, and toxicology. Certificates are offered in Death Investigation, Forensic Science, and Forensic Toxicology. Where applicable, the curriculum meets the criteria required for professional certification examinations (Medicolegal Death Investigation, Toxicological Chemist).

### Eligibility

Undergraduate students who pursue a forensic sciences certificate maintain their identity as majors in their home departments and continue to progress toward a baccalaureate degree while in the certificate program. Courses include lecture presentations and laboratory experiences that cover fundamental areas of forensic science and provide unique instruction on techniques that are essential in the specific certificates. Students are given instruction by faculty members at UWM and forensic professionals in the Milwaukee community. Any of the programs may be pursued as a post-baccalaureate educational certificate. Individuals who are not enrolled in a degree program at UWM, but are seeking continuing education for career development, may be admitted to courses in the certificate programs by meeting prerequisites with equivalent experience or consent of the instructor.

### Requirements

To receive a certificate in Death Investigation, Forensic Science, or Forensic Toxicology, students must complete at least one half of the required credits on the UWM campus. A minimum grade point average of 2.500 must be achieved on the required credits. All options within the certificate require at least a basic knowledge of chemistry and biology. To meet this requirement, prior to registering themselves in the Forensic Sciences Certificate Program, students must successfully complete CHEM 100 or equivalent and BIO SCI 100 or equivalent.

The following courses must be completed successfully to obtain a Certificate in Death Investigation:

Code	Title	Credits
ANTHRO/BMS/CHEM/ CRM JST 281	Dead Men Do Tell Tales: An Introduction to Forensic Science	3
ANTHRO/BMS/CHEM/ CRM JST 285	Medicolegal Death Investigation	3
ANTHRO/BMS/CHEM/ CRM JST 481	Criminalistics	3
ANTHRO 403	The Human Skeleton	3
ANTHRO 405	Forensic Anthropology	3
CRM JST 110	Introduction to Criminal Justice	3
CRM JST 480	Criminal Evidence and Investigation	3

BMS 610 or HCA 212	Pharmacology Drugs Used and Abused	3
<b>Total Credits</b>		<b>24</b>

Additional courses with forensic content are listed below. Check prerequisites or consult the instructor for eligibility. These courses are recommended, but are not required, for the Certificate in Death Investigation:

Code	Title	Credits
ANTHRO/BMS/CHEM/ CRM JST 585	Internship in Forensic Toxicology	1-3
ANTHRO/BMS/CHEM/ CRM JST 589	Internship in Death Investigation	1-3
ANTHRO/BMS/CHEM/ CRM JST 594	Internship in Forensic Science	1-3
ANTHRO 404	Human Biological Variation	3
BIO SCI 539	Laboratory Techniques in Molecular Biology	4
CHEM 194	First-Year Seminar:	3
CHEM 524	Instrumental Analysis	3
CHEM 602	Biochemistry: Cellular Processes	3
BMS 555	Toxicology and Therapeutic Drug Monitoring	1
BMS 560	Molecular and Genetic Diagnostics	2
BMS 561	Molecular Diagnostics Laboratory	1

## Forensic Science, Undergraduate Certificate (School of Biomedical Sciences and Health Care Administration)

The Biomedical Sciences Program, Criminal Justice Program, and Departments of Anthropology and Chemistry cooperate in offering three certificates in the area of forensic sciences. Sponsored jointly by the College of Letters and Science, the College of Health Professions and Sciences, and the Helen Bader School of Social Welfare, these certificate curricula are designed to train students in basic skills that will provide the foundation for careers in the fields of law enforcement, death investigation, pathology, and toxicology. Certificates are offered in Death Investigation, Forensic Science, and Forensic Toxicology. Where applicable, the curriculum meets the criteria required for professional certification examinations (Medicolegal Death Investigation, Toxicological Chemist).

### Eligibility

Undergraduate students who pursue a forensic sciences certificate maintain their identity as majors in their home departments and continue to progress toward a baccalaureate degree while in the certificate program. Courses include lecture presentations and laboratory experiences that cover fundamental areas of forensic science and provide unique instruction on techniques that are essential in the specific certificates. Students are given instruction by faculty members at UWM and forensic professionals in the Milwaukee community. Any of the programs may be pursued as a post-baccalaureate educational certificate. Individuals who are not enrolled in a degree program at UWM, but are seeking continuing education for career development, may be

admitted to courses in the certificate programs by meeting prerequisites with equivalent experience or consent of the instructor.

## Requirements

To receive a certificate in Death Investigation, Forensic Science, or Forensic Toxicology, students must complete at least one half of the required credits on the UWM campus. A minimum grade point average of 2.500 must be achieved on the required credits. All options within the certificate require at least a basic knowledge of chemistry and biology. To meet this requirement, prior to registering themselves in the Forensic Sciences Certificate Program, students must successfully complete CHEM 100 or equivalent and BIO SCI 100 or equivalent.

CHEM 602	Biochemistry: Cellular Processes	3
BMS 555	Toxicology and Therapeutic Drug Monitoring	1
BMS 560	Molecular and Genetic Diagnostics	2
BMS 561	Molecular Diagnostics Laboratory	1

## Interprofessional Leadership in Healthcare, Undergraduate Microcredential

The undergraduate microcredential in Interprofessional Leadership in Healthcare is an educational and career benefit to anyone planning for a career or currently working in the healthcare industry. The required courses are available in a fully online format or through the UW System Flexible Option Program and semester based UWM courses.

Interprofessional education and leadership skill development is encouraged by many organizations, including the Interprofessional Education Collaborative (IPEC), World Health Organization (WHO) and the National Center for Interprofessional Practice and Education (NCIPE).

Educational and career opportunities gained through completion of the microcredential include:

- Increased knowledge and understanding of other healthcare professions.
- Improved communication and teamwork skills.
- Enhanced problem-solving skills.
- Career advancement opportunities.

Through completion of the assessments and activities required in the Interprofessional Leadership in Healthcare microcredential you will demonstrate competency in:

- Skills for professionalism and ethical standards of practice.
- Application of the interprofessional practice domains of interprofessional communication, teamwork and professionalism, roles and responsibilities, and values and ethics.
- Critical evaluation of the fundamentals of diversity, equity, and inclusion as they can be enacted within the four interprofessional competencies.

The program is open to degree-seeking and University special students. It consists of nine credits (three courses) taught by UWM faculty and staff who are advanced members of health professions and engaged in interprofessional education and practice. The program collaborates between the School of Biomedical Sciences & Healthcare Administration and the School of Rehabilitation Sciences and Technology.

The required courses can be completed in any order and are available as electives for any student. These courses are required for the Biomedical Sciences Health Sciences degree completion. The microcredential is recognized on your final transcript and with an electronic badge, an electronic document indicating competencies and various learning achievements.

Your advisor will assist with declaring this microcredential and submission for your badge award.

## Requirements

Code	Title	Credits
<b>Required Courses</b>		
BMS 433	Teamwork in the Health Professions	3
or THERREC 303	Inclusive and Disability Programs in the Community	
Select one of the following:		3
BMS 434	Professional Development in the Health Sciences	
DMI 496	Professional Growth and Career Advancement in Diagnostic Imaging Professions	
BMS 549	Professional Development in Clinical Laboratory Sciences	
OCCTHPY 530	Contemporary Issues and Professional Preparation in OST	
BMS 435	Foundations of Interprofessional Education and Practice	3
<b>Total Credits</b>		<b>9</b>

The minimum GPA for microcredential courses is a C. If applicable, program criteria apply, including a B-course grade minimum for Flexible Option students.

## Molecular Diagnostics, Undergraduate Certificate

The certificate program in Molecular Diagnostics trains students in the newly emerging and rapidly evolving field of laboratory medicine. Students gain a solid foundation and the basic skills necessary for professional employment in Molecular Diagnostic programs in university and hospital laboratories, in new R&D test applications, or in the biotechnology industries serving the Molecular Diagnostics communities.

The certificate is designed to augment the basic education and skills of students currently pursuing a Bachelor of Science degree in Biomedical Sciences or Biological Sciences. With minimal additional courses, students will be able to complete a certificate in Molecular Diagnostics.

The certificate program will also be available to returning, non-degree students who wish to obtain additional credentials in Molecular Diagnostics for career development or enhancement.

## Requirements

Code	Title	Credits
<b>Required</b>		
CHEM 501	Introduction to Biochemistry	3
BIO SCI 325	Genetics	4
Select one of the following:		4
BMS 539 & BMS 540	Public Health Microbiology and Public Health Microbiology Lab	
BIO SCI 539	Laboratory Techniques in Molecular Biology	
Select one of the following:		3-4
BMS 560 & BMS 561	Molecular and Genetic Diagnostics and Molecular Diagnostics Laboratory	
BMS 705 & BMS 561	Molecular Pathology and Molecular Diagnostics Laboratory	
<b>Electives</b>		
Select one of the following:		3-5
BIO SCI 383	General Microbiology	
BIO SCI 315 & BIO SCI 316	Cell Biology and Laboratory in Genetics and Cell Biology	

BMS 534 & BMS 535	Medical Microbiology and Medical Microbiology Laboratory
BMS 599	Independent Study
<b>Total Credits</b>	<b>17-20</b>

Although flexibility is built into this certificate program, students will be expected to have basic knowledge of microbiology and genetics and at least one advanced laboratory course (500 level or above) to qualify for the Molecular Diagnostics Certificate.

## Health Care Administration

The expanding field of health care administration seeks professionals with specialized training in business and health care operations to oversee administrative functions, manage medical and health services, and to plan, direct, and coordinate the business activities in health care organizations and related industries. Expert faculty in our undergraduate and graduate programs provide competency-based education and training in the development of critical skills including business and finance, communication, leadership and management.

## Programs

- Health Care Administration, BS (p. 731)
- Health Care Administration, Minor (p. 734)
- Health Care Informatics, Undergraduate Certificate (School of Biomedical Sciences and Health Care Administration) (p. 734)
- Healthcare Administration, MHA (p. 735)
- Healthcare Compliance, Graduate Certificate (p. 736)
- Value-Based Healthcare, Graduate Certificate (p. 737)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Jennifer Fink	Associate Professor	PhD	University of Wisconsin-Milwaukee	✓	
Rene Gratz	Professor	PhD			✓
Mary K. Madsen	Professor	PhD			✓
Kathleen Olewinski	Clinical Associate Professor	MS, RHIA, NHA, FACHE	Cardinal Stritch University		
Gary Ross	Clinical Associate Professor	PhD	University of Kentucky		
Hanh Trinh	Associate Professor	PhD	Medical College of Virginia		
Barbara J. Zabawa	Clinical Assistant Professor	JD, MPH	University of Wisconsin-Madison		

## Health Care Administration, BS

Like all businesses, health care organizations require strong leadership to run smoothly. As an experienced health care administrator, your career could span the operation of a single department to executive leadership and management positions in which you're responsible for millions of dollars of facilities and equipment as well as hundreds of employees.

Our undergraduate Health Care Administration (HCA) program will help you master the basic business principles and tools that you will need for effective decision-making when you enter this field: finance, information systems, strategic planning, human resource management and marketing. You will also develop strong management and leadership competencies including business skills, problem-solving, communication

and relationship management, collaboration and teamwork, adaptability, cultural competency and systems thinking skills that will be essential to your success.

The UWM HCA program is certified by the Association of University Programs in Health Administration (AUPHA) and is the only AUPHA-certified health care administration program in the State of Wisconsin. Our HCA program has a proud history of national recognition by the American College of Healthcare Executives (ACHE), earning the prestigious Higher Education Network Award for 4 consecutive years in the undergraduate category as the program with the highest level of student engagement.

## Requirements

Code	Title	Credits
	University General Education Requirements	6
	Electives to include remaining University Requirements	16
	Major Requirements	58
	Extra-Departmental Requirements	40
<b>Total Credits</b>		<b>120</b>

## Course of Study

The Health Care Administration program offers a four-year curriculum leading to a Bachelor of Science (BS) degree in Health Care Administration. The curriculum includes all necessary requirements for a minor in business administration. Students begin by taking freshman- and sophomore-level foundation courses in the biological and health sciences, health information administration, as well as the liberal arts. This coursework provides a solid basis for the advanced study of healthcare administration that follows. Successful completion of a faculty-supervised, semester-long internship (minimum of 120 hours) at an approved healthcare agency or related industry is required in the senior year.

## Admission to the Major

The Health Care Administration program will consider applications to the major at the end of each semester, as long as the student's cumulative UWM GPA is 2.5 or above, the student has completed the admission prerequisite courses, and the student has met the grade requirements for required courses. Students are encouraged to apply to the major as soon as they meet these requirements and have achieved sophomore status.

Application forms for admission to the major in HCA can be accessed online or can be requested from the College of Health Professions and Sciences (CHPS) Office of Student Affairs. Completed application forms and copies of transcripts of previous college work can be submitted to the CHPS Office of Student Affairs. The following courses are prerequisites for admission to the major:

Code	Title	Credits
Select one of the following:		0-3
ENGLISH 102	College Writing and Research	
Completion of the UWM English competency requirement		
COMMUN 103	Public Speaking	3
ECON 103	Principles of Microeconomics	3
or ECON 104	Principles of Macroeconomics	
Select one of the following:		0-3
MATH 105	Introduction to College Algebra	
MATH 108	Algebraic Literacy II	
Achieve math placement level of 30		
HS 102	Healthcare Delivery in the United States	3
HCA 220	Leading Healthcare Professionals	3

Students are required to earn a grade of C or higher in all required courses.

No student applying to the program with a cumulative UWM GPA lower than 2.5 will be admitted. A student whose cumulative UWM GPA falls below 2.5 will be placed on probationary status and will not be able to graduate with the degree in Health Care Administration until their cumulative UWM GPA is 2.5 or higher. Students remaining on probation

for more than two consecutive semesters will be dismissed from the major.

## Requirements for Internship

The faculty-supervised internship (minimum of 120 hours) is an integral component of the Health Care Administration major. Students, under the direction of a preceptor, are given opportunities for management-related experience in local, national, and international healthcare organizations and related industries. Students must be admitted to the major and complete the internship application form by October 1 to be considered for the spring semester and March 1 for the fall semester. Summer internships will be considered for approval on a case-by-case basis, and the application deadline is March 1. Prior to internship, students must complete a background check and must meet physical and health screening requirements.

## Graduation Requirements

The following requirements must be met to graduate:

1. Completion of the required credits;
2. A cumulative UWM GPA of 2.5;
3. A grade of C or better in all required courses; and
4. Completion of all University General Education Requirements (p. 30).

<sup>1</sup> General Education Requirements (GERs): The courses required within the HCA curriculum satisfy the University's General Education Requirements for Cultural Diversity, Social Sciences, Quantitative Literacy, and Oral and Written Communication; students should use their elective credits to satisfy GER requirements for Natural Sciences, Humanities, Arts, and Foreign Language requirements.

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Health Care Administration, Minor Requirements

The minor in Health Care Administration consists of 17 credits and may be declared once a student has completed a minimum of 45 credits and achieved a minimum cumulative GPA of 2.5. To obtain the minor, a student must complete at UWM the 17 credits on which a minimum 2.5 cumulative GPA is also required. Declaration forms for the Health Care Administration Minor are available in the College of Health Professions and Sciences, Office of Student Affairs, NWQ Building B, 6th Floor. For more information or to schedule an advising appointment, please call (414) 229-2758.

HCA 422	Human Resource Management in Healthcare Organizations	3
HI 537	Health Information Technology and Management	3
<b>Total Credits</b>		<b>17</b>

## Health Care Informatics, Undergraduate Certificate (School of Biomedical Sciences and Health Care Administration)

(Offered cooperatively by the University of Wisconsin-Milwaukee College of Health Professions and Sciences, Zilber College of Public Health, and School of Information Studies.)

UWM offers a **certificate** in Health Care Informatics, a **Master of Science (MS)** in Health Care Informatics, and a **Ph.D.** in Medical Informatics. The undergraduate certificate is available in a **semester-based** in-person or online format or in the self-paced competency-based **Flexible Option**. It is available to students in any undergraduate major or university special students. The Flexible Option program allows for admission in any month.

Hospitals, clinics, private practices, health insurers, and other healthcare organizations have an extensive and complicated health information management infrastructure. Now more than ever, the healthcare industry needs professionals skilled in managing IT and who are well-versed in the unique needs of the healthcare systems. This certificate is valuable to students in the health professions, information studies, and related areas of study, such as public health, who are seeking professional employment in the health care industry.

Learning in the Health Care Informatics certificate demonstrates your knowledge and skills with a recognized credential. Completing this certificate signals your increased value to employers and can lead to expanded job opportunities or a graduate program in the field.

Learning goals for the six course (18 credit) certificate:

- Overview of the terminology and practices of health care
- Introduction to information technology theory and application
- Analysis and design of information systems in a healthcare environment
- Design, creation, and management of healthcare database systems
- Legal aspects of information products and services

Please see the requirements tab for complete information about curriculum and to declare this certificate.

See more information about the UW Flexible Option (<https://flex.wisconsin.edu/degrees-programs/health-care-informatics/>).

## Requirements

### Certificate goals:

1. Introduction to information technology theory and application;
2. Analysis and design of information systems in a healthcare environment;

3. Design, creation, and management of healthcare database systems; and
4. Legal aspects of information products and services.

## Curriculum

To obtain the certificate, the student must complete, with a minimum grade point average of 2.5, 18 credits in approved certificate courses of which 12 must be earned in residence at UWM.

Code	Title	Credits
HS 222 or BMS 205	Language of Medicine Introduction to Diagnostic Medicine	3
HS 224 or INFOST 110	Computational Tools for Healthcare Professionals Introduction to Information Science and Technology	3
INFOST 315 or INFOST 370	Knowledge Organization for Information Science and Technology Data Analysis and Visualization for the Information Professional	3
HI 537	Health Information Technology and Management	3
HCA 541 or INFOST 340	Healthcare Information Systems Analysis and Design Introduction to Systems Analysis	3
INFOST 465 or HS 311	Legal Aspects of Information Products and Services <sup>1</sup> Law and Ethics for Healthcare Professionals	3
<b>Total Credits</b>		<b>18</b>

<sup>1</sup> HS 311 allowed only in Flexible Option. All other students enroll in INFOST 465.

## Admission

Students can declare this certificate by contacting their advisor. Certificates are awarded upon completion of all requirements or at time of graduation for students seeking a bachelor's degree.

A 2.5 GPA requirement is effective for students who declare this certificate summer 2021 or beyond.

## Healthcare Administration, MHA

The Department of Health Care Administration offers the Master of Healthcare Administration (MHA) to provide evidence-based training in micro and macro theory and practice to advance the health of individuals and communities—local, national, and international. The program enables students to understand the complex interrelationships between health organizations, societal and cultural contexts, and biological systems, and emphasizes the well-being of the individuals and populations affected by these complex interrelationships. The UWM MHA program is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME) and is the only CAHME-accredited MHA program in the State of Wisconsin.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) and submit the following materials:

- **Resume or CV**
- **Transcripts:** All applicants, including UWM students, must upload transcripts from all academic institutions where a bachelor's degree or above has been or will be earned.
- **Reason Statement:** An essential part of your application, the reason statement is used to determine the appropriateness of your educational and professional goals and serves as an example of your ability to express yourself in writing. In the statement:
  - Explain your reasons for pursuing graduate study.
  - Describe specific interests and your background in the field.
  - List any relevant skills or training you have acquired.
  - List relevant academic awards or honors you have received.
- **Two Letters of Recommendation:** Letters of recommendation should come from academic sources and/or supervisors. The letters should address the applicant's academic and professional strengths, and the applicant's potential for success in graduate study.

## Credits and Courses

### MHA Options

There are four options for the MHA:

#### Option 1: Face-to-Face Program

(39 credits required for graduation)

All courses are offered in face-to-face sections; 30 credits of required courses, a 2-credit internship, 1-credit MHA capstone course and 6 credits of electives are required.

#### Option 2: Online Program

(39 credits required for graduation)

All courses are offered online; 30 credits of required courses, a 2-credit internship, 1-credit MHA capstone course and 6 credits of electives are required.

#### Option 3: Executive Online Program

(33 credits required for graduation)

All courses are offered online; 30 credits of required courses, a 2-credit internship and 1-credit MHA capstone course required. Admission to the Executive Online program requires previous health-related administrative experience and/or an advanced professional degree. Examples of acceptable degrees include MBA, PharmD, PhD, MD, JD, DO, DPT, and APRN.

### Option 4: Executive Online Program with the Pharmacy Leadership Academy

(30 credits required for graduation)

All courses are offered online; 27 credits of required courses, a 2-credit internship and 1-credit MHA capstone course required. Admission to this program requires concurrent enrollment in the Pharmacy Leadership Academy (<https://www.ashpfoundation.org/leadership-development/pharmacy-leadership-academy/>) (PLA) program.

\*HCA 866 is not a

## Additional Requirements

### Major Professor as Advisor

A student must have a major professor to advise and supervise the student's studies as specified in Graduate School regulations. Initially,

the director of the MHA Program advises and supervises newly admitted students. Students are then assigned faculty advisors according to faculty advising loads.

### Time Limit

All degree requirements must be completed within seven years of the first enrollment semester as a degree student.

## Healthcare Compliance, Graduate Certificate

Health care compliance is critical to all organization types and persons who work in the health care industry. Whether you are a health care practitioner, administrator, insurer or in a business that contracts with health care organizations, it is vital to understand the need for and function of a robust corporate compliance program.

Learning outcomes in this certificate program address the fundamentals of health care compliance, such as compliance administration, policies and procedures, oversight and committees, enforcement and reporting requirements, screening of employees and vendors, billing and coding basics, auditing and monitoring, education and training, investigations, fraud and abuse laws, and HIPAA. Students who excel in the five-course certificate program at UWM are prepared to sit for the Certification in Healthcare Compliance (CHC) exam offered by the Compliance Certification Board (CCB). A CHC designation is widely valued in the healthcare compliance community.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

CCB accreditation requires students to have a baccalaureate degree prior to taking the CHC or equivalent exam. Students who complete the certificate in conjunction with the MHA degree program must meet MHA admission requirements. Post baccalaureate applicants to the Healthcare Compliance Certificate program must have at least a bachelor's degree from an accredited institution and a stated interest in working in healthcare compliance. Minimum 2.75 cumulative GPA in bachelor's degree program.

Applicants must submit a Reason Statement to be considered for admission. The Reason Statement is used to determine the appropriateness of your educational/professional goals and serves as an example of your ability to express yourself in writing.

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the

Panthera application before completing 6 credits in the certificate sequence.

- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

The UWM Compliance Certificate Program courses are offered online and on campus. Courses that qualify for the 15-credit program include:

Code	Title	Credits
HCA 801	Design of Health and Human Service Systems	3
HCA 821	Operations Management in Healthcare Organizations	3
HCA 868	Health Law and Ethics	3
HCA 869	Health Care Compliance	3
HCA 813	Health Regulatory Policy and Politics	3
<b>Total Credits</b>		<b>15</b>

There is no capstone course or internship requirement for the certificate program, but students are required to interview a healthcare compliance officer as part of their Healthcare Compliance course and write a reflection on the interview. Degree seeking (MHA) students are encouraged to apply for a summer internship in a healthcare compliance role. Available internships are posted through the Health Care Compliance Association website (<https://www.hcca-info.org/CareerCenter/Internships.aspx>).

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Value-Based Healthcare, Graduate Certificate

Offered in collaboration with Advocate Health, one of the nation's largest and most successful managed care operations, this 16-credit certificate in Value-Based HealthCare prepares students for jobs in population management roles within healthcare organizations. Designed for busy health care professionals and leaders in health systems, public health, and community-based organizations, students will study core areas related to the design, function, management, regulation and evaluation of health insurance programs. Students will be able to distinguish between both private and public sector programs and the impact on delivery system transformation of CMMI payment initiatives. They will learn from practicing experts and applications to functioning programs. Students will evaluate the impact of payment models on population health programs and stakeholders. They will also evaluate the impact those models have on health care expenditures, utilization, beneficiary, and provider experiences with care and health outcomes.

For additional information, please contact Jennifer Fink, PhD at [jtfnk@uwm.edu](mailto:jtfnk@uwm.edu) or John Brill MD, MPH at [john.brill@aah.org](mailto:john.brill@aah.org).

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

The (VBC) certificate requires students to have a baccalaureate degree prior to taking the certificate. Students who complete the certificate in conjunction with the MHA degree program must meet MHA admission requirements. Post baccalaureate applicants to the (VBC) certificate program must have at least a bachelor's degree from an accredited institution and a stated interest in working in Value-Based Care Health Care. A minimum 2.75 cumulative GPA in bachelor's degree program is required.

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).

- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Additional Requirements

### Transfer Credit

Three transfer credits are allowed for the certificate, on a case-by-case basis.

### Time Limit

Degree seeking students must complete all requirements within seven years (Graduate School completion requirement). Post-baccalaureate students must complete certificate requirements within three years.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Health Sciences, PhD

The PhD in Health Sciences curriculum includes a set of core courses providing a comprehensive structure for doctoral education including:

- Philosophical foundations.
- Concepts and practices that contribute to students, development as teaching scholars.
- Research methods.
- A series of seminars that build students, critical thinking skills, familiarity with a range of health sciences research topics, and experience in scholarly dialogue and presentation.

## Concentrations and Cross-Disciplinary Courses

In addition to the core courses, the program includes concentration and cross-disciplinary courses in areas such as disability and rehabilitation, diagnostic and biomedical sciences, human movement sciences, population health, and health administration/policy. Independent research and the dissertation will be structured according to the choice of specialization.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

To be considered for admission to the program applicants must satisfy all UWM Graduate School admission requirements in addition to the following College of Health Professions and Sciences requirements:

1. Submission of scores on the General Test portion of the Graduate Record Examination (<http://uwm.edu/graduateschool/admission/#gre>); test taken within last five years.
2. One of the following:
  - Master's degree or equivalent in an area that provides foundational academic preparation in proposed Health Sciences PhD Area of Concentration.
  - Bachelor's degree with exceptional promise, as indicated by research experience/evidence of writing or an undergraduate project, recommendations, GRE (<http://uwm.edu/graduateschool/admission/#gre>) scores, and undergraduate GPA.
3. A sample of the applicant's written work that demonstrates their ability to conduct research and/or the ability to critically analyze the scholarly work of others.
4. A letter outlining the applicant's academic and professional background, declaration of Area of Concentration and Major Professor as well as specific research interests and goals for the PhD program. This statement should be submitted to the Graduate School and must be complete and thorough as it provides information that is central to the admission decision. This letter will serve in lieu of the Graduate School's "Reasons for Graduate Study" statement.
5. Three letters of recommendation from individuals familiar with the applicant's intellectual achievement and potential. At least two

of these letters must be from faculty or senior administrators at academic institutions.

For applicants from countries other than the U.S.A. whose first language is not English, a score of at least 250 on the computer-based (or 600 on the paper-based) Test of English as a Foreign Language (TOEFL) is required. A score of 6.5 on the International English Language Testing Systems (IELTS) examination will be accepted in lieu of the TOEFL.

The PhD Steering Committee will make an admission recommendation and forward it to the appropriate College of Health Professions and Sciences departmental Graduate Faculty or Executive Committee and identified Major Professor. The final admission decision is contingent upon approval by the departmental Graduate Faculty Committee or Executive Committee, the applicant’s Major Professor, and the Graduate School.

Prior to admission an eligible College of Health Professions and Sciences Graduate Faculty member must agree to serve as the applicant’s major professor.

### Reapplication

A student who has received a master’s degree in Biomedical Sciences, Communication Sciences and Disorders, Health Care Administration, or Occupational Therapy from the University of Wisconsin-Milwaukee must formally reapply for admission to the Graduate School before continuing studies toward the PhD degree.

### Credits and Courses

The Health Sciences PhD program requires you to complete a minimum of 72 credits beyond the Bachelor’s degree, including no more than 36 credits from a related master’s and/or other post-baccalaureate coursework. Depending on the area of concentration additional credits may be required. Consult with your major professor for the individual program of study requirements. You must complete a minimum of 36 credits, or 50% of the total credits required for the degree, in doctoral status at UWM, including pre-candidacy and candidacy work.

Of the credits taken in residence, you must complete at least 8 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, inclusive of summer sessions.

The precise number of credits and actual course requirements will be determined after a review of your previous coursework by your major professor and the Program Director. You will then plan an individual program of study in consultation with your major professor and doctoral advisory committee that will include a set of core courses, an area of concentration, cross-disciplinary courses, electives, and the dissertation.

Code	Title	Credits
<b>Core <sup>1</sup></b>		
<i>Research/Grantsmanship</i>		3
Select a minimum of 3 credits from the following:		
SOC WRK 991	Doctoral Proseminar: MCW 20253A Methods in Grant Preparation	
PH 808	Writing a Federal Grant in the Public Health Sciences	
BMS 718	Experimental Design and Research in Biomedical Sciences	
PSYCH 610	Experimental Design	

PH 827	Research Design in Community and Behavioral Health Promotion	
ED PSY 824	Advanced Experimental Design and Analysis	
<i>Teaching</i>		3
Select a minimum of 3 credits from the following:		
GRAD 801	Preparing Future Faculty & Professionals:	
CURRINS 774	College Teaching	
KIN 909	Guided Teaching Experience in Health Sciences	
CETL workshops in combination with guided teaching. CETL workshops may count as 1 credit under independent study or guided teaching.		
<i>Statistics</i>		6
Select a minimum of 6 credits from the following:		
KIN 702	Statistical Analysis in the Health Sciences	
ED PSY 820	Multiple Regression	
SOC WRK 962	Applied Multiple Regression Analysis	
HI 743	Predictive Analytics in Healthcare	
NURS 882	Qualitative Methods in Health Research	
NURS 885	Advanced Quantitative Methods in Health Research	
NURS 886	Advanced Qualitative Methods in Health Research	
ED PSY 825	Multivariate Methods	
SOC WRK 963	Measurement Methods and Related Multivariate Statistics	
<i>Seminar</i>		3
Select a minimum of 3 credits from the following:		
KIN 910	Advanced Seminar in Health Sciences (counts as duplicate of BMS 910)	
BMS 910	Advanced Seminar in Health Sciences (counts as duplicate of KIN 910)	
GRAD 801	Preparing Future Faculty & Professionals:	
SOC WRK 991	Doctoral Proseminar.	
ATRAIN 703	Foundations of Interprofessional Practice	
BIO SCI 925	Graduate Seminar in Biological Sciences	
BIO SCI 933	Seminar in Neuroscience	
<b>Area of Concentration</b>		<b>9</b>
(Minimum of 9 credits): Courses related to the area of concentration will require you to draw upon the strengths and expertise of the faculty and curriculum in an interdisciplinary and collaborative manner.		
<b>Cross Disciplinary Requirement</b>		<b>6</b>
(Minimum of 6 credits): Cross-disciplinary courses are courses in areas outside of your area of concentration but related to your cross-disciplinary focus.		
<b>Electives</b>		<b>10</b>
(10 credits): Elective courses are courses relevant to your Program of Study. Foreign language coursework is optional, depending upon the recommendation of the major professor.		

**Dissertation**

(Minimum of 12 credits): The last component of the degree requirements, independent research and dissertation, will be structured by your area of concentration. Your dissertation is to consist of focused, independent research that contributes to the existing body of scientific knowledge. Per the UWM Graduate School policy, exactly 3 dissertation credits may be taken in a given semester. Thus, a minimum of 4 semesters of dissertation work is recommended.

**Total Credits****52**

<sup>1</sup> Note: Students would need prior approval from their Major Professor and Program Director for any courses not listed. For some core courses, the course number will change depending upon the department through which the course is offered during a particular semester.

## Additional Requirements

### Residence

The student must complete at least half of the graduate credits required for the PhD in residence at UWM in doctoral status. In addition, the student must complete at least 8 graduate credits in each of two consecutive semesters, or 6 or more graduate credits in each of three consecutive semesters, exclusive of summer sessions. In exceptional cases, modifications of the residence requirement may be requested, subject to the approval of the College of Health Professions and Sciences PhD Steering Committee and the Graduate School.

### Foreign Language

Foreign language coursework is optional, depending upon the recommendation of the student's Major Professor.

### Doctoral Committee

In consultation with the Major Professor, each student is responsible for selecting a Doctoral Committee before completing 12 credits in the doctoral program. The doctoral committee shall consist of the student's major professor and four other graduate faculty: three of these must be at UWM, including at least two from CHPS. The other member may be from another institution, subject to the approval of the student's program executive committee. Upon formation of the Doctoral Committee, the student must file a "Doctoral Committee" form with their major professor which is to be subsequently filed with the PhD Steering Committee.

### Doctoral Preliminary Examinations

The doctoral preliminary examinations must be completed within three years of initial enrollment in the program. Students may receive up to two additional semesters to complete the preliminary examinations with approval of the PhD Steering Committee. The examinations consist of a written examination designed to demonstrate the breadth of a student's knowledge and the ability to conduct advanced research, and an oral exam covering issues raised during the written exam and/or focusing on the proposed dissertation research. The oral exam must follow the written exam within 10 days. Students take the preliminary examinations after completing all doctoral coursework or with no more than three credits of doctoral coursework remaining. Students cannot take the examinations if they have any incomplete or unreported grades or a GPA lower than 3.0. Students who fail the preliminary examinations may not proceed to the dissertation. The examinations may be retaken only once.

## 12 Dissertation Proposal

Upon successful completion of the preliminary examinations, the student submits a written dissertation proposal and delivers an oral presentation of the proposed research to the Dissertation Committee. The proposal takes the form of a scholarly document outlining the problem, its background and significance, summarizing relevant literature, and outlining the proposed research methods. It should include a tentative timetable and outline any required resources (space, equipment, etc.). Members of the student's Dissertation Committee must approve the dissertation proposal. Acceptance of the dissertation proposal establishes an agreement between the student and the Dissertation Committee as to the nature and scope of the research to be conducted, and the procedure for completing the dissertation. Upon Dissertation Committee approval, research proposals that use animal or human subjects must receive approval from the Animal Care and Use Committee or the Institutional Review Board.

### Dissertator Status

Specific requirements which must be completed before a doctoral student qualifies for dissertator status are described on the Graduate School Doctoral Requirements (<http://uwm.edu/graduateschool/doctoral-requirements/>) page.

### Dissertation

The dissertation is a major piece of original research representing a substantial contribution to the existing body of knowledge. The original research findings embodied in the dissertation should be acceptable for publication in a refereed journal. The student's Major Professor and Dissertation Committee provide guidance in completing the dissertation.

### Dissertation Defense

Once the dissertation document meets with Dissertation Committee approval, an oral defense takes place. At the time of the defense, the dissertation must be of publication-quality (as judged by the Dissertation Committee). The dissertation defense will be held in an open forum after which the Dissertation Committee will meet in closed session to make a decision on degree conferral. The time and place of the public presentation must be announced with adequate time (i.e., at least one week prior to the defense) so that faculty and students may attend.

### Time Limit

The student must complete all requirements for the degree within seven years of the date of initial enrollment in the program. Upon successfully passing the preliminary examinations, the student must complete all requirements for the degree within four years.

## Nursing (School of)

The School of Nursing offers a Bachelor of Science degree (BS) in nursing, a Master of Nursing (MN) degree, and a Doctor of Nursing Practice (DNP) degree. These nursing programs are fully approved through the State of Wisconsin Board of Nursing and accredited by the Commission on Collegiate Nursing Education. The School also offers a Doctor of Philosophy degree (PhD) in nursing and a non-nursing master's degree in Sustainable Peacebuilding.

### Vision

As an innovative, academic community, the University of Wisconsin-Milwaukee School of Nursing faculty, staff, students and alumni are

renowned practitioners, scientists and leaders in creating bold and transformative solutions for advancing local, national and global health.

## Mission

The University of Wisconsin-Milwaukee School of Nursing is a premier, urban, academic, collegial community that acts collaboratively with partners to:

- Prepare a diverse population of students to become science based, compassionate leaders through innovative, quality, educational programs for all settings and levels of practice.
- Conduct research and scholarship that advance science in nursing and health.
- Address health through evidence based practice and interprofessional collaboration.
- Develop leaders who transform health care delivery and health policy.

## Core Values

As a diverse Community of Scholars that values academic discourse and debate in a climate of civility, we live our core values and create opportunities to understand the perspectives of all others. We, the University of Wisconsin-Milwaukee School of Nursing community, demonstrate these core values in our learning, teaching, research, practice and service.

- Collaboration
- Creativity
- Integrity
- Human Dignity
- Diversity
- Accountability
- Social Justice
- Excellence

## Programs

### Undergraduate

- Global Health, Undergraduate Certificate (School of Nursing) (p. 748)
- Nursing, BS (p. 768)
- Nursing, RN to BS Program (p. 776)
- Peace and Conflict Studies, Undergraduate Certificate (p. 778)

### Master's

- Nursing, MN (p. 773)
- Sustainable Peacebuilding, MSP (p. 781)

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Alexa Anderson	Assistant Professor	PhD	University of Vermont	✓	
JoAnn Appleyard	Academic Staff Emerita	PhD, RN			✓
Mary Jo Baisch	Associate Professor Emerita	PhD, RN	University of Wisconsin-Milwaukee		✓
Jean Bell-Calvin	Clinical Assistant Professor Emerita	MS, RN, PHCNS-BC			✓
Janet Bitzan	Clinical Professor Emerita	PhD, RN			✓

## Doctoral

- Nursing Practice, DNP (p. 752)
- Nursing Practice, DNP/Business Administration, MBA (p. 754)
- Nursing Practice, DNP. Adult-Gerontology Acute Care Nurse Practitioner (p. 755)
- Nursing Practice, DNP. Clinical Nurse Specialist: Adult-Gerontology (p. 757)
- Nursing Practice, DNP. Clinical Nurse Specialist: Pediatrics (p. 759)
- Nursing Practice, DNP. Family Nurse Practitioner (p. 762)
- Nursing Practice, DNP. Nursing System Leadership: Nurse Executive (p. 764)
- Nursing Practice, DNP. Psychiatric Mental Health Nurse Practitioner (p. 766)
- Nursing, PhD (p. 775)

## Certificates

- Adult-Gerontology Acute Care Nurse Practitioner, Graduate Certificate (p. 745)
- Clinical Nurse Specialist (CNS), Graduate Certificate (p. 746)
- Family Nurse Practitioner, Graduate Certificate (p. 747)
- Global Health, Undergraduate Certificate (School of Nursing) (p. 748)
- Health Professional Education, Graduate Certificate (School of Nursing) (p. 750)
- Interprofessional Public and Population Health, Graduate Certificate (School of Nursing) (p. 751)
- Peace and Conflict Studies, Undergraduate Certificate (p. 778)
- Psychiatric Mental Health Nurse Practitioner (PMHNP), Graduate Certificate (p. 780)
- Trauma Informed Care, Graduate Certificate (School of Nursing) (p. 783)

## Requirements for Employment, Licensing, or Professional Organizations

Students should be aware that some professions, occupations, and employers are subject to licensing and/or bonding requirements. When a course of study includes clinical or field training, practice teaching, internships, or the like, students will be subject to a check of criminal conviction records, prior to acceptance of a student by the placement site. Drug testing is also a requirement prior to starting clinical, as is verification of health and immunization status. Students are responsible for obtaining the information necessary for them to become knowledgeable about these requirements and plan their studies accordingly. Please contact the appropriate department or program office for further information.

# Adult-Gerontology Acute Care Nurse Practitioner, Graduate Certificate

This 18-credit post graduate Adult-Gerontology Acute Care Nurse Practitioner (AG ACNP) certificate prepares students for certification and licensure as Adult-Gerontology Acute Care Nurse Practitioners (AG ACNP). Upon completing the certificate requirements, students will be eligible to sit for the AG ACNP national certification exam offered by the American Nurses Credentialing Center (ANCC) or by the American Association of Critical Care Nurses (AACN). Once nationally certified the AG ACNP is eligible to apply for licensure in all fifty states.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Admission

The admission requirements of the AG ACNP Post Graduate Certificate are consistent with those requirements specified by the Graduate School of the University of Wisconsin-Milwaukee. In addition, students must also meet the following requirements for the College of Nursing:

- A master's or doctoral degree in Nursing from an accredited program providing preparation as a nurse practitioner, clinical nurse specialist, certified nurse midwife, or certified registered nurse anesthetist.
- Certification in their current advanced practice registered nurse specialty as applicable.
- Completion with a grade of B or better of a graduate-level course in advanced physiology/pathophysiology, advanced pharmacology, and advanced health assessment. Evidence of current prescriptive

authority in the state of Wisconsin will be accepted in place of advanced pharmacology.

- Current registration as a Registered Nurse in the state of Wisconsin.
- Three (3) letters of recommendation, two (2) of which are from persons most knowledgeable about the applicant's recent academic and work experiences.
- Resume or Curriculum Vitae (CV).
- Personal statement that includes rationale for certificate study and career goals.
- Personal interview with a faculty member may be requested.
- One year of clinical experience relevant to the chosen specialty, such as adult medical surgical units, ICU, PACU or ED.

## Credits and Courses

The Adult-Gerontology Acute Care Nurse Practitioner Post Graduate Certificate includes three theory courses (3 credits each) and three practicum courses (3 credits each) for a total of 18 credits. The six required courses are:

Code	Title	Credits
<b>Theory</b>		
NURS 702	Advanced Practice Nursing Adult-Gerontology Chronic Illness	3
NURS 703	Advanced Practice Nursing Adult-Gerontology Acute Illness	3
NURS 704	Advanced Practice Nursing Adult-Gerontology Critical Illness	3
<b>Practicum</b>		
NURS 822	Adult-Gerontology Acute Care Nurse Practitioner Practicum I	3
NURS 823	Adult-Gerontology Acute Care Nurse Practitioner Practicum II	3
NURS 824	Adult-Gerontology Acute Care Nurse Practitioner Practicum III	3
<b>Total Credits</b>		<b>18</b>

## Additional Requirements

### Transfer Credit

If approved by the AG ACNP faculty, one 3-credit course from an institution other than UWM may be transferred in to meet requirements of the certificate program.

### Completion Requirements

Certificate program progression requirements will be consistent with the College of Nursing requirements for progression in graduate level programs. Students must complete all courses with at least a B- or better and a cumulative GPA of a 3.00 or greater in order to progress in program.

### Time Limit

It is expected that students will complete the certificate within one year from time of enrollment.

### Certificate Conferral

The certificate will be awarded upon successful completion of the requirements (i.e. once all grades for the certificate courses are officially

recorded with a cumulative GPA of 3.0 or more). Successful completion of the certificate program will be noted on the student's official transcript.

## Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

# Clinical Nurse Specialist (CNS), Graduate Certificate

This 18-credit Clinical Nurse Specialist Post Graduate Certificate is designed to provide advanced practice nurses with preparation as a Clinical Nurse Specialist (CNS). The student will choose one of the following populations: adult/gerontology or pediatric. Upon completing the certificate requirements, students will be eligible to sit for the population specific national certification exams offered by the American Nurses Credentialing Center (ANCC) or by the American Association of Critical Care Nurses (AACN). Once nationally certified, the CNS is eligible to apply for licensure in all fifty states.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

The admission requirements of the Post-Graduate CNS Certificate are consistent with those requirements specified by the Graduate School of the University of Wisconsin-Milwaukee. In addition, students must also meet the following requirements for the School of Nursing:

1. A master's or doctoral degree in Nursing from an accredited program providing preparation as a nurse practitioner, clinical nurse specialist, certified nurse midwife, or certified registered nurse anesthetist.
2. Certification in their current advanced practice registered nurse specialty as applicable.
3. Completion with a grade of B or better of a graduate-level course in advanced physiology/pathophysiology, advanced pharmacology, and advanced health assessment. Evidence of current prescriptive

authority in the state of Wisconsin will be accepted in place of advanced pharmacology.

4. Current registration as a Registered Nurse in the state of Wisconsin.
5. Three (3) letters of recommendation, two (2) of which are from persons most knowledgeable about the applicant's recent academic and work experiences.
6. Resume or Curriculum Vitae (CV).
7. Personal statement that includes rationale for certificate study and career goals.
8. Personal interview with a faculty member may be requested.
9. One year of clinical experience relevant to the chosen specialty.

## Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

The CNS Post-Graduate Certificate consists of 18 credit hours of coursework. All courses are 3 credits each and are offered in a 3-semester sequence so the program can be completed in 12 months. The three practicum courses vary by population focus and must be taken sequentially. The three theory courses vary by population focus and the plan for theory course work must be approved by the CNS option coordinator. The three courses must be graduate level (700 or above) and provide content across the continuum from wellness through acute care for the selected population.

### Adult/Gerontology Track

Code	Title	Credits

NURS 702	Advanced Practice Nursing Adult-Gerontology Chronic Illness	3
NURS 703	Advanced Practice Nursing Adult-Gerontology Acute Illness	3
Select one of the following two courses:		3
NURS 704	Advanced Practice Nursing Adult-Gerontology Critical Illness	

NURS 760	Processes of Aging (Offered regularly during fall semester or NURS 704)	
<b>Total Credits</b>		<b>18</b>

## Pediatric Track

Code	Title	Credits
<b>Clinical</b>		
NURS 817	Clinical Nurse Specialist Practicum I- Pediatric	3
NURS 818	Clinical Nurse Specialist Practicum II- Pediatric	3
NURS 819	Clinical Nurse Specialist Practicum III- Pediatric	3
<b>Theory</b>		
ED PSY 640	Human Development: Theory and Research	3
SOC WRK 771	Development of the Family Over the Life Span	3
NURS 766	Advanced Practice Nursing: Care of the Child and Family	3
<b>Total Credits</b>		<b>18</b>

## Psychiatric/Mental Health Track

Code	Title	Credits
<b>Clinical</b>		
NURS 811	Clinical Nurse Specialist Practicum I- Psychiatric/Mental Health	3
NURS 812	Clinical Nurse Specialist Practicum II- Psychiatric/Mental Health	3
NURS 813	Clinical Nurse Specialist Practicum III- Psychiatric/Mental Health	3
<b>Theory<sup>1</sup></b>		
COUNS 715	Multicultural Counseling	3
NURS 774	Trauma Counseling I: Theory and Research	3
NURS 775	Trauma Counseling II: Diagnosis and Treatment	3
ED PSY 752	Developmental Psychopathology	3
SOC WRK 753	Adult Psychopathology	3
<b>Total Credits</b>		<b>18</b>

<sup>1</sup> Recommended courses may include the courses listed under this heading.

## Additional Requirements

### Allowance for Transfer Credit

If approved by the CNS option coordinator, one 3-credit course from an institution other than UWM may be transferred in to meet requirements of the certificate program.

### Completion Requirements

Certificate program progression requirements will be consistent with the School of Nursing requirements for progression in graduate level programs. Students must complete all courses with at least a B- or better

and a cumulative GPA of a 3.00 or greater in order to progress in the program.

### Time limit

It is expected that students will complete the certificate within one year from time of enrollment.

### Certificate Conferral

The certificate will be awarded upon successful completion of the requirements (i.e. once all grades for the certificate courses are officially recorded with a cumulative GPA of 3.0 or greater). Successful completion of the certificate program will be noted on the student's transcript.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Certification and Licensing

On completion of the CNS Certificate program, graduates with a population focus on adult/gerontology or pediatrics will be eligible to take the national CNS certification exams in adult/gerontology or pediatrics offered by American Nurses Credentialing Center (ANCC, 2013) or by the American Association of Critical Care Nurses (AACN) Certification Corporation (AACN, 2014). Upon successful completion of the CNS certification exam, graduates may choose to apply for prescriptive privileges in the state of Wisconsin as an Advanced Practice Nurse Prescriber or APNP (Wisconsin DSPS, 2013). Currently, CNS certification exams are not available for the maternal/infant or psychiatric/mental health populations.

## Family Nurse Practitioner, Graduate Certificate

This 18-credit post graduate Family Nurse Practitioner (FNP) Graduate Certificate is designed to provide advanced practice nurses with preparation as a Family Nurse Practitioner. Upon completing the certificate requirements, students will be eligible to sit for national certification exams offered by the American Nurses Credentialing Center (ANCC) or by the American Academy of Nurse Practitioners National Certification Board (AANPCB). Once nationally certified the FNP is eligible to apply for licensure in all fifty states.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Admission

The admission requirements of the FNP Post Graduate Certificate are consistent with those requirements specified by the Graduate School of the University of Wisconsin-Milwaukee. In addition, students must also meet the following requirements for the College of Nursing:

- A master's or doctoral degree in Nursing from an accredited program providing preparation as a nurse practitioner, clinical nurse specialist, certified nurse midwife, or certified registered nurse anesthetist.
- Certification in their current advanced practice registered nurse specialty as applicable.
- Completion with a grade of B or better of a graduate-level course in physiology/pathophysiology, pharmacology, and comprehensive assessment. Evidence of prescriptive authority in the state of Wisconsin will be accepted in place of graduate pharmacology.
- Current registration as a professional nurse in the state of Wisconsin.
- Three (3) letters of recommendation, two (2) of which are from persons most knowledgeable about the applicant's recent academic and work experiences.
- Personal interviews with a faculty member may be requested.
- Resume or Curriculum Vitae (CV).
- Personal statement that includes rationale for certificate study and career goals.
- One year of clinical experience relevant to the chosen specialty.

## Credits and Courses

The Post Graduate FNP certificate is designed to provide advanced practice nurses with preparation as a Family Nurse Practitioner. The Certificate is 18 credits; six courses are required. Theory courses are taken concurrently with practicum courses.

Code	Title	Credits
<b>Theory Courses</b>		
NURS 767	Family Nurse Practitioner Theory I	3
NURS 768	Family Nurse Practitioner Theory II	3

NURS 769	Family Nurse Practitioner Theory III	3
<b>Practicum Courses</b>		
NURS 757	Family Nurse Practitioner Practicum I	3
NURS 758	Family Nurse Practitioner Practicum II	3
NURS 759	Family Nurse Practitioner Practicum III	3
<b>Total Credits</b>		<b>18</b>

## Additional Requirements

### Allowance for Transfer Credit

If approved by the FNP Option Coordinator, one 3-credit course from an accredited institution other than UWM may be transferred to meet requirements of the certificate program.

### Completion Requirements

Certificate program progression requirements will be consistent with the College of Nursing requirements for progression in graduate level programs. Students must complete all courses with at least a B- or better and a cumulative GPA of a 3.00 or greater.

### Time limit

It is expected that students will complete the certificate in one year from time of enrollment.

### Certificate Conferral

The certificate will be awarded upon successful completion of the requirements (i.e. once all grades for the certificate courses are officially recorded with cumulative GPA of 3.00 or greater). Successful completion of the certificate program will be noted on the student's transcript.

## Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Global Health, Undergraduate Certificate (School of Nursing)

Anne Dressel, *Director, Center for Global Health Equity, Nursing, Certificate Coordinator*

Connor Sampson, *Advisor, Nursing, sampsocc@uwm.edu*

Global Health is an interdisciplinary undergraduate certificate administered by the Director of the Center for Global Health Equity and the Global Health Advisory Committee (GHAC).

The world is economically, politically, culturally, and technologically connected and interdependent with increasingly mobile populations seeking economic opportunity, security, and safety as a result of civil unrest, regional conflicts, diminished natural resources, poverty, and disease. Although some health problems and issues remain specific to levels and contexts of socio-cultural, economic, and political development within countries, many of the same problems, issues, and concerns transcend geographic boundaries, as should appropriate approaches and solutions. The concept of “global health” describes and addresses these realities. An undergraduate certificate in Global Health will provide students with academic inquiry into:

- the global burden of disease
- the social determinants of health in a global context
- the principles, language, and measurement tools used in global health
- ethics and global health
- the global cultural, religious, and historical contexts of health, disease, and health care

The Global Health Certificate will provide undergraduate students with an opportunity to focus on current global health issues and concerns, policies, processes, programs, and practices that contribute to and hinder global health improvement. A wide array of courses will help students better comprehend the interdisciplinary approach to understanding and addressing global health issues.

## Eligibility

The Global Health Certificate is intended to enhance a bachelor’s degree. The certificate is available to all students seeking a bachelor’s degree from UWM, to students who previously have received a bachelor’s degree from UWM or any other accredited college or university, and to those who do not plan to pursue a college or university degree (non-degree students) but who have a strong interest in this subject. Non-degree students must meet regular University admission requirements. Students currently involved in baccalaureate studies who successfully complete the requirements of the program will be awarded the certificate at the time of graduation. Students who already have a bachelor’s degree will receive the certificate upon completion of the program requirements.

## Requirements

To obtain the certificate, the student must complete, with a minimum grade point average of 2.500, at least 21 credits in approved Global Health courses, of which 12 must be earned in residence at UWM. Of these 12 residence credits, 9 must be taken at the 300 level or above. A minimum of 6 credits must be taken in the College of Letters and Science. A minimum of 6 credits must be taken in the College of Nursing. No more than 9 credits from any one department may count toward the certificate. A maximum of 6 credits of independent study may count toward program requirements. Courses for the certificate may not be taken on a credit/no credit basis.

Independent study courses focusing on global health issues may be accepted with the approval of the Certificate Program Coordinator. Other courses not on this list but relevant to the study of global health may be accepted with the approval of the Certificate Program Coordinator.

Credits earned at other institutions equivalent to courses in the certificate program may be accepted in partial fulfillment of the program requirements, subject to review by the Certificate Program Coordinator. Students currently enrolled at UWM who have fulfilled some

of the program’s requirements prior to the approval of this program may count those courses toward completion of the certificate requirements.

The following are required:

Code	Title	Credits
<b>Core</b>		
NURS 301	Introduction to Global Health	3
PH 101	Introduction to Public Health	3
<b>World Regions</b>		
Select one of the following:		3

PH 303	Climate Change, the Environment and Human Health	3
POL SCI 374	Health, Wealth, and Democracy	3
SPANISH 388	Health Issues in the Hispanic World	3

## Fieldwork

Students are required to do an internship, self-designed research project, or study abroad (for a minimum of 3 credits at the 300-level or above) in the field of global health. The purpose of this requirement is to enable the student to engage in global health work through "practical" experience or research. The area of study must be approved by the coordinator of the Global Health Certificate and must meet the requirements of the department through which it is being completed.

The fieldwork requirement can be fulfilled in one of three ways:

- Internship – A number of global health internships are available through the International Studies Major (INTLST 450), as well as other departments and organizations.
- Study Abroad – UWM offers a number of Global Health study abroad programs, through several departments.
- Independent Study – The student may propose a global health research project to a professor in an area of interest. The independent study also must be discussed with and approved by the Global Health Certificate Coordinator.

# Health Professional Education, Graduate Certificate (School of Nursing)

The Health Professional Education certificate is designed to provide health professionals with additional preparation in educational principles and theory to support them in their roles as educators of students and staff in the health professions as well as in the role of patient educator. This program is open to students simultaneously enrolled in a graduate degree program, as well as to health professionals who have completed a baccalaureate, master's, or doctoral degree. The certificate program is a collaborative program between the College of Health Professions and Sciences and Schools of Nursing and Education, and is coordinated through the School of Nursing.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the

Panthera application before completing 6 credits in the certificate sequence.

- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Admission

Applicants are admitted to the certificate program in one of three categories: post-baccalaureate, current student in a UWM graduate health profession program, or post-graduate student.

1. Post-baccalaureate students must have completed a bachelor's degree in a health profession discipline with a grade point average of 2.75 or above (4.0 scale) and not be currently enrolled in a graduate degree program at UWM.
2. The admission requirements of the health professional educational certificate for students enrolled in good standing in a UWM graduate health profession program are consistent with those requirements specified by the program.
3. Post-graduate students must have completed a graduate degree in a health profession or related discipline with a grade point average of 3.0 or above (4.0 scale).

## Credits and Courses

The completion of 15 credit hours (5 courses) is required for the certificate program.

Code	Title	Credits
<b>Core</b>		
AD LDSP 757	Principles and Foundations of Adult Education	3
NURS 731	Practicum and Seminar in Health Professional Education	3
<b>Curriculum/Program Planning &amp; Evaluation Courses</b>		
Select one of the following:		3
AD LDSP 667	Program Planning in Adult Education	
AD LDSP 607	Coordination of Staff Development and Training Program	
AD LDSP 647	Evaluation of Adult, Continuing, and Higher Education Programs	
NURS 752	Curriculum Development in Nursing Education	
<b>Teaching/Instructional Strategies</b>		
Select one of the following:		3
AD LDSP 687	Instructional Design and Teaching Strategies	
AD LDSP 707	Using Technology With Adult Learners	
AD LDSP 827	Seminar in Adult and Organizational Learning	
NURS 705	Instructional Strategies for Patient Education	
<b>Elective Courses</b>		
Select one additional course from the above or from the following:		3
AD LDSP 867	Seminar in Continuing Education in the Professions	

AD LDSP 787	Administration of Adult Education Programs
AD LDSP 547	The Educational Dimensions of Practice with Older Adults
NURS 764	Changing Health Behaviors
CURRINS 774	College Teaching
NURS 751	Teaching in Practice Disciplines
<b>Total Credits</b>	<b>15</b>

A current listing of courses that meet these requirements can be obtained from the College of Health Professions and Sciences or the School of Nursing. Students will need to maintain a 3.0 GPA and meet all other requirements of the Graduate School for continuation in the program. The Practicum and Seminar in Health Professional Education is the last course taken in the certificate program.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Interprofessional Public and Population Health, Graduate Certificate (School of Nursing)

The Interprofessional Public and Population Health Graduate Certificate is designed for students and working professionals involved in program planning and implementation, evaluation, education policy, health policy, engineering administration, research, and other areas related to public and population health. It recognizes that an interdisciplinary, systems approach is essential for communities to solve complicated social and economic problems. No one perspective or set of strategies can address the many dimensions of current societal problems. Prevention and population health are important cornerstones of the solutions to these problems, requiring linkages and new models of interaction among primary care, hospitals, communities and public health.

The Interprofessional Graduate Certificate is a 16-credit program with courses in four core disciplines: epidemiology, health policy, social and behavioral health, and environmental health. The fifth course grounds students in public health principles and practice. The sixth course will provide students the opportunity to engage in interprofessional workshops and other learning forums to foster competencies in interprofessional values, communication and teamwork. Three of the courses, in health behavior, epidemiology and health policy, are offered online, which will provide added flexibility for students.

This program is open to post-baccalaureate students, to those currently enrolled in a UWM graduate degree program, as well as to health professionals who have completed a baccalaureate, master's or doctoral degree. The certificate program is a collaborative program between the College of Health Professions and Sciences, School of Nursing, and the Zilber College of Public Health, and is coordinated through the Zilber College of Public Health with administrative support from the School of Nursing.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

The completion of 16 credit hours is required for the certificate program. All students are required to complete six courses (all are 3 credits unless noted):

Code	Title	Credits
PH 700	Structures of Inequality and Population Health	3
PH 703	Environmental Health Sciences	3
NURS 728	Epidemiological Principles for Population Health	3
NURS 803	Health Policy	3
KIN 556	Multilevel Approaches to Changing Physical Activity and Eating Behaviors	3
or KIN 534	Physical Activity, Exercise and Health	
ATRAIN 703	Foundations of Interprofessional Practice	1
<b>Total Credits</b>		<b>16</b>

Students will need to maintain a 3.0 GPA and meet all other standard requirements for UWM graduate students for continuation in the program.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.

- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Nursing Practice, DNP

The Doctor of Nursing Practice program at UWM prepares nurses for the highest academic preparation in clinical nursing. The DNP will prepare practitioners who are able to use their education and expertise in evidence-based practice in providing outstanding care and collaborative leadership to improve clinical care delivery, patient outcomes, and system management.

There are three entry options for the Doctor of Nursing (DNP) Practice Program:

- Program for individuals with a bachelor's degree in nursing and a current Registered Nurse license.
- Program for individuals with an advanced practice master's degree in nursing and a current Registered Nurse license.
- Program for individuals with a master of nursing (or equivalent) degree and a current Registered Nurse license.

Students may be admitted for the Fall or Spring semester, on a part-time or full-time plan of study.

Students entering with a bachelor's degree in nursing or a master of nursing degree and a current RN license choose a specialization in one of the following areas:

- Family Nurse Practitioner (FNP)
- Adult-Gerontology Acute Care Nurse Practitioner (AG ACNP)
- Psychiatric-Mental Health Nurse Practitioner (PMHNP)
- Clinical Nurse Specialist (CNS): Population focus in Adult-Gerontology, or Pediatrics.
- Nursing System Leadership (Nurse Executive)

The online Post-Master's Doctor of Nursing Practice is for Advanced Practice Nurses (NP, CNS, CNM, CRNA) with a master's degree.

Transcript Designated Concentrations:

- Family Nurse Practitioner
- Adult-Gerontology Acute Care Nurse Practitioner
- Psychiatric-Mental Health Nurse Practitioner
- Clinical Nurse Specialist- Adult-Gerontology
- Clinical Nurse Specialist-Pediatrics
- Nursing System Leadership-Nurse Executive

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Admission

The admission requirements of the DNP program in Nursing are consistent with those requirements specified by the Graduate School of the University of Wisconsin-Milwaukee. In addition, students must also meet the following requirements for the School of Nursing:

1. A bachelor's degree or a master's in Nursing from a professionally accredited program, with a minimum undergraduate grade point average of at least 3.0 (4.0 scale).
2. One year of RN experience.
3. Completion with a grade of B or higher of an upper-level undergraduate course in statistics within the last five years.
4. A current unencumbered Registered Nurse license.
5. Three (3) letters of recommendation for graduate study in nursing, two (2) of which are from persons most knowledgeable about the applicant's recent academic and work experiences.
6. Completion of a personal statement.
7. Current CV or resume.
8. Submission of one writing sample.
9. Personal interview with a faculty member may be requested.

## Reapplication

A student who receives a master's degree from the University of Wisconsin-Milwaukee must formally reapply for admission to the Graduate School before continuing studies toward the DNP.

## Credits and Courses

### Post Advanced Practice Master's Curriculum

The Post Advanced Practice Master's Doctor of Nursing Practice (DNP) is a 26- to 32-credit, Post-Master's program, which builds upon the required entry point of advanced practice specialization in nursing. The variable credits reflect the credit intensive load of traditional Master's programs preparing Advanced Practice Nurses (generally greater than 40 credits). Up to six credits from the previous Advanced Practice Master's program may be recognized based on review of the previous Master's Program coursework and transcript if courses are duplicative of required courses.

The program includes 32 credit hours of core theoretical courses, including the advanced nursing practice core (6 credits), an evidence-based practice core (9 credits), a systems core (9 credits), and 8 credits of the DNP Project Core.

Code	Title	Credits
<b>Core Theoretical Coursework</b>		
<i>Foundations of Advanced Nursing Practice Core</i>		
NURS 728	Epidemiological Principles for Population Health	3
NURS 804	Healthcare Organization and Systems Leadership for Advanced Practice	3
<i>Evidence Based Practice Core</i>		
NURS 720	Biostatistics and Applications for Nursing Practice	3
NURS 725	Evidence Based Practice in Healthcare	3
NURS 805	Translational and Implementation Science	3
<i>Systems Core</i>		
NURS 750	Outcomes and Quality Management	3

NURS 773	Information Systems to Support Clinical Decision-Making	3
NURS 803	Health Policy	3
<b>Project Core</b>		
NURS 993	DNP Project I: Plan	2
NURS 994	DNP Project II: Proposal	2
NURS 995	DNP Project III: Leadership Practice Immersion <sup>1</sup>	4
<b>Total Credits</b>		<b>32</b>

<sup>1</sup> May be completed over 1 or 2 semesters.

## Additional Requirements

### Faculty Advisor

The student must have a Faculty Advisor to advise and supervise the student's studies as specified in Graduate School regulations. The student is assigned to a Faculty Advisor at the time of admission.

### Leadership Practice Immersion

Both the post baccalaureate and post master's curriculum include a 4-credit DNP Project III, an experience that will include the required DNP project. This residency experience will include 460 additional clinical hours in the student's specialty focus area and will include an emphasis on the evidence-based practice, leadership and system competencies of the DNP prepared graduate.

### Time Limit

Students in the post baccalaureate DNP program must complete all degree requirements within seven years of the first enrollment semester as a degree student. Students in the post master's DNP program must complete all degree requirements within five years of the first enrollment semester as a degree student.

### Minimum Grade Requirement

For continuation in the program, in addition to general Graduate School requirements (<http://uwm.edu/graduateschool/academic-policies-procedures/>), students must achieve a minimum grade of B- in all required nursing courses. However, an overall GPA of 3.00 is still required for the degree.

### Residence

The student must meet minimum Graduate School residence requirements.

### DNP Project II: Proposal/Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for degree. The doctoral examination comprises a written portfolio and an oral component, taken in that sequence, with each component requiring a passing grade for successful completion. The examination is an integrative experience that is designed to validate the student's mastery of the content of the DNP curriculum and must be completed prior to beginning the residency experience.

### DNP Project III: Leadership Practice Immersion

The candidate will complete a final comprehensive clinical project as part of the Leadership Practice Immersion experience which demonstrates the ability to implement the principles of evidence-based practice and translation under the direction of the faculty advisor.

The candidate must, as the final step toward the degree, pass an oral examination in defense of the clinical project. A candidate who does not

pass this examination may apply for reexamination within one year from the initial examination date. This reexamination may occur only one time. A candidate who does not pass this examination within program time limits may be required to undergo another comprehensive preliminary examination and be readmitted to the program and/or candidacy.

## Nursing Practice, DNP/Business Administration, MBA

The Lubar College of Business and the University of Wisconsin-Milwaukee School of Nursing collaboratively offer a program designed to provide a combined nursing and business curriculum to strengthen the graduate's performance as a leader and manager in nursing and health care administration.

### Requirements

#### Admission Requirements

##### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

##### Admission

Students are admitted to both the University of Wisconsin-Milwaukee graduate programs in nursing and business administration. The admission requirements are consistent with those specified by the UWM Graduate School, College of Nursing and Lubar College of Business. Applicants may choose to complete either the GMAT (<http://uwm.edu/graduateschool/admission/#gmat>) or GRE (<http://uwm.edu/graduateschool/admission/#gre>) and must have a BS in Nursing degree and at least two years' practice in a health care setting. Three letters of reference are required including one from a former faculty and one from a health care employer.

#### Credits and Courses

MBA foundation coursework provides the basis for the theory and practice of business. The MBA Program requires Bus Adm 701, Business Mathematics (2 cr), and Bus Adm 703, Financial Accounting (3 cr). Bus Adm 701 is waived for individuals who have completed an appropriate academic course in their background, or have earned an appropriate Quantitative sub-score on the GMAT (<http://uwm.edu/graduateschool/admission/#gmat>) or GRE (<http://uwm.edu/graduateschool/admission/#gre>) or have passed the proficiency exam. Bus Adm 703 is waived for individuals who have completed an appropriate course in their background, or have passed the proficiency exam. Bus Adm 701 and Bus Adm 703 do not count toward the degree. Students are also assumed to have basic proficiency in information technology (IT), including the use of word processing, spreadsheets, presentation software, and web browsers. Online resources are available for Bus Adm 701, 703, and IT.

For the coordinated degree program, students will complete **83** credit hours. A student not completing the requirements for the coordinated degree program would need to complete all requirements of an individual program—MBA or DNP—in order to receive a degree.

<sup>1</sup> Integrating course for the coordinated degree program.

## Additional Requirements

A student not completing the requirements for the coordinated degree program would need to complete all requirements of an individual program—MBA or DNP—in order to receive a degree. Students must fulfill the MBA Program Boot Camp and Executive Development activities to meet all graduation requirements.

### DNP Project

The candidate will complete a final comprehensive clinical project as part of the **leadership practice immersion** experience, which demonstrates the ability to implement the principles of evidence-based practice and translation under the direction of the **faculty advisor**.

The candidate must, as the final step toward the degree, pass an oral examination in defense of the **DNP** project. A candidate who does not pass this examination may apply for reexamination within one year from the initial examination date. This reexamination may occur only one time. A candidate who does not pass this examination within program time limits may be required to undergo another comprehensive preliminary examination and be readmitted to the program and/or candidacy.

### Time Limit

Students in the coordinated MBA/DNP degree program must complete all degree requirements within seven years of the first enrollment semester as a degree student.

## Nursing Practice, DNP: Adult-Gerontology Acute Care Nurse Practitioner

The Doctor of Nursing Practice program at UWM prepares nurses for the highest academic preparation in clinical nursing. The DNP will prepare practitioners who are able to use their education and expertise in evidence-based practice in providing outstanding care and collaborative leadership to improve clinical care delivery, patient outcomes, and system management.

There are three entry options for the Doctor of Nursing (DNP) Practice Program:

1. Program for individuals with a bachelor's degree in nursing and a current Registered Nurse license.
2. Program for individuals with an advanced practice master's degree in nursing and a current Registered Nurse license.
3. Program for individuals with a master of nursing (or equivalent) degree and a current Registered Nurse license.

Students may be admitted for the Fall or Spring semester, on a part-time or full-time plan of study.

Students entering with a bachelor's degree in nursing or a master of nursing degree and a current RN license choose a specialization in one of the following areas:

- Family Nurse Practitioner (FNP)
- Adult-Gerontology Acute Care Nurse Practitioner (AG ACNP)
- Psychiatric-Mental Health Nurse Practitioner (PMHNP)
- Clinical Nurse Specialist (CNS): Population focus in Adult-Gerontology, or Pediatrics.
- Nursing System Leadership (Nurse Executive)

The online Post-Master's Doctor of Nursing Practice is for Advanced Practice Nurses (NP, CNS, CNM, CRNA) with a master's degree.

Transcript Designated Concentrations:

- Family Nurse Practitioner
- Adult-Gerontology Acute Care Nurse Practitioner
- Psychiatric-Mental Health Nurse Practitioner
- Clinical Nurse Specialist- Adult-Gerontology
- Clinical Nurse Specialist-Pediatrics
- Nursing System Leadership-Nurse Executive

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

The admission requirements of the DNP program in Nursing are consistent with those requirements specified by the Graduate School of the University of Wisconsin-Milwaukee. In addition, students must also meet the following requirements for the School of Nursing:

1. A bachelor's degree or a master's in Nursing from a professionally accredited program, with a minimum undergraduate grade point average of at least 3.0 (4.0 scale).
2. One year of RN experience.
3. Completion with a grade of B or higher of an upper-level undergraduate course in statistics within the last five years.
4. A current unencumbered Registered Nurse license.
5. Three (3) letters of recommendation for graduate study in nursing, two (2) of which are from persons most knowledgeable about the applicant's recent academic and work experiences.
6. Completion of a personal statement.
7. Current CV or resume.
8. Submission of one writing sample.
9. Personal interview with a faculty member may be requested.

### Reapplication

A student who receives a master's degree from the University of Wisconsin-Milwaukee must formally reapply for admission to the Graduate School before continuing studies toward the DNP.

## Credits and Courses

### Post Baccalaureate Curriculum

The Doctor of Nursing Practice (DNP) is a three-year, full time, 65-credit post-baccalaureate program, which includes 30 credit hours of core theoretical courses, an advanced nursing practice core (9 credits), a research core (9 credits) a systems core (12 credits), 27 credits hours of specialty theory and practicum courses, and 8 credits in the DNP Project Core.

Code	Title	Credits
<b>Core Theoretical Coursework</b>

NURS 994	DNP Project II: Proposal	2
NURS 995	DNP Project III: Leadership Practice Immersion <sup>1</sup>	4
<b>Total Credits</b>		<b>65</b>

<sup>1</sup> May be completed over 1 or 2 semesters.

### Post Generalist Master's Curriculum (MN or equivalent)

The Post Generalist Master's Curriculum is a minimum of 41 credits that builds upon the required entry point of a Generalist Master's in Nursing (MN or equivalent). Where course background varies, an individual plan of study will be developed based on review of the previous master's program coursework and transcript.

Code	Title	Credits

<b>Total Credits</b>		<b>27</b>

### Additional Requirements

#### Faculty Advisor

The student must have a Faculty Advisor to advise and supervise the student's studies as specified in Graduate School regulations. The student is assigned to a Faculty Advisor at the time of admission.

#### Leadership Practice Immersion

Both the post baccalaureate and post master's curriculum include a 4-credit DNP Project III, an experience that will include the required DNP project. This residency experience will include 460 additional clinical hours in the student's specialty focus area and will include an emphasis on the evidence-based practice, leadership and system competencies of the DNP prepared graduate.

#### Time Limit

Students in the post baccalaureate DNP program must complete all degree requirements within seven years of the first enrollment semester as a degree student. Students in the post master's DNP program must

complete all degree requirements within five years of the first enrollment semester as a degree student.

### Minimum Grade Requirement

For continuation in the program, in addition to general Graduate School requirements (<http://uwm.edu/graduateschool/academic-policies-procedures/>), students must achieve a minimum grade of B- in all required nursing courses. However, an overall GPA of 3.00 is still required for the degree.

### Residence

The student must meet minimum Graduate School residence requirements.

### DNP Project II: Proposal/Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for degree. The doctoral examination comprises a written portfolio and an oral component, taken in that sequence, with each component requiring a passing grade for successful completion. The examination is an integrative experience that is designed to validate the student's mastery of the content of the DNP curriculum and must be completed prior to beginning the residency experience.

### DNP Project III: Leadership Practice Immersion

The candidate will complete a final comprehensive clinical project as part of the Leadership Practice Immersion experience which demonstrates the ability to implement the principles of evidence-based practice and translation under the direction of the faculty advisor.

The candidate must, as the final step toward the degree, pass an oral examination in defense of the clinical project. A candidate who does not pass this examination may apply for reexamination within one year from the initial examination date. This reexamination may occur only one time. A candidate who does not pass this examination within program time limits may be required to undergo another comprehensive preliminary examination and be readmitted to the program and/or candidacy.

## Nursing Practice, DNP: Clinical Nurse Specialist: Adult-Gerontology

## Additional Requirements

#### Faculty Advisor

The student must have a Faculty Advisor to advise and supervise the student’s studies as specified in Graduate School regulations. The student is assigned to a Faculty Advisor at the time of admission.

#### Leadership Practice Immersion

Both the post baccalaureate and post master’s curriculum include a 4-credit DNP Project III, an experience that will include the required DNP project. This residency experience will include 460 additional clinical hours in the student’s specialty focus area and will include an emphasis

on the evidence-based practice, leadership and system competencies of the DNP prepared graduate.

### Time Limit

Students in the post baccalaureate DNP program must complete all degree requirements within seven years of the first enrollment semester as a degree student. Students in the post master's DNP program must complete all degree requirements within five years of the first enrollment semester as a degree student.

### Minimum Grade Requirement

For continuation in the program, in addition to general Graduate School requirements (<http://uwm.edu/graduateschool/academic-policies-procedures/>), students must achieve a minimum grade of B- in all required nursing courses. However, an overall GPA of 3.00 is still required for the degree.

### Residence

The student must meet minimum Graduate School residence requirements.

### DNP Project II: Proposal/Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for degree. The doctoral examination comprises a written portfolio and an oral component, taken in that sequence, with each component requiring a passing grade for successful completion. The examination is an integrative experience that is designed to validate the student's mastery of the content of the DNP curriculum and must be completed prior to beginning the residency experience.

### DNP Project III: Leadership Practice Immersion

The candidate will complete a final comprehensive clinical project as part of the Leadership Practice Immersion experience which demonstrates the ability to implement the principles of evidence-based practice and translation under the direction of the faculty advisor.

The candidate must, as the final step toward the degree, pass an oral examination in defense of the clinical project. A candidate who does not pass this examination may apply for reexamination within one year from the initial examination date. This reexamination may occur only one time. A candidate who does not pass this examination within program time limits may be required to undergo another comprehensive preliminary examination and be readmitted to the program and/or candidacy.

## Nursing Practice, DNP: Family Nurse Practitioner

The Doctor of Nursing Practice program at UWM prepares nurses for the highest academic preparation in clinical nursing. The DNP will prepare practitioners who are able to use their education and expertise in evidence-based practice in providing outstanding care and collaborative leadership to improve clinical care delivery, patient outcomes, and system management.

There are three entry options for the Doctor of Nursing (DNP) Practice Program:

1. Program for individuals with a bachelor's degree in nursing and a current Registered Nurse license.
2. Program for individuals with an advanced practice master's degree in nursing and a current Registered Nurse license.

3. Program for individuals with a master of nursing (or equivalent) degree and a current Registered Nurse license.

Students may be admitted for the Fall or Spring semester, on a part-time or full-time plan of study.

Students entering with a bachelor's degree in nursing or a master of nursing degree and a current RN license choose a specialization in one of the following areas:

- Family Nurse Practitioner (FNP)
- Adult-Gerontology Acute Care Nurse Practitioner (AG ACNP)
- Psychiatric-Mental Health Nurse Practitioner (PMHNP)
- Clinical Nurse Specialist (CNS): Population focus in Adult-Gerontology, or Pediatrics.
- Nursing System Leadership (Nurse Executive)

The online Post-Master's Doctor of Nursing Practice is for Advanced Practice Nurses (NP, CNS, CNM, CRNA) with a master's degree.

Transcript Designated Concentrations:

- Family Nurse Practitioner
- Adult-Gerontology Acute Care Nurse Practitioner
- Psychiatric-Mental Health Nurse Practitioner
- Clinical Nurse Specialist- Adult-Gerontology
- Clinical Nurse Specialist-Pediatrics
- Nursing System Leadership-Nurse Executive

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

The admission requirements of the DNP program in Nursing are consistent with those requirements specified by the Graduate School of the University of Wisconsin-Milwaukee. In addition, students must also meet the following requirements for the School of Nursing:

1. A bachelor's degree or a master's in Nursing from a professionally accredited program, with a minimum undergraduate grade point average of at least 3.0 (4.0 scale).
2. One year of RN experience.
3. Completion with a grade of B or higher of an upper-level undergraduate course in statistics within the last five years.
4. A current unencumbered Registered Nurse license.
5. Three (3) letters of recommendation for graduate study in nursing, two (2) of which are from persons most knowledgeable about the applicant's recent academic and work experiences.
6. Completion of a personal statement.
7. Current CV or resume.
8. Submission of one writing sample.
9. Personal interview with a faculty member may be requested.

## Reapplication

A student who receives a master's degree from the University of Wisconsin-Milwaukee must formally reapply for admission to the Graduate School before continuing studies toward the DNP.

## Credits and Courses

### Post Baccalaureate Curriculum

The Doctor of Nursing Practice (DNP) is a three-year, full time, 65-credit post-baccalaureate program, which includes 30 credit hours of core theoretical courses, an advanced nursing practice core (9 credits), a research core (9 credits) a systems core (12 credits), 27 credits hours of specialty theory and practicum courses, and 8 credits in the DNP Project Core.

Code	Title	Credits
<b>Core Theoretical Coursework</b>		
<i>Foundations of Advanced Nursing Practice Core</i>		
NURS 726	Advanced Perspectives on Cultural Diversity and Disparities in Health Care	3
NURS 728	Epidemiological Principles for Population Health	3
NURS 735	Theory for Advanced Practice	3
<i>Evidence Based Practice Core</i>		
NURS 720	Biostatistics and Applications for Nursing Practice	3
NURS 725	Evidence Based Practice in Healthcare	3
NURS 805	Translational and Implementation Science	3
<i>Systems Core</i>		
NURS 750	Outcomes and Quality Management	3
NURS 773	Information Systems to Support Clinical Decision-Making	3
NURS 803	Health Policy	3
NURS 804	Healthcare Organization and Systems Leadership for Advanced Practice	3
<b>Specialty Theory and Practicum</b>		<b>27</b>
<b>Project Core</b>		
NURS 993	DNP Project I: Plan	2
NURS 994	DNP Project II: Proposal	2
NURS 995	DNP Project III: Leadership Practice Immersion <sup>1</sup>	4
<b>Total Credits</b>		<b>65</b>

<sup>1</sup> May be completed over 1 or 2 semesters.

### Post Generalist Master's Curriculum (MN or equivalent)

The Post Generalist Master's Curriculum is a minimum of 41 credits that builds upon the required entry point of a Generalist Master's in Nursing (MN or equivalent). Where course background varies, an individual plan of study will be developed based on review of the previous master's program coursework and transcript.

Code	Title	Credits

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for degree. The doctoral examination comprises a written portfolio and an oral component, taken in that sequence, with each component requiring a passing grade for successful completion. The examination is an integrative experience that is designed to validate the student's mastery of the content of the DNP curriculum and must be completed prior to beginning the residency experience.

### DNP Project III: Leadership Practice Immersion

The candidate will complete a final comprehensive clinical project as part of the Leadership Practice Immersion experience which demonstrates the ability to implement the principles of evidence-based practice and translation under the direction of the faculty advisor.

The candidate must, as the final step toward the degree, pass an oral examination in defense of the clinical project. A candidate who does not pass this examination may apply for reexamination within one year from the initial examination date. This reexamination may occur only one time.

A candidate who does not pass this examination within program time limits may be required to undergo another comprehensive preliminary examination and be readmitted to the program and/or candidacy.

## Nursing, BS

The Bachelor of Science in Nursing (BS in Nursing) program at UW-Milwaukee will prepare graduates to be science-based, compassionate nurse leaders through innovative and quality educational programs for all specialties and settings of practice.

As the largest School of Nursing in the state, UW-Milwaukee partners with over 160 clinical agencies to prepare students for beginning positions of responsibility and leadership in providing professional care for clients and their families in a variety of healthcare settings. Classroom and clinical experiences provide students with the knowledge and skills needed to begin a nursing career after graduation including: critical-thinking, clinical leadership, advocacy, and application of the nursing process to deliver care.

The BS in Nursing program is offered on the Milwaukee campus, UW-Washington County and Waukesha campuses and through a Consortial Program at the UW-Parkside campus.

University of Wisconsin-Milwaukee School of Nursing is accredited through the Council of Baccalaureate and Higher Degree Programs of the Commission on Collegiate Nursing Education (CCNE) and the State of Wisconsin Board of Nursing.

## Pre-Professional Program New Freshmen

Students intending to pursue study in professional nursing are advised to complete the following units (one unit equals one year) in high school:

- 1/2 unit of speech (if available)
- 4 units of a foreign language
- 3 units of college preparatory mathematics at or above algebra level (required by UWM)
- 1/2 unit of computer science
- 1 unit of biology
- 1 unit of chemistry
- 1 unit of history
- 3 units of social studies
- 4 units of English (required by UWM)

In addition to completing high school courses, applicants seeking admission to the pre-nursing program must have a composite ACT score of at least 19 (SAT equivalent of 910).

## Transfer Students

Students intending to transfer into the pre-nursing curriculum must meet the following criteria:

1. Completion of a minimum of 15 credits;
2. Cumulative GPA of 2.5 on all completed coursework; and
3. Completion of one transferable science class with a grade of B or better.

(The required pre-nursing science courses include: BIO SCI 101, BIO SCI 202, BIO SCI 203, CHEM 101, CHEM 103, and BMS 332.)

The policies and procedures of the School apply to all students even though the student may be enrolled in courses in another college or school within the University.

The general regulations governing UWM presented in this catalog apply to all pre-nursing students. The pre-nursing classification does not automatically guarantee acceptance into the nursing major.

The PSYCH 101 and NURS 203 sequence is required for Freshman, but transfers who have completed another Psych/Human Growth and Development sequence do not need to take these two courses at UW-Milwaukee.

### Non-Nurse College Graduates

After prerequisites are met, non-nurse college graduates may be admitted into the professional nursing major or the master's (MN) program. Individuals' records, including consideration of related work experiences, are assessed to assign transfer credit for previous college-level coursework and to offer opportunities for credit by examination.

## Professional Program

Students who seek to enter the major and meet eligibility criteria (see below) are required to file an application with the Student Affairs Office, School of Nursing. (This form is in addition to the application form required for admission to the University.) The School of Nursing Undergraduate Program Committee reviews the applications and makes recommendations for admission. Admission to the nursing major is highly competitive. A grade of C or higher must be earned in all requirements for the major. The average GPA of students accepted to the nursing major can be significantly higher than the minimum required GPA of 2.75, and a science minimum GPA of 2.75, needed for application to the major.

### Application Deadlines

Students who seek to enter the nursing major in September must submit applications by the preceding January 2; for January entrance the deadline is the preceding July 24.

### Eligibility Criteria

Students are required to meet the following criteria to be reviewed for selection into the nursing major:

Code	Title	Credits
<b>Coursework</b> <sup>1, 2, 3, 4</sup>		
NURS 101	Cultural Diversity in Health Care	3
NURS 203	Human Growth and Development Across the Life Span	4
BIO SCI 202	Anatomy and Physiology I	4
BIO SCI 203	Anatomy and Physiology II	4
BIO SCI 101	General Survey of Microbiology	4
CHEM 101	Chemical Science <sup>5</sup>	5
CHEM 103	Survey of Biochemistry <sup>5</sup>	5
BMS 332	Clinical Nutrition	2
ENGLISH 102	College Writing and Research <sup>5</sup>	3
PSYCH 101	Introduction to Psychology	3
Sociology (any course)		3

HS 222 Language of Medicine<sup>6</sup> 3

Additional Professional Admission Requirements	
Demonstration of competency in Math and English.	
Completion of the Transfer Reference Form must be submitted by the Dean of Nursing if an applicant has been enrolled in clinical nursing courses at another college/university. The form and/or attached letter should reflect a positive recommendation for the student's progression into the nursing major.	
An interview with the student making application may be requested at the discretion of the Undergraduate Program Committee.	
Demonstration of satisfactory health as evidenced by physical examination and fulfillment of the health and immunization requirements by the appropriate deadline. The School of Nursing reserves the right to require a student to seek advice of healthcare professionals where it is believed that a condition of health would impede their progress or jeopardize the health of others. The School of Nursing does not discriminate based on a disability and provides reasonable accommodation to qualified students on an individual basis.	
Knowledge of a computer word processing application.	
Criminal background check.	

**Total Credits 43**

- Courses may be repeated only once. No more than two (2) required courses may be repeated. All credit for required courses must have been earned in the 10 years preceding progression into the nursing major. Grades of less than 2.0 (C) must be replaced by grades greater than 2.0 (C) no later than August 31 for fall applicants and December 30 for spring applicants.
- Achieve a minimum grade point average of 2.75 on a 4.0 scale and 2.75 in the required science courses. This GPA is computed on the courses listed above.
- Achieve a minimum grade of 2.0 (C) in each required nursing and non-nursing course.
- All coursework must be completed with acceptable grades before beginning the nursing major.
- Enrollment in freshman-level courses is based on placement test scores. Depending on the outcome of the placement tests, one or more preparatory courses may be required before enrollment in higher-level courses is permitted. Credits earned in preparatory courses do not apply to the 120 credits required for graduation.
- Any course including those from outside Schools/Colleges/Universities would be accepted if designated as "Medical Terminology." Student Affairs and Program Director to evaluate syllabi for applicability.

## BS in Nursing Curriculum

Students must earn a minimum of 120-130 semester credits to complete requirements for the undergraduate degree. A cumulative GPA of 2.0 for all credits earned at UWM is required for graduation. For additional GPA requirements, refer to the Admission (p. 768) tab. Thirty semester credits must be completed on the Milwaukee campus; at least 20 of these credits must be earned in nursing. The required courses are listed below.

Code	Title	Credits
<b>General Education Requirements</b> <sup>1</sup>		
ENGLISH 102	College Writing and Research	3

<sup>1</sup> (GER credits) - All students are responsible for checking whether they must meet the UWM General Education Requirements. (p. 30)

<sup>2</sup> Any course including those from outside Schools/Colleges/Universities would be accepted if designated as "Medical Terminology." Student Affairs and Program Director to evaluate syllabi for applicability.

## Required Grade/Grade Point Average in the Professional Major

Every nursing student is required to maintain a minimum of a C average (cumulative GPA of 2.0 on a 4.0 scale) on all work attempted in each semester or summer session. Failure to meet this minimum GPA will automatically result in a status of academic probation.

In addition to maintaining a cumulative GPA of 2.0, a student must earn at least a C (2.0) in each required nursing course. (In a practicum nursing course, a student must earn at least a C in both the clinical and theoretical components in order to receive a C as the final course grade.) Any student who earns a grade below C (2.0) in a required nursing course is automatically dropped from the nursing major. Such a student must appeal to the Undergraduate Program Committee for readmission and permission to repeat the course in which a minimum grade of C was not earned.

In a nursing course with limited enrollment or a waiting list, qualified students who have not taken the course previously will have enrollment priority. Progression to the next level of courses is not permitted until all courses of the previous level have been successfully completed.

## Dropping Courses

Students should refer to a current class schedule for information concerning existing University of Wisconsin-Milwaukee drop policy guidelines and any exceptions for individual courses.

Following admission to the nursing major, a student who wishes to drop from a required or elective clinical nursing course or to withdraw must discuss the matter with the instructor, course coordinator or department chair, and the Associate Dean for Academic Affairs. In addition, the student may wish to discuss the matter with an academic advisor in the Student Affairs Office. Written approval to drop must be secured from the instructor and the Associate Dean irrespective of the week of the semester. Any such interruption in the sequence of courses following acceptance into the major requires re-admission to the clinical major. Information about applying for re-admission is available in the College of Nursing's Student Affairs Office.

## Grievance Procedure

The College of Nursing has a formal written grievance procedure, available in the College of Nursing's Student Affairs Office. A grievance is defined as any situation affecting the status of a student in which the student believes his/her rights have been compromised or denied because of an erroneous or arbitrary interpretation or application of rules. Student grievances are reviewed by the College of Nursing's

Undergraduate Program Committee, which recommends the disposition of the grievance to the Associate Dean for Academic Affairs. In addition, this Committee reviews and acts upon all cases of academic misconduct as described in Chapter UWS 17, UWM Student Disciplinary Procedures.

## Student Responsibilities in the Major

Students are expected to provide their own transportation, uniforms, books, supplies, equipment, and other learning resources, such as clients for practice experience, as deemed necessary to meet course objectives.

### Health

Good physical and mental health are essential for study and practice in professional nursing. The faculty of the College of Nursing reserves the responsibility for retaining only those students who demonstrate qualities of physical and mental health generally considered to be imperative for professional nursing practice.

Health and accident insurance is not provided for students by the University of Wisconsin-Milwaukee, or by any clinical agency where students may be assigned for clinical experience. Nursing students are expected to provide for their own personal health and accident insurance coverage.

A physical examination and specified immunizations are required of all students prior to enrollment in nursing practice courses. Expenses of this examination are the student's responsibility. Evidence of a physical examination – to be completed by a nurse practitioner, physician, or a physician assistant of the student's choice – must be submitted to the UWM College of Nursing Student Affairs Office on a date specified by the College of Nursing. The examination must be completed within 90 days before the date on which the student begins clinical nursing coursework. Students who do not meet these requirements may not continue in a clinical nursing practicum course.

Students are required to pass a 10-panel urine drug screen prior to participating in a clinical nursing practicum course. The purposes of the drug screen are to comply with expectations of area healthcare agencies, to provide optimal healthcare, and to support professional nursing's zero tolerance position related to the unlawful use of substances. Students must abide by the drug screen policies of each healthcare agency to which they are assigned for clinical practicums. Students are also required to complete a CPR certification program through American Heart Association at a health care provider level.

### Illness or Prolonged Absence

Students are expected to be present at all scheduled classes and clinical laboratory experiences. Since space in nursing courses is assigned during the first week of the semester, students are expected to be present for all instructional periods during that week as well. Frequent or prolonged absences from scheduled classes and/or clinical experiences may necessitate that the student drop a nursing course. Any planned interruption in coursework should be discussed with the student's advisor at the earliest possible date.

### Safe Professional Practice in Clinical Settings

Students are expected to demonstrate patterns of professional behaviors that follow the legal and ethical codes of nursing; promote the actual or potential well-being of clients, healthcare workers, and self in the biological, psychological, sociological, and cultural realms; demonstrate accountability in preparation, documentation, communication, and continuity of care; and show respect for the human rights of individuals. A student whose pattern of behavior is found to be unsafe may be

terminated from a clinical practicum for reason of unsafe practice at any time during the semester. If the behavior is identified before the drop date, the student will be directed to drop. If the drop date has passed, the student will receive a grade of F for the course. In order to continue in the nursing program, a student who is terminated from a clinical practicum must appeal to the Undergraduate Program Committee for re-admission to the nursing program.

### Travel

Students in nursing are responsible for arranging transportation to and from all agencies or clients' homes used to provide clinical experience for the program. They are also responsible for any related liability. Students are expected to carry insurance on their vehicles.

### Uniforms

Information about the uniform, a one-time investment, is sent to each student with the official letter of acceptance into the major. Students purchase their uniforms after acceptance.

## Professional Credentials

Wisconsin state law requires nurses to be licensed to practice nursing within the state. Licensure is obtained by endorsement or by passing an examination. Students graduating from the College of Nursing are eligible to write the examination if they:

1. are at least 18 years of age;
2. are graduates of a high school or its equivalent;
3. are able to speak, read, and write English; and
4. pay the fee for licensure.

Applicants for registration/licensure in the State of Wisconsin will be asked to state if they have ever been convicted of a criminal offense, excluding minor traffic violations. When individuals have such a conviction, an explanation is requested. An investigation may follow depending upon the circumstances and all the facts related to the situation. Some organizations may require background reviews prior to acceptance of a student by the placement site.

## Plan of Study

Individual course plans may vary. A Communication course in public speaking is strongly recommended (COMMUN 103 or COMMUN 105). Consult your academic advisor to confirm a plan of study.

Year 1		
Semester 1		Credits
MATH 105	Introduction to College Algebra	3

## Competencies/Program Outcomes

The graduate of the UWM College of Nursing is prepared to practice as a beginning generalist in a variety of settings. In addition, the graduate will possess knowledge and skills that qualify her or him to pursue life-long learning and advanced study. The UWM College of Nursing undergraduate and graduate programs are directed toward enhancing the health of those who live and work in urban communities.

### Patient-centered Care

The graduate will provide holistic care that recognizes patients' (individuals, families, groups, and communities) preferences,

values, and needs and respects patients or their designees as full partners in providing compassionate, coordinated, age and culturally appropriate, safe and effective care.

### Professionalism

The graduate will demonstrate accountability for the delivery of standard-based nursing care that is consistent with moral, altruistic, legal, ethical, regulatory, and humanistic principles.

### Leadership

The graduate will influence the behavior of individuals or groups of individuals within the environment in a way that will facilitate the establishment and acquisition/achievement of shared goals.

### Systems-based Practice

The graduate will demonstrate an awareness of and responsiveness to the larger context of the health care system, and will demonstrate the ability to effectively call on microsystem resources to provide care that is of optimal quality and value (Adapted from ACGME, n.d.).

### Informatics and Technology

The graduate will use information and technology to communicate, manage knowledge, mitigate error, and support decision making (QSEN, 2007).

### Communication

The graduate will interact effectively with patients, families, and colleagues, fostering mutual respect and shared decision making, to enhance patient satisfaction and health outcomes.

### Teamwork and Collaboration

The graduate will function within nursing and interdisciplinary teams, fostering open communication, mutual respect, shared decision making, team learning, and development (Adapted from QSEN, 2007).

### Safety

The graduate will minimize risk of harm to patients and providers through both system effectiveness and individual performance (QSEN, 2007).

### Quality Improvement

The graduate uses data to monitor the outcomes of care processes, and uses improvement methods to design and test changes to continuously improve the quality and safety of health care systems (QSEN, 2007).

### Evidence-based Practice

The graduate will identify, evaluate, and use the best current evidence coupled with clinical expertise and consideration of patients' preferences, experience and values to make practice decisions (Adapted from QSEN, 2007).

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Nursing, MN

The Master of Nursing program at the University of Wisconsin-Milwaukee offers students a nursing master's degree that successfully builds upon their existing degrees. Whether a student is already a practicing nurse or they are looking to earn a second degree in nursing, UWM's program helps students meet their goals of working in a generalist nursing practice at an advanced level or in nursing education.

A variety of program pathways make earning a Master of Nursing degree possible, with track options and program formats tailored to their needs. These four program pathways are: Direct Entry Master's, Expedited MN, BSN-MN (with three tracks: Professional Development Practitioner, Nurse Educator, and Unit Manager), and RN-BSN-MN. Graduates of the MN program will feel prepared to function as an advanced care-giver or educator depending on the track they choose.

## Credits and Courses

The Master of Nursing program at the University of Wisconsin-Milwaukee prepares graduates for roles in generalist nursing practice and education in diverse and urban communities, consistent with the *AACN Vision for Nursing Education* (AACN 2018, 2021). This model allows students to build on a core nursing foundation to an advanced level of nursing education (AACN, 2021). The focus is on the roles that masters-prepared nurses fulfill in the ever-evolving health care system. The program is designed to meet the needs of two types of students who seek a master's degree: 1) Direct Entry Masters students and 2) Students with a baccalaureate in nursing seeking a degree to prepare for an advanced role in nursing.

## Points of Entry to the MN Program

The MN program offers four points of entry: 1) Direct Entry for students with a non-nursing baccalaureate degree; 2) Expedited Entry for Registered Nurses with a non-nursing degree; 3) Registered Nurses with a baccalaureate degree in nursing; and 4) RN's who have completed the RN-BSN program. Each entry point offers individuals the opportunity to build on their current education and experiences and receive an education that positions them for specific roles that advance nursing practice within the health care system.

1. The **Direct Entry** prepare nurses who can function independently, yet collaboratively, at a wide variety of clinical positions with an

emphasis on quality and evidence-based practice. Graduates will be able to provide care for individuals, families, and populations in all healthcare settings and across the lifespan. Graduates will also be prepared with advanced nursing knowledge to apply evidence to practice and address quality concerns to improve patient care and promote patient safety.

2. **Expedited MN entry.** This entry point is open to students who have earned an associate degree in nursing and have a non-nursing baccalaureate degree. They are admitted as a special student and take courses in the RN-BSN program. This will allow them to have the educational experience and meet the competencies for Entry Level (level one) nurses as defined by the AACN in the *Essentials for Nursing* (2021). After completing the required courses, they enter the MN program and proceed with the course of study for the BSN-MN student. Students do not earn a BSN.
3. The **BSN-MN** point of entry is for nurses with a nursing baccalaureate seeking to increase their educational preparation for career advancement to a role usually requiring a masters degree. Health care systems and nursing education organizations are seeking masters prepared nurses to function as Professional Development Practitioners, Nurse Educators and Unit Managers. Professional Development Practitioners carry out roles within health care organizations that assure that nursing personnel have the knowledge and skills needed to be competent providers and have strong clinical judgment. Nursing educators carry out roles within colleges and universities teaching students in classroom, simulation, and health care settings who seek to enter professional nursing practice. Unit managers lead organizational units within the larger health care setting. Managers work to ensure that quality goals are met by assuring resources are in place including recruitment, retention, workforce development, fiscal resource management and representing the organization to patients and families. Graduates of the MN will be prepared to assess and evaluate, develop, implement, and evaluate systematic and innovative approaches to improve quality either directly or through the education of nursing providers, depending on the role.
4. **RN-BSN-MN.** The fourth point of entry is for RNs that enter the UWM education system without a baccalaureate degree. These students must first complete a RN-BSN program and then will be eligible to enter the BSN-MN program.

## Four Program Pathways

1. The **Direct Entry Master's (DEM)** program students are inducted to professional nursing by meeting the essential areas of competency defined by AACN *Essentials* (2021) for entry into practice (Level 1) and the requirements of the State of Wisconsin needed for a nurse entering into professional practice. Graduates are eligible to become a Registered Nurse in the State of Wisconsin. This curriculum is designed with courses to establish clinical knowledge and to support practice as a leader in the clinical setting. Core competencies include provision of care, assessment, clinical practice, identification of quality gaps, utilization of data and information systems, and application and evaluation of evidence to address quality concerns while functioning in an interprofessional team.
2. **Expedited Master's Entry.** Students take courses to bridge requirements between an Associate degree and a Baccalaureate level practice as a professional nurse. These courses are offered in the UWM School of Nursing RN to BSN program, which offers the courses via two modes (FLEX or BSN@Home), and students choose their preferred mode of learning. Students in this pathway will be admitted as "Special Students" and must achieve a B- or above in all RN to BSN

courses and prerequisites to be eligible to apply and enter the MN program. Once students have completed the required courses and any prerequisites, they can apply for admission into the MN program. Students completing this pathway do not earn a BSN.

- 3. BSN-MN.** This is for students that are seeking additional education to prepare themselves for roles in the healthcare system related to educating or leading others. Specific roles include Professional Development Practitioner, Nurse Educator or Unit Manager. Students admitted via this point of entry have a course of study designed to meet the core learning needs of a masters-prepared nurse and then allows for the students to individualize the program by collaborating with the Program Director and Student Affairs to utilize electives to enhance their specific role learning needs.
- 4. RN-BSN-MN, Master's Entry Program.** Registered Nurses with an Associate Degree in Nursing (ADN) but without a Baccalaureate in any discipline enter into the RN to BSN program first. Upon successful completion of the RN to BSN program, they are admitted to the MN program following the BSN-MN pathway. Students taking this pathway earn BSN and MN degrees.

## Curriculum Overview

The curriculum of the Direct Entry Master of Nursing Program is designed to meet the *Essentials of Masters Education in Nursing (2021)* standards. With advanced education curriculum for the direct-entry-level student (4 semesters, two winterims, and one summer) it provides the foundation for nursing practice as indicated in the current AACN Essentials (2021). This program assures that Direct Entry students meet all the entry level competencies for entry level (Level 1) professional nursing practice (AACN, 2021). At program completion, students will be eligible within the State of Wisconsin to take the NCLEX-RN exam to become Registered Nurses.

Program Format: All theory courses in this program may be delivered face to face, hybrid, online or flex format dependent on program needs. All clinical and residency courses are delivered in person.

Admission to the program is the fall of each year for the Direct Entry.

### Direct Entry Master's Program

Code	Title	Credits
NURS 654G	Health Assessment and Promotion	3
NURS 657G	Pharmacotherapeutics for Nursing Practice	3
NURS 653G	Foundations in Pathophysiology for Nursing Practice	4
NURS 670G	Nursing Care of Adults and Older Adults I	3
NURS 671G	Nursing Care of Adults and Older Adults II	3
NURS 672G	Nursing Care of Women and Infants	2
NURS 673G	Nursing Care of Children and Families	2
NURS 674G	Mental Health Nursing Care Across the Lifespan	2
NURS 744		3
NURS 736		3
NURS 675G	Nursing and Society	3
NURS 676G		3
NURS 686G	Professional Nursing Practicum I	3
NURS 688G	Professional Nursing Practicum II	4

NURS 663G	Transformation to Professional Practice	2
NURS 720	Biostatistics and Applications for Nursing Practice	3

NURS 746		3
NURS 733	Integrated Clinical Concepts	3
<b>Total Credits</b>		<b>61</b>

### Expedited Master's Entry Program

The following courses are requirements for the RN with a non-nursing baccalaureate. Students will be admitted as a special student until entry into the Master program and take courses in the RN-BSN program.

Code	Title	Credits
NURS 441X	Chronic Care Management	3
NURS 446X	Research and Evidence-Based Practice	3
NURS 453X	Information Management and Healthcare Technology	3
NURS 454X	Community Health Nursing	3
<b>Total Credits</b>		<b>12</b>

### BSN-MN Curriculum

The BSN-MN component of the program (3 semesters and one optional summer) prepares the student with competencies consistent with a masters in nursing and the core skills and knowledge of a master level nurse with the addition of specialty knowledge and skills needed to function in one of three specialization roles: Professional Development Practitioner, Nurse Educator or Nurse Manager.

Post Baccalaureate and RN expedited master's students may be admitted at the beginning of any semester, including summer.

### Core Courses

Code	Title	Credits
NURS 720	Biostatistics and Applications for Nursing Practice	3
NURS 804	Healthcare Organization and Systems Leadership for Advanced Practice	3
NURS 733	Integrated Clinical Concepts	3
NURS 773	Information Systems to Support Clinical Decision-Making	3
NURS 725	Evidence Based Practice in Healthcare	3
NURS 750	Outcomes and Quality Management	3
NURS 803	Health Policy	3
NURS 785		3
<b>Total Credits</b>		<b>24</b>

### Students seeking to specialize in Nurse Education

Code	Title	Credits
NURS 716	Theoretical Foundations of Nursing Education	3
NURS 718	Master of Nursing Education Residency I	3

NURS 719	Master of Nursing Education Residency II	3
<b>Total Credits</b>		<b>9</b>

**Students seeking to specialize in other roles:** Three 3-credit electives that must be planned with Program Director and Student affairs advisor.

## Additional Requirements

### Minimum Grade Requirement

For continuance in the program, in addition to general Graduate School requirements students must achieve a minimum grade of B- in all required Master of Nursing practicum courses, a minimum grade of B- in all other required courses, and a cumulative GPA of 3.00.

### Master’s Clinical Project

The student will complete a final comprehensive clinical project.

### Time Limit

Students in the Master of Nursing program must complete all degree requirements within seven years of the first enrollment semester as a degree student.

## Nursing, PhD

The PhD program in Nursing at the University of Wisconsin-Milwaukee prepares nurses as scholars to conduct independent and collaborative research, to develop and test theory relevant to nursing, and to improve the quality of care by expanding the body of nursing knowledge. Scholars will be prepared to serve the urban community and improve the general accessibility and acceptability of health care.

Specialization is achieved through an approved program of study and includes program elements of coursework, dissertation, and direction of faculty advisors. This specialization is focused on a particular area of nursing practice and the social context within which it occurs.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus the following School of Nursing requirements to be considered for admission to the doctoral program in Nursing:

1. A bachelor’s or master’s degree with a major in nursing or health related field from a professionally accredited or approved program.
2. A cumulative grade point average of 3.0 on a 4.0 scale for all previous coursework.
3. Completion of a graduate level statistics course within the last 5 years with a grade of B or better.
4. A written statement prepared by the applicant of previous professional experience, personal career goals, research interests,

motivation for PhD study, and educational objectives to be accomplished in the program.

5. Recommendations from at least three persons who have known the applicant in a professional capacity.
6. Two examples of original work that demonstrate the applicant’s academic potential.
7. A conversation with the program director is required as part of the holistic admission process. A telephone conversation or visual online (e.g. Zoom, Teams) video meeting may be used when travel is prohibitive.

## Reapplication

A student who receives the master’s degree must formally reapply for admission to the Graduate School before continuing studies toward the PhD.

## Credits and Courses

Minimum degree requirements are 61 graduate credits beyond the bachelor’s degree, at least 31 of which must be earned in residence at the University of Wisconsin-Milwaukee. The College of Nursing requires a minimum of 49 graduate credits beyond the master’s degree in nursing or master’s graduate core courses.

Code	Title	Credits
<b>Nursing Core</b>		
NURS 801	Foundations of Inquiry for Health Research	3
NURS 802	The Science of Nursing	3
NURS 803	Health Policy	3
<b>Specialty Core (6 core, 9 elective credits)</b>		
NURS 820	Analysis of Nursing Phenomena	3
NURS 809	Integrative Studies	3
Elective Credits		9
<b>Research Core</b>		
NURS 808	Multivariate Statistics for Healthcare	3
NURS 881	Measurement for Health Research	3
NURS 882	Qualitative Methods in Health Research	3
NURS 883	Quantitative Methods in Health Research	3
NURS 885	Advanced Quantitative Methods in Health Research	3
or NURS 886	Advanced Qualitative Methods in Health Research	
NURS 890	Issues in Scholarship	3
<b>Practicum</b>		
NURS 899	Practicum in Nursing: (Leadership/ Education)	1
NURS 899	Practicum in Nursing: (Research)	1-3
<b>Dissertation</b>		
NURS 997	Doctoral Dissertation (3 credits minimum)	3
<b>Total Credits</b>		<b>47-49</b>

Specialization is achieved through an approved program of study and includes program elements of minor field coursework, supervised research experiences, practicum with emphasis on skill development in nursing leadership/education, dissertation, and the direction of

faculty advisors. The student specializes in a particular area of nursing practice and the social context within which it occurs. The plan for this is developed in consultation with the major professor. Minimum requirements for all formal coursework other than dissertation research can be expected to take at least two academic years of study.

Students admitted without a master's degree in nursing must complete 12 credits of master's program graduate core courses before beginning doctoral level nursing courses. The graduate core courses that must be completed are:

Code	Title	Credits
<b>Graduate Core Courses</b>		
NURS 725	Evidence Based Practice in Healthcare	3
NURS 728	Epidemiological Principles for Population Health	3
NURS 735	Theory for Advanced Practice	3
NURS 804	Healthcare Organization and Systems Leadership for Advanced Practice	3

Post baccalaureate students admitted to the doctoral program will not be granted a master's degree in nursing unless all requirements for the master's degree in nursing are met.

## Additional Requirements

### Major Professor as Advisor

The student is expected to affirm their Major Professor by the end of their second semester of full-time study or the equivalent in earned credits. The date for submission will be published for each semester by the PhD Program Director. The Major Professor will be the student's research advisor, and will serve as chairperson of their Comprehensive Preliminary Examination Committee and the Dissertation Committee. The PhD student must select a Major Professor who is a member of the graduate faculty of the School of Nursing and who has agreed to serve.

### Minimum Grade Requirement

For continuation in the program, in addition to general Graduate School requirements (<https://uwm.edu/graduateschool/students/academic-policies-and-procedures/>), students must achieve a minimum grade of B- in all required courses.

### Minor Field

The student must complete a minor of 8 to 12 credits, 6 or more of these credits to be earned from courses in departments outside the School of Nursing. Such courses are selected for their relevance to the student's area of specialization, and are to be taken in the substantive content of the selected minor field.

### Language Requirement

Foreign language competency may be required at the option of the student's major professor.

### Residence

The student must meet minimum Graduate School residence requirements.

### Doctoral Preliminary Examination

The student must pass a doctoral preliminary examination to qualify for formal admission to candidacy for degree. The doctoral examination comprises a written and an oral component, taken in that sequence, with

each component requiring a passing grade for successful completion. The examination is an integrative experience that is designed to validate the student's mastery of the content of the doctoral program curriculum and readiness to conduct independent research within the student's area of specialization as identified in the formal plan of study.

### Dissertation

The candidate must write a dissertation, which demonstrates ability to formulate a research topic and pursue independent and original investigation under the direction of the major professor.

### Dissertation Defense

The candidate must, as the final step toward the degree, pass an oral examination in defense of the dissertation. A candidate who does not pass this examination may apply for reexamination within one year from the initial examination date. This reexamination may occur only one time. A candidate who does not pass this examination within program time limits may be required to undergo another comprehensive preliminary examination and readmitted to the program and/or candidacy.

### Time Limit

The student must complete all requirements for the degree within seven years from the date of initial enrollment in the program. The student must complete all requirements for the degree within four years from the time of attainment of dissertator status.

For additional information on the PhD, see the Graduate School Doctoral Requirements (<https://uwm.edu/graduateschool/students/academic-policies-and-procedures/doctoral-resources/doctoral-requirements/>) page.

## Nursing, RN to BS Program

The UW-Milwaukee School of Nursing offers the flexibility of two modes of learning for students to complete the RN to BSN program. These include BSN@home through the UW System Collaborative and UW Flexible Option (focus on competency-based education). Students may choose to pursue their RN-to-BSN at a full or part time basis, at the pace that works best for them. Students enjoy the ability to move in and out of what mode best fits their learning style and life needs. We offer online, in-person and competency-based assessment. Prelicensure Associate Degree Nursing (ADN) students can request permission to take courses to satisfy requirements for BSN completion.

Nurses who graduated from Wisconsin Technical Colleges after Dec. 31, 1989, can transfer credits from these programs through formal VTAE articulation agreements.

UW-Milwaukee School of Nursing is accredited through the Council of Baccalaureate and Higher Degree Programs of the Commission on Collegiate Nursing Education (CCNE) and the State of Wisconsin Board of Nursing.

## Admission

Admission requirements for all RN-BSN completion programs include a past Associate's Degree, Diploma, or concurrent enrollment in the ADN program (in 3rd or 4th semester) in nursing and a past cumulative GPA of 2.5 or higher as well as a registered nursing license. Registered Nurses follow admission procedures for transfer students, with deadlines well in advance of the beginning of each semester. The UW Flexible Option has unique admission requirements and admits students every month. For additional information about the UW Flexible Option, students can

call 1-877-895-3276. To ensure success in enrollment and advising, individuals interested in BSN completion, online or face-to-face, should consult with an advisor in the Student Affairs Office, (414) 229-5047. The advisor will provide information on all degree completion options and route the student through the appropriate admission procedures. The advisor will also work with the student to complete an individual plan of study.

## RN to BS Curriculum

The Baccalaureate Degree Program for Registered Nurses is a 121-credit program including UWM General Education Requirements (p. 30) and nursing curriculum requirements. The curriculum requirements are the same for all modes of learning – online, face-to-face and the UW Flexible Option. A cumulative GPA of 2.0 for all credits earned at UWM is required for graduation. Thirty semester credits must be completed on the UWM campus; at least 20 of these credits must be earned in nursing.

<b>Total Credits</b>	<b>121-127</b>
----------------------	----------------

<sup>1</sup> Demonstration of mathematics and English proficiency by Registered Nurse students is a requirement for enrollment in Capstone Practicum for Registered Nurses (NURS 445). Refer to the UWM Timetable (<http://www4.uwm.edu/schedule/>) for definition of competencies.

<sup>2</sup> Registered Nurse students are permitted to enroll in courses out of the usual sequence in the undergraduate curriculum with the exception of Capstone Practicum for Registered Nurses (NURS 445). This is the final course and all other required courses are prerequisite to this course.

## Competencies/Program Outcomes

The graduate of the UWM College of Nursing is prepared to practice as a beginning generalist in a variety of settings. In addition, the graduate will possess knowledge and skills that qualify her or him to pursue life-long learning and advanced study. The UWM College of Nursing undergraduate and graduate programs are directed toward enhancing the health of those who live and work in urban communities.

### Patient-centered Care

The graduate will provide holistic care that recognizes patients' (individuals, families, groups, and communities) preferences, values, and needs and respects patients or their designees as full partners in providing compassionate, coordinated, age and culturally appropriate, safe and effective care.

### Professionalism

The graduate will demonstrate accountability for the delivery of standard-based nursing care that is consistent with moral, altruistic, legal, ethical, regulatory, and humanistic principles.

### Leadership

The graduate will influence the behavior of individuals or groups of individuals within the environment in a way that will facilitate the establishment and acquisition/achievement of shared goals.

### Systems-based Practice

The graduate will demonstrate an awareness of and responsiveness to the larger context of the health care system, and will demonstrate the ability to effectively call on microsystem resources to provide care that is of optimal quality and value (Adapted from ACGME, n.d.).

### Informatics and Technology

The graduate will use information and technology to communicate, manage knowledge, mitigate error, and support decision making (QSEN, 2007).

## Communication

The graduate will interact effectively with patients, families, and colleagues, fostering mutual respect and shared decision making, to enhance patient satisfaction and health outcomes.

## Teamwork and Collaboration

The graduate will function within nursing and interdisciplinary teams, fostering open communication, mutual respect, shared decision making, team learning, and development (Adapted from QSEN, 2007).

## Safety

The graduate will minimize risk of harm to patients and providers through both system effectiveness and individual performance (QSEN, 2007).

## Quality Improvement

The graduate uses data to monitor the outcomes of care processes, and uses improvement methods to design and test changes to continuously improve the quality and safety of health care systems (QSEN, 2007).

## Evidence-based Practice

The graduate will identify, evaluate, and use the best current evidence coupled with clinical expertise and consideration of patients' preferences, experience and values to make practice decisions (Adapted from QSEN, 2007).

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Peace and Conflict Studies, Undergraduate Certificate

The Peace and Conflict Studies Undergraduate Certificate is premised on the notion that helping people work together to creatively manage conflict will result in more peaceful and just societies, locally and internationally.

Building peace in our community, nation, and world will depend on our ability to work well together to solve problems and pursue opportunities. The Certificate aims to help students build the foundation in these essential skills and is open to students majoring in any field who wish to explore the meaning of peace, including human welfare and quality of life, as well as the resolutions of different types of political, economic, or social conflicts.

The certificate can enhance the resume of students going into social work, education, public administration, law, healthcare, international affairs, human resources and global business. The program is interdisciplinary combining coursework from fields such as social sciences, health sciences, humanities, and more.

Certificates are similar to minors in terms of credit requirements but draw on coursework from multiple fields of study rather than from a single department.

## Eligibility

The Peace and Conflict Studies Undergraduate Certificate is open to all students seeking a bachelor's degree from UWM, to students who previously have received a bachelor's degree from UWM or any other accredited college or university, and to those who do not plan to pursue a college or university degree (non-degree students) but who have a strong interest in this subject. To be admitted to the University as non-degree students, individuals must meet regular University admission requirements. The program leading to the certificate is open to students majoring in any field.

## Requirements

A student must complete 18 credits in the program. At least 9 credits must be in advanced courses (300 level and above), and at least 9 credits must be completed at UWM. A 2.500 GPA average is required in the certificate. Students interested in the Peace and Conflict Studies Undergraduate Certificate should consult with the coordinator or their advisor to add the certificate and outline a program of study.

The Peace and Conflict Studies Certificate consists of three areas: Core (3 credits); Fieldwork (3 credits); and Elective Coursework (12 credits), as outlined below:

Code	Title	Credits
<b>Required Core:</b>		
PEACEST 203	Introduction to Peace and Conflict Studies	3
<b>Required Fieldwork: Can be fulfilled in one of three ways:<sup>1</sup></b>		
	Internship	
	Study Abroad	
	Independent Study	
<b>Electives</b>		<b>12</b>
<b>Total Credits</b>		<b>18</b>

<sup>1</sup> The purpose of this requirement is to enable the student to engage in peace studies through "practical" experience or research. The student should be engaged in the "practice of peace" through community service, conflict identification and education, environmental awareness, governmental politics, or social change. The area of study must be approved by the coordinator of the peace studies certificate and must meet the requirements of the department through which it is being

completed. The fieldwork requirement may be fulfilled in one of three ways: an internship, study abroad, or independent study.

### Electives

Students are encouraged to construct an area of concentration from their elective credits. Suggested areas of concentration may be geographic and/or thematic, such as:

- World regions and countries
- World religions and practices
- Conflict resolution skills
- International relations
- Sustainable development
- Peace studies/education
- Environmental studies
- Social change/social justice
- Economic development

Select at least four 3-credit courses. A maximum of 9 credits (3 courses) may be taken in any one department. The list below includes recommended electives and is not exhaustive. Course offerings change from year to year. Students should consult with their advisor or the certificate Coordinator.

## Psychiatric Mental Health Nurse Practitioner (PMHNP), Graduate Certificate

This 18-credit post graduate Psychiatric Mental Health Nurse Practitioner (PMHNP) Graduate Certificate is designed to provide advanced practice nurses with preparation as a PMHNP Practitioner. Upon completing the certificate requirements, students will be eligible to sit for national certification exams offered by the American Nurses Credentialing Center (ANCC). Once nationally certified the PMHNP is eligible to apply for licensure in all fifty states.

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found

by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Admission

The admission requirements of the psychiatric mental health nurse practitioner graduate certificate program are consistent with those requirements specified by the Graduate School of the University of Wisconsin-Milwaukee. In addition, students must also meet the following requirements for the College of Nursing:

- A master's or doctoral degree in Nursing from an accredited program providing preparation as a nurse practitioner, clinical nurse specialist, certified nurse midwife, or certified registered nurse anesthetist.
- Certification in their current advanced practice registered nurse specialty as applicable.
- Completion with a grade of B or better of a graduate-level course in physiology/pathophysiology, pharmacology, and comprehensive health assessment. Evidence of prescriptive authority in the state of Wisconsin will be accepted in place of graduate pharmacology.
- Current registration as a registered nurse in the state of Wisconsin.
- Three (3) letters of recommendation, two (2) of which are from persons most knowledgeable about the applicant's recent academic and work experiences.
- Personal interviews with a faculty member may be requested.
- Resume or Curriculum Vitae (CV).
- Personal statement that includes rationale for certificate study and career goals.

#### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Credits and Courses

The Psychiatric Mental Health Nurse Practitioner (PMHNP) Graduate Certificate is 18 credits total. All six courses are required. The three theory courses for this certificate will be offered online. The three practicum courses will be completed with a preceptor in a clinical setting. Practicums must be completed within the state of Wisconsin.

Code	Title	Credits
NURS 741	Psychiatric Mental Health Theory I	3
NURS 742	Psychiatric Mental Health Theory II	3
NURS 743	Psychiatric Mental Health Theory III (effective Spring 2019)	3
NURS 781	Psychiatric Mental Health NP Practicum I	3
NURS 782	Psychiatric Mental Health NP Practicum II	3

NURS 783	Psychiatric Mental Health NP Practicum III	3
<b>Total Credits</b>		<b>18</b>

## Additional Requirements

### Transfer Credit

If approved by the PMHNP faculty, one 3-credit comparable graduate level course from an accredited institution other than UWM may be transferred in to meet requirements of the certificate.

### Completion Requirements

Certificate program progression requirements will be consistent with the College of Nursing requirements for progression in graduate level programs. Students must complete all courses with at least a B- or better and a cumulative GPA of a 3.00 or greater in order to progress in program.

### Certificate Conferral

The certificate will be awarded upon successful completion of the requirements (i.e., once all grades for the certificate courses are officially recorded with a cumulative GPA of 3.0 or more). Successful completion of the certificate program will be noted on the student's official transcript.

### Time Limit

It is expected that students will complete the certificate in one year from time of enrollment.

## Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

## Sustainable Peacebuilding, MSP

The School of Nursing offers an interdisciplinary professional graduate degree program leading to a Master of Sustainable Peacebuilding (MSP). The MSP is designed to prepare students for careers in peacebuilding—e.g. international development, community change, conflict resolution, resource stewardship. The MSP curriculum is designed to develop student expertise in systems thinking, social-ecological interactions, and the application of such concepts to peacebuilding and development fields. MSP students complete 30 credits of interactive coursework with practice-based learning opportunities. In the last semester, MSP students fulfill Graduate School master's degree requirements (<https://uwm.edu/graduateschool/students/academic-policies-and-procedures/masters-resources/masters-requirements/>) by completing a capstone (paper,

presentation, & portfolio). MSP offers a two-year or three-year program of study.

Students completing the MSP will:

- Classify the various components of complex social-ecological systems and identify appropriate intervention strategies.
- Recognize patterns of human-environment interaction, including drivers of change resulting in conflict, development, and peacebuilding.
- Acquire critical knowledge across multiple disciplines relevant to development and peacebuilding and relate and translate knowledge among the disciplines.
- Facilitate effective group problem-solving processes, which includes communicating confidently and effectively to diverse audiences.
- Assess systemic outcomes of peacebuilding programs and policies and recommend adaptive modifications for improvement.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

The Master of Sustainable Peacebuilding admits students to begin in fall semester only. Applicants must satisfy Graduate School requirements (<http://uwm.edu/graduateschool/students/admission/>) for admission as well as provide the following materials:

- All applicants must hold a bachelor's degree from an accredited program with a minimum GPA of 2.75 (4.0 scale).
- International applicants must provide Proof of English Proficiency. The language of instruction at UWM is English. MSP does not offer a dual- or contingent-admission option. A current resume that clearly articulates the applicant's professional, international, and intercultural experiences as well as language exposure and proficiencies must also be provided.

Applicants are encouraged but not required to submit:

- Two letters of recommendation from persons familiar with the applicant's academic or professional work.
- A writing sample that demonstrates the applicant's critical thinking, research, and writing skills as well as the applicant's ability to think across disciplines. The writing sample can be a previously written academic, professional, or personal piece OR a newly written essay (prompts provided by MSP).

To be considered for admission, all applicants must complete an online application, including:

- Pay the nonrefundable application fee;
- Upload unofficial transcripts from any and all schools attended, regardless of how long ago it may have been. Applicants will be required to submit official transcripts after an admission offer is accepted;
- Upload a current professional resume;

## 4. Upload a 2-3-page Personal Statement (Reason for Graduate Study).

This essay should address the following:

- Why is MSP a good fit for you?
  - What have you studied and/or where have you worked that prepares you for the MSP?
  - How will MSP help you advance your professional goals?
  - Discuss an experience that relates to your goal to join our program.
  - Which faculty member(s), community organizations, and/or global issues are you interested in working on while in MSP?
5. Submit the names and email addresses of at least two references who will write a Letter of Recommendation for you. If possible, include one academic (e.g. advisor) and one professional (e.g. supervisor) reference. At least two letters must be received by UWM for your application to be considered complete.
6. Upload a Writing Sample (max 10 pages) from within the past five years. Examples include:
- Paper from a college course;
  - Excerpt from an undergraduate thesis;
  - Grant proposal;
  - Peer-reviewed article;
  - A web-based piece, such as a blog entry or news article;
  - Project report or evaluation;
  - Guided Research Essay (this is suggested if you do not have a writing sample you would like to submit).
7. Participate in a brief phone or virtual interview that will be scheduled after the candidate's file is reviewed.

Please check the MSP Website (<https://uwm.edu/nursing/academics/msp/>) for up-to-date information on eligibility, application requirements, and deadlines.

## Credits and Courses

The Master of Sustainable Peacebuilding admits students in the 15-month track to begin in spring semester only and students in the 2-year and 3-year tracks to begin in fall semester only. Students may enroll in the 15-month, 2-year or 3-year course of study. Typically, students enroll in the 2-year option. The 15-month option is provided for students seeking an intensive courseload and who have few other commitments. The 3-year option is provided for students who carry extensive responsibilities outside of school for work or caregiving. Students may switch tracks one time. They must discuss this with the Academic Program Manager and provide a revised plan of study. Additional requests to switch tracks are only approved by the Program Director after reviewing extenuating circumstances described in the written request.

30 credits are required for the MSP degree, distributed as follows:

Code	Title	Credits
<b>Core</b>		
MSP 760	Systems Thinking, Mapping, and Sustainability	3
MSP 770	Conflict Analysis and Restorative Practices	3
MSP 771	Facilitation Skills for Peacebuilding	3
MSP 785	Strategic Project Design, Management and Evaluation	3

MSP 786	Transformational Leadership for Peacebuilding	3
---------	---	---

### Core Seminars and Workshops

MSP 762	Conflict Transformation: Negotiation and Mediation Skills	3
MSP 780	Transdisciplinary Research Methods and Information Literacy	3
MSP 781	Evaluation and Organizational Innovation	3

### Electives

Select 3 credits in consultation with advisor(s) that meet the student's academic and professional goals. Credits can be taken in any unit on campus.	3
---	---

### Independent Study

Students may register for the following with approval from the supervising faculty member and the student's faculty advisor:

MSP 799	Independent Study
---------	-------------------

### Fieldwork 3

Select one of the following for a fieldwork experiences: <sup>1</sup>

MSP 772	Fieldwork in Sustainable Peacebuilding: US Placement
MSP 773	Fieldwork in Sustainable Peacebuilding: Study Abroad

### Total Credits 30

<sup>1</sup> Students will complete a fieldwork experience, locally in Milwaukee, elsewhere in the U.S., or abroad. Students will engage in work that focuses on a pertinent issue in the broader context of peacebuilding, e.g. food security, water conflict, public health, etc. Students will select from current MSP projects or develop their own projects.

## Additional Requirements

### Progression in the Program

For continuance in the program, in addition to general Graduate School requirements, students must achieve a minimum grade of B- in all required MSP courses including electives.

Before a student can enroll in fieldwork, they must complete the following courses: MSP 760, MSP 770, MSP 771 and MSP 785.

### Advising

As specified in the regulations of the Graduate School, a major professor will be assigned to every person enrolled in the program to advise and supervise their work. Students may request a specific faculty advisor who aligns with their research and professional interests, if desired; however, fulfillment of such requests are not guaranteed.

### Master's Capstone Paper, Portfolio and Presentation

Before graduation students must complete (as outlined in the MSP student handbook) an in-depth reflective essay paper. The paper is the culminating work for the program and focuses on what has been learned over the course of the MSP. The paper is structured around reflection about the student learning outcomes and the professional competencies. In addition to the paper, students submit an e-portfolio. The e-portfolio is developed throughout the program to show progression in knowledge and applied skills. Finally, the student prepares and gives

a final presentation to faculty, staff and peers about key insights and experiences from the program.

### Transfer Credits

Students may transfer in one graduate-level course of up to 3 credits to count as an elective in the curriculum. Students must have received a grade of B or better in the graduate-level transfer course. To be approved as transfer credits, the student must complete the required process as determined by the UWM Graduate School and receive MSP Program Director approval.

## Trauma Informed Care, Graduate Certificate (School of Nursing)

The Certificate in Trauma-Informed Care will expose graduate students in several helping professions to the theory and practice of trauma-related service delivery. This is a multidisciplinary program that integrates knowledge from the social, behavioral, and health sciences. The primary goal of the program is to train graduate students from the helping professions in specialized knowledge and skills related to psychological trauma.

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

#### Admission

Students in good standing currently in a graduate program or those who have already completed a graduate degree are eligible for the certificate.

### Credits and Courses

All students participating in the certificate program will complete 15 academic credits related to trauma theory and practice.

Code	Title	Credits
<b>Core</b>		
SOC WRK/COUNS/ NURS/OCCTHPY 774	Trauma Counseling I: Theory and Research	3

SOC WRK/COUNS/ NURS/OCCTHPY 775	Trauma Counseling II: Diagnosis and Treatment	3
------------------------------------	---	---

Electives		
Select 9 elective credits (see Potential Electives and Recommended Field Work lists below)		9

Recommended Field Work		
Select 3-6 credits from the following: <sup>1</sup>		
SOC WRK 721	Field Instruction I	
SOC WRK 722	Field Instruction II	
SOC WRK 821	Field Instruction III	
SOC WRK 822	Field Instruction IV	
SOC WRK 921	Field Instruction V	
COUNS 764	Supervised Practicum 1 in School Counseling	
COUNS 765	Supervised Practicum 1 in Clinical Mental Health Counseling	
NURS 899	Practicum in Nursing:	
OCCTHPY 725	Occupational Therapy Field Service I	
OCCTHPY 735	Occupational Therapy Field Service II	

<b>Total Credits</b>		<b>15</b>
----------------------	--	-----------

<sup>1</sup> Students also have an opportunity to complete anywhere from 3 to 6 additional qualifying program credits through participation in in trauma-informed practice field settings, contingent on the respective department’s field credit policy. Four departments are participating in this interdisciplinary certificate program—Social Work, Educational Psychology, Nursing, and Rehabilitation Sciences & Technology—and accordingly, the program curriculum will consist of courses offered via multiple campus departments.

### Potential Electives

Code	Title	Credits
SOC WRK/CRM JST 497	Study Abroad: (Bristol or South Africa or Austria)	1-6
SOC WRK 680G	Death and Dying	3
SOC WRK 690G	Mindfulness and Community Building	3
SOC WRK 753	Adult Psychopathology	3
SOC WRK 754	Child and Adolescent Psychopathology	3

SOC WRK 818	Treatment of Co-Occurring Disorders	3
SOC WRK 820	Seminar in Social Work Practice: (Qualifying topics: Violent & Traumatized Families; Motivational Interviewing; or Interventions for Substance Misuse and Screening Brief Intervention and Referral to Treatment for Substance Misuse)	3
PSYCH 711	Current Topics in Psychology: (Qualifying topics: Functional Assessment and Intervention or Neurobiology of Learning & Memory)	1-4
PSYCH 727	Cognitive Neuroscience	3
MSP 770	Conflict Analysis and Restorative Practices	3

COUNS 704 & COUNS 705	Multicultural Mental Health Guidelines and Ethics Overview and Multicultural Practice: Awareness and Knowledge of Others <sup>1</sup>	6
COUNS 715	Multicultural Counseling	3
COUNS 744	Multicultural Mental Health Guidelines, Working with First Nations Persons	3
COUNS 812	Clinical Studies in Counseling	3
COUNS 816	Counseling Children and Adolescents	3
COUNS 820	Counseling Appraisal and Clinical Decision-Making	3
COUNS 904	Family Systems Theory, Research, and Practice	3
OCCTHPY 519	Therapeutic Communication	3
OCCTHPY 719	Occupational Therapy in Psychosocial Practice	3
CRM JST 830	Intervention Strategies for Correctional Clients	3
CRM JST 970	Readings in Criminal Justice Research: (Qualifying topics: Victimology; Women and the Criminal Justice System)	3

<sup>1</sup> COUNS 704 and COUNS 705 must be taken together to fulfill this requirement.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Rehabilitation Sciences and Technology (School of)

The UW-Milwaukee School of Rehabilitation Sciences & Technology encompasses a broad range of programs educating future rehabilitation professionals with a strong focus on interprofessional education, technology, research excellence, and community engagement.

The School of Rehabilitation Sciences & Technology offers programs in Assistive Technology and Universal Design, Athletic Training and Performance Psychology, Communication Sciences & Disorders, Occupational Therapy, Sciences and Technology, Physical Therapy and Therapeutic Recreation.

To learn more about the school, please visit the College of Health Professions and Sciences webpage.

## Programs

- Assistive Technology and Accessible Design, Graduate Certificate (School of Rehabilitation Sciences and Technology) (p. 786)
- Athletic Training, MS (p. 787)
- Certified Mental Performance Consultant, Graduate Certificate (p. 789)
- Communication Sciences and Disorders, BS (p. 791)
- Communication Sciences and Disorders, MS (p. 793)
- Health Professional Education, Graduate Certificate (School of Rehabilitation Sciences and Technology) (p. 795)
- Interprofessional Public and Population Health, Graduate Certificate (School of Rehabilitation Sciences and Technology) (p. 797)
- Occupational Science and Technology, BS (p. 798)
- Occupational Therapy, MS (p. 801)
- Occupational Therapy, MS: Assistive Technology and Accessible Design (p. 802)
- Occupational Therapy, MS: Ergonomics (p. 804)
- Occupational Therapy, OTD (p. 806)
- Physical Therapy, DPT (p. 807)
- Pre-Athletic Training (p. 808)
- Pre-Audiology (p. 809)
- Pre-Occupational Therapy (p. 810)
- Pre-Physical Therapy (p. 811)
- Pre-Speech-Language Pathology (p. 812)
- Rehabilitation Science and Technology, MS (p. 813)
- Therapeutic Recreation, Undergraduate Certificate (p. 815)
- Trauma Informed Care, Graduate Certificate (School of Rehabilitation Sciences and Technology) (p. 816)

## Graduate Admission Requirements

Each graduate program has admission requirements in addition to the general Graduate School admission requirements. Refer to Graduate Admission and Costs (p. 20) for the graduate school's admission requirements, and to the specific program for the program's admission requirements.

## Undergraduate Admission

Students interested in the Occupational Science & Technology or the Communication Sciences and Disorders undergraduate programs are encouraged to contact the College of Health Professions and Sciences Office of Student Affairs. Students with bachelor's degrees in other areas are welcome and encouraged to contact Student Affairs for a credit evaluation.

## Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty

Jing Yang	Associate Professor	PhD	The Ohio State University	✓
Inga Wang	Associate Professor	OTR/L, PhD	Johns Hopkins University	✓
Dana Washburn	Clinical Assistant Professor	MS	Rush University, Chicago	

## Assistive Technology and Accessible Design, Graduate Certificate (School of Rehabilitation Sciences and Technology)

The Certificate in Assistive Technology and Accessible Design is an interdisciplinary program designed to meet the demand for assistive technology and accessible design specialists. The School of Rehabilitation Sciences and Technology and the Communication Sciences and Disorders program in the College of Health Professions and Sciences, along with the Department of Teaching and Learning in the School of Education, collaborate on the course offerings and management. The certificate follows a model of prerequisite disability and technology basic knowledge, survey of the fields, assessment, intervention and leadership. Completion of the certificate will help prepare the students to sit for State and National certification examinations as Assistive Technology Specialists, Rehabilitation Engineering Technologist and Low Vision Specialist.

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

#### Admission

Students interested in this certificate should contact one of the three sponsoring programs before enrolling in any certificate courses.

Admission to the certificate requires evidence of a basic knowledge of disability and computer applications, evidence of an Undergraduate or Graduate course in anatomy and physiology equivalent to BIO SCI 201 with a grade of C or better (may be taken during first fall or spring semester enrolled depending when it is offered but will require special permission), an undergraduate GPA of at least 2.75 or a graduate GPA of at least 3.0.

### Credits and Courses

Generally, students in the health sciences and exceptional education will have sufficient coursework in disability related studies. Prerequisite evidence in disability related studies may be obtained at the undergraduate level. One of the following is recommended to meet the computer applications requirement.

Code	Title	Credits
EXCEDUC 730	Assistive and Instructional Technology for Students with Disabilities	3
OCCTHPY 750	Computer Applications in Occupational Therapy Practice	3

The Certificate in Assistive Technology and Accessible Design requires completion of a minimum 15 credits as listed below. In special circumstances, the ATAD coordinator and advisory board may approve substitution of an equivalent Assessment or Intervention course relevant to assistive technology and adaptive design as appropriate.

Code	Title	Credits
<b>Introduction</b>		
OCCTHPY 620	Introduction to Assistive and Rehabilitation Technology (must be taken at graduate level)	3
<b>Assessment</b>		
Select one of the following:		3
EXCEDUC 765	Assistive Technology Service Delivery in Schools	
COMSDIS 715	Assessment and Intervention in Augmentative and Alternative Communication	
OCCTHPY 770	Assessment in Assistive Technology and Accessible Design	
OCCTHPY 742	Single Case Experimental Design	
<b>Intervention</b> <sup>2</sup>		
Select one of the following:		3
OCCTHPY 625	Design and Disability	

OCCTHPY 595	Vision I: Introduction to Low Vision & Visual Impairment
OCCTHPY 596	Vision II: Practical Aspects of Visual Impairment & Low Vision Intervention
OCCTHPY 593	Introduction to Biomedical and Rehabilitation Instrumentation
OCCTHPY 999	Advanced Independent Study
EXCEDUC 735	Technology & Instruction for Students with Disabilities
EXCEDUC/OCCTHPY 777	Fieldwork in Assistive Technology
EXCEDUC 799	Independent Reading
COMSDIS 717	Special Populations in Communication Disorders
COMSDIS 791	Research Experience in Communication Sciences and Disorders
COMSDIS 799	Independent Studies

<b>Elective</b>	
Select an additional 3 credits from either Assessment or Intervention list	3
<b>Capstone</b>	
OCCTHPY 760	Assistive and Rehabilitation Technology 3
<b>Total Credits</b>	<b>15</b>

<sup>1</sup> Alternate related graduate-level course can substitute if this course has been completed on an undergraduate level.  
<sup>2</sup> Any U/G course must be taken at graduate level.

## Additional Requirements

### Minimum Grade Requirement

To be awarded the certificate, students must earn a minimum grade of B- in the certificate courses.

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.

- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

### Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

## Athletic Training, MS

Athletic trainers are health care professionals who provide physically active people services such as injury/illness prevention, emergency care, clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions. Athletic trainers care for people across the lifespan and activity levels, including youth to professional athletes, performing artists, military or civil service personnel, and workers in physically demanding jobs. To become an athletic trainer you must complete a graduate degree in Athletic Training in a program accredited by the Commission on Accreditation of Athletic Training Education (<https://caate.net/>) (CAATE). The UWM Master of Science in Athletic Training (MSAT) (<https://uwm.edu/rehabilitation-sciences-technology/academics/ms-athletic-training/>) is such a program. Upon completion of the degree you must pass the national Board of Certification exam (<https://www.bocatc.org/>), and then you can start working as an athletic trainer.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application Deadline

The early decision deadline is November 1. After that date a rolling admission process is used until the class is filled with highly qualified students. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

To apply for the MS Athletic Training program all application materials must be submitted through the Athletic Training Centralized Application Service (ATCAS) (<https://atcas.liaisoncas.com/applicant-ux/#/login>). The exception is for UWM undergraduate students who are applying to the Accelerated BS-Kinesiology/MS-Athletic Training program who only apply directly to the UWM Graduate School.

## Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these departmental requirements to be considered for admission to the program:

1. Completion of a bachelor's degree from an accredited institution with an overall cumulative grade point average (GPA) of a 3.0 (on a 4.0 scale) preferred. GPA's between 2.75 and 3.0 will be considered if other aspects of the application indicate strong readiness for graduate study. Official transcripts must be submitted. Undergraduate degree must be completed by the time the applicant plans to begin in the MSAT program.
2. Completion of the following 10 foundation courses. A prerequisite GPA of 3.0 (on a 4.0 scale) is recommended:
  - a. Human anatomy
  - b. Human physiology
  - c. Biology
  - d. Psychology
  - e. Statistics
  - f. Chemistry
  - g. Physics
  - h. Exercise physiology
  - i. Biomechanics
  - j. Nutrition
3. Two letters of recommendation. One of the letters must come from an academic reference (preferably a faculty member as opposed to a graduate student instructor). The other letter can come from another professor, an athletic trainer with whom the applicant spent a significant amount of time, or a work supervisor. The recommenders should be able to speak towards the applicant's readiness for graduate level study and aptitude for the athletic training profession.
4. Optional: Completion of observation of athletic training practice with a certified athletic trainer within 12 months of application submission. 10-20 hours of observation is preferred.
5. Optional: GRE scores are optional unless the cumulative GPA is below 2.75.

## Prospective Students

Prospective applicants who have questions about pursuing athletic training are encouraged to contact the program via email at [msat-info@uwm.edu](mailto:msat-info@uwm.edu). Students can also contact the Pre-Athletic Training advisor in the College of Health Professions and Sciences Office of Student Affairs. Prospective applicants are encouraged to carefully review the entirety of this website prior to scheduling an advising appointment.

### Need to complete prerequisite courses?

Prospective applicants who have already completed a bachelor's degree and are interested in taking courses at UWM to satisfy MSAT program prerequisites should contact the Pre-Athletic Training advisor Torry Rufer at 414-229-2758 or [tjruferr@uwm.edu](mailto:tjruferr@uwm.edu).

You will also need to apply for admission to UWM (<http://graduateschool-apply.uwm.edu/>). On the application, applicants should identify their reason for applying as "Undergraduate courses as a visitor/guest student" and their "applying as" status as "Undergraduate non-degree student with a bachelor's degree." Applicants should apply as a second-degree student only if they plan to complete a second bachelor's degree. Questions regarding financial aid for non-degree students should be

directed to Gayla Jenkins ([jenkinsg@uwm.edu](mailto:jenkinsg@uwm.edu)) in the UWM Department of Financial Aid.

## Curriculum Overview

The MS Athletic Training provides students with a structured, tracked curriculum that contains coursework as well as community-engaged opportunities for clinical education, research, and professional development. Philosophies of evidence-based practice, integrated person-centered care, cultural competence, and clinical problem solving will be incorporated into all courses within the curriculum. There are several courses that are taught interprofessionally, where students from multiple healthcare professions learn about, from and with each other. The curriculum meets all of the competencies and requirements set forth by the Commission on the Accreditation of Athletic Training Education. At the completion of the program, students will be eligible to sit for the national certification exam, administered by the Board of Certification, and enter the healthcare workforce.

## Clinical Education

Clinical education experiences provide the student with the opportunity to practice and refine their clinical and decision-making skills in the context of direct patient care under the supervision of a licensed athletic trainer or physician. Students commit an average of 12 hours per week to clinical education. Students will begin the clinical education placements during their first semester and will continue these for each semester of the program. The final two semesters will include a capstone clinical education placement. Clinical placements are guided by concurrent coursework, type of practice setting (i.e., collegiate, high school, clinical, professional sports, industrial), injury risk level, and sociodemographic factors (i.e., gender, age, urban/suburban/rural). All clinical education experiences will be strategically mapped to ensure that each student is exposed to as many of the above factors as possible.

## Credits and Courses

This is a 69-credit, two-year program conducted on a 12-month calendar. Students will matriculate at the start of the Summer term, and take courses for the following Fall, Spring, Summer, Fall, and Spring. Graduation will occur at the end of the Spring term.

Code	Title	Credits
<b>Required Courses</b>		
ATRAN 701	Athletic Training Foundational Skills	1
ATRAN 705	Athletic Training Practice Based Research I	2
ATRAN 706	Athletic Training Practice Based Research II	1
ATRAN 710	Prevention & Care of Emergent Medical Conditions in Athletic Training	4
ATRAN 723	Physiological Regulation in Exertion & Disease	3
ATRAN 725	Gross Anatomical Kinesiology	4
ATRAN 726	Pathoetiology of Musculoskeletal Injury	1
ATRAN 744	Organizational Competencies in Athletic Training	3
ATRAN 745	Administrative Management in Athletic Training	2
ATRAN 747	Clinical Exam and Diagnosis of the Lower Extremity in Athletic Training	3
ATRAN 748	Clinical Exam and Diagnosis of the Head and Spine in Athletic Training	3

ATRAIN 749	Clinical Exam and Diagnosis of Upper Extremity in Athletic Training	3
ATRAIN 753	Medical Physiology II	3
ATRAIN 754	Clinical Exam and Diagnosis of Medical Conditions in Athletic Training	1
ATRAIN 757	Foundations of Therapeutic Interventions in Athletic Training	3
ATRAIN 758	Physical Agents	2
ATRAIN 759	Advanced Therapeutic Interventions	3
ATRAIN 785	Clinical Education in Athletic Training: I	1
ATRAIN 786	Clinical Education in Athletic Training: II	2
ATRAIN 787	Clinical Education in Athletic Training: III	2
ATRAIN 788	Clinical Education in Athletic Training: IV	2
ATRAIN 800	Athletic Training Board of Certification Exam Preparation	2
ATRAIN 883	Capstone Clinical Education in Athletic Training (ATRAIN 883 is 6 credits repeated twice)	12
PRPP 551G	Psychology of Injury: Prevention, Rehabilitation & Return to Participation	3
PRPP 553G	Psychological Considerations for Optimizing Health & Performance	3
<b>Total Credits</b>		<b>69</b>

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that each student have a major professor to advise, supervise, and approve the program of study. Students are assigned a faculty advisor upon acceptance to the program.

### Time Limit

The student must complete all degree requirements within seven years of initial enrollment.

## Accelerated Program Option

This program is offered as part of an accelerated graduate program. For more information, see Accelerated Graduate Degrees (p. 37).

### Contact Information

Pavilion, Suite 350

## Certified Mental Performance Consultant, Graduate Certificate

The Certified Mental Performance Consultant (CMPC<sup>®</sup>) Graduate Certificate program prepares those who have completed, or are currently completing, a graduate degree (e.g., MS, PhD, PsyD), with the didactic coursework and mentored experiences to be eligible to sit for the CMPC<sup>®</sup> certification exam. The CMPC<sup>®</sup> designation prepares individuals for employment opportunities working alone and/or alongside other health professionals in some of the following settings: general health care (injury prevention and/or rehabilitation), sports medicine, counseling or clinical psychology, adaptive sports, exercise and fitness, military, performing arts, e-sports, and gaming. The CMPC<sup>®</sup> designation enables

already practicing mental health professionals to expand the scope of their practice.

The course and credit requirements for the CMPC<sup>®</sup> Graduate Certificate program depend upon whether the student is completing the program in tandem with another graduate degree or as a post-graduate curriculum.

Upon application into the CMPC<sup>®</sup> Graduate Certificate program, each student will undergo a transcript review whereby prior didactic coursework and prior mentored experience will be compared to the list of didactic coursework and mentored experience requirements to obtain the CMPC<sup>®</sup> designation (as determined by the National Commission for Certifying Agencies).

For additional information, please contact the Program Coordinator, Dr. Monna Arvinen-Barrow (arvinenb@uwm.edu), PhD, CMPC FAASP (United States), CPsychol AFBPsS (United Kingdom), UPV sert. (Finland).

Please visit the Laboratory for Sport Psychology & Performance Excellence (<https://sites.uwm.edu/lab-sppe/>) web page for more information.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Admission

The CMPC<sup>®</sup> Graduate Certificate program uses a rolling admission process.

The admission requirements of the CMPC<sup>®</sup> Graduate Certificate program are consistent with those requirements specified by the Graduate School of UWM. In addition, students must also meet the following requirements:

- Currently enrolled, and in good standing, in a graduate degree program at an accredited university, OR;
- A Master's or Doctoral degree from an accredited university.
- Transcripts from all university degrees/coursework.
- Current resume or curriculum vitae (CV).
- Personal statement that includes rationale for certificate study and career goals.

- Two letters of recommendation from persons most knowledgeable about the applicant's recent academic and relevant work experiences.
- Electronic interview with program faculty may be requested by the Program Coordinator.
- Students wishing to obtain the CMPC® Graduate Certificate should inform the Program Coordinator and apply using the Graduate School online application.
  - Upon review of the application materials, the Program Coordinator will generate a Plan of Study for the student. The Plan of Study will include the specific Knowledge Areas (i.e., courses and required credits) the student needs to meet the didactic coursework proportion of the CMPC® designation as well as the number and type of mentored experience (i.e., courses and required credits) the student needs to meet the mentored experience portion of the CMPC® designation.
  - The Plan of Study will be shared with the student in-writing and via verbal discussion.
  - A Plan of Study signed by the Program Coordinator and the student will be sent via email to the Graduate School and placed in the student's official file.

## Credits and Courses

### In-Tandem Requirements

Students who enroll in the CMPC® Graduate Certificate program in-tandem with a current graduate degree must complete a minimum of 34 credits. The number of credits needed to obtain this certificate depends on the needs of each student.

Code	Title	Credits
<b>Didactic Coursework</b> <sup>12</sup>		
COUNS 814	Professional, Ethical and Legal Issues in Counseling Psychology <sup>1</sup>	3

<b>Total Credits</b>		<b>40</b>

- 1 Knowledge Area 1: Professional Ethics & Standards
- 2 Knowledge Area 2: Sport Psychology
- 3 Knowledge Area 3: Sport Science
- 4 Knowledge Area 4: Psychopathology
- 5 Knowledge Area 5: Helping Relationships
- 6 Knowledge Area 6: Research Methods & Statistics
- 7 Knowledge Area 7: Psychological Foundations of Behavior
- 8 Knowledge Area 8: Diversity & Culture
- 9 More than 10 credits (equivalent to 400 clinical hours) may be necessary to amass the required combination of clinical hours.
- 10 Students must enroll in and complete PRPP 854 for a total of 6 credits.
- 11 Students must enroll in and complete PRPP 855 for a total of 4 credits.
- 12 Other courses as approved by the program director.

### Post-Graduate Requirements

Students who enroll in the certificate program as a post-graduate with a completed graduate degree must complete a minimum of 15 credits. The number of credits needed to obtain this certificate depends on the needs of each student.

Code	Title	Credits

- 2 More than 12 credits may be necessary to amass the required combination of clinical hours.
- 3 Students must enroll in and complete PRPP 854 for a total of 6 credits.
- 4 Students must enroll in and complete PRPP 855 for a total of 6 credits.

## Additional Requirements

### Transfer Credit

Transfer credit is not allowed for this certificate.

### Minimum Grade Requirement

Students must complete all courses with a grade of B or better (not including B-).

### Time Limit

It is expected that students completing the CMPC<sup>®</sup> Graduate Certificate program in-tandem with another graduate degree at UWM complete the requirements for the certificate within seven years. It is expected that students completing the CMPC<sup>®</sup> Graduate Certificate program as a post-graduate curriculum complete within three or four years, pending credit requirements.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Communication Sciences and Disorders, BS

The Communication Sciences and Disorders Program offers a Bachelor of Science degree, which provides the pre-professional foundation for graduate study. The student who plans to become a professional speech-language pathologist or audiologist will receive preparation in human communication sciences and disorders as well as a broad educational experience in the liberal arts and sciences.

### Requirements

Students must achieve the following:

1. Satisfactory completion of 121 credits;
2. Satisfactory completion of the required courses in the Communication Sciences and Disorders Program, and those required outside the program;

3. Satisfactory completion of the University General Education Requirements (p. 30);
4. A cumulative 2.5 GPA or better in all credits earned at UWM. Students should note that admission to graduate programs in speech-language pathology and audiology is highly competitive. To be competitive with other Graduate School applicants, it is recommended that students maintain a GPA greater than 3.5; and
5. Completion of the last 30 credits in residence at UWM.

<b>Total Credits</b>		<b>121-122</b>

<sup>1</sup> Electives should be used to meet general education requirements.

<sup>2</sup> COMSDIS 220, COMSDIS 230, and COMSDIS 240 must have a minimum cumulative GPA of 3.00 for admission to the major.

<sup>3</sup> These courses meet a subset of the requirements for Wisconsin Department of Public Instruction for School Certification in Speech-Language Pathology.

## Admission to the Major

To be accepted as a communication sciences and disorders major you must have:

1. A cumulative GPA of 2.75 or better in at least the first 58 credits taken;
2. A GPA of 3.0 or better in COMSDIS 220, COMSDIS 230, and COMSDIS 240;
3. Completion of Oral and Written Communication - Part A competency;
4. Completion of Quantitative Literacy - Part A competency;
5. Completion of an application form for admission to the major;
6. Endorsement by the faculty of the student's written application.

Students will receive written notice of the admission decision. A meeting with your advisor to discuss the program of study is required immediately following admission to the major.

### Appeal Procedures

Students who are refused admission to the major may appeal the decision by writing to the department chairperson and enumerating the reasons they believe their case is exceptional and merits additional consideration. If possible, the appeal should be accompanied by written support from one or more of the faculty, and should include documentation of any extenuating circumstances cited in support of the appeal. A committee composed of the entire faculty of the Communication Sciences and Disorders Program will consider individual student appeals for admission to the major. Students are notified in writing of the faculty's decision concerning the appeal.

## Careers

Individuals who have an educational background in Communication Sciences and Disorders have a variety of employment and career opportunities available to them upon completion of the Bachelor's Degree. For those interested in working with children and adults with disabilities, positions may be found in schools, agencies, health-care facilities, and government. The Communication Sciences and Disorders undergraduate major also provides a good preparation for graduate and certification training in human service-related fields.

### Examples of Jobs for Undergraduate Majors

- Care Coordinator for high-risk children and families
- Case Manager for individuals with developmental disabilities
- Job Coach
- Activity Assistant
- Life Skills Instructor
- Rehabilitation Technician (assists rehabilitation professionals in healthcare settings)
- Classroom Aide
- Special Ed Educational Assistant
- Autism Line Therapist
- In-home Behavioral Support Specialist
- Substitute Teacher

- Childcare Teacher (certification required)
- Peer Recovery Specialist (certification required)

### Jobs Requiring Additional Education (graduate degree or post-baccalaureate certification)

- Speech-Language Pathologist
- Audiologist
- Social Worker
- Occupational Therapist
- Manager, Day Services Program
- Special Education Teacher
- Reading Specialist
- Vocational Rehabilitation Counselor
- Manager, Autism Therapy Agency

## Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

## College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

## Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

### Contact Information

**Barbara Pauloski**  
Undergraduate Program Coordinator

## Communication Sciences and Disorders, MS

The Communication Sciences and Disorders Program offers a Master's of Science which prepares students for careers as speech-language pathologists in public schools, hospitals, rehabilitation centers, nursing homes, private practice and university training programs. The program typically takes 2 calendar years to complete. Students usually prepare for service delivery in both school and healthcare clinical settings to

maximize career flexibility. Occasionally, students may choose to focus career preparation on just one type of setting.

Laboratory and instructional facilities include a speech and language clinic, an instructional communication sciences laboratory, and faculty research laboratories. Research and instructional laboratories contain state-of-the-art technology, a variety of acoustic and physiological measurement systems including a swallow station, and augmentative and alternative communication (AAC) devices. Students participate in three semesters of on-campus clinic. Students have the opportunity to participate in research through a thesis or research experience, working closely with a faculty mentor.

Following a minimum of two successful practicum experiences in the on-campus clinics, students are eligible for off-campus externships in medical, rehabilitation, school, and birth-to-three sites. A successful practicum experience is one in which a student earns a grade of S (satisfactory progress). Students placed in these facilities are required to pass a criminal background check prior to the externship placement, in accordance with Wisconsin State Statutes, Chapters 48 and 50.

The master's degree program in speech-language pathology (MS in Communication Sciences and Disorders) at the University of Wisconsin-Milwaukee is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (<https://caa.asha.org/>) of the American Speech-Language-Hearing Association, 2200 Research Boulevard, Rockville, MD 20850-3289, 301-296-5700.

The Wisconsin Department of Public Instruction (DPI) has also approved the undergraduate/graduate program in communication sciences and disorders. Students in the graduate program are advised individually to select academic coursework and clinical practica so that they may fulfill the standards of the credentials of their choice, including the state professional license issued by the Wisconsin Department of Safety and Professional Services (DSPS), a state public schools license issued by the Wisconsin Department of Public Instruction (DPI), and the national professional Certificate of Clinical Competence in Speech-Language Pathology (CCC) issued by the American Speech-Language-Hearing Association (ASHA).

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these departmental requirements to be considered for admission to the program.

- Submission of three letters of recommendation from persons familiar with applicant's academic qualifications and achievements.
- Students must apply to the program using the Communication Sciences and Disorders Centralized Application Service (CSDCAS) (<https://csdcas.liaisoncas.com/applicant-ux/#/login>).

Consult the CSD FAQ Website (<https://uwm.edu/healthsciences/academics/ms-communication-sciences-disorders/faqs/>) for information about prerequisite coursework.

Applicants may be admitted with specific program-defined course deficiencies provided that the deficiencies amount to no more than two courses. The student is expected to satisfy deficiency requirements within three enrolled semesters. The deficiencies are monitored by the Graduate School and the individual graduate program unit. No course credits earned in making up deficiencies may be counted as program credits required for the degree.

Students preparing for professional certification in speech-language pathology must also have transcript credit (which could include coursework, advanced placement, CLEP, or examination of equivalency) for each of the following areas: human or animal biology, physics or chemistry, social/behavioral sciences, and statistics.

## Credits and Courses

Minimum degree requirement is 48 credits, although total degree credits are typically around 52.

Code	Title	Credits
<b>Core Curriculum</b>		
32 credits including the following:		
COMSDIS 670	Advanced Procedures in Aural Rehabilitation for the SLP	3
COMSDIS 701	Research Design and Methods in Communication Sciences and Disorders	3
COMSDIS 702	Clinical Phonology and Articulation	2
COMSDIS 703	Voice Disorders	2
COMSDIS 704	Speech Fluency and Stuttering	3
COMSDIS 706	Language Assessment and Intervention	3
COMSDIS 709	Evaluation and Management of Swallowing Disorders	3
COMSDIS 710	Motor Speech Disorders	3
COMSDIS 712	Acquired Neurogenic Communication Disorders in Adults	3
COMSDIS 715	Assessment and Intervention in Augmentative and Alternative Communication	3
COMSDIS 725	Speech/Language Services in Educational and Medical Environments	2
COMSDIS 784	Professional Portfolio Development I	1
COMSDIS 785	Professional Portfolio Development II	1
<b>Electives</b>		
Select 2 credits of electives (see below)		2
<b>Total Credits</b>		<b>34</b>

The remaining credits will be taken in required clinical practica. The student, in consultation with the major advisor, plans the appropriate practicum courses for on-campus clinics and off-campus externships to meet ASHA certification, DPI and Wisconsin licensure requirements. Only clinical clock hours for practicum experiences in which the student has earned a grade of B or better will apply toward degree, certification, or licensure requirements.

Code	Title	Credits
<b>Clinical Practica</b>		
COMSDIS 720	Advanced Clinical Practice in Speech-Language Pathology:	1-3
COMSDIS 726	Speech-Language Pathology Externship in Medical Environments	6
COMSDIS 727	Speech-Language Pathology Externship in Educational Environments	6
COMSDIS 799	Independent Studies (clinical)	1-3

## Electives

Code	Title	Credits
COMSDIS 579	Special Topics in Communication Sciences and Disorders:	1-3
COMSDIS 630	Communication Disorders in Multicultural Populations	2
COMSDIS 640	Clinical and Research Instrumentation in Communication Sciences & Disorders	2
COMSDIS 661	The Role of the Speech-language Pathologist in Literacy	2
COMSDIS 688	Evaluation and Diagnosis in Speech-Language Pathology	2
COMSDIS 713	Degenerative Cognitive Communication Disorders in Older Adults	2
COMSDIS 717	Special Populations in Communication Disorders	2
COMSDIS 790	Research and Thesis (credits beyond 1)	1-6
COMSDIS 791	Research Experience in Communication Sciences and Disorders	1-3
COMSDIS 799	Independent Studies (academic)	1-3

Students who have fulfilled the program's student learning outcomes in U/G courses (for example, COMSDIS 670) will be waived from taking these courses as part of their graduate program. However, students must still take a minimum of 36 graduate credits in academic coursework and must have a minimum of 48 total graduate credits to complete degree requirements.

## Thesis

Optional. A student may earn up to 6 credits for a thesis (COMSDIS 790) if this option is selected. One of these credits will apply toward the core curriculum, two credits may apply toward the elective credit requirement, and the rest may apply toward the total of 48 credits required for the degree.

## Capstone Project

Students who do not choose the thesis option must complete a capstone project. Capstone projects provide students the opportunity to showcase their growth during the graduate program and illustrate what they have to offer potential employers and the larger society. Students may choose to complete a research experience or an evidence-based case presentation.

## Research Experience

The research experience is a one-credit course (COMSDIS 791) that may involve (but is not limited to) a small-scale original study, a project related to the ongoing research of a faculty member, or a literature review. Students may work individually or in groups. The final product can be

either a research paper or a poster of the research findings, presented at a department symposium.

## Evidence-based Case Presentation

The evidence-based case presentation is an opportunity for students to showcase their growth as a clinician. Students will summarize information from a case as part of the discussion section during each of their clinical externships (COMSDIS 726 and COMSDIS 727). Students opting to complete the evidence-based case presentation as their capstone project will present a summary of their clinical approach using one of these cases during a program symposium. Students are required to apply principles of evidence-based practice in their presentation.

## Additional Requirements

### Major Professor as Advisor

Entering students are assigned a major professor as an advisor to supervise the graduate studies as specified in Graduate School regulations.

### Knowledge and Skills Acquisition (KASA) Assessment

All students will be responsible for completion of the Knowledge and Skills Acquisition (KASA) assessment, which assesses student attainment of learning outcomes in a variety of content areas. Students who are judged by program faculty and staff to be deficient in one or more content areas will be required to take additional coursework or clinical practica until their deficiencies have been satisfied.

Completion of the degree program affords the necessary opportunities to meet licensure and certification requirements. However, it is still the student's responsibility to ensure that their individual course and practicum choices are consistent with the credentials they seek to obtain, and that all competencies and standards have been met.

### Time Limit

The student must complete all degree requirements within seven years of initial enrollment.

## Health Professional Education, Graduate Certificate (School of Rehabilitation Sciences and Technology)

The Health Professional Education certificate is designed to provide health professionals with additional preparation in educational principles and theory to support them in their roles as educators of students and staff in the health professions as well as in the role of patient educator. This program is open to students simultaneously enrolled in a graduate degree program, as well as to health professionals who have completed a baccalaureate, master's, or doctoral degree. The certificate program is a collaborative program between the College of Health Professions and Sciences and Schools of Nursing and Education, and is coordinated through the School of Nursing.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found

by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Admission

Applicants are admitted to the certificate program in one of three categories: post-baccalaureate, current student in a UWM graduate health profession program, or post-graduate student.

1. Post-baccalaureate students must have completed a bachelor's degree in a health profession discipline with a grade point average of 2.75 or above (4.0 scale) and not be currently enrolled in a graduate degree program at UWM.
2. The admission requirements of the health professional educational certificate for students enrolled in good standing in a UWM graduate health profession program are consistent with those requirements specified by the program.
3. Post-graduate students must have completed a graduate degree in a health profession or related discipline with a grade point average of 3.0 or above (4.0 scale).

## Credits and Courses

The completion of 15 credit hours (5 courses) is required for the certificate program.

Code	Title	Credits
<b>Core</b>		
AD LDSP 757	Principles and Foundations of Adult Education	3
NURS 731	Practicum and Seminar in Health Professional Education	3
<b>Curriculum/Program Planning &amp; Evaluation Courses</b>		
Select one of the following:		3
AD LDSP 667	Program Planning in Adult Education	
AD LDSP 607	Coordination of Staff Development and Training Program	
AD LDSP 647	Evaluation of Adult, Continuing, and Higher Education Programs	
NURS 752	Curriculum Development in Nursing Education	
<b>Teaching/Instructional Strategies</b>		
Select one of the following:		3
AD LDSP 687	Instructional Design and Teaching Strategies	

AD LDSP 707	Using Technology With Adult Learners	
AD LDSP 827	Seminar in Adult and Organizational Learning	
NURS 705	Instructional Strategies for Patient Education	
<b>Elective Courses</b>		
Select one additional course from the above or from the following:		3
AD LDSP 867	Seminar in Continuing Education in the Professions	
AD LDSP 787	Administration of Adult Education Programs	
AD LDSP 547	The Educational Dimensions of Practice with Older Adults	
NURS 764	Changing Health Behaviors	
CURRINS 774	College Teaching	
NURS 751	Teaching in Practice Disciplines	
<b>Total Credits</b>		<b>15</b>

A current listing of courses that meet these requirements can be obtained from the College of Health Professions and Sciences or the School of Nursing. Students will need to maintain a 3.0 GPA and meet all other requirements of the Graduate School for continuation in the program. The Practicum and Seminar in Health Professional Education is the last course taken in the certificate program.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

# Interprofessional Public and Population Health, Graduate Certificate (School of Rehabilitation Sciences and Technology)

The Interprofessional Public and Population Health Graduate Certificate is designed for students and working professionals involved in program planning and implementation, evaluation, education policy, health policy, engineering administration, research, and other areas related to public and population health. It recognizes that an interdisciplinary, systems approach is essential for communities to solve complicated social and economic problems. No one perspective or set of strategies can address the many dimensions of current societal problems. Prevention and population health are important cornerstones of the solutions to these problems, requiring linkages and new models of interaction among primary care, hospitals, communities and public health.

The Interprofessional Graduate Certificate is a 16-credit program with courses in four core disciplines: epidemiology, health policy, social and behavioral health, and environmental health. The fifth course grounds students in public health principles and practice. The sixth course will provide students the opportunity to engage in interprofessional workshops and other learning forums to foster competencies in interprofessional values, communication and teamwork. Three of the courses, in health behavior, epidemiology and health policy, are offered online, which will provide added flexibility for students.

This program is open to post-baccalaureate students, to those currently enrolled in a UWM graduate degree program, as well as to health professionals who have completed a baccalaureate, master's or doctoral degree. The certificate program is a collaborative program between the College of Health Professions and Sciences, School of Nursing, and the Zilber College of Public Health, and is coordinated through the Zilber College of Public Health with administrative support from the School of Nursing.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.

- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

## Credits and Courses

The completion of 16 credit hours is required for the certificate program. All students are required to complete six courses (all are 3 credits unless noted):

Code	Title	Credits
PH 700	Structures of Inequality and Population Health	3
PH 703	Environmental Health Sciences	3
NURS 728	Epidemiological Principles for Population Health	3
NURS 803	Health Policy	3
KIN 556	Multilevel Approaches to Changing Physical Activity and Eating Behaviors	3
or KIN 534	Physical Activity, Exercise and Health	
ATRAIN 703	Foundations of Interprofessional Practice	1
<b>Total Credits</b>		<b>16</b>

Students will need to maintain a 3.0 GPA and meet all other standard requirements for UWM graduate students for continuation in the program.

## Additional Requirements

### Transfer Credit

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

### Grade Point Average Requirement

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

### Articulation with Degree Programs

1. Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.

2. Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
3. A course may count toward no more than one certificate and one degree.
4. Students may not earn a certificate subsequent to a concentration in the same area.

## Time Limit

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

# Occupational Science and Technology, BS

You've decided you enjoy working with persons with disabilities either through direct care or administrative service. Not quite sure which is the best career path? The Bachelor of Science in Occupational Science and Technology (OST) allows you the chance to pursue a variety of career options. A flexible educational path, combined with a blend of elective courses, and you'll be prepared to work in different health and human service settings.

You will also be particularly well prepared for further graduate study in Occupational Therapy and other disability related disciplines. Students in the OST Program with the designated pre-occupational therapy designation may apply to the UWM Masters in Occupational Therapy Program through the Early Admission Program. This is an advantage over students applying through the regular Occupational Therapy Comprehensive Application System (OTCAS).

Become part of a large interdisciplinary department with a strong focus on interprofessional education, research excellence and technology, especially around assistive and therapeutic technologies. The OST undergraduate degree program is housed in the School of Rehabilitation Sciences and Technology within the College of Health Professions and Sciences. Students in the OST Program may study in specialty areas in assistive technology, engineering, human factors, injury and performance, occupational therapy and therapeutic recreation. Learn from faculty who are among the strongest in the nation in terms of their leadership, professional credentials and research productivity.

For additional information, please contact Patricia Thomas (pthomas@uwm.edu), MPA, CTRS, OST Program Director or visit the OST Undergraduate Program (<https://uwm.edu/healthsciences/academics/bs-occupational-science-technology/>) website.

Free Electives and GER	34-41
<b>Total Credits</b>	<b>120-127</b>

## Degree Requirements

The undergraduate degree in occupational science and technology offers a flexible path that allows students to pursue a variety of career options in different settings. The combination of foundation, core, track electives and free electives allows students to create an individualized program based on their interests and career objectives. The first few semesters are focused on building a foundation of knowledge. In the final semesters of the OST degree program, students focus primarily on the track and free electives courses. Students are automatically admitted to the major after completion of 57 credits. Within those 57 credits students must have a B- or better in: BIO SCI 202 or BIO SCI 203, OCCTHPY 151, OCCTHPY 201, PSYCH 101, and THERREC 202.

At the time of admission to the major, students must declare at least one track to complete as part of their program of study. Selection of a minor or certificate is encouraged to meet the program free elective requirements. To remain in the program, students must maintain a 2.75 cumulative GPA. The faculty and staff in the OST Program want the students to succeed. Students falling below the required 2.75 cumulative GPA are strongly encouraged to meet with the Program's Academic Advisor to develop an action plan for success. Ongoing communication with the Academic Advisor and Program Director are encouraged and a key to success in the program.

Students must achieve the following to complete an undergraduate degree in occupational science and technology:

- Satisfactory completion of 120 credits with a cumulative 2.75 GPA or better in all credits earned at UWM. Because a master's degree is required for professional practice in many health-related fields, such as occupational therapy, it is recommended that students maintain a GPA greater than 3.0 to be competitive with other Graduate School applicants;
- Satisfactory completion of the University General Education Requirements (p. 30); and
- Completion of the last 30 credits in residence at UWM.

Students are encouraged to meet with the Program's Academic Advisor at least once per semester throughout your undergraduate career to ensure that all requirements are being met.

## Course of Study

The program is divided into foundation, core, track and free elective courses. The undergraduate program requires 120 credits for graduation. All students admitted to the program must satisfy University-Wide General Education Requirements (GER) (p. 30), (except second-degree candidates who are exempt). English and mathematics competency requirements must also be met.

With 120 credits required to graduate with a bachelor's degree in Occupational Science and Technology, students need to take responsibility to complete all foundation and core courses, GER requirements, at least one program track, and sufficient free elective credits. A number of GER courses are part of the degree requirements. Recommended free electives and certificate/minor programs are listed to assist the student in creating an individualized area of study.

Requirements are subject to change as of the publication date of the catalog. Please check with the Office of Student Affairs for the most current information.

<b>Total Credits</b>		<b>21</b>

**Applications of Assistive Technology**

This track is aimed towards students who are interested in applying technology and/or designing environments and products that enhance the capabilities of persons living with and without a disability. This may include Occupational Therapy or other rehabilitation professions. Students are encouraged to also add the Pre-Occupational Therapy designation to their program if interested in pursuing Occupational Therapy. The Program's Academic Advisor may assist with adding the designation.

<b>Total Credits</b>		<b>21</b>

### Human Factors, Injury and Performance

This track is targeted toward students interested in helping individuals (with and without disabilities) achieve peak occupational health and performance through the interaction of human factors and human function. This track is aimed at students who seek an entrepreneurial component to their educational learning experience, and provides a strong foundation for graduate study in rehabilitation professions. Students are encouraged to also add the Pre-Occupational Therapy or other pre-professional designation to their program if interested in pursuing graduate rehabilitation studies. The Program's Academic Advisor may assist with adding such designations.

### Honors in the Major

Honors in the major are granted to students who earn a GPA of 3.500 or above on a minimum of 30 completed credits at UWM.

### College of Health Professions and Sciences Dean's Honor List

GPA of 3.500 or above, earned on a full-time student's GPA on 12 or more graded credits in a given semester.

### Honors College Degree and Honors College Degree with Distinction

Granted to graduating seniors who complete Honors College requirements, as listed in the Honors College (p. 819) section of this site.

## Commencement Honors

Students with a cumulative GPA of 3.500 or above, based on a minimum of 40 graded UWM credits earned prior to the final semester, will receive all-university commencement honors and be awarded the traditional gold cord at the December or May Honors Convocation. Please note that for honors calculation, the GPA is **not** rounded and is truncated at the third decimal (e.g., 3.499).

## Final Honors

Earned on a minimum of 60 graded UWM credits: Cum Laude - 3.500 or above; Magna Cum Laude - 3.650 or above; Summa Cum Laude - 3.800 or above.

## Occupational Therapy, MS

### Related Certificates

- Certificate in Assistive Technology and Accessible Design (p. 786)
- Certificate in Trauma-Informed Care (p. 816)
- Graduate Certificate in Applied Gerontology (p. 541)

The School of Rehabilitation Sciences & Technology offers a Master of Science in Occupational Therapy (MSOT) Degree. The MSOT Degree Program prepares students to become scholarly, client-centered practitioners, educators, and scientists who will be able to enrich the health, well-being, quality of life and occupational participation of the people, communities, and populations they will serve after graduating. MSOT students engage in graduate-level instruction with a strong focus in theory, evidence-based research, interprofessional education, technology, community engagement, leadership, and clinical underpinnings. During their time in the program, students take required and elective courses. Students can use elective courses to help them complete graduate certificates alongside their MSOT Degree.

Graduates of the program are eligible to take the occupational therapist certification examination offered by the National Board for Certification in Occupational Therapy. The Master of Science in Occupational Therapy Degree Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) (<http://www.acoteonline.org/>) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is (301) 652-6611.

All students admitted to the MS in Occupational Therapy degree program will be required to complete a Background Information Disclosure form (HFS64). A background check, which identifies a past criminal record, does not necessarily preclude an individual from pursuing studies in occupational therapy or becoming a successful practitioner. Should there be a discrepancy between the information reported by the student on HFS-64 and the reports issued by the Department of Justice and the Department of Health and Family Services, the student will be subject to dismissal from the occupational therapy program and reported to DHFS per HFS 12.20 (1)(c), Wis. Adm. Code.

Graduates of the master's program will be eligible to sit for the National Certification Examination for the Occupational Therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an

Occupational Therapist, Registered (OTR). In addition, most states require licensure to practice; however state licenses are usually based on the results of the NBCOT Certification Examination. Candidates for the NBCOT Certification Examination will be asked to answer questions related to the topic of felonies when applying for the exam. For further information on these limitations and other certification requirements, visit the NBCOT website at [www.nbcot.org](http://www.nbcot.org) (<http://www.nbcot.org>), email [info@nbcot.org](mailto:info@nbcot.org), call 301-990-7979, or send mail requests to NBCOT 1 Bank Street, Suite 300 Gaithersburg, MD 20878. A felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

For more information, please contact us at [ot-program@uwm.edu](mailto:ot-program@uwm.edu).

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

Applications for the MS OT are handled annually using the OT Centralized Application Service (OTCAS) (<https://otcas.liaisoncas.com/applicant-ux/#/login>). OTCAS provides a full-service, web-based application and admissions process for prospective occupational therapy program applicants.

Following are important timelines for the OTCAS application cycle (see OTCAS for specific dates).

- **Mid July:** OTCAS applications cycle opens (see OTCAS for specific dates).
- **Mid January** (December 1 if international): Deadline for submission of all application material to OTCAS (see OTCAS for specific dates).

Once recommended for acceptance to UWM's MS in Occupational Therapy Program, students need to apply to and be accepted by UWM's Graduate School. However, students may apply to UWM's Graduate School at any time prior to being recommended for acceptance to the OT Program.

### Current UWM Pre-OT Students

Applications for the MS OT are handled annually using the internal Panthera application system.

Following are important timelines for the Panthera application cycle.

- **November 30:** Deadline for submission of all application material to Panthera.

### Admission

The MS in Occupational Therapy Program admits students on the basis of a holistic, competitive application process. Students are accepted into the program once per year in Spring and begin professional coursework in the following Fall.

In addition to Graduate School requirements (<http://uwm.edu/graduateschool/admission/>), applicants must meet these departmental requirements to be considered for admission to the program.

1. An undergraduate degree completed by the end of the Spring semester of the year prior to beginning the OT Program, from an accredited institution, with an overall cumulative grade point average (GPA) of a 3.0 (on a 4.0 scale).
2. Six prerequisite courses, required to be completed by end of Fall semester of the year prior to beginning the OT Program, with a minimum grade point average of 3.0 (on a 4.0 scale):

Code	Title	Credits
	Human Anatomy <sup>1</sup>	3-4
	Human Physiology <sup>1</sup>	3-4
	Human Development	3
	Introduction to Psychology	3
	Statistics	3
	Select one of the following natural science courses:	3-5
	Physics <sup>2</sup>	
	Biology <sup>2</sup>	
	Chemistry <sup>2</sup>	
	Psychology <sup>2</sup>	

<sup>1</sup>Courses requiring a lab component.

<sup>2</sup>Courses with laboratory-based data analysis required.

3. Completed OTCAS application. (UWM Pre-OT Students should complete the Panthera application.)
4. Three letters of recommendation: One letter must be from an academic source and one from a clinical/health-related source. The third letter can be either from an academic or clinical/health-related source. All three letters must use the OTCAS form.
5. Reasons Statement or Personal Essay: This is the same as the OTCAS essay. Address why you selected occupational therapy as a career and how an occupational therapy degree relates to your immediate and long-term professional goals.
6. Additional Question: Answer why the Occupational Therapy Program in the School of Rehabilitation Sciences & Technology at the University of Wisconsin-Milwaukee is a good fit for you. Limit 250 words.

For all admission and application related questions, please contact OT-program@uwm.edu.

## Credits and Courses

The program is a tracked curriculum of 75 credits over 28 months, including a minimum of 24 weeks of full-time fieldwork during the program. OCCTHPY 810 serves as the capstone requirement for the degree. Students will enroll as full time students for each term of study (Summer, Fall, Spring). There is no part-time option for students in the MS in OT program. Students must maintain a GPA of 3.0 and a grade of B- or better in all required courses. Students who do not maintain this will be placed on probation.

## Transcript-Designated Concentrations

Through judicious use of electives, students may also choose one of two transcript-designated concentrations. This may require completion of more than the minimum 75 credits.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that each student have a major professor to advise, supervise, and approve the program of study. Students are assigned faculty advisors in the MS in OT program upon acceptance into the program.

### Time Limit

The student must complete all degree requirements within four years of initial enrollment.

## Occupational Therapy, MS: Assistive Technology and Accessible Design

The Concentration in Assistive Technology and Accessible Design is an interdisciplinary program designed to meet the demand for assistive technology and accessible design specialists. The College of Health Science's Departments of Rehabilitation Sciences and Technology and Communication Sciences Disorders, along with the School of Education's Department of Teaching and Learning, collaborate on the course offerings. The concentration emphasizes technologies for disability.

In addition, most states require licensure to practice; however state licenses are usually based on the results of the NBCOT Certification Examination. Candidates for the NBCOT Certification Examination will be asked to answer questions related to the topic of felonies when applying for the exam. For further information on these limitations and other certification requirements, visit the NBCOT website at [www.nbcot.org](http://www.nbcot.org) (<http://www.nbcot.org>), email [info@nbcot.org](mailto:info@nbcot.org), call 301-990-7979, or send mail requests to NBCOT 1 Bank Street, Suite 300 Gaithersburg, MD 20878. A felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

For more information, please contact us at [ot-program@uwm.edu](mailto:ot-program@uwm.edu).

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

Applications for the MS OT are handled annually using the OT Centralized Application Service (OTCAS) (<https://otcas.liaisoncas.com/applicant-ux/#/login>). OTCAS provides a full-service, web-based application and admissions process for prospective occupational therapy program applicants.

Following are important timelines for the OTCAS application cycle (see OTCAS for specific dates).

- **Mid July:** OTCAS applications cycle opens (see OTCAS for specific dates).
- **Mid January** (December 1 if international): Deadline for submission of all application material to OTCAS (see OTCAS for specific dates).

Once recommended for acceptance to UWM's MS in Occupational Therapy Program, students need to apply to and be accepted by UWM's Graduate School. However, students may apply to UWM's Graduate School at any time prior to being recommended for acceptance to the OT Program.

### Current UWM Pre-OT Students

Applications for the MS OT are handled annually using the internal Panthera application system.

Following are important timelines for the Panthera application cycle.

- **November 30:** Deadline for submission of all application material to Panthera.

### Admission

The MS in Occupational Therapy Program admits students on the basis of a holistic, competitive application process. Students are accepted into the program once per year in Spring and begin professional coursework in the following Fall.

In addition to Graduate School requirements (<http://uwm.edu/graduateschool/admission/>), applicants must meet these departmental requirements to be considered for admission to the program.

1. An undergraduate degree completed by the end of the Spring semester of the year prior to beginning the OT Program, from an accredited institution, with an overall cumulative grade point average (GPA) of a 3.0 (on a 4.0 scale).
2. Six prerequisite courses, required to be completed by end of Fall semester of the year prior to beginning the OT Program, with a minimum grade point average of 3.0 (on a 4.0 scale):

Code	Title	Credits
	Human Anatomy <sup>1</sup>	3-4
	Human Physiology <sup>1</sup>	3-4
	Human Development	3
	Introduction to Psychology	3
	Statistics	3
	Select one of the following natural science courses:	3-5
	Physics <sup>2</sup>	
	Biology <sup>2</sup>	
	Chemistry <sup>2</sup>	
	Psychology <sup>2</sup>	

<sup>1</sup>Courses requiring a lab component.

<sup>2</sup>Courses with laboratory-based data analysis required.

3. Completed OTCAS application. (UWM Pre-OT Students should complete the Panthera application.)
4. Three letters of recommendation: One letter must be from an academic source and one from a clinical/health-related source. The third letter can be either from an academic or clinical/health-related source. All three letters must use the OTCAS form.
5. Reasons Statement or Personal Essay: This is the same as the OTCAS essay. Address why you selected occupational therapy as a career and how an occupational therapy degree relates to your immediate and long-term professional goals.
6. Additional Question: Answer why the Occupational Therapy Program in the School of Rehabilitation Sciences & Technology at the University of Wisconsin-Milwaukee is a good fit for you. Limit 250 words.

For all admission and application related questions, please contact [OT-program@uwm.edu](mailto:OT-program@uwm.edu).

## Credits and Courses

The program is a tracked curriculum of 75 credits over 28 months, including a minimum of 24 weeks of full-time fieldwork during the program. OCCTHPY 810 serves as the capstone requirement for the degree. Students will enroll as full time students for each term of study (Summer, Fall, Spring). There is no part-time option for students in the MS in OT program. Students must maintain a GPA of 3.0 and a grade of B- or better in all required courses. Students who do not maintain this will be placed on probation.

### Transcript-Designated Concentrations

Through judicious use of electives, students may also choose one of two transcript-designated concentrations. This may require completion of more than the minimum 75 credits.

**Assistive Technology and Accessible Design**

Code	Title	Credits
<b>Required</b>		
OCCTHPY 593	Introduction to Biomedical and Rehabilitation Instrumentation	3
OCCTHPY 620	Introduction to Assistive and Rehabilitation Technology	3
OCCTHPY 625	Design and Disability	3
<b>Electives</b>		
Select a minimum of 6 credits from the following: 6		
OCCTHPY 595	Vision I: Introduction to Low Vision & Visual Impairment	
OCCTHPY 596	Vision II: Practical Aspects of Visual Impairment & Low Vision Intervention	
OCCTHPY 760	Assistive and Rehabilitation Technology	
OCCTHPY 770	Assessment in Assistive Technology and Accessible Design	
OCCTHPY 777	Fieldwork in Assistive Technology	
OCCTHPY 999	Advanced Independent Study	
COMSDIS 717	Special Populations in Communication Disorders	
IND ENG 580	Ergonomics	
<b>Capstone</b>		
OCCTHPY 810	Critical Evaluation of Theory, Research and Practice	2
<b>Total Credits</b>		<b>17</b>

**Additional Requirements****Major Professor as Advisor**

The Graduate School requires that each student have a major professor to advise, supervise, and approve the program of study. Students are assigned faculty advisors in the MS in OT program upon acceptance into the program.

**Time Limit**

The student must complete all degree requirements within four years of initial enrollment.

**Occupational Therapy, MS: Ergonomics**

**Note:** The concentration in ergonomics is being revised; admission to the program is temporarily suspended.

This concentration provides the skills and experience needed to practice ergonomics in work environments. Students learn theoretical concepts of occupational biomechanics, physiology, psychophysics, and human factors as well as numerous job analysis techniques. Students are taught how to synthesize and apply these theories and tools to reduce injuries, improve productivity and increase quality of service/goods in industry. Emphasis is placed on practical applications and solutions.

**Related Certificates**

- Certificate in Assistive Technology and Accessible Design (p. 786)
- Certificate in Trauma-Informed Care (p. 816)
- Graduate Certificate in Applied Gerontology (p. 541)

The School of Rehabilitation Sciences & Technology offers a Master of Science in Occupational Therapy (MSOT) Degree. The MSOT Degree Program prepares students to become scholarly, client-centered practitioners, educators, and scientists who will be able to enrich the health, well-being, quality of life and occupational participation of the people, communities, and populations they will serve after graduating. MSOT students engage in graduate-level instruction with a strong focus in theory, evidence-based research, interprofessional education, technology, community engagement, leadership, and clinical underpinnings. During their time in the program, students take required and elective courses. Students can use elective courses to help them complete graduate certificates alongside their MSOT Degree.

Graduates of the program are eligible to take the occupational therapist certification examination offered by the National Board for Certification in Occupational Therapy. The Master of Science in Occupational Therapy Degree Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) (<http://www.acoteonline.org/>) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is (301) 652-6611.

All students admitted to the MS in Occupational Therapy degree program will be required to complete a Background Information Disclosure form (HFS64). A background check, which identifies a past criminal record, does not necessarily preclude an individual from pursuing studies in occupational therapy or becoming a successful practitioner. Should there be a discrepancy between the information reported by the student on HFS-64 and the reports issued by the Department of Justice and the Department of Health and Family Services, the student will be subject to dismissal from the occupational therapy program and reported to DHFS per HFS 12.20 (1)(c), Wis. Adm. Code.

Graduates of the master's program will be eligible to sit for the National Certification Examination for the Occupational Therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, most states require licensure to practice; however state licenses are usually based on the results of the NBCOT Certification Examination. Candidates for the NBCOT Certification Examination will be asked to answer questions related to the topic of felonies when applying for the exam. For further information on these limitations and other certification requirements, visit the NBCOT website at [www.nbcot.org](http://www.nbcot.org) (<http://www.nbcot.org>), email [info@nbcot.org](mailto:info@nbcot.org), call 301-990-7979, or send mail requests to NBCOT 1 Bank Street, Suite 300 Gaithersburg, MD 20878. A felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

For more information, please contact us at [ot-program@uwm.edu](mailto:ot-program@uwm.edu).

**Admission Requirements****Application Deadlines**

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found

by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

## Application

Applications for the MS OT are handled annually using the OT Centralized Application Service (OTCAS) (<https://otcas.liaisoncas.com/applicant-ux/#/login>). OTCAS provides a full-service, web-based application and admissions process for prospective occupational therapy program applicants.

Following are important timelines for the OTCAS application cycle (see OTCAS for specific dates).

- **Mid July:** OTCAS applications cycle opens (see OTCAS for specific dates).
- **Mid January** (December 1 if international): Deadline for submission of all application material to OTCAS (see OTCAS for specific dates).

Once recommended for acceptance to UWM's MS in Occupational Therapy Program, students need to apply to and be accepted by UWM's Graduate School. However, students may apply to UWM's Graduate School at any time prior to being recommended for acceptance to the OT Program.

### Current UWM Pre-OT Students

Applications for the MS OT are handled annually using the internal Panthera application system.

Following are important timelines for the Panthera application cycle.

- **November 30:** Deadline for submission of all application material to Panthera.

## Admission

The MS in Occupational Therapy Program admits students on the basis of a holistic, competitive application process. Students are accepted into the program once per year in Spring and begin professional coursework in the following Fall.

In addition to Graduate School requirements (<http://uwm.edu/graduateschool/admission/>), applicants must meet these departmental requirements to be considered for admission to the program.

1. An undergraduate degree completed by the end of the Spring semester of the year prior to beginning the OT Program, from an accredited institution, with an overall cumulative grade point average (GPA) of a 3.0 (on a 4.0 scale).
2. Six prerequisite courses, required to be completed by end of Fall semester of the year prior to beginning the OT Program, with a minimum grade point average of 3.0 (on a 4.0 scale):

Code	Title	Credits
	Human Anatomy <sup>1</sup>	3-4
	Human Physiology <sup>1</sup>	3-4
	Human Development	3
	Introduction to Psychology	3
	Statistics	3
	Select one of the following natural science courses:	3-5
	Physics <sup>2</sup>	
	Biology <sup>2</sup>	
	Chemistry <sup>2</sup>	
	Psychology <sup>2</sup>	

<sup>1</sup>Courses requiring a lab component.

<sup>2</sup>Courses with laboratory-based data analysis required.

3. Completed OTCAS application. (UWM Pre-OT Students should complete the Panthera application.)
4. Three letters of recommendation: One letter must be from an academic source and one from a clinical/health-related source. The third letter can be either from an academic or clinical/health-related source. All three letters must use the OTCAS form.
5. Reasons Statement or Personal Essay: This is the same as the OTCAS essay. Address why you selected occupational therapy as a career and how an occupational therapy degree relates to your immediate and long-term professional goals.
6. Additional Question: Answer why the Occupational Therapy Program in the School of Rehabilitation Sciences & Technology at the University of Wisconsin-Milwaukee is a good fit for you. Limit 250 words.

For all admission and application related questions, please contact OT-program@uwm.edu.

## Credits and Courses

The program is a tracked curriculum of 75 credits over 28 months, including a minimum of 24 weeks of full-time fieldwork during the program. OCCTHPY 810 serves as the capstone requirement for the degree. Students will enroll as full time students for each term of study (Summer, Fall, Spring). There is no part-time option for students in the MS in OT program. Students must maintain a GPA of 3.0 and a grade of B- or better in all required courses. Students who do not maintain this will be placed on probation.

OCCTHPY 625	Design and Disability	
OCCTHPY 788	Legal Issues and Regulatory Agencies in Ergonomics	
OCCTHPY 790	Design Project	
<b>Capstone</b>		
OCCTHPY 810	Critical Evaluation of Theory, Research and Practice	2

**Total Credits** 17

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that each student have a major professor to advise, supervise, and approve the program of study. Students are assigned faculty advisors in the MS in OT program upon acceptance into the program.

### Time Limit

The student must complete all degree requirements within four years of initial enrollment.

## Occupational Therapy, OTD

The Post-Professional Doctor of Occupational Therapy (PPOTD) prepares licensed clinicians to become experts in an identified specialization area and will prepare them to become clinical leaders, translating new findings and evidence into practice. In this post-professional program, students will develop and demonstrate more advanced knowledge and skills, beyond those learned at the master's level, in an occupational therapy concentration area.

UWM's PPOTD Program welcomes licensed clinicians who have completed an ACOTE-accredited MSOT or MOT degree program (or WFOT equivalent). See "Requirements" for additional applicant eligibility information.

For more information, please contact us (ot-program@uwm.edu).

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Primary entry requirements are:

1. MSOT or MOT degree from an ACOTE-accredited program (or equivalent recognized by the World Federation of Occupational Therapists, WFOT).
2. Occupational therapy licensure (or international equivalent approved by WFOT). Current master's students may apply but cannot formally matriculate to the OTD program until they are licensed. Students may be provisionally admitted to the OTD program and accumulate credits toward graduation for one semester while required documentation is being prepared or approved.
3. The competitive admissions process also includes evaluation of the GPA, coursework, and professional experiences, as well as a statement of personal interests.

Practicing occupational therapists with a bachelor's degree may be admitted on a case-by-case basis. Those who are accepted to the OTD Program will be expected to complete deficiency credits that ensure that their educational background is comparable to practitioners with a master's degree, and will complete a minimum of 54 credits of graduate-level coursework at UWM.

## Credits and Courses

The OTD program requires 33 credits, including 9 credits of required occupational therapy core courses beyond the level of the MS degree and 15 credits of electives in a concentration area chosen by students and their advisors. Students who need additional background preparation may need additional credits.

Code	Title	Credits
<b>Core</b>		<b>9</b>
NURS 810	Leadership for Advanced Practice in Healthcare	
OCCTHPY 701	Advanced Measurement and Instrumentation in Health Care	
	Evidence Based Practice for Individuals & Populations <sup>1</sup>	
<b>Area of Concentration</b>		<b>15</b>
Complete a minimum of 15 credits in an area of concentration		
<b>Doctoral Project and Experiential Components <sup>1</sup></b>		<b>9</b>
<b>Total Credits</b>		<b>33</b>

<sup>1</sup> Student should meet with their faculty advisor to enroll in a specific course or courses. Curricular requests are currently in process for permanent course numbers and are expected to be approved in academic year 2019-2020.

### Area of Concentration (minimum of 15 credits)

Students work with faculty advisors to develop a statement of their proposed concentration area, their needed and desired knowledge and courses, a mentoring team, possible doctoral experience sites, and a doctoral project. Examples of potential doctoral concentrations are below.

#### Assistive Technology and Assessable Design

Code	Title	Credits
EXCEDUC 765	Assistive Technology Service Delivery in Schools	
OCCTHPY 724	Advanced Design and Disability	
OCCTHPY 760	Assistive and Rehabilitation Technology	
OCCTHPY 770	Assessment in Assistive Technology and Accessible Design	
OCCTHPY 777	Fieldwork in Assistive Technology	

#### Community and Behavioral Health

Code	Title	Credits
PH 702	Introduction to Biostatistics	
PH 706	Perspectives on Community & Behavioral Health	
PH 725	Theories and Models of Health Behavior	
PH 726	Community Health Assessment	
PH 728	Program Evaluation in Public Health	

### The Doctoral Experience and the Doctoral Project (minimum of 9 credits)

Students must deliver and show competence in an evidence-based or evidence-informed population-based intervention that is still individualized. Ideally, the doctoral experience will also inform the student's doctoral project. The doctoral experience may occur in one

16-week period, or it may be spread out over a greater period, if the 640-hour criterion is met. Like the MS thesis and PhD dissertations, the culminating 6-credit hour doctoral project must be written, publicly presented and defended. Up to 3 credits may be transferred, on a case-by-case basis, for UW-Milwaukee MSOT graduates whose master's thesis or project will be used as the foundation of their OTD project.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that each student have a major professor to advise, supervise, and approve the program of study. Students are assigned faculty advisors in the OTD program upon acceptance into the program.

### Time Limit

The OTD curriculum is designed to be completed in four semesters. Some students may require two or three years of combination full- and part-time coursework, especially if they choose to work part time, take additional courses, or want to invest more time to complete their project.

Incoming OTD students with advanced applicable coursework and experience may transfer graduate credits or place out of up to 6 credits that directly relate to their proposed Program of Study. UWM MSOT students may transfer up to 3 of their master's thesis or project credits and apply those to their OTD project credits requirement. Combined, these transfers could reduce the total credits required to 24 and would likely accelerate time to completion for some students.

Because circumstances beyond a student's control may prevent completion of requirements according to this timeline, students will be granted a maximum of ten years to complete the degree.

### Contact Information

**Kris A. Barnekow, PhD, OTR/L, Associate Professor**

## Physical Therapy, DPT

The Doctor of Physical Therapy (DPT) is the classroom based and clinical education that prepares graduates for entry into the practice of physical therapy. The goal of this entry-level professional education program is to graduate students who are knowledgeable, service-oriented, and reflective practitioners who are able to render independent judgements in people with movement system dysfunction that limits activity and participation. Find out why you should choose UWM to start your career in physical therapy.

The program begins in early June and includes classroom, laboratory, research and clinical learning experiences. Admission to the DPT program is competitive. The faculty values a well-rounded applicant who has demonstrated both academic and personal/professional potential.

For more information, contact Lori Woodburn, DPT Program Assistant, at [pt-program@uwm.edu](mailto:pt-program@uwm.edu) or 414-251-5797.

The Doctor of Physical Therapy Program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: 703-706-3245; e-mail: [accreditation@apta.org](mailto:accreditation@apta.org); website: [www.capteonline.org](http://www.capteonline.org).

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Admission

Admission to the program is highly competitive. A snapshot of the typical successful applicant is available on the program website's Frequently Asked Questions (<https://uwm.edu/rehabilitation-sciences-technology/academics/dr-physical-therapy/faqs/>) section. The DPT program enrolls students through the Physical Therapy Centralized Application Service (PTCAS) (<http://www.ptcas.org/>). Policies and procedures related to consideration of the candidate are published on the PTCAS website and updated annually. Students apply to the UWM Graduate School after being recommended for Admission by the DPT program. Undergraduate degree and prerequisite coursework must be completed by the time the student enrolls in the DPT Program.

An applicant must meet Graduate School requirements (<http://uwm.edu/graduateschool/admission/>) plus these program requirements to be considered for admission to the program:

1. Completion of an undergraduate degree from an accredited institution with an overall cumulative grade point average (GPA) of a 3.0 (on a 4.0 scale).
2. Completion of 9 prerequisite courses with a minimum prerequisite grade point average of 3.0 (on a 4.0 scale).

Code	Title	Credits
	General Biology I	4
	Human Anatomy or Anatomy & Physiology I <sup>1</sup>	4
	Human Physiology or Anatomy & Physiology II <sup>1</sup>	4
	Chemistry I <sup>1</sup>	4
	Chemistry II <sup>1</sup>	4
	Physics I <sup>1</sup>	4
	Physics II <sup>1</sup>	4
	Psychology	3
	Statistics	3

<sup>1</sup>Courses requiring a lab component.

3. Submission of scores on the General Test of the Graduate Record Examination (<http://uwm.edu/graduateschool/admission/#gre>) taken within the last five years.
4. Two letters of recommendation, one of which must be an academic reference.
5. Responses to narrative essay questions.

### Selection

Admission to the program is competitive. The program enrolls 36 students annually. Students are selected based on GPA, GRE (<http://uwm.edu/graduateschool/admission/#gre>) scores, two letters of recommendation (one academic reference, one personal reference), and narratives. The program will give preference during the selection process to candidates with prerequisite requirements completed at the time of application to the program.

## Credits and Courses

The program is a sequenced, competency-based curriculum of 106 credits including 24 weeks of internship in the final year of the program. Students will enroll as full-time students for each term of study (Summer, Fall, Spring) including Winterim in both of the first two years in the program. There is no part-time option for students, nor can courses be taken out of sequence in the DPT program.

Code	Title	Credits
PRPP 553G	Psychological Considerations for Optimizing Health & Performance	3
PT 700	Introduction to Physical Therapy Practice and Examination Techniques	3
PT 701	Clinical Foundations of the Physical Therapy Examination	5
PT 702	Scientific Principles of Interventions	5
PT 704	Physical Agents	2
PT 707		2

PT 720	Human Gross Anatomy	6
PT 721	Medical Physiology	3
PT 722	Medical Physiology II	3
PT 723	Physiological Regulation in Exertion & Disease	3
PT 731	Professional Development 1	1
PT 732	Professional Development 2	2
PT 733	Professional Development 3	2
PT 734	Professional Development 4	1
PT 735	Advanced Clinical Reasoning	4
PT 740	Kinesiology & Biomechanics of Normal & Abnormal Movement	4
PT 750	Functional Neuroanatomy	3
PT 751	Motor Behavior	3
PT 820	Cardiopulmonary Evaluation & Treatment	3
PT 821	Integument System	2
PT 844		4
PT 845		4
PT 850	Neuromuscular: Adult	4
PT 852	Neuromuscular: Pediatric	4
PT 881	Fieldwork II: Basic Skills Experience	2
PT 980	PT Clinical Internship I	8
PT 981	PT Clinical Internship II	8
<b>Total Credits</b>		<b>101</b>

<sup>1</sup> PT 709 should be taken twice, for a total of 4 credits.

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that each student have a major professor to advise, supervise and approve the program of study. Students are

assigned faculty advisors in the DPT program. Faculty advisors are core members of the DPT program faculty who are also licensed.

## Pre-Athletic Training

Athletic trainers are health care professionals who provide physically active people services such as injury/illness prevention, emergency care, clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions. Athletic trainers care for people across the lifespan and activity levels, including youth athletes, professional athletes, performing artists, military or civil service personnel, and workers in physically demanding jobs. To become an athletic trainer students must complete a graduate degree in Athletic Training in a program accredited by the Commission on Accreditation of Athletic Training Education (<https://caate.net/>) (CAATE).

Undergraduate students can follow one of two paths to pursue Athletic Training at UWM:

### Traditional Path

Students can complete an undergraduate degree and the prerequisite coursework for admission to the MS Athletic Training program (<https://uwm.edu/rehabilitation-sciences-technology/academics/ms-athletic-training/>). An undergraduate degree in Kinesiology (<https://uwm.edu/publichealth/academics/bs-kinesiology/>), the science of human movement, is ideal preparation for training in athletic training. UWM Kinesiology students take coursework in biomechanics, exercise physiology, motor behavior and control, and psychosocial aspects of human movement, which serve as important foundations for advanced training in the UWM MSAT program. Students also can explore the practical application of the scientific principles of human movement in correlate and elective coursework.

The UWM Master of Science in Athletic Training (<https://uwm.edu/rehabilitation-sciences-technology/academics/ms-athletic-training/>) (MSAT) is a graduate level professional program that prepares students to become credentialed Athletic Trainers. The MSAT program regularly hosts information sessions for undergraduate students. Students can learn more about the prerequisites for admission to the UWM MSAT program in this site: MSAT application and admissions procedure (<https://uwm.edu/rehabilitation-sciences-technology/academics/ms-athletic-training/>).

### Accelerated Path

Students interested in a more direct path may apply to the Accelerated BS Kinesiology / MS Athletic Training program (<https://uwm.edu/rehabilitation-sciences-technology/academics/accelerated-kinesiology-athletic-training/>) and complete their Bachelor's and Master's degree in 5 years. This program is for high performing students and entails completing 3 years as a Kinesiology undergraduate student and the moving into the MSAT program as a graduate student. At the end of the 4th year (the first in the MSAT program), the BS Kinesiology degree is conferred. Upon successful completion of years 4 and 5, students earn the MS in Athletic Training.

For additional information on either path towards Athletic Training, you may contact either of the program directors:

Christy Greenleaf, PhD ([cgreenl@uwm.edu](mailto:cgreenl@uwm.edu))

Professor, BS Kinesiology Program Director

Jennifer Earl-Boehm, PhD, ATC, FNATA (jearl@uwm.edu)

Associate Professor, MS Athletic Training Program Director

## Freshman Admission

### Traditional Path

Students are accepted to the College of Health Sciences BS Kinesiology degree program (<https://uwm.edu/healthsciences/academics/bs-kinesiology/>) as "Kinesiology Intended" and should select the designation "Pre-Athletic Training" when completing your application. Students must complete the admission to major requirements.

### Accelerated Path

Students are accepted to the College of Health Sciences as "Accelerated BS Kinesiology/MS Athletic Training (<https://uwm.edu/healthsciences/academics/accelerated-kinesiology-athletic-training/>) Intended" and should select the designation "Pre-Athletic Training" when completing your application. Students must complete the admission to major requirements.

Regardless of which path is chosen, students should regularly meet with their academic advisor to create a plan of study that will include all of the prerequisite courses needed for the athletic training graduate program. Students should maintain a cumulative GPA of 3.0 or higher to be competitive for admission to the MSAT through either the Traditional or Accelerated path.

## I'm a new student. How do I start?

You are assigned an academic advisor upon admission to UWM. New Student Orientation (NSO) (<https://uwm.edu/studentorientation/>) helps those who are new to campus learn and understand the enrollment process and enroll in classes for their first semester at UWM! You should ask to have the designation "Pre-Athletic Training" added to your academic record.

---

## Who is my advisor?

Undergraduate students who have declared an intent to pursue Pre-Athletic Training or the accelerated BS Kinesiology/MS Athletic Training are advised by Torry Rufer. Contact Torry at 414-229-2758 or [tjruferr@uwm.edu](mailto:tjruferr@uwm.edu).

---

## When should I meet with my advisor?

Students are encouraged to meet with their advisor at least once per semester to ensure timely progress to graduation.

- **Enrolling for spring semester?**  
Schedule an appointment with your advisor in October or November.
- **Enrolling for fall semester?**  
Schedule an appointment with your advisor in March or April.

Students are also welcome to schedule an appointment with their advisor at any time to discuss academic challenges, career opportunities, or any other questions.

## How can my advisor help me?

CHS boasts professional academic advisors who understand the challenges of balancing academics, work, family, and the social aspects of college life. Advisors partner with you to:

- Explore your academic and career interests
- Plan the sequence of your courses
- Prepare for course enrollment
- Access tutoring and other academic support
- Identify opportunities for campus involvement
- Connect you to campus resources
- Plan for graduation

## Contact Information

Pavilion , Suite 350

## Pre-Audiology

Audiologists help people of all ages with hearing and balance disorders. When a person has problems with hearing or balance it can have a significant impact on their quality of life. Audiologists do many things including:

- Screening people to identify possible hearing disorders.
- Completing comprehensive hearing testing to diagnose hearing loss.
- Selecting and custom-fitting hearing aids and assistive technology.
- Advising people about how to treat and cope with ringing in their ears, also known as *tinnitus*.
- Evaluating and treating dizziness and balance problems.
- Helping people protect their hearing from the effects of loud noise.

Audiologists can work in many settings including doctor's offices, hospitals, schools, rehabilitation centers, and private practices.

A career in audiology requires a doctoral degree (AuD or Doctor of Audiology) from a program accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association. (<https://www.asha.org/eweb/ashadynamicpage.aspx?site=ashacms&webcode=caalisting&caacat=all>)

In Wisconsin, an AuD consortial program is offered by UW-Madison and UW-Stevens Point.

Before applying to graduate school, most programs require students to have either a bachelor's degree in Communication Sciences and Disorders OR to complete prerequisite coursework in Communication Sciences and Disorders before applying. See the requirements tab (p. 809) for details.

For additional information please contact:

Barbara Pauloski, ([pauloski@uwm.edu](mailto:pauloski@uwm.edu)) Ph.D., CCC-SLP Associate Professor

Undergraduate Program Coordinator in Communication Sciences and Disorders

## Requirements

If you are interested in becoming an audiologist, it is strongly recommended that you complete a bachelor's degree in Communication

Sciences and Disorders (<https://uwm.edu/rehabilitation-sciences-technology/academics/bs-communication-sciences-disorders/>).

If you do not major in Communication Sciences and Disorders as an undergraduate, it is important to know what the requirements are for any graduate program you are considering. Many AuD programs accept students with degrees other than Communication Sciences and Disorders; however, it will usually require an additional year of graduate study to complete the program.

## I'm a new student. How do I start?

You are assigned an academic advisor upon admission to UWM. New Student Orientation (NSO) (<https://uwm.edu/studentorientation/>) helps those who are new to campus learn and understand the enrollment process and enroll in classes for their first semester at UWM! You should ask to have the designation "Pre-Audiology" added to your academic record.

---

## Who is my advisor?

Undergraduate students who have declared an intent to pursue Pre-Audiology are advised by MacKenzie Kougl. Contact MacKenzie at 414-229-2758 or via e-mail at [m.witowski@uwm.edu](mailto:m.witowski@uwm.edu) ([mlkoug@uwm.edu](mailto:mlkoug@uwm.edu)).

---

## When should I meet with my advisor?

Students are encouraged to meet with their advisor at least once per semester to ensure timely progress to graduation.

- **Enrolling for spring semester?**  
Schedule an appointment with your advisor in October or November.
- **Enrolling for fall semester?**  
Schedule an appointment with your advisor in March or April.

Students are also welcome to schedule an appointment with their advisor at any time to discuss academic challenges, career opportunities, or any other questions.

---

## How can my advisor help me?

CHS boasts professional academic advisors who understand the challenges of balancing academics, work, family, and the social aspects of college life. Advisors partner with you to:

- Explore your academic and career interests
- Plan the sequence of your courses
- Prepare for course enrollment
- Access tutoring and other academic support
- Identify opportunities for campus involvement
- Connect you to campus resources
- Plan for graduation

## Pre-Occupational Therapy

According to The American Occupational Therapy Associations (AOTA) (<https://www.aota.org/>), occupational therapy helps people with an injury, illness, or disability learn or re-learn to do everyday activities. For adults, this could include activities like getting dressed, cooking, and

driving. For children, this could include activities like learning or playing. Occupational Therapy got its name from its focus on helping patients with everyday activities—or "occupations".

AOTA requires students pursuing a career in occupational therapy to enter the profession with a post-baccalaureate degree. The Occupational Therapy (OT) profession has a dual entry education program. Students interested in the profession may complete a master's or doctorate level program. UWM offers a master's in OT (MSOT (<https://uwm.edu/rehabilitation-sciences-technology/academics/ms-occupational-therapy/>)). Successful completion of an undergraduate degree is required for entry into a graduate program. Students may complete any undergraduate degree in preparation for a graduate level OT Program as long as all prerequisite courses and other requirements are met.

The UWM bachelors degree in Occupational Science and Technology (OST) (<https://uwm.edu/rehabilitation-sciences-technology/academics/bs-occupational-science-technology/>) prepares student exceptionally well for the UWM and other graduate level OT Programs. The **foundation courses** of the degree include the human anatomy, human physiology, psychology, statistics, and natural science with a lab courses that are common prerequisites for graduate OT Programs. The **core courses** of the OST degree allows students to delve into content in the areas of disability, assistive technology, health, medical conditions, and other contemporary issues in the area of health and disability. Within the curriculum, there is also a sequence of four research courses, which helps students gain knowledge and skills required for graduate level research.

The OST degree has four **tracks** to allow **focused study**: Applications of Assistive Technology, Disability and Occupation, Human Factors, Injury and Performance and Therapeutic Recreation. **All tracks** help students to work in the area of disability. The Disability and Occupation track and the Applications of Assistive Technology track are ideal for students interested in OT graduate education.

Paid and unpaid experience working with individuals with a disability, shadow experiences with OTs in different settings, and a strong personal statement are also often requirements for application to different graduate OT Programs. It is important to work with the Pre-Occupational Therapy (Pre-OT) advisor MacKenzie Kougl MS ([mlkoug@uwm.edu](mailto:mlkoug@uwm.edu)) beginning in freshman year or upon entry to the OST Degree (or other degree) Program in order to plan all needed activities into your college career. Having the Pre-OT designation on your transcript record will allow you access to key information about UWM OT Program information sessions, assistance with your application, student organizations, and more. With the Pre-OT designation students may apply to the UWM Masters in Occupational Therapy Program through the Early Admission Program. This is an advantage over students applying through the regular Occupational Therapy Comprehensive Application System (OTCAS).

For additional information, please contact Patricia Thomas ([pthomas@uwm.edu](mailto:pthomas@uwm.edu)), MPA, CTRS, OST Program Director or visit the OST Undergraduate Program (<https://uwm.edu/rehabilitation-sciences-technology/academics/bs-occupational-science-technology/>) website.

## Requirements

The UWM Occupational Therapy (OT) Program's vision is to be a leader in accessibility and inclusivity recognized worldwide by our academic peers, field practitioners, alumni, present and future students, those they serve, and the public. Students from diverse backgrounds are encouraged to apply to the program. UWM's OT Program is one of the largest in Wisconsin. As the only public OT Program in the

Greater Milwaukee area, we offer a top-notch academic experience at a fraction of the cost of private schools. You may find the UWM OT Program admission requirements on the College of Health Professions and Sciences Occupational Therapy MS (p. 801) catalog page.

Successful completion of UWM's Bachelor of Science Degree in Occupational Science and Technology (OST) prepares you extremely well for graduate education in Occupational Therapy (OT). Courses cover topics in the areas of disability, assistive technology and universal design, disability and occupation, and much more. Please see the Disability and Occupation Track or the Applications of Assistive Technology Track of the OST degree (p. 798). For more information about the BS in Occupational Science and Technology, you may wish to contact Patricia Thomas, MPA, CTRS (pthomas@uwm.edu), OST Program Director. Please note, completion of the OST degree does not guarantee admission to UWM's MSOT program.

It is important to note while admission to an OT program is competitive, there are many individuals and resources available at UWM to help you prepare a quality application. UWM's Student Success Center offers supplemental instruction and tutoring. The Writing Center offers one on one sessions. The Career Planning and Resource Center offers assistance with resumes and securing paid and unpaid experiences in the area of disability, rehabilitation, and OT. The Student Health and Wellness Center provides on campus health and mental health services. Many of the instructors who teach in the OST degree have a background in rehabilitation, disability, and/or health. One of the best resources for success is the Pre-Occupational Therapy Advisor. It is important to work with MacKenzie KougI, MS (mlkougI@uwm.edu), the Pre-OT Advisor, as early in your undergraduate career as possible.

## I'm a new student. How do I start?

You are assigned an academic advisor upon admission to UWM. New Student Orientation (NSO) (<https://uwm.edu/studentorientation/>) helps those who are new to campus learn and understand the enrollment process and enroll in classes for their first semester at UWM! You should ask to have the designation "Pre-Occupational Therapy" added to your academic record.

## Who is my advisor?

Undergraduate students who have declared an intent to pursue Pre-Occupational Therapy are advised by MacKenzie KougI. Contact MacKenzie at 414-229-2758 or mlkougI@uwm.edu.

## When should I meet with my advisor?

Students are encouraged to meet with their advisor at least once per semester to ensure timely progress to graduation.

- **Enrolling for spring semester?**  
Schedule an appointment with your advisor in October or November.
- **Enrolling for fall semester?**  
Schedule an appointment with your advisor in March or April.

Students are also welcome to schedule an appointment with their advisor at any time to discuss academic challenges, career opportunities, or any other questions.

## How can my advisor help me?

CHS boasts professional academic advisors who understand the challenges of balancing academics, work, family, and the social aspects of college life. Advisors partner with you to:

- Explore your academic and career interests
- Plan the sequence of your courses
- Prepare for course enrollment
- Access tutoring and other academic support
- Identify opportunities for campus involvement
- Connect you to campus resources
- Plan for graduation

## Pre-Physical Therapy

### Students Interested in Physical Therapy

Physical therapy is an integral and unique component of the healthcare system. As a health profession, physical therapy focuses on the neuromuscular, musculoskeletal, integumentary, and cardiopulmonary systems of the human body as they relate to human motion and function. Human movement and the ability to interact physically with one's environment are essential components of physical, emotional, and social well-being. The physical therapist is dedicated to promoting health, preventing disease, improving quality of life, and rehabilitating individuals disabled by injury or disease.

To practice as a Physical Therapist, the American Physical Therapy Association (<https://www.apta.org/>) (APTA) requires that students complete a Doctor of Physical Therapy (DPT) degree through an accredited program and pass the national licensure examination. Students should first complete a bachelor's degree and meet the pre-requisites for admission to a DPT program. Information about applying to DPT programs can be found in the Requirements tab. The UWM DPT (<https://uwm.edu/rehabilitation-sciences-technology/academics/dr-physical-therapy/>) program hosts regular information sessions for undergraduate students. The DPT program is a three-year professional doctorate program beyond the bachelors degree.

An undergraduate degree in Kinesiology (<https://uwm.edu/publichealth/academics/bs-kinesiology/>), the science of human movement, is ideal preparation for training in physical therapy. All UWM DPT prerequisites are included in the course of study. Kinesiology students take coursework in biomechanics, exercise physiology, motor behavior and control, and psychosocial aspects of human movement, which serve as important foundations for advanced training in a DPT program. Students can also explore the practical application of the scientific principles of human movement in correlate and elective coursework.

Inquiries about the DPT program itself should be sent to pt-program@uwm.edu.

**John Holland**, MS, Program Director, Kinesiology Undergraduate Program

Wendy Huddleston (huddlest@uwm.edu), PT, PhD, Program Director, Doctor of Physical Therapy

## Admission

**Admission to a DPT program is competitive.** As with most DPT programs in the country, application to the UWM DPT program occurs

through PTCAS (<http://www.ptcas.org/home.aspx>), which is a centralized admissions system. Completion of UWM's Kinesiology Bachelor of Science degree (<https://uwm.edu/publichealth/academics/bs-kinesiology/>) is good preparation but does not guarantee admission to UWM's DPT program. Also, be aware of the admission requirements for each individual DPT program as they do vary. Information about preparing for DPT is available in this document: Preparing to Apply for Admission to a Physical Therapy Program (<https://uwm.edu/rehabilitation-sciences-technology/academics/dr-physical-therapy/#tab-plog-admissionerapy/#tab-plog-admission>).

### UWM DPT application requirements (<https://uwm.edu/rehabilitation-sciences-technology/academics/dr-physical-therapy/#tab-plog-admission>) include:

- Completion of an undergraduate degree from an accredited institution with an overall cumulative grade point average above 3.0 (on a 4.0 scale)
- Completion of 10 prerequisite courses with a minimum prerequisite grade point average above 3.0 (on 4.0 scale)
  - Refer to DPT program website (<https://uwm.edu/rehabilitation-sciences-technology/academics/dr-physical-therapy/>) for list of prerequisite courses
- GRE scores (taken within the last five years)
- Completion of at least 40 total hours of clinical observation experiences in both inpatient and outpatient settings under the supervision of a licensed physical therapist
- Two letters of recommendation (one academic)
- Responses to narrative essay questions

### I'm a new student. How do I start?

You are assigned an academic advisor upon admission to UWM. New Student Orientation (NSO) (<https://uwm.edu/studentorientation/>) helps those who are new to campus learn and understand the enrollment process and enroll in classes for their first semester at UWM! You should ask to have the designation "Pre-Physical Therapy" added to your academic record.

### Who is my advisor?

Undergraduate students who have declared an intent to pursue Pre-Physical Therapy are advised by Torry Rufer. Contact Torry at 414-229-2758 or [tjruferr@uwm.edu](mailto:tjruferr@uwm.edu).

### When should I meet with my advisor?

Students are encouraged to meet with their advisor at least once per semester to ensure timely progress to graduation.

- **Enrolling for spring semester?**  
Schedule an appointment with your advisor in October or November.
- **Enrolling for fall semester?**  
Schedule an appointment with your advisor in March or April.

Students are also welcome to schedule an appointment with their advisor at any time to discuss academic challenges, career opportunities, or any other questions.

### How can my advisor help me?

CHS boasts professional academic advisors who understand the challenges of balancing academics, work, family, and the social aspects of college life. Advisors partner with you to:

- Explore your academic and career interests
- Plan the sequence of your courses
- Prepare for course enrollment
- Access tutoring and other academic support
- Identify opportunities for campus involvement
- Connect you to campus resources
- Plan for graduation

### Pre-Speech-Language Pathology

Speech-Language Pathologists (SLPs) help people of all ages with communication and swallowing problems. Problems with communication and swallowing can have a significant impact on people's quality of life.

SLPs work to prevent, assess, diagnose, and treat a range of problems. These include problems with:

- **Speech sounds**, or how we say sounds and put sounds together into words. Other words for these problems are *articulation or phonological disorders, apraxia of speech, or dysarthria*.
- **Language** is how well we understand what we hear or read and how we use words to tell others what we are thinking. In adults, this problem may be called *aphasia*.
- **Literacy** is how well we read and write. People with speech and language disorders may also have trouble reading, spelling, and writing.
- **Social communication** refers to how well we follow rules, like taking turns, how to talk to different people, or how close to stand to someone when talking. This is also called *pragmatics*.
- **Voice**, or how our voices sound. We may sound hoarse, lose our voices easily, talk too loudly or through our noses, or be unable to make sound.
- **Fluency** is how well speech flows. Problems with fluency are known as *stuttering*. Someone who stutters may repeat sounds, like t-t-t-table, use "um" or "uh", or pause a lot when talking. Many young children will go through a time when they stutter, but most outgrow it.
- **Cognitive-communication** refers to how well our minds work. Problems in this area may involve memory, attention, problem-solving, organization, and other thinking skills.
- **Feeding and swallowing** or how well we chew and swallow food and liquid. A swallowing disorder may lead to poor nutrition, weight loss, and other health problems. This is also called *dysphagia*.

Speech-Language Pathologists can work in many settings including hospitals, schools, rehabilitation centers, and private practices.

A career in speech-language pathology requires a master's degree from a program accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (<https://www.asha.org/eweb/ashadynamicpage.aspx?site=ashacms&webcode=caalisting&caacat=all>).

Before applying to graduate school, most programs require students to have either a bachelor's degree in Communication Sciences and

Disorders OR to complete pre-requisite coursework in Communication Sciences and Disorders before applying. See the requirements (p. 813) tab for details.

For additional information please contact:

Barbara Pauloski, Ph.D., CCC-SLP (pauloski@uwm.edu)

Associate Professor, Undergraduate Program Coordinator

## Requirements

Students interested in becoming speech-language pathologists may choose to complete a bachelor's degree in Communication Sciences and Disorders (<https://uwm.edu/rehabilitation-sciences-technology/academics/bs-communication-sciences-disorders/>).

Sometimes people don't decide to become a speech-language pathologist until they have already completed (or almost completed) a bachelor's degree in another area. If that is the case, it is suggested that you take the prerequisite courses listed below. It is important to check the requirements for any program before you apply to graduate school. For the requirements for applying to UWM's graduate program, check out the FAQs on our program website (<https://uwm.edu/rehabilitation-sciences-technology/academics/ms-communication-sciences-disorders/>).

- English Phonetics (COMSDIS 230)
- Anatomy & Physiology of the Speech and Hearing Mechanism (COMSDIS 220)
- Normal Language Development (COMSDIS 240)
- Speech Science (COMSDIS 480)
- Hearing Science (COMSDIS 380)
- Introduction to Audiology (COMSDIS 470)
- Aural Rehabilitation (COMSDIS 490)
- 25 guided hours of clinical observation (COMSDIS 350 & COMSDIS 351)
- Statistics (KIN 270)
- Physics or Chemistry
- Human or Animal Biology
- Psychology or Sociology

## I'm a new student. How do I start?

You are assigned an academic advisor upon admission to UWM. New Student Orientation (NSO) (<https://uwm.edu/studentorientation/>) helps those who are new to campus learn and understand the enrollment process and enroll in classes for their first semester at UWM! You should ask to have the designation "Pre-Speech-Language Pathology" added to your academic record.

## Who is my advisor?

Undergraduate students who have declared an intent to pursue Pre-Speech-Language Pathology are encouraged to contact the College of Health Professions & Sciences Office of Student Affairs at 414-229-5047 or via e-mail at [uwmchps@uwm.edu](mailto:uwmchps@uwm.edu).

## When should I meet with my advisor?

Students are encouraged to meet with their advisor at least once per semester to ensure timely progress to graduation.

- **Enrolling for spring semester?**  
Schedule an appointment with your advisor in October or November.
- **Enrolling for fall semester?**  
Schedule an appointment with your advisor in March or April.

Students are also welcome to schedule an appointment with their advisor at any time to discuss academic challenges, career opportunities, or any other questions.

## How can my advisor help me?

## Rehabilitation Science and Technology, MS

### Admission Requirements

#### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

#### Admission

Students must meet the general requirements of admission to a graduate program at UWM. As stated by the Graduate School, these requirements include: (1) "a baccalaureate degree, or its equivalent as determined by the UWM Center on International Education, from a regionally accredited institution, completed before the first term of enrollment in the Graduate School; (2) proficiency in the English language; and (3) a minimum cumulative undergraduate grade point average (GPA) of 2.75 on a 4.0 scale, or an equivalent measure on a grading system that does not use a 4.0 scale".

Additional admission requirements include: (1) Transcripts from all university degrees/coursework; (2) Reasons Statement that includes a rationale and career goals; (3) current resume or curriculum vitae; and (4) two letters of recommendation from persons most knowledgeable about the applicant's recent academic and relevant work experiences. Depending on the MS-RST track and faculty advisor, GRE scores may be requested by the Program.

Students applying to the degree must have completed (undergraduate) pre-requisites in statistics (3 credits), laboratory-based natural sciences (4 credits,) and psychology (required for the Intervention and Consultation in Performance Psychology [ICPP] and Human Factors Innovation [HFI] tracks) or sociology (3 credits). A grade of B- or better must have been obtained in each prerequisite course. Prerequisites will be verified through transcript review at the time of application. Students deemed not to have satisfied one or more of the prerequisites may be admitted on probation and complete the prerequisite(s) as deficiency credits within their first two semesters. Deficiency coursework will not count towards the MS-RST degree.

## Credits and Courses

Code	Title	Credits
<b>Prerequisites or support courses (minimum 10 credits)</b>		
Statistics		3
Natural Science(s) (Laboratory-Based)		4
Psychology (required for ICPP or HFI tracks) or Sociology		3

## Thesis Students

Code	Title	Credits
<b>Core Courses (12 credits)</b>		
Select one of the following:		3
NURS 882	Qualitative Methods in Health Research	
NURS 883	Quantitative Methods in Health Research	
OCCTHPY 542	Evidence for Practice II	
PH 729	Survey Research Methods in Public Health	
Select one of the following:		3
ED PSY 624G	Educational Statistical Methods I	
KIN 702	Statistical Analysis in the Health Sciences	
OCCTHPY 742	Single Case Experimental Design	
Select one of the following:		3
ATRAIN 799	Independent Study II	
COMSDIS 799	Independent Studies	
OCCTHPY 799	Independent Study II	
PRPP 799	Independent Study II	
PT 799	Independent Reading	
Select one of the following:		3
ATRAIN 890	Research and Thesis	
COMSDIS 790	Research and Thesis	
OCCTHPY 890	Research and Thesis	
PRPP 890	Research and Thesis	

### Foundation Courses (6 credits)

PRPP 553G	Psychological Considerations for Optimizing Health & Performance	3
PT 723	Physiological Regulation in Exertion & Disease	3

A prescribed foundation is defined for most students to take; however, advisors can define an alternative foundation on an individualized basis to ensure that each student's specialized goals are met.

### Specialization Courses (minimum of 12 credits selected from one area) 12

#### Assistive Technology and Accessible Design (ATAD)

OCCTHPY 620	Introduction to Assistive and Rehabilitation Technology
OCCTHPY 625	Design and Disability
OCCTHPY 760	Assistive and Rehabilitation Technology

#### Electives

#### Human Factors Innovations (HFI)

OCCTHPY 522	Health, Performance, & Injury Monitoring in Organizations
OCCTHPY 592	Innovative Solutions in Human Factors and Performance

#### Select one of the following:

PRPP 551G	Psychology of Injury: Prevention, Rehabilitation & Return to Participation
PRPP 552G	Psychology of Personal Excellence
NUTR 580	Sports Nutrition

#### Electives

#### Intervention and Consultation in Performance Psychology (ICPP)

PRPP 551G	Psychology of Injury: Prevention, Rehabilitation & Return to Participation
PRPP 552G	Psychology of Personal Excellence
PRPP 854	Professional Studies in Sport & Performance Psychology

#### Select one of the following:

COUNS 714	Essentials of Counseling Practice
COUNS 715	Multicultural Counseling
COUNS 814	Professional, Ethical and Legal Issues in Counseling Psychology
PRPP 855	Mentored Fieldwork in Sport and Performance Psychology

#### Rehabilitation Sciences (RS)

12 credits of courses selected in collaboration with faculty advisor that reflect an area of specialization to match the student's career and professional interests. At least 6 credits must come from ATRAIN, CSD, OCCTHPY, PRPP, or PT graduate level courses.

**Total Credits 30**

## Non-Thesis Students

Code	Title	Credits
<b>Core Courses (9 credits)</b>		
Select one of the following:		3
NURS 882	Qualitative Methods in Health Research	
NURS 883	Quantitative Methods in Health Research	
OCCTHPY 542	Evidence for Practice II	
PH 729	Survey Research Methods in Public Health	
Select one of the following:		3
ED PSY 624G	Educational Statistical Methods I	
KIN 702	Statistical Analysis in the Health Sciences	

OCCTHPY 742	Single Case Experimental Design

----------	--	--

*Rehabilitation Sciences (RS)*

15 credits of courses selected in collaboration with faculty advisor that reflect an area of specialization to match the student's career and professional interests. At least 6 credits must come from ATRAIN, CSD, OCCTHPY, PRPP, or PT graduate level courses.

**Total Credits 30**

## Additional Requirements

### Major Professor as Advisor

The Graduate School requires that each student have a major professor to advise and approve the program of study. Students are assigned a faculty advisor upon acceptance to the program.

### Time Limit

The student must complete all degree requirements within seven (7) years of initial enrollment.

## Therapeutic Recreation, Undergraduate Certificate

Therapeutic Recreation (TR) is the provision of treatment services and recreation services to persons with illnesses or disabling conditions. The primary purposes of treatment services (also called recreation therapy) are to restore, remediate, or rehabilitate in order to improve functioning and independence. The primary purpose of recreation services is to provide recreation and leisure resources and opportunities to help improve health and well-being and enhance quality of life.

Therapeutic Recreation Specialists may work in hospitals, residential care, long-term care, schools, and a variety of community settings. Individuals served include people with mental, physical, or emotional disabilities. A variety of recreation/leisure activities are employed as tools to help those served attain independence and a high quality of life.

According to the U.S. Department of Labor, "The rapidly growing number of older adults is expected to spur job growth for recreational therapy professionals and paraprofessionals in assisted-living facilities, adult daycare programs, and other social assistance agencies. Continued growth also is expected in community residential care facilities, as well as daycare programs for individuals with disabilities." Given the projected need for recreation specialists, the College of Health Professions and Sciences at UWM has created a certificate program in Therapeutic Recreation (TR) available to a broad range of individuals, including students and TR and other human service professionals in the community. In addition, individuals who are certified with the National Council for Therapeutic Recreation Certification (NCTRC) may wish to complete certificate coursework to comply with continuing education requirements.

The certificate focuses on the development of knowledge and acquisition of skills and abilities in the areas of health and TR. Courses present the concepts of health, wellness, disease, and illness in relation to quality of life for individuals with disabilities. Specific skill development in the areas of assessment and facilitation techniques is also taught and complemented with an ongoing focus on emerging issues in the field of therapeutic recreation. In preparation for the nationally recognized certification examination, coursework covers topic areas included in the NCTRC Job Analysis categories. The program may be taken by UWM undergraduates concurrently with their chosen major, or as a post-baccalaureate educational certificate program.

## Related Programs and Degrees

Students interested in pursuing a career in Therapeutic Recreation may wish to examine one of the following degree programs at UWM:

## Bachelor of Art

- Psychology
- Sociology

## Bachelor of Science

- Biological Sciences
- Nursing
- Occupational Studies
- Social Work

### Notes:

- Completion of this certificate program partially fulfills the academic coursework requirements for the NCTRC Certified Therapeutic Recreation Specialist credential. Additional requirements are needed to fully qualify for the credential.
- Students interested in obtaining NCTRC certification are encouraged to visit the NCTRC website at [www.nctrc.org](http://www.nctrc.org) (<https://nctrc.org/>).

For more information about the certificate program, contact Patricia Thomas, TR Certificate Coordinator, at (414) 229-2507 or [pthomas@uwm.edu](mailto:pthomas@uwm.edu).

## Requirements

Six courses are required to successfully complete the totally online Certificate in Therapeutic Recreation. A minimum cumulative grade point average of 2.5 must be maintained on all the required coursework.

### TR Certificate Coursework

Code	Title	Credits
<b>Introductory courses</b>		
Select one of the following:		3
THERREC 103	Life Balance: An Understanding of Leisure (SU/F/S)	
THERREC 202	Disability: Society and the Person (F)	
THERREC 203	Therapeutic Recreation Process (SU/F) <sup>1</sup>	
<b>Intervention courses</b>		
Select four of the following:		12
THERREC 300	Therapeutic Recreation Assessment and Documentation (S) <sup>1</sup>	
THERREC 303	Inclusive and Disability Programs in the Community (F)	
THERREC 308	Therapeutic Recreation in Physical Rehabilitation and Behavioral Health (F) <sup>1</sup>	
THERREC 309	Therapeutic Recreation in Pediatrics and Gerontology <sup>1</sup>	
THERREC 310	Facilitation Techniques in Therapeutic Recreation (S) <sup>1</sup>	
<b>Capstone course</b>		
THERREC 400	Issues and Trends in Therapeutic Recreation (TR) (SU/F) <sup>1</sup>	3
<b>Total Credits</b>		<b>18</b>

<sup>1</sup> Required for students seeking the credential as a Certified Therapeutic Recreation Specialist (CTRS) with the National Council for Therapeutic Recreation Certification (NCTRC).

F, S, SU (fall, spring, summer) refers to the semesters in which courses are taught.

## Trauma Informed Care, Graduate Certificate (School of Rehabilitation Sciences and Technology)

The Certificate in Trauma-Informed Care will expose graduate students in several helping professions to the theory and practice of trauma-related service delivery. This is a multidisciplinary program that integrates knowledge from the social, behavioral, and health sciences. The primary goal of the program is to train graduate students from the helping professions in specialized knowledge and skills related to psychological trauma.

## Admission Requirements

### Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines/>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines/>).

### Application

- Students wishing to obtain this certificate must declare their intention by applying to the program office or director.
- All graduate certificate applicants—even those already enrolled in a UWM graduate program—must apply to the Graduate School through the Panthera Admission Application (<https://graduateschool-apply.uwm.edu/>).
- Graduate degree and previously admitted graduate non-degree students who decide to pursue a certificate program must submit the Panthera application before completing 6 credits in the certificate sequence.
- Applicants must possess a baccalaureate degree and have a minimum 2.75 cumulative undergraduate grade point average to be admitted into a certificate program.

### Admission

Students in good standing currently in a graduate program or those who have already completed a graduate degree are eligible for the certificate.

## Credits and Courses

All students participating in the certificate program will complete 15 academic credits related to trauma theory and practice.

Code	Title	Credits
<b>Core</b>		
SOC WRK/COUNS/ NURS/OCCTHPY 774	Trauma Counseling I: Theory and Research	3
SOC WRK/COUNS/ NURS/OCCTHPY 775	Trauma Counseling II: Diagnosis and Treatment	3

**Electives**  
 Select 9 elective credits (see Potential Electives and Recommended Field Work lists below) 9

*Recommended Field Work*

Select 3-6 credits from the following: <sup>1</sup>

SOC WRK 721	Field Instruction I
SOC WRK 722	Field Instruction II
SOC WRK 821	Field Instruction III
SOC WRK 822	Field Instruction IV
SOC WRK 921	Field Instruction V
COUNS 764	Supervised Practicum 1 in School Counseling
COUNS 765	Supervised Practicum 1 in Clinical Mental Health Counseling
NURS 899	Practicum in Nursing:
OCCTHPY 725	Occupational Therapy Field Service I
OCCTHPY 735	Occupational Therapy Field Service II

**Total Credits** 15

<sup>1</sup> Students also have an opportunity to complete anywhere from 3 to 6 additional qualifying program credits through participation in in trauma-informed practice field settings, contingent on the respective department’s field credit policy. Four departments are participating in this interdisciplinary certificate program—Social Work, Educational Psychology, Nursing, and Rehabilitation Sciences & Technology—and accordingly, the program curriculum will consist of courses offered via multiple campus departments.

**Potential Electives**

Code	Title	Credits
SOC WRK/CRM JST 497	Study Abroad: (Bristol or South Africa or Austria)	1-6
SOC WRK 680G	Death and Dying	3
SOC WRK 690G	Mindfulness and Community Building	3
SOC WRK 753	Adult Psychopathology	3
SOC WRK 754	Child and Adolescent Psychopathology	3
SOC WRK 791	Current Topics in Social Work: (subtopic: Technology in Social Work Practice)	3
SOC WRK 818	Treatment of Co-Occurring Disorders	3
SOC WRK 820	Seminar in Social Work Practice: (Qualifying topics: Violent & Traumatized Families; Motivational Interviewing; or Interventions for Substance Misuse and Screening Brief Intervention and Referral to Treatment for Substance Misuse)	3
PSYCH 711	Current Topics in Psychology: (Qualifying topics: Functional Assessment and Intervention or Neurobiology of Learning & Memory)	1-4
PSYCH 727	Cognitive Neuroscience	3
MSP 770	Conflict Analysis and Restorative Practices	3

COUNS 704 & COUNS 705	Multicultural Mental Health Guidelines and Ethics Overview and Multicultural Practice: Awareness and Knowledge of Others <sup>1</sup>	6
COUNS 715	Multicultural Counseling	3
COUNS 744	Multicultural Mental Health Guidelines, Working with First Nations Persons	3
COUNS 812	Clinical Studies in Counseling	3
COUNS 816	Counseling Children and Adolescents	3
COUNS 820	Counseling Appraisal and Clinical Decision-Making	3
COUNS 904	Family Systems Theory, Research, and Practice	3
OCCTHPY 519	Therapeutic Communication	3
OCCTHPY 719	Occupational Therapy in Psychosocial Practice	3
CRM JST 830	Intervention Strategies for Correctional Clients	3
CRM JST 970	Readings in Criminal Justice Research: (Qualifying topics: Victimology; Women and the Criminal Justice System)	3

<sup>1</sup> COUNS 704 and COUNS 705 must be taken together to fulfill this requirement.

**Additional Requirements**

**Transfer Credit**

No more than 20% of the required credits may be taken at an institution other than UWM. These courses are subject to Graduate School transfer policy and must be approved by the director of the certificate program.

**Grade Point Average Requirement**

A minimum cumulative 3.00 grade point average in certificate courses taken at UWM is required.

**Articulation with Degree Programs**

- Credits and courses required for a certificate may double count toward meeting UWM graduate degree requirements subject to the following restrictions:
  - Degree programs must approve the courses from certificates that can double count toward the degree.
  - All credits taken in completion of certificate requirements may count towards a UWM graduate degree as long as they do not contribute more than 90% of the total credits needed to obtain the degree. (Note: Students in PhD programs must still complete the minimum residency requirements)
  - Certificate courses used toward meeting degree requirements must be completed within the time limit for transfer credit.
- Courses completed for a degree may be counted toward a subsequent certificate, subject to all certificate policy requirements.
- A course may count toward no more than one certificate and one degree.
- Students may not earn a certificate subsequent to a concentration in the same area.

## **Time Limit**

Certificate program time limits shall be established as follows:

- 18 or fewer credits/Three years from initial enrollment in the certificate sequence.
- 19 or more credits/Four years from initial enrollment in the certificate sequence.

For certificates that are designed as add-ons to degree programs and are awarded concurrent with the degree, the time limit shall be the same as that of the degree program.

# HONORS COLLEGE

The Honors College is open to qualified undergraduates pursuing a UWM bachelor's degree. The college offers seminars and individualized instruction in the humanities, arts, social sciences, and natural sciences. It is particularly appropriate for students who want more engaged and writing-intensive studies or who are preparing for graduate, law, medical, or professional school.

Students who complete the Honors curriculum receive the degree designations "Honors Degree" or "Honors with Distinction" on their diplomas and transcripts.

## Administration

Peter Sands, Director  
 Laura Blaska, Associate Director  
 Jill Budny, Assistant Director

## Admission

Students pursuing their first bachelor's degree can join the Honors College as freshmen, continuing, or transfer students. Freshmen are admitted based upon a holistic review of their UWM application and high school record. Freshmen are automatically considered once they have been admitted to UWM. Selected students are notified by mail.

Continuing UWM and transfer students should have a cumulative GPA equivalent to their academic standing (see Requirements (p. 819)) and have met the University English requirement by testing out of, or receiving a B- or better, in ENGLISH 102. Interested continuing and transfer students should contact the Honors College to schedule an appointment with an Honors advisor to discuss how the curriculum can be integrated into their academic plans.

## Continuing in the Honors College

Honors College students must meet the following **cumulative GPA**/enrollment criteria:

- To continue in the Honors College, students must maintain the following minimum grade point averages for work done at UWM by the beginning of their year in school:
  - Freshman (after first semester) 3.0
  - Sophomore 3.3
  - Junior 3.4
  - Senior/to graduate with an Honors degree 3.5
- Students admitted as new freshmen who need to complete the University English Requirement must complete Honors 200 in the first semester following their completion of the English Requirement.
- Students who do not take Honors courses for two consecutive semesters will be considered "inactive" and dropped from the Honors College.

Students are encouraged to review the Honors College Handbook (<http://uwm.edu/honors/academics/studenthandbooks/>) for additional information.

## Notification of Ineligible Students

At the end of each semester, the Honors College will review students' academic records to determine whether they meet the criteria for continuation in the program. The Honors College will notify by mail

all students who fail to meet these criteria, stating that they no longer are eligible to enroll in Honors classes. If these students already are enrolled in Honors classes for the next semester, they will be dropped administratively.

## Regaining Honors College Eligibility

- Students who become ineligible by failing to maintain the minimum grade point average may apply for reinstatement if they subsequently raise their grade point average to the required level.
- Students who become ineligible after two consecutive semesters with no Honors courses may apply for reinstatement.
- In either case, students applying for reinstatement must indicate in writing how they propose to complete Honors requirements before graduation.

## Course of Study

Freshmen and sophomores entering the Honors College must complete HONORS 200, earning a grade of B- or better, before taking other honors courses (except for honors calculus, which can be taken concurrently). Following HONORS 200, which may be repeated once with a change in topic, students with sophomore standing or above may take departmental Honors seminars at 3 credits each.

Code	Title	Credits
HONORS 200	Honors Seminar: The Shaping of the Modern Mind:	3
MATH 221	Honors Calculus I	5
MATH 222	Honors Calculus II	5
AFRIC 381	Honors Seminar:	3
ANTHRO 381	Honors Seminar:	3
ARTHIST 381	Honors Seminar:	3
ATM SCI 381	Honors Seminar:	3
BIO SCI 380	Honors Seminar:	3
CHEM 381	Honors Seminar:	3
COMPLIT 381	Honors Seminar:	3
ECON 381	Honors Seminar:	3
ENGLISH 685	Honors Seminar:	3
FRENCH 383	Honors Seminar:	3
GEOG 381	Honors Seminar:	3
GEO SCI 381	Honors Seminar:	3
HIST 398	Honors Seminar:	3
HIST 399	Honors Seminar:	3
HONORS 350	Honors Seminar in the Humanities:	3
HONORS 351	University Honors Seminar in the Social Sciences:	3
HONORS 352	Honors Seminar in the Natural Sciences:	3
HONORS 380	Honors Seminar in the Arts:	3
ITALIAN 383	Honors Seminar:	3
MATH 381	Honors Seminar:	3
PHILOS 381	Honors Seminar:	3
PHYSICS 381	Honors Seminar:	3
POL SCI 380	Honors Seminar:	3
SOCIOL 380	Honors Seminar:	3
URB STD 381	Honors Seminar:	3

With the exception of HONORS 200 and HONORS 380, Honors seminars are retakable with a change in topic to a maximum of 9 credits. HONORS 200 and HONORS 380 are retakable once.

## Advanced Independent Study

Independent study courses are offered through the Honors College and through academic departments across campus. Course numbers and prerequisites vary by department.

Code	Title	Credits
HONORS 685	Honors Tutorial	1-3
HONORS 686	Research in Honors	3-6
HONORS 687	Senior Honors Project *	3-6
HONORS 689	Senior Honors Thesis *	3-6

\* Students may not do both a Senior Thesis and a Senior Project.

## Graduate Courses

Graduate level courses completed with a B- or better may be counted toward the Honors College graduation requirements. This option normally is open only to seniors in the program who meet the necessary prerequisites. Permission for an Honors student to take a graduate course must be obtained from the instructor of the course, the chairperson of the department or school/college designee in which the course is taught, and the Honors College director.

## Other Options

A maximum of 9 Honors credits earned at other universities may be applied to the Honors College graduation requirements with the director's approval. Honors credits also may be earned through approved Study Abroad Programs.

## Graduation Requirements

An Honors College Degree requires 21 Honors credits and at least a 3.5 cumulative grade point average at graduation. All Honors credits count toward the total credits required for graduation. Students must earn a grade of B- or better to receive Honors credit for a course. At least 12 of the 21 Honors credits must be earned at UWM, with at least 9 credits in upper-level Honors seminars at UWM.

Students who plan to graduate "Honors College Degree with Distinction" need to successfully complete one of the following courses for two consecutive semesters, to a total of six credits: HONORS 686 Research in Honors, HONORS 687 Senior Honors Project, or HONORS 689 Senior Honors Thesis.

Graduating with an Honors College Degree provides convincing evidence of outstanding academic achievement, a valuable accomplishment students can note on resumes and graduate school applications. The designation of Honors College Degree or Honors College Degree with Distinction will be listed on both the diploma and final transcript.

## Graduation Ceremony

The Honors College hosts a graduation ceremony each May at the Helene Zelazo Center for the Performing Arts. This event celebrates all Honors College graduates from December, May, and August. Family and friends are welcome to attend. Additional details are available on the Honors College website (<https://uwm.edu/honors/academics/graduation/>).

# LETTERS AND SCIENCE (COLLEGE OF)

---

The College of Letters and Science is the largest academic unit of the University of Wisconsin-Milwaukee. Study of the liberal arts and sciences provides a broad base of knowledge and an array of skills cited by employers as critical to professional success, even more than the major: critical thinking, problem solving, oral and written communication, ability to work well with others, and adaptability to change.
