BX-HSIO1 High-Speed Input/Output Circuits

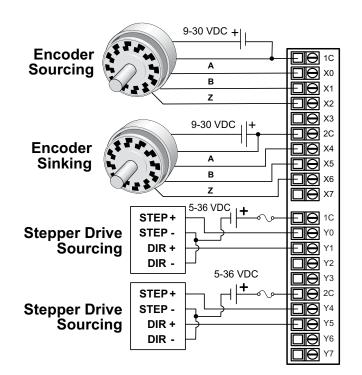

BX-HSIO2 High-Speed Input/Output Circuits

Note: $VDD = 24VDC - 1K\Omega$ resistor is needed for servo to handle this voltage. The 1K Ω resistors are not needed if a 5VDC source is used.

1-800-633-0405 **BRX Motion Control, Communications and Specialty Expansion Modules**

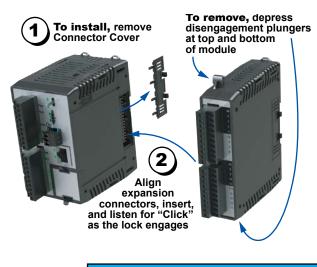

Overview

One of the unique features of the BRX platform is its ability to expand its capability to fit your application solution. One of the ways the BRX platform can do this is by using expansion modules that conveniently "snap on" to the side of any BRX MPU. Once the expansion module has been snapped into place and is added to the project, it instantly adds I/O to the MPU with little to no additional setup required.

The specialty expansion modules give you the ability to add additional high-speed I/O or serial communications as needed. On the front panel of the expansion modules a color scheme and a symbol are used to denote the module type.

High-speed I/O modules have 8-point sinking/sourcing inputs and are available with 8-point sinking or sourcing outputs, all with switching frequencies up to 250kHz. The serial communications modules have 4 serial ports.

The high-speed I/O modules ship without wiring terminals. This allows you to select the termination style that best suits your application. Several wiring options are available, including screw terminal connectors and spring clamp terminal connectors. The serial communications modules ship with a terminal connector installed in each port.

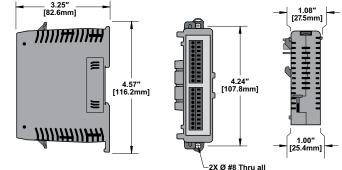

Hot-Swapping Information Note: This device cannot be Hot Swapped.

General Specifications

All BRX high-speed input/output modules and serial communications modules have the same general specifications listed in the table below.

General Specifications				
Operating Temperature	ture 0° to 60°C (32° to 140°F)			
Storage Temperature	−20° to 85°C (−4° to 185°F)			
Humidity	5% to 95% (non-condensing)			
Environmental Air	No corrosive gases permitted			
Vibration	IEC60068-2-6 (Test Fc)			
Shock	IEC60068-2-27 (Test Ea)			
Enclosure Type	Open Equipment			
Noise Immunity	NEMA ICS3-304			
EU Directive	See the "EU Directive" topic in the BRX Help File			
Agency Approvals	UL 61010-2 File E185989, Canada and USA, CE Compliant EN61131-2			

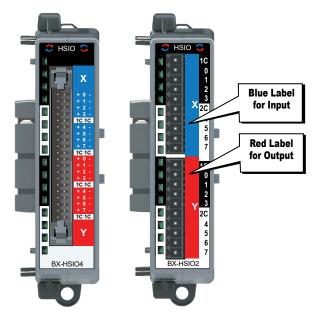

Dimensions

NOTE: When removing an expansion module make sure there is room for the module to slide away from the system. Failure to do so will result in difficulty removing the module.

1-800-633-0405 **BRX Motion Control, Communications and Specialty Expansion Modules**

High-speed Input/Output Modules

Three (3) high-speed input/output modules are available, with eight inputs and eight outputs each. High-speed I/O module faceplates have blue and red terminal bar sections to distinguish input and output terminals, respectively, and have the Symbol to signify high-speed I/O.

High-Speed Input/Output Modules						
Part Number	art Number Input Output Points Output Type Switching Pric					
BX-HSIO1	8	8	12–24 VDC Sinking	Up to 250kHz	\$229.00	
<u>BX-HSIO2</u>	8	8	12–24 VDC Sourcing	Up to 250kHz	\$229.00	
<u>BX-HSIO4</u>	8	8	2.5–5 VDC Sinking/Sourcing	Up to 2MHz	\$259.00	

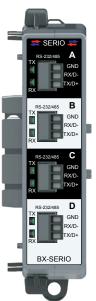

Serial Communications Module

Three (3) serial communications modules are available, with four serial ports each. Serial communications module faceplates have black and white terminal sections to distinguish serial terminals, and have the fi symbol to signify serial I/O.

Serial Communications Module					
Part Number Ports Port Type Price					
BX-SERIO	4	RS-232 / RS-485	\$208.00		
BX-SERIO-2	4	RS-232 with Flow Control	\$204.00		
BX-SERIO-4	4	RS-422	\$188.00

BX-MBIO*	8			

* Remote I/O controllers do not support Motion Control and **Communications Modules.**

BRX Wiring Termination Options

Terminal Block Connectors

The terminal block connectors are provided in kits of multiple connectors that are ordered as a single part number. There are 2 different types of kits to choose from; one kit for the five (5), eight (8) and 12-point discrete, and one kit for the analog modules and 16-point discrete modules. The five (5), eight (8) and 12-point discrete module kits each have (3) 5-pin 5mm connectors. The 8-point modules will use only 2 of the 5-pin connectors. The five (5) and 12-point modules will use all three connectors. The analog and 16-point digital module kits include (2) 10-pin 3.81 mm connectors.
