

# Ontology Matching

## OM-2022

Proceedings of the ISWC Workshop

### Introduction

Ontology matching<sup>1</sup> is a key interoperability enabler for the semantic web, as well as a useful tactic in some classical data integration tasks dealing with the semantic heterogeneity problem. It takes ontologies as input and determines as output an alignment, that is, a set of correspondences between the semantically related entities of those ontologies. These correspondences can be used for various tasks, such as ontology merging, data interlinking, query answering or navigation over knowledge graphs. Thus, matching ontologies enables the knowledge and data expressed with the matched ontologies to interoperate.

The workshop had three goals:

- To bring together leaders from *academia, industry* and *user institutions* to assess how academic advances are addressing real-world requirements. The workshop strives to improve academic awareness of industrial and final user needs, and therefore, direct research towards those needs. Simultaneously, the workshop serves to inform industry and user representatives about existing research efforts that may meet their requirements. The workshop also investigated how the ontology matching technology is going to evolve.
- To conduct an extensive and rigorous evaluation of ontology matching and instance matching (link discovery) approaches through the OAEI (Ontology Alignment Evaluation Initiative) 2022 campaign<sup>2</sup>.
- To examine similarities and differences from other, old, new and emerging, techniques and usages, such as process matching, web table matching or knowledge embeddings.

The program committee selected 9 submissions for oral presentation and 4 submissions for poster presentation. 18 matching systems participated in this year's OAEI campaign. Further information about the Ontology Matching workshop can be found at: <http://om2022.ontologymatching.org/>.

# Organization

## Organizing Committee

Pavel Shvaiko,  
*Trentino Digitale SpA, Italy*

Jérôme Euzenat,  
*INRIA & University Grenoble Alpes, France*

Ernesto Jiménez-Ruiz,  
*City, University of London, UK & SIRIUS, University of Oslo, Norway*

Oktie Hassanzadeh,  
*IBM Research, USA*

Cássia Trojahn,  
*IRIT, France*

## Program Committee

Alsayed Albergawy, *Jena University, Germany*  
Manuel Atencia, *Universidad de Málaga, Spain*  
Jiaoyan Chen, *University of Oxford, UK*  
Jérôme David, *University Grenoble Alpes & INRIA, France*  
Gayo Diallo, *University of Bordeaux, France*  
Daniel Faria, *INESC-ID & IST, University of Lisbon, Portugal*  
Alfio Ferrara, *University of Milan, Italy*  
Marko Gulic, *University of Rijeka, Croatia*  
Wei Hu, *Nanjing University, China*  
Ryutaro Ichise, *National Institute of Informatics, Japan*  
Antoine Isaac, *Vrije Universiteit Amsterdam & Europeana, Netherlands*  
Naouel Karam, *Fraunhofer, Germany*  
Prodromos Kolovakis, *EPFL, Switzerland*  
Patrick Lambrix, *Linköpings Universitet, Sweden*  
Oliver Lehmberg, *University of Mannheim, Germany*  
Fiona McNeill, *University of Edinburgh, UK*  
Majeed Mohammadi, *Eindhoven University of Technology, Netherlands*

## Table of Contents

### Long Technical Papers

The impact of imbalanced class distribution on knowledge graphs matching <i>Omaima Fallatah, Ziqi Zhang, Frank Hopfgartner</i> .....	1
Exploring Wasserstein distance across concept embeddings for ontology matching <i>Yuan An, Alex Kalinowski, Jane Greenberg</i> .....	13
LamAPI: a comprehensive tool for string-based entity retrieval with type-base filters <i>Roberto Avogadro, Marco Cremaschi, Fabio D'Adda, Flavio De Paoli, Matteo Palmonari</i> .....	25
BiodivTab: semantic table annotation benchmark construction, analysis, and new additions <i>Nora Abdelmageed, Sirko Schindler, Birgitta König-Ries</i> .....	37
An eye on representation learning in ontology matching <i>Guilherme Sousa, Rinaldo Lima, Cássia Trojahn</i> .....	49
A simple standard for ontological mappings 2022: updates of data model and outlook <i>Nicolas Matentzoglu, Joe Flack, John Graybeal, Nomi L. Harris, Harshad B. Hegde, Charles T. Hoyt, Hyeongsik Kim, Sabrina Toro, Nicole Vasilevsky, Christopher J. Mungall</i> .....	61

### Short Technical Papers

Too big to match: a strategy around matching tasks for large taxonomies <i>Alsayed Algergawy, Naouel Karam, Amir Laadhar, Franck Michel</i> .....	67
Self-learning ontological concept representation for searching and matching tasks <i>Duy-Hoa Ngo, Bevan Koopman</i> .....	73
Matching pharmacogenomic knowledge: particularities, results, and perspectives <i>Pierre Monnin, Adrien Coulet</i> .....	79

## OAEI Papers

Results of the Ontology Alignment Evaluation Initiative 2022 <i>Mina Abd Nikooie Pour, Alsayed Albergawy, Patrice Buche, Leyla J. Castro, Jiaoyan Chen, Hang Dong, Omaima Fallatah, Daniel Faria, Irini Fundulaki, Sven Hertling, Yuan He, Ian Horrocks, Martin Huschka, Liliana Ibanescu, Ernesto Jiménez-Ruiz, Naouel Karam, Amir Laadhar, Patrick Lambrix, Huanyu Li, Ying Li, Franck Michel, Engy Nasr, Heiko Paulheim, Catia Pesquita, Tzanina Saveta, Pavel Shvaiko, Cássia Trojahn, Chantelle Verhey, Mingfang Wu, Beyza Yaman, Ondřej Zamazal, Lu Zhou</i> .....	84
ALIN results for OAEI 2022 <i>Jomar da Silva, Kate Revoredo, Fernanda Baião, Cabral Lima</i> .....	129
A-LION - alignment learning through inconsistency negatives of the aligned ontologies <i>Sarah M. Alghamdi, Fernando Zhapa-Camacho, Robert Hoehndorf</i> .....	137
AMD results for OAEI 2022 <i>Zhu Wang</i> .....	145
ATBox results for OAEI 2022 <i>Sven Hertling, Heiko Paulheim</i> .....	153
Cross-lingual ontology matching with CIDER-LM: results for OAEI 2022 <i>Javier Vela, Jorge Gracia</i> .....	158
DLinker results for OAEI 2022 <i>Bill Happi, Géraud Fokou Pelap, Danai Symeonidou, Pierre Larmande</i> .....	166
GraphMatcher: a graph representation learning approach for ontology matching <i>Sefika Efeoglu</i> .....	174
KGMatcher+ results for OAEI 2022 <i>Omaima Fallatah, Ziqi Zhang, Frank Hopfgartner</i> .....	181
LogMap family participation in the OAEI 2022 <i>Ernesto Jiménez-Ruiz</i> .....	188

LSMatch and LSMatch-multilingual results for OAEI 2022 <i>Abhisek Sharma, Archana Patel, Sarika Jain</i> .....	191
Matcha and Matcha-DL results for OAEI 2022 <i>Daniel Faria, Marta Contreiras Silva, Pedro Cotovio, Patrícia Eugénio, Catia Pesquita</i> .....	197
SEBMatcher results for OAEI 2022 <i>Francis Gosselin, Amal Zouaq</i> .....	202
TOMATO: results of the 2022 OAEI evaluation campaign <i>Philippe Roussille, Olivier Teste</i> .....	210
WomboCombo results for OAEI 2022 <i>Peter Kardos, Zsolt Szántó, Richárd Farkas</i> .....	216

## **Posters**

What should be the minimum requirements for making FAIR ontology alignments? <i>Cássia Trojahn, Nicolas Matentzoglu</i> .....	220
Towards a unified metadata model for semantic and data mappings <i>Sarah Alzahrani, Declan O'Sullivan</i> .....	223
Meta2KG: transforming metadata to knowledge graphs <i>Nora Abdeltageed, Birgitta König-Ries</i> .....	226
Multifarm <sub>11</sub> - extending the multifarm benchmark for Hindi language <i>Abhisek Sharma, Sarika Jain, Cássia Trojahn</i> .....	229
