INTRODUCTION TO FIS 2008 POSTER AND DEMONSTRATION TRACK

To complement the main symposium program FIS 2008 holds a combined Poster and Demonstration session. The Poster and Demonstration Session is an opportunity for presenting late-breaking results, ongoing research projects, and speculative or innovative work in progress. Posters and demos are also intended to provide authors and participants with the ability to network with each other and to engage in technical discussions about the work. The twelve accepted submissions comprise technical posters, reports on Future Internet software systems, descriptions of completed work, work in progress, as well as demonstrations showcasing innovative Future Internet related implementations and technologies.

Poster and Demonstration Track Chair

Anna V. Zhdanova
