Washington State Department of Agriculture Regional Markets Program

## Small Grants Already Making Big Impact for Washington's Farm-raised Meat Processing

**WSDA's Local Meat Processing Capacity Grants program** awarded \$3.6 million to small meat processors in March 2022. The program was made possible by one-time funding from the state Legislature. This is a snapshot of impacts as of June 2022, midway point for the grant program. Completed projects are **already making an impact** on meat processing services available for small farms and ranches who sell meat and poultry to Washington consumers.

### **Small Projects, Big Impacts**

- Averaged \$50,000 per award
- Increased efficiency, capacity, food safety, humane handling, and workforce capability of awardees
- Primary goal of the "Small Project" category was to make big collective impact, distributed among many small projects

### **Small Projects, Big Multipliers**

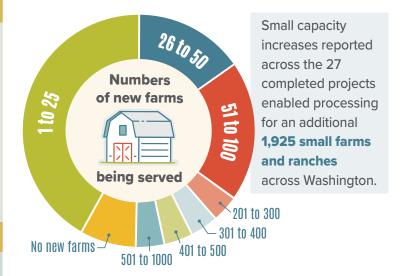

The completed projects will enable an estimated additional:

- \$3.5 million or more *annually* in gross revenue for meat processing shops
- **\$16 million** or more *annually* in gross revenue for **farms and ranches**
- Representing a multiplier of at least \$14 annually for every \$1 invested in grant funds

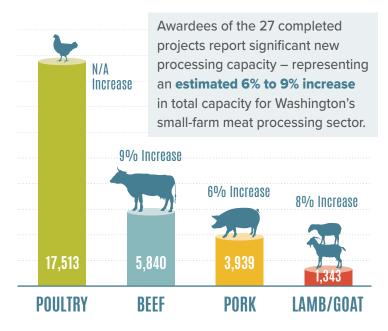

*Farm revenue estimates based on hanging weight prices: beef (\$5/lb), pork (\$6.5/lb), lamb (\$8.5/lb), poultry (\$8/lb).* 

# Additional projects to be completed by June 2023:

- 8 "Small Project" grants
- 4 "Large Project" grants to expand access to USDA-inspected processing for small farms and ranches across Washington - by an estimated 10,000 farm-raised livestock per year

#### Numbers and percentage increases of small-farm meat processing capacity by animal sector

\*Estimates based on self-reported impacts by awardees. To learn more about WSDA's Local Meat Processing Capacity Grants or the Regional Markets Meat & Poultry Assistance Program, visit **agr.wa.gov/farmfoodbiz**
