Audible uses S3 Object Lambda to dynamically modify manifests to offer the most performant streaming

"We use Amazon S3 Object Lambda to dynamically modify manifests and segment sizes to provide users with the most performant and high quality streaming and audio entertainment experience, whether they are at home or on the go. Users access and stream content on Audible from a wide range of devices and geographies, varying from strong to limited internet connectivity."

– Saurabh Gandhi, Sr. Director of Software Development, Audible
