data.world

The Modern Data Catalog for Higher Education

On campus, data governance refers to the management of data across academic and administrative departments. Your data governance plan is also your playbook for acquiring, managing, using, and securing data.

Data is at the core of every decision on campus, from the Registrar's Office to the Advancement Office to college and campus operational data. As campuses undergo digital transformation, multitudes more data is generated and stored.

High-quality data is critical for the multi-faceted ventures happening on campus every day. It supports informed decision-making, academic excellence, and operational effectiveness.

That's where data.world comes in.

Industry Overview

Colleges and universities need to:
- Keep student records and financial data safe and secure
- Implement clear data ownership and stewardship policies
- Facilitate data-driven planning and decision-making
- Detect and update outdated data
- Adhere to regulatory compliance rules

data.world solutions can help:
- Classify campus data based on sensitivity level
- Enact and update data ownership and accountability policies
- Establish governance practices based on complex organization structure
- Automate regulatory compliance

The impact you deliver on campus starts with high-quality data.

Imagine having a crystal clear view of all of your data resources in one place: student records, financial information, instructor evaluations, and research information. From setting rules for how long data should be retained to assigning ownership and accountability for data-related decisions - we've got you covered. Uncover the insights that lead to positive change and operational excellence on campus.

Clarity and ownership

Faster insights mean faster decision-making. Understand connections across your data, so you can map data and context back to stakeholders, and understand the particulars in every program rollout.

Domain governance

Higher ed campuses generate large waves of data that increase in volume every day. Stay organized and scale with your data in a highly efficient manner. No need to sacrifice governance or reliability.

Data exploration

With so much data on hand, you need laser-like focus. Find specific data with a federated search functionality across legacy systems and new ones. Save time you'd otherwise spend sifting through irrelevant information.

Why data.world for Higher Ed?

Data.world helps campuses make better decisions with governed discovery of data, reports, and critical metrics. Align with institutional goals and objectives, and foster a culture of responsible data management throughout campus. Self-serve all of the information you need to create a trusted map of the intricate relationships between assets, people, domains, and processes.

Data.world unlocks new capabilities for Higher Ed:

Find data 10x faster: Use data.world's chat-like experience for finding data and all of its relevant context. Everyone from data teams to administrative users can find the information they need to solve problems, 10x faster.

Increase use of trusted data assets: Grow exponentially more efficient with automated monitoring and alerting. Drop crucial updates right where your data users live and breathe: in places like Tableau, Power BI, and Sigma.

Be foundationally ready for AI: When it comes to mapping policies, exploring data, and automation, generative AI is a race. Embrace it and become multitudes more efficient. Data.world is designed to give LLMs the rich context needed to generate outputs you can use that are accurate, explainable, and governable.
