Accenture
Graduate Program – Application/Software Engineering Analyst

Job Description:
Accenture Technology continues to spearhead its role in elevating market efficiency. This is your opportunity to be a part of these exciting times. Come and join us if you are:

- Excited and looking forward to the next stage of the technology revolution
- Passionate in technologies and striving to make a difference in people's everyday life
- Interested in making an impact on the society by helping industry leaders elevate their business efficiency
- Enjoy working in a community of great and enthusiastic people who share similar goals and accomplishments
- Striving to perform, inspire, progress and achieve more

Role Attributes:
You will be at the core of Accenture's Technology business, you are eager to learn and use that curiosity to solve technical problems through developing, designing and maintaining software products or systems that enable client strategies to improve the way our clients and the world works. You will be using your versatility and experience to create and support technology solutions that meet client requirements from analysis to implementation. You will be applying the latest SDLC best practices to continuously improve the quality and efficiency of the Accenture development teams.

Exposure:
- Applications design, coding, tuning, testing and implementing configuration changes
- Gather and analyze requirements and specifications relating to people, processes and technology
- Variety of Enterprise applications and systems with leaders in different industry businesses

Key Competencies:
- Studying in a Bachelor or above degree program in Computer Science/Engineering, Information Technology/System, with an expected graduation date in 2022
- Passionate and keen to develop your profession in technical delivery, and strive to deliver the best design, codes and practice
- Dynamic and adaptive to the global collaborative project team environment
- Good communication skills and the ability to interact professionally with a diverse group of people
- High proficiency in both verbal and written English and Cantonese (Mandarin is an added advantage)
- Hands-on experience in application development and design, technical document writing
- Frontend/ Backend integration with cloud platform deployment, Automation, CI/CD, etc.
- Mobile App development experience – Native Android/iOS (Objective-C)
- Development projects that are delivered in Agile/Scrum, DevOps

Recruitment Timeline:
- Candidates who passed the CV screening will be informed and invited to the next round of interviews in May and June.
- Successful candidates who received our job offer are expected to onboard in Aug/Sept 2022.
