One Scalable Platform

High Performance For Mainstream Markets

Ti35

Thirty-Five Thousand LE

- Intelligent Edge Devices
- Smart Home & IoT

Industry
Lowest power
consumption
FPGA

- Vision Systems
- Industrial Automation

Ti1000

One Million LE

- Edge Servers
- Communications

Improving Upon a Familiar Design Environment

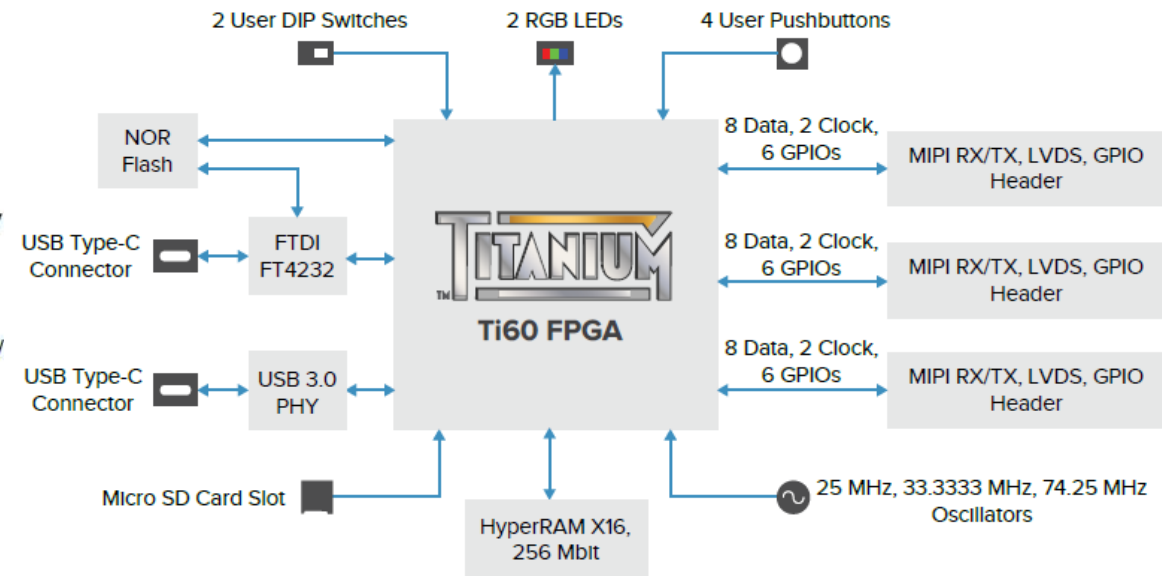

- Software Development Model
- Licensed ARM Core
- Fixed ISA
- Fixed Accelerators
- No Hardware Flexibility

- Software Development Model
- Open-Source RISC-V Core
- Open and Customizable ISA
- Infinitely Configurable Accelerators
- Flexible and Future-Proof Hardware

Eval Boards: Example Ti60F225

- Ti60F225A
- HyperRAM 256Mbit

Summer Internship (HK\$15000+/month)

Software Engineer Intern, EDA Tools (2)

- Electronic Design Automation (EDA) tools development: You will work on user interface, workflow and backend tools with other talented engineers in our global development team.
- Responsibilities:
 - * Develop and test EDA tools using C++, Python, etc.
 - * Integrate with front and backend tool chain to delivery applications.

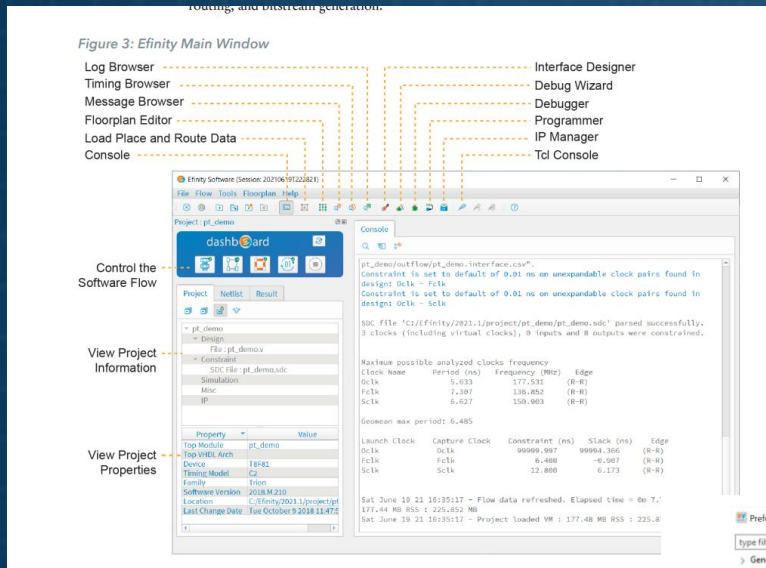

Application Engineer Intern (2)

Skill: Basic knowledge in hardware and programming design. Knowledge in RTL and Python will be added as advantage

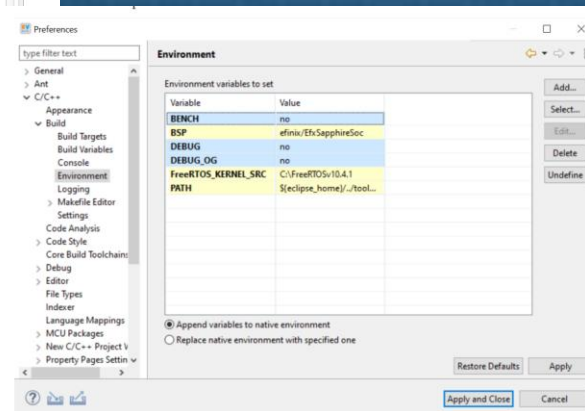

- **Responsibilities**
 - Support Application team on board and application design
 - Assist FPGA chip validation
 - Support providing technical information for documentation
