(qui couvrait aussi d'autres aspects)

"openness" est une des composantes du

FAIR data management

L'objectif de l'action est de couvrir tous les aspects FAIR dans Horizon 2020

FAIR DATA

Findable	• discoverable with metadata, identifiable and locatable by means of a standard identification mechanism
Accessible	• always available and obtainable
Interoperable	• both syntactically and semantically understandable, allowing data exchange and reuse between researchers, institutions, organisations or countries
Reusable	• sufficiently described and shared with the least restrictive licences, allowing the widest reuse possible and the least cumbersome integration with other data source

Horizon2020

FAIR DATA MANAGEMENT

OPEN ACCESS TO RESEARCH DATA

DATA MANAGEMENT PLANS

"Participating in the ORD Pilot does not necessarily mean opening up all your research data. Rather, the ORD pilot follows the principle ***"as open as possible, as closed as necessary"*** *and focuses on* ***encouraging sound data management*** *as an essential part of research best practice."*

Les organismes de financement demandent de plus en plus aux chercheurs d'élaborer et de mettre en œuvre des plans de gestion des données.

Digital Curation Center

- “Centre of expertise in digital curation with a focus on building capability and skills for research data management.”
- “The DCC has analysed UK funders’ policies and developed various data management resources in response.”

“Web-based tool to help researchers create data management and sharing plans according to the requirements of major funders.”

Guidance
The EUDAT B2SHARE tool includes a built-in license wizard that facilitates the selection of an adequate license for research data.
ULIEGE & DCC guidance on IPR Ownership and Licencing
(DCC guidance)
Questions to consider:
• Who owns the data?
• How will the data be licensed for reuse?
• If you are using third-party data, how do the permissions you have
